TABLE OF CONTENTS

WELCOME TO EMPIRE STATE UNIVERSITY

On behalf of Empire State University, I extend a warm welcome to you as you begin the next step in your academic journey. We are thrilled that you have chosen SUNY Empire, and we will continue to work hard every day to provide you with the support you need to succeed and attain your degree.

SUNY Empire is committed to meeting students where they are, always striving to do better in service to our access mission and to our core commitments to inclusivity, creativity, and innovation. For nearly three decades, we have ranked first in student satisfaction among our peer SUNY institutions.

You — our students — are at the heart of all we do. SUNY Empire currently enrolls 16,000 students who come from across New York state, the country, and the world. We are proud to have more than 97,000 alumni who excel in careers ranging from healthcare and business to the performing arts and education.

In addition, we are extremely proud to be the largest-serving military-affiliated institution in SUNY—granting 20% of all military-affiliated degrees. And SUNY Empire is the first and only university designated an autism supportive institution, creating an inclusive environment and academic experience for neurodivergent students. These are just two examples of how we strive for inclusive excellence.

Together, the SUNY Empire community stands united around a singular mission: to provide innovative, flexible, and quality academic programs that empower people and strengthen communities. You are a vital part of that mission, and we encourage you to take advantage of all that we offer.

I wish you all the best in your studies at SUNY Empire!

Sincerely,

Lisa Vollendorf, Ph.D.

President

This catalog is current as of June 2024. The provisions of this catalog do not constitute a contract, express or implied, between any applicant, student or faculty member and Empire State University or the State University of New York. The university reserves the right to make changes in policy, procedures, curricula, fee schedule, and other academic and administrative requirements, as circumstances dictate, subsequent to publication. Each student is expected to have knowledge of the information contained in this catalog and in other university publications and the student has a responsibility to stay informed of any changes. Changes in policy and programs are noted at information sessions and orientation workshops and on the university's website.

ABOUT EMPIRE STATE UNIVERSITY

Our Mission

Founded in 1971 as the innovative campus of the State University of New York, Empire State University empowers learners from diverse backgrounds to achieve their educational goals. We have decades of experience providing educational access through online teaching and learning, individualized instruction, mentoring, and prior learning assessment. We build on our students' experiences to promote their growth and drive upward mobility and economic development in New York state and beyond.

Empire State University is a national leader for high-quality, flexible, and affordable education. We stand alone among public institutions nationwide in our ability to provide impactful academic experiences to learners of all ages.

Our values are a guiding force for everything we do in service to our students, their families, and their communities, and they infuse all of our strategic priorities, decisions, and actions.

- Access
- Diversity, Equity, and Inclusion
- Flexibility
- Innovation

The university enrolls more than 16,000 students annually and has more than 97,000 alumni across New York, the nation, and the world.

Accreditation

Empire State University is accredited by the Middle States Commission on Higher Education (MSCHE) (https://www.msche.org/), which is recognized by the U.S. Department of Education (USDE) to conduct accreditation activities for institutions of higher education in Delaware, the District of Columbia, Maryland, New Jersey, New York, Pennsylvania, Puerto Rico and the U.S. Virgin Islands. MSCHE also is recognized by the Council on Higher Education Accreditation.

Nursing Programs

The RN to BSN, the M.S. in Nursing Education and the M.S. in Nursing Administration programs at Empire State University are accredited by the **Commission on Collegiate Nursing Education (https://www.aacnnursing.org/About-AACN/)**. The nursing curriculum is aligned to the American Association of Colleges of Nursing's (AACN) *The Essentials: Core Competencies for Professional Nursing Education* (2021), as well as the American Nurses Association *Standards of Professional Performance* (2021) and the National Academy of Medicine: *Future of Nursing* (2021) recommendations. Nursing students may complete general learning requirements via online or face-to-face courses at any regionally accredited institution. In addition, requirements can be met via assessment of prior learning, independent study and successful completion of selected examinations.

Master of Business Administration in Business Management and the Master of Business Administration in Healthcare Leadership

The Empire State University Master of Business Administration (MBA) programs in Business Management and Healthcare Leadership have received special accreditation through the International Accreditation Council for Business Education (https://iacbe.org/) (IACBE), for a period of seven years from January 1, 2021-December 31, 2027. Please visit the IACBE website for current membership status (https://iacbe.org/memberpdf/SUNYEmpireStateCollege.pdf). This accreditation certifies that both the MBA in Business Management and the MBA in Healthcare Leadership have undertaken a rigorous self-evaluation, undergone a comprehensive, independent peer review, and have demonstrated compliance with IACBE accreditation principles.

The Master of Business Administration in Business Management, Human Resource Management Concentration

The Society for Human Resources Management (SHRM) (https://www.shrm.org/) has acknowledged that SUNY Empire State University's MBA in Business Management with a specialization in Human Resource Management has received renewal of its alignment with SHRM's HR Curriculum Guidebook and Templates until December 2025. Throughout the world, 451 programs in 341 educational institutions have been acknowledged by SHRM as being in alignment with its suggested guides and templates. The HR Curriculum Guidebook and Templates were developed by SHRM to define the minimum HR content areas that should be studied by HR students at the undergraduate and graduate levels.

Master of Science in Finance

The Empire State University M.S. in Finance program well-positions students to obtain the Chartered Financial Analyst (CFA®) charter, which has become the most respected and recognized investment credential in the world. The M.S. in Finance program has been recognized by the CFA Institute (https://www.cfainstitute.org). The M.S. in Finance curriculum covers more than 70% of the CFA Program's Candidate Body of Knowledge® (CBOK), which is the gold standard for the financial

investment industry. It also includes significant portions of the CFA Code of Ethics and Standards of Professional Conduct, the highest standards of financial professionals. The M.S. in Finance program offers a limited number of CFA Program student scholarships each academic year via the CFA Institute University Affiliation program (https://www.cfainstitute.org/en/about/universities/university-affiliation/)®.

Affirmative Action/Nondiscrimination Notice

Pursuant to Empire State University policy, the university is committed to fostering a diverse community of outstanding faculty, staff and students, as well as ensuring equal educational opportunity, employment and access to services, programs and activities, without regard to an individual's race, color, national origin, religion, creed, age, disability, sex, gender identity, sexual orientation, familial status, pregnancy, predisposing genetic characteristics, military status, domestic violence victim status or criminal conviction. Employees, students, applicants or other members of the university community (including but not limited to vendors, visitors and guests) may not be subjected to harassment that is prohibited by law or treated adversely or retaliated against based upon a protected characteristic.

The university's policy is in accordance with federal and state laws and regulations prohibiting discrimination and harassment. These laws include the Americans With Disabilities Act (ADA) as Amended, Section 504 of the Rehabilitation Act of 1973, Title IX of the Education Amendments of 1972, Title VII of the Civil Rights Act of 1964 as Amended by the Equal Employment Opportunity Act of 1972, and the New York State Human Rights Law. These laws prohibit discrimination and harassment, including sexual harassment and sexual violence.

Inquiries regarding the application of Title IX and other laws, regulations and policies prohibiting discrimination may be directed to:

Lindsay Holcomb
Title IX Coordinator

2 Union Avenue, Saratoga Springs, NY 12866-4391
Phone: 1-800-847-3000 x1009
Email: TitleIX@sunyempire.edu

Inquiries also may be directed to:

email OCR.NewYork@ed.gov

Title IX Coordinator

Title IX of the Education Amendments of 1972 (Title IX), 20 U.S.C. Sec., 1681, et seq., states that all students have equal educational opportunity free from sex discrimination, including sexual harassment and sexual assault. The Title IX coordinator is responsible for the university's compliance with this regulation including, but not limited to, systematically monitoring and evaluating policy and procedures that

effectively and efficiently respond to complaints of sex discrimination. Individuals with questions or concerns related to Title IX may email TitleIX@sunyempire.edu or call 518-587-2100, ext. 2240.

Locations

- The university's more than 15 locations across New York state provides you the opportunity to pursue a degree either online or near your home or workplace.
- The Harry Van Arsdale, Jr. School of Labor Studies partners with trade unions and other labor organizations to offer degree programs to union members and other working adults.
- International Education provides residents at our international locations the opportunity to earn a SUNY Empire degree.
- The School for Graduate Studies offers 18 master's degrees through a combination of face-to-face and online educational delivery, 27 advanced certificate programs and an Ed.D. in Educational Leadership and Change. The School also offers three, 3-credit, micro-credentials.
- The School of Nursing and Allied Health offers an RN to BSN degree for working registered nurses who hold associate degrees or diplomas and wish to continue their nursing education, as well as a Master of Science in Nursing Administration and a Master of Science in Nursing Education and a Bachelor of Science in Allied Health for licensed/certified allied health professionals. All of these degree options are offered online.

New York State Locations

If you study through one of our New York state locations, you will enjoy the convenience of studying near your home or work. Students who study through one of these locations enjoy face-to-face work with faculty mentors who give them personalized attention from degree planning through graduation.

Our locations regularly offer independent studies and small seminars called study groups that can include online elements. You also have access to other ways to study including online courses and residency-based studies. Locations organize many special events and forums, including teach-ins, art shows, speaker series and student-faculty academic conferences. In addition to many of the online student resources, you have access to local orientations and student services on-site.

International Education

International Education offers students overseas the opportunity to earn a SUNY Empire degree without leaving their home countries and New York state-based students the opportunity to join selected studies with students overseas. Working with partners in various parts of the world, we offer broad-ranging degree study opportunities in business, information systems, and the liberal arts and sciences, with an emphasis on comparative regional studies. Programs are offered at the following locations:

- **Tirana, Albania**
- **Prague, Czech Republic**
- **Santo Domingo, Dominican Republic**
- **Athens, Greece**
- **Thessaloniki, Greece**
- **Beirut, Lebanon**
- **Eskişehir, Turkey**

The Harry Van Arsdale, Jr. School Of Labor Studies

The Harry Van Arsdale, Jr. School of Labor Studies partners with trade unions and other labor organizations to offer associate and bachelor degree programs in labor studies to union members and other working adults. Its mission is to provide wage-earning adults with an opportunity to earn a degree in a learning environment that celebrates their achievements and recognizes their distinctive needs. It offers a liberal arts curriculum in Labor Studies, broadly defined, which is understood to encompass the systematic study of the working-class presence and its impact on the wider society. As a student of Labor Studies you will examine the topics of work, workers and worker organizations, including the status and power of wage earners and their families in the changing economy; the study of work in its social, political and economic contexts; the creation of the modern urban workforce; the impact of technology on the organization of society; the interaction of workers, both organized and unorganized, with the institutions of wider society; alternative modes of work organization; and the nature of working-class identity, culture and experience. You will sharpen your skills in writing and research and critical reading and thinking.

All the courses with union partners are face to face at:
The Harry Van Arsdale, Jr. School of Labor Studies
4 Park Ave
New York, N.Y.
Priority in enrolling in classes is given to students from union-partners. The International Association of Machinist and Aerospace Workers and the International Union of Painters and Allied Trades partnerships are residency-based. Residencies are held at each union's educational facilities in Maryland.

Online Courses And Graduate Degrees In Labor Studies

Online courses for associate and bachelor's degrees and graduate level courses in Labor Studies also are offered at Empire State University through the Harry Van Arsdale, Jr. School of Labor Studies in New York City.

The Harry Van Arsdale, Jr. School of Labor Studies offers associate and bachelor's degrees in five related areas: Labor Studies, Cultural Studies, Historical Studies, Interdisciplinary/Multidisciplinary Studies and Social Science.

For a related program of study at the graduate level, the Master of Arts in Work and Labor Policy offers a fully online program that focuses on current problems and policies caused by changes in the global economy, technology, the work force and the workplace. It is designed for unionists, human resource professionals, arbitrators, educators, activists, lawyers and individuals involved in government or private industry.

- Financial Aid Information: Financial Aid (https://www.sunyempire.edu/tuition-financial-aid/financial-aid/)
- Learning Resources: Academic Support (p. 194)
- Technology Information: Information Technology Services (https://www.sunyempire.edu/its/)

Our Students

Empire State University is SUNY's leading online university, and our students represent a diverse community of learners. They are motivated and enthusiastic. Many of them are busy adults with jobs, families, and real lives that might not fit a conventional university experience.

Most of our undergraduate students are between 25 and 50 years old (with an average age of 35).

Nearly 64% of the university's students are enrolled as undergraduates, 20% are enrolled in our School for Graduate Studies, and 16% enroll in programs including the Harry Van Arsdale Jr. School of Labor Studies, the School of Nursing and Allied Health, or extended and international education.

As a public university, Empire State University's mission includes helping military-affiliated students further their education. Our Veteran and Military Resource Center is staffed with experts who are ready to help this population of students find the academic program that best meets their needs, whether stateside or on deployment.

FACULTY MENTORS

The more than 200 full- and part-time members of SUNY Empire's undergraduate faculty come from a variety of backgrounds, from business to the arts. Approximately 96% of the full-time faculty hold doctoral or other terminal degrees.

What the faculty have in common is a passion for teaching students. Our faculty are called mentors because they are partners and guides in your education. Every undergraduate student at SUNY Empire is assigned a mentor who serves as their own academic guide and resource from orientation to graduation. Our students confer with their mentors on a regular basis to receive advice, plan their degree, and to carry out learning activities. Students maintain contact with their mentors in a variety of ways: email, online discussion areas, or even face-to-face. Most students value the personal attention, and when our students graduate, often it is their mentors whom they celebrate when they look back on their college years.

YOUR UNDERGRADUATE DEGREE

There is no hard and fast time frame for how long it will take to earn your degree, since this depends on how many courses you take at a time and how much credit you can include from transfer, exams and prior learning assessment. More than 50% of students complete their bachelor's degrees within three years; some take as little as a year.

Perhaps you're not ready to begin a degree program right now. Empire State University offers non-matriculated study that allows you to earn college credit.

However you choose to learn, SUNY Empire is dedicated to providing you with the best education in a time-efficient and affordable way.

Rates of Degree Completion*

All Students

Entering Fall 2016 - 1880
Graduated by Fall 2022 - 935

Combined Undergraduate to Graduate Degree Pathways

Empire State University offers combined undergraduate and graduate degree pathways to highly qualified, current SUNY Empire undergraduate students who wish to continue to a master's degree. These pathways may accelerate a student's time to degree completion and reduce the cost of completing a master's degree.

- B.S. in Accounting and MBA in Business Management (150-CPA Licensure Qualified Program) (p. 608)
- B.S. Allied Health Science and M.B.A Healthcare Leadership (p. 611)
- B.A., B.S. The Arts and M.A. Liberal Studies (p. 613)
- B.B.A. Business Administration and M.B.A. Business Management (p. 606)
- B.S. Business Administration and M.B.A. Business Management (p. 606)
- B.A., B.S., B.P.S. Business, Management, and Economics and M.B.A. Business Management (p. 606)
- B.A., B.S., B.P.S. Business, Management, and Economics and M.A. Community and Economic Development (p. 610)
- B.A., B.S. Cultural Studies and M.A.T. Adolescent Education with ELA or Spanish Concentration (p. 604)
- B.A., B.S. Cultural Studies and M.A. Liberal Studies (p. 613)
- B.A., B.S. Educational Studies and M.A.T. Adolescent Special Education (p. 605)
- B.A., B.S. Historical Studies and M.A.T. Adolescent Education with Social Studies Concentration (p. 604)
- B.A., B.S. Historical Studies and M.A. Liberal Studies (p. 613)
- B.S. Human Resource Management and M.B.A. Business Management (p. 606)
- B.S. Management and M.B.A. Business Management (p. 606)
- B.S.N. Nursing and M.S. Nursing Education or M.S. Nursing Administration (p. 615)
- B.A., B.S., B.P.S. Public Affairs and M.A. Community and Economic Development (p. 610)
- B.A., B.S. Science, Math, and Technology and M.A.T. Adolescent Education with a concentration in Biology, Chemistry, Earth Science, Math, or Physics (p. 604)

Certificates

- Business and Environmental Sustainability: Certificate (p. 146)
- Crisis Prevention and Intervention: Certificate (p. 147)
- Entrepreneurship: Certificate (p. 148)
- Global Indigenous Knowledge: Certificate (p. 149)
- Healthcare Management: Certificate (p. 150)
- Manufacturing Management: Certificate (p. 151)

Micro Credentials

Micro Credentials, as defined by the State University of New York, "verify, validate and attest that specific skills and/or competencies have been achieved; are endorsed by the issuing institution; having been developed

through established faculty governance processes, and are designed to be meaningful and high quality."

Empire State University offers the following undergraduate micro credentials:

- Career Self-Management and Self-Marketing: Micro Credential (p. 152)
- Direct Support Professionals: Micro Credentials (p. 153)

Accounting: BS/Pathway to the CPA-150/150E

The Bachelor of Science (B.S.) in Accounting is a 124-credit program designed to serve students who are interested in pursuing future careers as professional accountants regardless of their chosen field or certification in public, private, nonprofit, and/or governmental accounting services. The Bachelor of Science (B.S.) in Accounting includes a set of required accounting and business courses, along with **SUNY General Education and other academic requirements**, that all students must complete in order to be eligible to receive the degree.#The required courses can be found on the "Program Details" tab. The B.S. in Accounting adheres to university's policy regarding granting college credit for prior learning. **However, it is important to note that credits awarded for individualized Prior Learning Assessment (iPLA) and/ or Professional Learning Evaluation (PLE)** might **not fulfill course requirements for the CPA licensure. Students should consult with their mentors and/or check with the appropriate NYS Professional Licensure (https://www.op.nysed.gov/certified-public-accountants/certified-public-accountants-license-requirements/) web site.** Courses are offered online, through independent studies, or through a blended approach. Empire State University's B.S. in Accounting (which is 124 credits) satisfies all accounting educational requirements topics and credits. However, does not satisfy the total 150 credit academic requirement for CPA licensure. Consequently, all students are required to fill-out and submit a **CPA Disclaimer** statement acknowledging this fact.

B.S. Accounting/MBA CPA-150/150E NYS Licensure-Qualifying Registered Program NYS

The B.S. in Accounting is a pathway towards the achievement of the 150 and 150E CPA educational requirement with cost and time saving (Dual Program BS/MBA 152 total credits instead of total 160-cr. for both degrees.). The program awards Bachelor of Science (B.S.) in Accounting & Master of Business Administration (M.B.A.) in Business Management. More information about this program can be found on the **graduate programs web site**. The program is 152-credit dual degree program allows highly qualified applicants to the **Bachelor of Science in Accounting degree** program or current students enrolled in that program to complete three selected graduate courses (9 credits, cost undergraduate tuition) required for the **Master of Business Administration** in Business Management. These courses will count toward both the undergraduate degree (125 credits) and the graduate degree (an additional 27 credits). Successful completion of the B.S. in Accounting program which includes the selected graduate courses puts students on track to complete additional graduate courses required for CPA-150/150E licensure.

Eligibility: To apply to the for the BS/MBA program, applicants must have a minimum 3.2 GPA (calculated of up to the last sixty credits earned before applying). Students must complete an **undergraduate application**. If the students have **less than 60 credits,** at the time of their applications, they are **conditionally accepted to the program if they have a minimum GPA of 3.2 in the credits they completed**. Then, they will be continuously monitored until they complete at least 60 credits and the program prerequisites. If their GPA goes below 3.2 during their conditional acceptance, then they will be dismissed from the program. Officially admitted students can start taking graduate courses. There is no monitoring after official acceptance. After this point, students must meet graduate expectations for academic progress and grade point average in their master's level courses to remain in the dual or any other degree pathway.

The following are the three dual listed/counted graduate courses and their equivalency in the B.S. in Accounting:

- GR MGMT 6020 Leadership & Executive Development, 3cr = UG MGMT 3060 Organizational Behavior.
- GR MGMT 6025 Strategic Perspectives of Global Management, 3cr = UG Business Elective.
- GR MGMT 6075 International Financial Management, 3cr = UG FSMA 3010 Corporate Finance.

Students are required to complete all their bachelor's degree requirements and be cleared for graduation from their bachelor's degree to be able to continue with the remaining MBA courses. For the dual program, students must include the following three graduate courses required instead of electives for the MBA program:

- FSMA 6060 Strategic Cost Analysis, 3cr.
- FSMA 6080 International Accounting, 3cr.
- APAN 6025 Applied Management Analytics, 3-cr.

The dual program is listed among the licensure-qualifying programs by **the NYS Education Department's inventory of Registered Programs CPA 150 and CPA 150E (https://www2.nysed.gov/heds/IRPSL1.html) (Programs leading to professional licenses).** There is no requirement for undergraduate concurred degree plan. Students upon meeting the program's admission requirements may apply directly to the graduate program.

Mandatory Professional Licensure Disclosure

New York State takes pride in the high quality of its licensed and certified professionals. For the protection of its citizens, each license and certificate has requirements that individuals must meet in order to be licensed or certified in New York State. SUNY's academic programs leading to licensure or certification are carefully designed to meet and exceed these State requirements. This is a role SUNY plays in protecting the public. Other states frequently have their own requirements, so if your goal is to practice in another state, this disclosure will help you check to see what that state requires. The full details regarding this disclosure related to the applicable SUNY Empire degree programs may be found here (https://sunyempire.edu/online-compliance/licensure/).

Program Details

The program requirements below are for the B.S. in Accounting. Students pursuing a B.S. in Accounting as part of the B.S. Accounting - MBA Business Management Dual 150/150E CPA Registered Licensure Qualifying Degree Program, (https://sunyempire.edu/graduate-studies/combined-programs/dual-degree-bs-accounting-mba-business-management/) should follow the program requirements listed under the **graduate programs web site**. The B.S. in Accounting must contain 24-cr. upper level in accounting, including Advanced Accounting, Federal Income Tax II, Accounting Information Systems, and Auditing.

Required Courses

Code	Title	Credits
Educational Planning Course		4
BUSN 2010	Business Statistics	4

or MATH 1065	Statistics	
Core Accounting Courses		
ACCT 2005	Introductory Accounting I: Financial Accounting	4
ACCT 2010	Introductory Accounting II: Managerial Accounting	4
ACCT 3025	Intermediate Accounting I	4
ACCT 3030	Intermediate Accounting II	4
ACCT 3010	Cost Accounting	4
ACCT 4010	Advanced Accounting	4
ACCT 3015	Federal Income Tax I: Individual Income Tax	4
ACCT 3020	Federal Income Tax II: Business Income Tax	4
ACCT 4005	Accounting Information Systems	4
ACCT 4015	Auditing	4
Core Business Courses		
ECON 2015	Macroeconomics	4
ECON 2020	Microeconomics	4
MGMT 3060	Organizational Behavior	4
BUSN 1010	Business Law I	4
BUSN 2005	Business Law II	4
FSMA 3010	Corporate Finance	4
Upper-Level Business Elective		4

Learning Outcomes

- General broad business competencies: Students will be able to identify the legal, economic, ethical, organizational, and global forces and their impact on a business environment and its sustainability and continuity.
- Accounting and professional competencies: Students will be able to apply accounting theory and professional standards dealing with special topics in accounting that demand distinctive in-depth study and define the applicable accounting principles and standards for various industries and businesses' forms.
- Higher level of professional functional competencies: Students will be able to apply accounting principles to a more complex business forms, and utilize technology, demonstrating a higher level of financial reporting and demonstrate their professional skepticism to risk management.

Pathways to graduate Programs and educational Requirements for the 150/150E CPA License:

There are various pathways for students who are interested to pursue a career as Certified Public Accountants:

1- **B.S. Accounting/MBA CPA-150/150E NYS Licensure-Qualifying Registered Program NYS.**

The Dual program BS in Accounting/MBA is listed among the licensure-qualifying programs by **the NYS Education Department's inventory of Registered Programs CPA 150 and CPA 150E (https://www2.nysed.gov/heds/IRPSL1.html) (Programs leading to professional licenses).** There is no requirement for undergraduate concured degree plan. Students upon meeting the program's admission requirements may apply directly to the graduate program.

The BS in Accounting is a pathway towards the achievement of the 150 and 150E CPA educational requirement with cost and time saving (Dual Program BS/MBA 152 total credits instead of total 160-cr. for

both degrees separately.). The program awards Bachelor of Science (B.S.) in Accounting & Master of Business Administration (M.B.A.) in Business Management. More information about this program can be found on the **graduate programs web site**. The program is 152-credit dual degree program allows highly qualified applicants to the **Bachelor of Science in Accounting degree** program or current students enrolled in that program to complete three selected graduate courses (9 credits, cost undergraduate tuition) required for the **Master of Business Administration** (General Business Track). These courses will count toward both the undergraduate degree (125-cr.] and the graduate degree (additional 27-cr.). Successful completion of the BS in Accounting program which includes the selected graduate courses puts students on track to complete additional graduate courses required for CPA-150/150E licensure.

Eligibility: To apply to the for the BS/MBA program, applicants must have a minimum 3.2 GPA (calculated of up to the last sixty credits earned before applying). Students must complete an **undergraduate application**. If the students have **less than 60 credits,** at the time of their applications, they are **conditionally accepted to the program if they have a minimum GPA of 3.2 in the credits they completed**. Then, they will be continuously monitored until they complete at least sixty credits and the program prerequisites. If their GPA goes below 3.2 during their conditional acceptance, then they will be dismissed from the program. Officially admitted students can start taking graduate courses. There is no monitoring after official acceptance. After this point, students must meet graduate expectations for academic progress and grade point average in their master's level courses to remain in the dual or any other degree pathway.

The following are the three dual listed/counted graduate courses and their equivalency in the BS in Accounting:

- GR MGMT 6020 Leadership & Executive Development, 3cr = UG MGMT 3060 Organizational Behavior.
- GR MGMT 6025 Strategic Perspectives of Global Management, 3cr = UG Business Elective.
- GR MGMT 6075 International Financial Management, 3cr = UG FSMA 3010 Corporate Finance.

Students are required to complete all their bachelor's degree requirements and be cleared for graduation from their bachelor's degree to be able to continue with the remaining MBA courses. **For the Dual Program Student must include the following three graduate courses required instead of electives for the BMA program:**

- FSMA 6060 Strategic Cost Analysis, 3cr,
- FSMA 6080 International Accounting, 3cr.
- APAN 6025 Applied Management Analytics, 3-cr.
- Contact School of Graduate Studies: Dr. Joseph Angiello. * General Inquiry: **grad@sunyempire.edu**
- Contact School of Business Undergraduate Studies: Dr. Nazik Roufaiel

2- **Combined Bachelor's/Master's Degrees | Empire State University (sunyempire.edu)**:

Apply to the **Combined Degree Pathway BS/BPS in Business, Management, and Economics (Accounting Practices Concentration)/ MBA in Business Management Program [EC1]** The combined pathway requires 148 credits total, of which 36 are master's credits leading to the MBA in Business Management, and twelve graduate credits (four courses each 3-cr., undergraduate tuitions) to be

counted towards both the bachelor and master's degrees. Students must meet all college, AOS, and relevant concentration guidelines. Students do not have to have a concurred degree program to apply for a combined pathway. Students must plan their degree early in their career to benefit from the four combined pathway courses that would satisfy both the BS/BPS in Accounting Practices & MBA.

Eligibility: to apply to the BS/MBA program, applicants must have a minimum 3.2 GPA (calculated of up to the last sixty credits earned before applying). Students must complete an **undergraduate application**. If the students have **less than 60 credits,** at the time of their applications, they are **conditionally accepted to the program if they have a minimum GPA of 3.2 in the credits they completed**. Then, they will be continuously monitored until they complete at least sixty credits and the program prerequisites. If their GPA goes below 3.2 during their conditional acceptance, then they will be dismissed from the program. Officially admitted students can start taking graduate courses. There is no monitoring after official acceptance. After this point, students must meet graduate expectations for academic progress and grade point average in their master's level courses to remain in the dual or any other degree pathway. Students must complete the prerequisite courses in accounting, statistics, macroeconomics, and microeconomics with a C or better grade. Students must be aware of the **total educational credits requirements a minimum of 150-cr. for the CPA 150/150E License.**

The following are the four dual listed/counted graduate courses and their equivalency in the BS/BPS in Accounting Practices

- MGMT 6020 Leadership & Executive Development, 3cr = UG MGMT 3060 Organizational Behavior
- MGMT 6025 Strategic Perspectives of Global Management, 3cr = UG Business Elective
- MGMT 6075 International Financial Management, 3cr = UG FSMA 3010 Corporate Finance
- Any business graduate elective course fits the minimum accounting (33-cr.) educational credits requirements and the minimum business credit required (36-cr.) for the CPA. Students are advised to include a graduate business analytics course for the 150E CPA. APAN 6025 Applied Management Analytics.

Completing the MBA Program: Students must meet graduate expectations for academic progress and grade point average in their master's level courses to remain in the combined degree pathway. Students must declare their MBA concentration at this time.

- Contact School of Graduate Studies: Dr. Betul Lus. General Inquiry: **grad@sunyempire.edu**
- Contact School of Business Undergraduate Studies: Dr. Nazik Roufaiel.

3- Undergraduate Enrollment in Graduate Courses

Students may enroll in up to Nine graduate credits (three graduate courses) by pursuing **Undergraduate Enrollment in Graduate Courses** They pay undergraduate tuition fees for these graduate courses. This is a wonderful opportunity to save money and time by advancing to a graduate program. Students may complete the credits necessary to meet the 150-credit hour educational requirement, and its distribution, through graduate and/or undergraduate courses [BS/BPS]. Submit the online **Undergraduate Enrollment in Graduate Courses Permission Form**. For information on the NYS Public Accountancy

requirements, go to **New York State Education Department's Public Accountancy web page**.

Eligibility: An undergraduate student must be within thirty-two (32) credits of completing a bachelor's degree and must have a concurred degree program.

- Contact School of Graduate Studies: Dr. Betul Lus. General Inquiry: **grad@sunyempire.edu**
- Contact School of Business Undergraduate Studies: Dr. Nazik Roufaiel.

Addiction Studies: B.S.

The Bachelor of Science (B.S.) in Addiction Studies is a 124-credit program designed to serve students who are interested in becoming skilled professionals to understand and treat individuals suffering from addiction. The program is structured around courses that address fundamental aspects of how addiction affects individuals, families, and communities, while examining the assessment, treatment, and prevention of substance abuse.

The B.S. in Addiction Studies includes a set of required courses that all students must take, along with SUNY General Education and other academic requirements (p. 185), in order to be eligible to receive a degree.The required courses for programs in Addiction Studies can be found on the "Program Details" tab. Students will work with a faculty mentor to develop a degree plan that matches their goals and meets all program requirements. Students should speak with their mentor to see if any credit earned through individualized Prior Learning Assessment (iPLA) (https://www.sunyempire.edu/degree-planning-academic-review/prior-learning-assessment/individualized-prior-learning-assessment/) or Professional Learning Evaluation (PLE) (p. 168) might fulfill these course requirements. Courses are offered online, through independent studies, or through a blended approach.

The program is guided by the competencies model from the US Department of Health and Human Service and features a curriculum focused on equipping students with fundamental skills through core courses. Once a foundational skill set is laid, students are given the opportunity to customize their education to match their educational and career goals by choosing from a wide variety of courses to fulfill the degree requirements. Students will have the option of completing the degree program through various delivery modes such as online, independent study, blended, and/or face-to-face course.

Students completing a bachelor's degree in Addiction Studies will demonstrate knowledge of human behavior, service delivery, skills, and ethics, to work with diverse individuals, families, and communities struggling with addiction. Obtaining a bachelor's degree in an approved Human Services field from an accredited institution may be substituted for 2,000 hours of work experience, thus allowing individuals with a CASAC-T to obtain their CASAC in a shorter period of time.

For more information, please visit the Health and Human Services Degree Planning Resources web page. (https://www.sunyempire.edu/health-human-services/degree-planning-resources/)

Program Details
The B.S. in Addiction Studies degree program includes the following required courses:

Curriculum Requirements

Code	Title	Credits
Lower Level Core Courses		
HUDV 1015	Human Development: Introductory (Any type of development course: Human Development, Child Development, Adult Development, Human Behavior, Lifespan Development)	4
ADDS 2005	Addiction & Dependency: Introduction	4
HUSV 2010	Case Management	4
HUSV 2020	Crisis Intervention: Theory & Practice	4
HUSV 2025	Helping & Counseling Skills	4
HUSV 2035	Introduction to Human Services	4
Upper Level Core Courses		
ADDS 3005	Interventions for Substance Use Disorders	4
HUSV 3005	Advocacy in Human Services	4
PSYC 3010	Abnormal Psychology: Advanced (Lower Level is acceptable.)	4
HUSV 3020	Documentation in Human Services	4
ADDS 3010 or ADDS 3020 or ADDS 4005	Substance Use Interventions in the Workplace Substance Use with Special Populations Adolescence & Addictions	4
HUSV 3030 or CHFS 3030	Group Work Family Intervention	4
PSYC 3040	Biological Psychology (OR Introduction to Psychopharmacology (lower level))	4
ADDS 4010	Advanced Substance Use Counseling	4
ADDS 4015 or HUSV 4035	Evidence-Based Substance Use Counseling Internship in Human Services	4
HUSV 4020	Diversity in Human Services	4
HUSV 4030	Human Service Ethics	4

Learning Outcomes

- Foundation 1: Knowledge, Students will be able to explain the theories of addiction.
- Foundation 1: Knowledge, Students will be able to utilize treatment knowledge in the application of practice for professional addiction services.
- Foundation 2: Skills application, Students will be able to describe the continuum of care, including but not limited to mutual aid groups, individual and family counseling, and counseling special populations.
- Foundation 2: Skills application, Students will be able to compare and contrast the various helping strategies that can be tailored to the individual.
- Foundation 2: Skills application, Students will be able to integrate knowledge, values, and skills related to the proposed field of study.
- Foundation 3: Assessment education, Students will be able to formulate the skills in assessment, proper documentation and education of individuals, families, and/or groups.
- Foundation 4: Ethics, Students will be able to interpret the code of ethics and/or the professional standards within their field.
- Foundation 4: Ethics, Students will be able to apply the code of ethics and/or professional standard to practical situations within their field.
- Foundation 4: Ethics, Students will be able to reconcile possible conflicts between their own values and professional expectations.
- Foundation 5: Diversity, Students will be able to analyze the impact and importance of human diversity on service delivery, which may include, but not be limited to race, ethnicity, gender, class, socioeconomic status, age, culture, religious beliefs, sexual orientation, sexual identity, geographic differences, and/or ability.
- Foundation 5: Diversity, Students will be able to examine the impact of power, privilege and oppression on their work with individuals, families, groups and communities.

Allied Health Science: B.S.

The Bachelor of Science (B.S.) in Allied Health Science is a degree completion program designed for allied health professionals such as cardiovascular technologists, clinical laboratory technicians, dental hygienists, emergency medical technicians, health information technologists, medical assistants, medical sonographers, occupational therapy assistants, physical therapy assistants, radiologic technicians, respiratory therapists, surgical technologists, and others. It includes eight online core courses in the curriculum. Students may complete general learning requirements via online or face-to-face courses at any regionally accredited institution. Requirements may be met via assessment of prior learning, independent study, and successful completion of selected examinations.

The B.S. in Allied Health Science includes a set of required courses that all students must take, along with SUNY General Education and other academic requirements (p. 185), in order to be eligible to receive a degree.The required courses can be found on the "Program Details" tab. Students should speak with their mentor to see if any credit earned through individualized Prior Learning Assessment (iPLA) (https://www.sunyempire.edu/degree-planning-academic-review/prior-learning-assessment/individualized-prior-learning-assessment/) or Professional Learning Evaluation (PLE) (p. 168) might fulfill these course requirements. Courses are offered online, through independent studies, or through a blended approach.

Program Admission Requirements

- An associate degree or diploma in allied health or related field, which leads to licensure or certification, from an accredited institution of higher education.
- A current license or certification for those professions requiring licensure or certification.
- The completion of a minimum of 12 credits in the natural and social sciences (Anatomy and Physiology required).

Program Details

The B.S. in Allied Health Science degree program includes the following required courses:

Code	Title	Credits
HLAD 2010	The United States Health Systems	4
ALLH 3030	Contemporary Applications of Diversity, Equity, Inclusion, and Social Justice in Healthcare	4
NURS 3035	Interdisciplinary Perspectives in Global Health	4
HLAD 3045	Healthcare Ethics	4
HSCI 3200	Health Informatics	4
ALLH 4005	Transition to Baccalaureate Health Professions	4
HLAD 4015	Healthcare Policy	4
HLAD 4020	Leadership in Healthcare	4

Elective Requirements- 12 Credits

Electives are chosen based on student interest. In addition, the following professional certifications also have been approved to meet elective requirements: American Heart Association (ACLS); American Heart Association (PALS); AART Mammography Certification. Please speak with your mentor about other professional certifications that may be used.

Learning Outcomes

Students completing a B.S. in Allied Health Science will be able to:

- Students will be able to integrate knowledge from the health, biological and social sciences, and the humanities to provide culturally competent care to individuals, families and communities.
- Students will be able to apply a variety of communication strategies in establishing positive relationships with patients, families and members of the health care team.
- Students will be able to use evidence and information technology to enhance patient safety and promote quality care outcomes.
- Students will be able to integrate principles of leadership in promoting collaboration with interdisciplinary teams.
- Students will be able to analyze how the baccalaureate-prepared health care provider develops professional role identity, including consideration of values, and legal and ethical aspects to healthcare practice.

Biology: B.S.

This program will begin Spring 2025.

Biology is the study of living things, from cells and their molecules to organisms and the ecosystems that they live in. The Bachelor of Science in Biology is a 120-credit program that includes foundational coursework in Biology, Chemistry, Physics, and Math. The program includes both required and elective advanced level Biology courses, which allow students to reinforce and expand their knowledge in the field.

Biology is a broad and varied scientific discipline and, as such, lays a foundation for a multitude of career paths. Students with a degree in Biology may seek employment in education; academic, clinical, or research fields; environment and ecology-related fields; and allied health science professions. Additionally, a Biology degree can serve as the foundation for future graduate studies in a variety of occupations.

Program Details

Students pursuing a B.S. program in Biology must complete the following courses:

Code	Title	Credits
BIOL 1210 & BIOL 1211	Biology I: Lecture and Biology I: Laboratory	4
or BIOL 1200	Biology I with Lab	
BIOL 1212 & BIOL 1213	Biology II: Lecture and Biology II: Laboratory	4
or BIOL 1201	Biology II with Lab	
CHEM 1210 & CHEM 1211	Chemistry I: Lecture and Chemistry I: Laboratory	4
or CHEM 1205	Chemistry I with Lab	
CHEM 1212 & CHEM 1213	Chemistry II: Lecture and Chemistry II: Laboratory	4
or CHEM 1206	Chemistry II with Lab	
PHYS 1210 & PHYS 1211	Physics I: Lecture and Physics I: Laboratory	4
or PHYS 1200	Physics I with Lab	
PHYS 1212 & PHYS 1213	Physics II: Lecture and Physics II: Laboratory	4
or PHYS 1201	Physics II with Lab	
MATH 1065	Statistics	4
MATH 2140	Calculus I	4
CHEM 3210	Organic Chemistry I with Lab	4
BIOL 3204	Genetics	4
BIOL 3206	Cell Biology	4
BIOL 3302	Evolution	4
BIOL 3800	Bioethics	4
2 Additional Upper Level BIOL Electives		8

Biology Program Notes:

1. BIOL 1210 and BIOL 1212 can be replaced with the three-course sequence: BIOL 1204 Introduction to Cell Biology and Genetics, BIOL 1205 Introduction to Organismal Biology, and BIOL 1206 Introduction to Population Biology. BIOL 1211 Biology I Laboratory and Biology 1213 II Laboratory must still be taken.

2. Students who have taken Organic Chemistry I with Lab at a lower level at a different institution may use it to meet the Organic Chemistry I with Lab requirement here at SUNY Empire.

3. Students who need a refresher in foundational mathematics before taking Physics and Calculus should consider taking MATH 1040 Algebra and/or MATH 1140 Precalculus.

4. Students transferring in lower level coursework that overlaps content covered in in BIOL 3204, 3206, or 3302 may count that lower-level work as satisfying the upper-level content requirements. However, students must have a minimum of 24 advanced level credits in Biology (or other approved areas), so additional upper level Biology electives must be taken.

5. BIOL 3800 Bioethics provides students with a framework to assess ethical issues in Biology, as well as an opportunity to reflect on their future roles in the field. It is recommended that students take BIOL 3800 Bioethics as soon as Biology I and II are completed.

6. An upper level BIOL elective can be met with a BIOL 3XXX or 4XXX course. A full list of BIOL course offerings can be found in the course catalog. CHEM 3400 Biochemistry, HSCI 4200 Epidemiology and ENSC 4202 Biogeography are also courses that can be used to meet the upper level Biology elective requirement.

Learning Outcomes

- Describe the foundational concepts and fundamental laws in Biology.
- Use reasoning and problem-solving skills to critically read scientific texts, evaluate for competing hypotheses, and assess experimental design.
- Employ laboratory skills and the scientific method to formulate hypotheses, run experiments to test their hypotheses, and analyze and interpret the results.
- Communicate biological concepts from literature or their own laboratory research through reports, essays, and presentations.
- Identify evolution as one of the central theories of biology that explains the unity and diversity of life, as well its importance in the classification of living things.
- Identify the importance of scientific integrity, ethical research, and applications of biology to science policy and society as a whole.

Business Administration: B.B.A.

The Bachelor of Business Administration (B.B.A.) in Business Administration is a 124-credit program. The B.B.A. provides students with knowledge, skills and competencies in accounting, economics, finance, human resource management, legal and ethical studies, marketing, and strategic management. The B.B.A. prepares students to manage and lead in business and organizational contexts in a rapidly changing world. The B.B.A. is designed to serve those students who may have completed their respective two-year degree in business studies, e. g., Associates of Applied Science (A.A.S.) in business or Associates of Science (A.S.) in business, and who wish to continue to learn and pursue a bachelor's degree in business. Furthermore, the B.B.A. is appropriate for those adult learners who have been working in business related industries and want to now pursue a bachelor's degree in business to advance their career.

The Bachelor of Business Administration (B.B.A.) includes a set of required courses that all students must take, along with SUNY General Education and other academic requirements (p. 185), in order to be eligible to receive a degree.The required courses for programs can be found on the "Program Details" tab. Students should speak with their mentor to see if any credit earned through individualized Prior Learning

Assessment (iPLA) (https://www.sunyempire.edu/degree-planning-academic-review/prior-learning-assessment/individualized-prior-learning-assessment/) or Professional Learning Evaluation (PLE) (p. 168) might fulfill these course requirements. Courses are offered online, through independent studies, or through a blended approach.

Program Details

The Bachelor of Business Administration (B.B.A.) program includes the following required courses:

Code	Title	Credits
BUSN 1015	Introduction to Business	4
MRKT 1005	Marketing Principles	4
ACCT 2005	Introductory Accounting I: Financial Accounting	4
ACCT 2010	Introductory Accounting II: Managerial Accounting	4
ECON 2015	Macroeconomics	4
ECON 2020	Microeconomics	4
MGMT 1005	Principles of Management	4
BUSN 1010	Business Law I	4
BUSN 3010	Business Ethics	4
BUSN 4030	International Business	4
HRMS 3015	Human Resource Management	4
FSMA 3010	Corporate Finance	4
MGMT 3060	Organizational Behavior	4
MGMT 3050	Operations Management	4
BUSN 3122	Management Information Systems	4
MGMT 4035	Strategic Management	4
BUSN 2010	Business Statistics	4
Total Credits		**68**

Learning Outcomes

- Foundation 1: Communication; Students will be able to articulate a range of different communication tools and techniques used in business contexts.
- Foundation 1: Communication; Students will describe the importance of active listening techniques for effective business communications.
- Foundation 1: Communication; Students will be able to assess a business situation and identify the appropriate mode of communication(s) in response to that situation.
- Foundation 1: Communication; Students will be able to describe and prepare effective business presentations.
- Foundation 2: Critical Thinking; Students will be able to identify and analyze specific business problems and issues and develop alternative solutions.
- Foundation 2: Critical Thinking; Students will be able to analyze and apply appropriate and relevant data to synthesize information.
- Foundation 2: Critical Thinking; Students will be able to evaluate and apply appropriate alternatives to make business decisions.
- Foundation 3: Ethical and Legal Environment; Students will be able to define and examine ethical and legal environment in business.
- Foundation 3: Ethical and Legal Environment; Students will be able to identify and evaluate common ethical and legal issues and problems in contemporary global business environment.
- Foundation 3: Ethical and Legal Environment; Students will be able to analyze and apply ethical theories and legal applications that help to shape business decision-making in organizations.
- Foundation 4: Global Business Environment; Students will be able to identify the differences between domestic and international business operations and the major international business growth areas, opportunities, and challenges.
- Foundation 4: Global Business Environment; Students will be able to analyze the importance of sociocultural, economic, environmental, technological, political/legal factors between countries and how they affect success or failure of business operations abroad.
- Foundation 4: Global Business Environment; Students will be able to develop and evaluate the strategies of establishing an international business abroad, including explaining the advantages and disadvantages of various methods of trade.
- Foundation 5: Information Management; Students will be able to describe the range of information systems used within organizations, including core business information systems applications and technologies and their use in operations and competitive advantage, as well as the impact of the evolving nature of information systems.
- Foundation 5: Information Management; Students will be able to analyze the information system needs, including identifying and addressing relevant stakeholders within the context of an organization and make suitable recommendations.
- Foundation 5: Information Management; Students will be able to describe the technology lifecycle and its impact on an organization and the planning that is required for an organization.
- Foundation 6: Organizational Environment; Students will be able to describe the facets of individual behavior that affect personal, group, and organizational performance and effectiveness.
- Foundation 6: Organizational Environment; Students will be able to demonstrate comprehension of the key concepts and theories of organizational behavior by comparing and contrasting strengths and weaknesses.
- Foundation 7: Organizational Environment; Students will be able to apply the learned concepts in analysis of managerial case studies.

Business Administration: B.S.

The Bachelor of Science (B.S.) degree in Business Administration is a 124-credit program designed to serve students who are interested in pursuing future careers as business leaders and professionals in public, private, nonprofit, and/or international organizations. The program provides a solid foundation of theoretical, conceptual, and applied knowledge in the areas of business, management, and economics and meets SUNY liberal arts and general education requirements.

The B.S. in Business Administration includes a set of required courses that all students must take, along with SUNY General Education and other academic requirements (p. 185), in order to be eligible to receive a degree.The required courses for programs in Business Administration can be found on the "Program Details" tab. Students should speak with their mentor to see if any credit earned through individualized Prior Learning Assessment (iPLA) (https://www.sunyempire.edu/degree-planning-academic-review/prior-learning-assessment/individualized-prior-learning-assessment/) or Professional Learning Evaluation (PLE) (p. 168) might fulfill these course requirements. Courses are offered online, through independent studies, or through a blended approach.

Students enrolled in 16 credits per semester, two semesters per year, can expect to complete this program in four years. Empire State University also offers a summer term with business, management, accounting, marketing, and economics courses. The program provides students with the option to pursue a more structured degree program in Business Administration while offering the option to individualize the degrees through their selection of electives.

For more information, including sample degree plans and other degree planning resources, please visit the Business, International Business, and Marketing Degree Planning Resources web page. (https://www.sunyempire.edu/business-international-business-marketing/degree-planning-resources/)

Learning Outcomes

- Foundation 1: Managerial and Marketing Skills; Students will be able to identify and apply fundamental concepts and skills of management and marketing to successfully function in an organizational environment.
- Foundation 2: Quantitative, Financial, and Analytical Skills; Students will be able to demonstrate an understanding of quantitative, financial, accounting, and analytical tools and apply these tools to solve problems in the business environment.
- Foundation 3: Economics; Students will be able to solve economic problems using appropriate economic principles and concepts and analytical models.
- Foundation 4: Legal, Ethical, and Social Responsibility; Students will be able to examine, explain, and apply moral theories, ethical standards, and social and legal responsibilities in the business environment.
- Foundation 5: Information Management; Students will be able to use information technology tools and systems to collect, manage, and analyze data for decision making relevant to the business environment.
- Foundation 6: Understanding People in an Organizational Context; Students will be able to examine and reflect on organizational culture and apply the concepts that explain how individuals and groups behave in the organization.
- Foundation 7: Understanding Global Business Environment; Students will be able to analyze the impact and differentiation of sociocultural, demographic, economic, political/legal, technological and environmental factors on success in international operations.
- Foundation 8: Students will be able to apply methodology, tools, and problem-solving skills to integrate their business knowledge while solving problems affecting both the internal and external environments.

Business, Management, and Economics: A.A., A.S.

Students pursing an Associate of Arts (A.A.) or Associate of Science (A.S.) degree in Business, Management and Economics will investigate the world of accounting, business administration, economics, finance, human resources, information systems, international business, labor relations, management, marketing and public administration. Students will develop analytical, management, communication and quantitative skills, increase their understanding of economic principles and disciplinary methods and learn about the effective use of information technologies to support career or personal goals and aspirations.

Degree programs in Business, Management and Economics offer students the opportunity to develop individualized degree plans based on their intellectual, professional, and personal interests. General program guidelines can be found on the "Program Details" tab, and students will work with an academic mentor to choose courses that meet the guidelines and address each student's individual interests. Students can also work with their academic mentors to identify applicable transfer credit, prior college-level learning, and possible course equivalencies. Working with a mentor and using SUNY Empire's educational planning process, students can develop a specialized concentration in Business, Management and Economics by following the general program guidelines as well as any applicable concentration guidelines. Students may also develop their own concentrations.

For more information about general undergraduate degree requirements, please visit Earning an Undergraduate Degree (p. 185).

For sample degree programs and other degree planning resources, please visit the Department of Accounting, Economics and Finance (https://www.esc.edu/accounting-economics-finance/degree-planning-resources/), Department of Management and Human Resource Management (https://www.esc.edu/management/degree-planning-resources/), or Department of Business, International Business and Marketing (https://www.esc.edu/business-international-business-marketing/degree-planning-resources/) Degree Planning Resources web pages.

For more information about Business, Management and Economics, please visit the School of Business web site (https://www.esc.edu/undergraduate-studies/school-business/).

Program Details

Business, Management and Economics programs are expected to meet the University Learning Goals (https://www.esc.edu/policies/?search=cid%3D61278), which include active learning, breadth and depth of knowledge, social responsibility, communication skills, critical thinking and problem-solving skills, quantitative literacy, information and digital media literacy.

Academic Planning takes the form of a course (commonly but not exclusively referred to as "Educational Planning") wherein students develop a degree plan and rationale essay with their primary faculty advisor/mentor.

In their degree programs and rationale essays, students must address the BM&E Area of Study general guidelines and then the concentration guidelines, the registered program guidelines, or the individualized concentration they develop in consultation with their primary mentor.

Programs in Business, Management and Economics include the following seven foundations:

1. Communications Skills
2. Information Management
3. Economics
4. Ethical and Social Responsibility
5. Quantitative Skills
6. Understanding People in a Broader Context
7. Understanding Organizations within Broader Context

These foundations may be met through transcript credit; college-level knowledge demonstrated through individual prior learning assessment (iPLA), professional learning evaluations (PLE), or credit by examination; or individual courses, a series of courses, or components within individual courses with Empire State University. The student's **Degree Plan Rationale Essay** should clearly explain how the degree plan meets each of the foundations in the Area of Study, what will be learned, and how the student will build on these foundations to meet personal, academic, or career goals. For details about the academic planning process and requirements, please see the Student Degree Planning Guide (https://www.esc.edu/degree-planning-academic-review/degree-program/student-degree-planning-guide/).

ASSOCIATE IN ARTS (AA) AND ASSOCIATE IN SCIENCE (AS)

An associate degree in Business, Management and Economics is meant to introduce students to a range of foundational subjects related to Business, Management and Economics. For an associate degree, students must have **four** of the of the **seven** foundations in their degree programs. Courses that meet the four selected foundations, must be School of Business courses (ACCT, BUSN, ECON, FSMA, HRMS, MGMT, MRKT) or equivalent.

Foundation #1: COMMUNICATION SKILLS

Code	Title	Credits
ACCT 3015	Federal Income Tax I: Individual Income Tax	4
ACCT 3020	Federal Income Tax II: Business Income Tax	4
ACCT 3035	Principles of Fraud Examination & Financial Forensics	4
ACCT 4005	Accounting Information Systems	4
ACCT 4015	Auditing	4
BUSN 1005	Business Communication	4
BUSN 2005	Business Law II	4
MRKT 4040	Marketing Strategy	4

Foundation #2: INFORMATION MANAGEMENT

Code	Title	Credits

ECON 3130	Topics in Contemporary Business & Economic Issues International Programs Only	3

Foundation #4: ETHICAL AND SOCIAL RESPONSIBILITY

Code	Title	Credits
ACCT 3035	Principles of Fraud Examination & Financial Forensics	4
ACCT 4015	Auditing	4
BUSN 3010	Business Ethics	4
ECON 3135	Business Government & Society	4
FSMA 3020	Finance Society & Ethics International Programs Only	4
MGMT 3015	Ethics for a Global Economy	4
MGMT 3040	Managing Sustainable Organizations	4
MGMT 3073	Current Issues in Healthcare Management	4

Foundation #5: QUANTITATIVE SKILLS

Code	Title	Credits
ACCT 1005	Accounting for Decision Makers	6
ACCT 2005	Introductory Accounting I: Financial Accounting	4
ACCT 2010	Introductory Accounting II: Managerial Accounting	4
ACCT 3005	Accounting For Governmental & Not-For-Profit Organizations	4
ACCT 3010	Cost Accounting	4
ACCT 3025	Intermediate Accounting I	4
ACCT 3030	Intermediate Accounting II	4
BUSN 2010	Business Statistics	4
BUSN 2175	Personal Finance Management	4
BUSN 3127	Business Analytics	4
ECON 3025	Econometrics	4
FSMA 3005	Behavioral Finance International Programs Only	4
FSMA 3010	Corporate Finance	4
FSMA 3015	Entrepreneurial Finance for Small Business	4
FSMA 3025	Healthcare Finance	4
FSMA 3030	International Finance	4
FSMA 3045	Investment Management	4
FSMA 3055	Risk Management & Insurance	4
FSMA 4005	Financial Markets & Institutions	4
FSMA 4010	Security Analysis & Portfolio Management	4
MGMT 3030	Logistics Management	4
MGMT 3075	Supply Chain Management	4
MGMT 3080	Supply Chain Management In The Global Context	4
MGMT 4025	Manufacturing Management	4
MGMT 4030	Project Management for Business	4

Foundation #6: UNDERSTANDING PEOPLE IN AN ORGANIZATIONAL CONTEXT

Code	Title	Credits
HRMS 3015	Human Resource Management	4
HRMS 3030	Labor Management Relations for Business	4
HRMS 3035	LGBTQ Workplace Issues	4
HRMS 4015	Organization Development & Change	4
MGMT 3025	Leadership	4
MGMT 3060	Organizational Behavior	4
MGMT 3090	Women in Management	4
MGMT 4005	Change Management	4

Foundation #7: UNDERSTANDING ORGANIZATIONS WITHIN BROADER CONTEXT

Code	Title	Credits
ACCT 4010	Advanced Accounting	4
BUSN 3005	Business Enterprise in American History	4
BUSN 3040	Electronic Commerce (e-Commerce)	4
BUSN 4030	International Business	4
BUSN 4035	International Business Law	4
ECON 3020	Ecological Economics	4
ECON 3030	Economic Policies of the European Union International Programs Only	3
ECON 3085	International Economics	4
ECON 3090	International Political Economy	4
ECON 3095	International Trade & Finance International Programs Only	3,4
ECON 3110	Social & Economic Contexts of Globalization International Programs Only	3
ECON 3115	The Global Financial Crisis & the Great Recession International Programs Only	3
ECON 3120	Economic Policies of the European Union International Programs Only	4
FSMA 3015	Entrepreneurial Finance for Small Business	4

FSMA 3030	International Finance	4
HRMS 4020	Strategic Human Resource Management	4
HRMS 3010	Diversity in the Workplace	4
MRKT 4025	International Marketing	4
MGMT 3010	Cross Cultural Management	3
MGMT 3020	International Cross Cultural Management	4
MGMT 4035	Strategic Management	4

Learning Outcomes

- Foundation 1: Communication Skills, Students will be able to identify and apply appropriate basic communications skills necessary to successfully function in an organizational environment. At a minimum, students should have acquired the competencies in a course such as English Composition that meet SUNY General Education requirements for Basic Communication.
- Foundation 2: Information Management, Students will be able to use information technology tools and systems to collect, manage, and analyze data for decision making relevant to the business environment. Studies can be introductory or advanced level but must be beyond basic computer applications.
- Foundation 3: Economics, Students will be able to solve economic problems using appropriate economic principles and concepts and analytical models.
- Foundation 4: Ethical and Social Responsibility, Students will be able to examine, explain or apply moral theories, ethical standards and social responsibilities in the business environment.
- Foundation 5: Quantitative Skills, Students will be able to demonstrate an understanding of quantitative reasoning and analytical tools and an ability to apply these tools to problems in the business environment.
- Foundation 6: Understanding People in an Organizational Context, Students will be able to examine and reflect on organizational culture and apply the concepts that explain how individuals and groups behave in the organization.
- Foundation 7: Understanding Organizations Within Broader Context, Students will be able to evaluate challenges to organizations in a complex and changing world by describing the strategic impact of diversity, political, International, technological or environmental issues in the business environment.

Concentration Guidelines

ASSOCIATE OF Arts or Associate of SCIENCE IN BUSINESS, MANAGEMENT AND ECONOMICS WITH A CONCENTRATION IN ACCOUNTING

These guidelines for an Associate of Science in the area of study of Business, Management and Economics (BME) with a concentration in accounting is intended to provide a framework for students who seek an associate degree in this field. Whether this associate degree would be for purposes of obtaining an entry level clerical positions as a standalone degree, or a pathway toward a Bachelor of Science degree in Accounting (https://catalog.sunyempire.edu/undergraduate/areas-study-degrees-certificates/bs-accounting/) or BME (BS/BPS) degree program with Concentration in Accounting Practices, (p. 30) the degree provides students with a sense of accomplishment by dividing the long-term goal, towards the bachelor's degree, and then graduate programs, into short-term goals that results in an Empire State University degree. Students can then nest the associate degree into a Bachelor of Science in accounting, or a different type of bachelor's degree in BME It is also

intended to support students who are interested in exploring the field of accounting, to determine if a longer-term career goal (and corresponding preparation with a bachelor's degree, and/or master's degree) is suitable. The degree also provides students who already have work experience in accounting, to obtain a SUNY Empire degree, therefore strengthening their academic credentials and expanding their job horizons.

WHERE YOU MAY BE PLACED IN A JOB MARKET WITH AN ASSOCIATE DEGREE IN BME WITH A CONCENTRATION IN ACCOUNTING?

Students who obtain an associate degree in BME with a concentration in accounting strengthen their ability to obtain entry level bookkeeping or accounting clerk positions. Employers require a foundational knowledge of accounting. Moreover, having an associate degree may qualify someone to apply for Certified Public Bookkeeper (CPB) license, which is accredited by the **National Association of Certified Public Bookkeepers (NACPB).** The license is recognized throughout the United States and its properties. Please see **Certified Public Bookkeeper (CPB) License**. In addition, holding an associate degree, may qualify someone for a **Certified Accounting Paraprofessional (CAP) license**, which is accredited by the **National Association of Certified Accounting Paraprofessionals (NACAP)**. It is recognized throughout the United States and its properties. These licenses enhance one's credibility and job prospects in the field. While an associate degree strengthens one's credentials, it does not guarantee that one will successfully obtain the CPB or CAP licensure or a particular job.

RECOMMENDED GUIDELINES FOR AN A.S. IN BME WITH A CONCENTRATION IN ACCOUNTING

The recommended guidelines for the associate degree follow the same requirements for any associates at SUNY Empire. These requirements include thirty-two credits for liberal arts courses and thirty credits across 7 SUNY General Education requirements. Associate degrees in BME with a concentration in accounting must include a minimum of 15-16 credits in accounting. Most of SUNY Empire courses are four credits. Many students bring community college courses, which are often three credits. Transfer credits for accounting courses that are equivalent to SUNY Empire accounting courses, will be considered as part of the minimum accounting course requirement. For example, if a student has a three credit Introductory Accounting I: Financial Accounting course from a community college, that course counts toward the accounting requirements [If equivalent contents]. These guidelines pertain to an associate degree, therefore, there is no advanced level credit requirement. Below is a sample of course requirements for an Associate of Science in BME with a concentration in accounting.

Sample of course requirements.

- General Education coursework (24 credits - liberal)
- Statistics (4 credits - Gen. Ed. Math - liberal)
- Total Credits (36 liberal, twenty-eight non-liberal)
- Macro or Micro-Economics (4 credits - Gen. Ed. Social Science - liberal)
- Educational Planning (4 credits - liberal)
- Legal Environment of Business or Business Law I (4 credits)
- Organizational Behavior or equivalent (4 credits)
- Introductory Accounting I: Financial Accounting (4 credits)
- Introductory Accounting II: Managerial Accounting (4 credits)
- Intermediate Accounting I (4 credits)
- Select at least one of the following (4 credits):

- Intermediate Accounting II
- Federal Income Tax I
- Cost Accounting
- Accounting Information Systems
- Elective
- Total Credits (36 liberal, twenty-eight non-liberal)

Students interested in pursuing a degree towards the Certified Public Accountant (CPA) career, may be eligible to join directly- upon completing the associate degree - the Dual Degree **registered CPA Licensure Qualifying program; BS in Accounting/MBA Business Management Dual Program** [Nine credits are cross counted towards both the bachelor's and Master's degrees]. This program is listed among the licensure-qualifying programs by **the NYS Education Department's Inventory of Registered Programs CPA 150** and **CPA 150E.**

Upon completing 60-cr with GPA average 3.2 or higher, students may enroll in the Combined program BS/BPS BME/MBA [twelve credits are cross counted towards both the bachelor's and Master's degrees], **BS/ BPS In BME Concentration Accounting Practices/MBA Business Management program**. Each program awards a bachelor's degree upon its completion while working towards the achievement of the master's degree and provides a substantial cost saving taking cross-listed graduate courses at undergraduate tuition rate per course. No requirements for a concurred degree plan.

Students pursuing a career to a bachelor's degree may be eligible to enroll in some graduate courses [nine credits] while undergraduate (https://www.sunyempire.edu/registrar/forms-services/undergrad-enrollment-grad-courses/). It is an opportunity for cost saving and advancement to a graduate program when completing the bachelor's degree. An undergraduate student must be within thirty-two (32) credits of completing a bachelor's degree and must have a concurred degree program.

Business, Management and Economics: B.A., B.S., B.P.S.

As students of Business, Management and Economics you will investigate the world of accounting, business administration, economics, finance, human resources, information systems, international business, labor relations, management, marketing, and public administration. Students will develop analytical, management, communication, and quantitative skills, increase understanding of economic principles and disciplinary methods and learn about the effective use of information technologies to support career or personal goals and aspirations.

Degree programs in Business, Management and Economics offer students the opportunity to develop individualized degree plans based on their intellectual, professional, and personal interests. General program guidelines can be found on the "Program Details" tab, and students will work with an academic mentor to choose courses that meet the guidelines and address each student's individual interests. Students can also work with their academic mentors to identify applicable transfer credit, prior college-level learning, and possible course equivalencies. Working with a mentor and using SUNY Empire's educational planning process, students can develop a specialized concentration in Business, Management and Economics by following the general program guidelines as well as any applicable concentration guidelines. Students may also develop their own concentrations.

For more information about general undergraduate degree requirements, please visit Earning an Undergraduate Degree (p. 185).

For sample degree programs and other degree planning resources, please visit the Department of Accounting, Economics and Finance (https://www.sunyempire.edu/accounting-economics-finance/degree-planning-resources/), Department of Management and Human Resource Management (https://www.sunyempire.edu/management/degree-planning-resources/), or Department of Business, International Business and Marketing (https://www.sunyempire.edu/business-international-business-marketing/degree-planning-resources/) Degree Planning Resources web pages.

For more information about Business, Management and Economics, please visit the School of Business web site (https://www.sunyempire.edu/undergraduate-studies/school-business/).

Program Details

Business, Management and Economics programs are expected to meet the University Learning Goals (https://www.sunyempire.edu/policies/?search=cid%3D61278), which include active learning, breadth and depth of knowledge, social responsibility, communication skills, critical thinking and problem-solving skills, quantitative literacy, information and digital media literacy.

Academic Planning takes the form of a course (commonly but not exclusively referred to as "Educational Planning") wherein students develop a degree plan and rationale essay with their primary faculty advisor/mentor.

In their degree programs and rationale essays, students must address the BM&E Area of Study general guidelines and then the concentration guidelines, the registered program guidelines, or the individualized concentration they develop in consultation with their primary mentor.

Programs in Business, Management and Economics include the following seven foundations:

1. Communications Skills
2. Information Management
3. Economics
4. Ethical and Social Responsibility
5. Quantitative Skills
6. Understanding People in a Broader Context
7. Understanding Organizations within Broader Context

These foundations may be met through transcript credit; college-level knowledge demonstrated through individual prior learning assessment (iPLA), professional learning evaluations (PLE), or credit by examination; or individual courses, a series of courses, or components within individual courses with Empire State University. The student's **Degree Plan Rationale Essay** should clearly explain how the degree plan meets each of the foundations in the Area of Study, what will be learned, and how the student will build on these foundations to meet personal, academic, or career goals. For details about the academic planning process and requirements, please see the Student Degree Planning Guide (https://www.sunyempire.edu/degree-planning-academic-review/degree-program/student-degree-planning-guide/).

BACHELOR OF ARTS (BA), BACHELOR OF SCIENCE (BS) AND BACHELOR OF PROFESSIONAL STUDIES (BPS)

Students must meet **all seven** foundations. Below are courses that will meet each foundation.

Foundation #1: COMMUNICATION SKILLS

Code	Title	Credits
ACCT 3015	Federal Income Tax I: Individual Income Tax	4
ACCT 3020	Federal Income Tax II: Business Income Tax	4

Learning Outcomes

- Foundation 1: Communication Skills; Students will be able to identify and apply appropriate basic communications skills necessary to successfully function in an organizational environment. At a minimum, students should have acquired the competencies in a course such as English Composition that meet SUNY General Education requirements for Basic Communication.
- Foundation 2: Information Management; Students will be able to use information technology tools and systems to collect, manage, and analyze data for decision making relevant to the business environment. Studies can be introductory or advanced level but must be beyond basic computer applications.
- Foundation 3: Economics; Students will be able to solve economic problems using appropriate economic principles and concepts and analytical models.
- Foundation 4: Ethical and Social Responsibility; Students will be able to examine, explain or apply moral theories, ethical standards and social responsibilities in the business environment.
- Foundation 5: Quantitative Skills; Students will be able to demonstrate an understanding of quantitative reasoning and analytical tools and an ability to apply these tools to problems in the business environment.

- Foundation 6: Understanding People in an Organizational Context; Students will be able to examine and reflect on organizational culture and apply the concepts that explain how individuals and groups behave in the organization.
- Foundation 7: Understanding Organizations Within Broader Context; Students will be able to evaluate challenges to organizations in a complex and changing world by describing the strategic impact of diversity, political, International, technological or environmental issues in the business environment.

Concentration Guidelines

Specific guidelines have been developed for concentrations in the following areas:

- Accounting Practices, Bachelor (p. 30) - & **Pathways to the graduate studies & CPA 150/150E Educational Requirements**
- **Economics (p. 33)**
- Finance (p. 34)
- Information Systems (p. 35)
- International Business (p. 37)
- Labor Relations (p. 38)
- Marketing (p. 39)
- Public Administration (p. 40)

If you are interested in an area not listed here, please contact your mentor about designing your own concentration.

Accounting Practices - For students matriculated beginning Spring 2019 Under — AOS Guidelines: Business, Management and Economics
Degree Options

Empire State University offers a Bachelor of Science in Business, Management and Economics (BME) with a concentration in Accounting Practices. Students who choose accounting practice as a concentration can select, but are not limited to, from the following options: Accounting Practices: Financial Accounting; Accounting Practices: Managerial Accounting; Accounting Practices: Governmental and Not-for-Profit Organizations; Accounting Practices: Forensic Accounting; Accounting Practices: Internal Auditing. Empire State University also offers a **B.S. in Accounting** degree program, which is a pathway to the registered NYS CPA licensure qualifying program. (p. 17)

An Empire State University B.S. degree with a concentration in Accounting Practices enables students to design and pursue a degree program that is tailored toward their accounting career goals and objectives. Through the educational planning process, the student should examine which degree meets their intended career path.

Information on Career Options in Accounting

There are various employment opportunities and professional licenses or certificates in the public, private and nonprofit sectors, which require specific coursework. Accordingly, it is the students' responsibility, in designing the degree plan, to check with their state board and professional associations regarding the current requirements for any professional designations they are interested in pursuing. In general, being an accountant does not require state CPA licensing or professional certification unless the student is interested in pursuing work in public accountancy as a certified public accountant. However,

obtaining the CPA license and/or other accounting certificates (Such as Certified Management Accountant (https://www.imanet.org/IMA-Certifications/CMA-Certification/), Certified Fraud Examiners (https://www.acfe.com/), Certified Internal Auditor (https://www.theiia.org/en/certifications/cia/), and/or Certified Government Financial Manager (https://www.agacgfm.org/CGFM.aspx)) opens the job market widely for better opportunities.

Learning Outcomes: By the completion of the program students will be able to demonstrate:

- **General broad business competencie**s: Students will be able to identify the legal, economic, ethical, organizational, and global forces and their impact on a business environment and its sustainability and continuity.
- **Accounting and professional competencies**: Students will be able to apply accounting theory and professional standards dealing with specific topics in accounting that demand distinctive in-depth study and define the applicable accounting principles and standards for various industries and businesses' forms.
- **Higher level of professional functional competencies**: Students will be able to apply accounting principles to a more complex business forms, and utilize technology, demonstrating a higher level of financial reporting and demonstrate their professional skepticism to risk management.

BME GUIDELINES

A BME degree plan in any of the Accounting Practices' concentrations is expected to satisfy the general guidelines for the Business, Management and Economics Area of Study.

ACCOUNTING PRACTICES CORE COURSES

The following are the foundation core courses (or equivalent) for a concentration in Accounting Practices (Transfer underline equivalent classes must be a minimum of three credits in any topic and may be at low-level). Concentration is Accounting Practices must include 24-cr. upper level in accounting, including Advanced Accounting, one of the two Federal Income Taxes, Accounting Information Systems, and Auditing.

Code	Title	Credits
ACCT 2005	Introductory Accounting I: Financial Accounting	4
ACCT 2010	Introductory Accounting II: Managerial Accounting	4
ACCT 3025	Intermediate Accounting I	4
ACCT 3030	Intermediate Accounting II	4
ACCT 4005	Accounting Information Systems	4
One of the following:		4
BUSN 1010	Business Law I	
One of the following:		4
MATH 1065	Statistics	
Or		
BUSN 2010	Business Statistics	
One of the following:		4
ECON 2015	Macroeconomics	
Or		
ECON 2020	Microeconomics	
MGMT 3060	Organizational Behavior	4

Accounting Practices Concentrations
Accounting Practices: Financial Accounting
Financial accounting career focuses on understanding various accounting and industries practices. This includes, but is not limited to understanding accounting cycle, external financial reporting, financial statements analysis, and tax preparation for various forms of businesses.

In addition to Accounting Practices Core Courses, students are expected to take the following courses:

Code	Title	Credits
ACCT 3010	Cost Accounting	4
ACCT 4010	Advanced Accounting	4
ACCT 3015	Federal Income Tax I: Individual Income Tax	4
ACCT 4015	Auditing (Auditing must be upper-level course.)	4
ACCT 3020	Federal Income Tax II: Business Income Tax (Recommended, yet optional.)	4
FSMA 3010	Corporate Finance	4

Accounting Practices: Management Accounting
Students may choose to pursue a career in management accounting. Management accountants are strategic financial-management professionals who integrate accounting expertise with advanced management skills to drive business performance inside organizations. Management accountants monitor, interpret and communicate operating results, evaluate performance, control operations, and make decisions about the strategic direction of the organization.

In addition to Accounting Practices Core Courses, students are expected to take the following courses:

Code	Title	Credits
ACCT 3010	Cost Accounting	4
ACCT 4010	Advanced Accounting	4
ACCT 3015	Federal Income Tax I: Individual Income Tax	4
FSMA 3010	Corporate Finance	4
In addition to two (2) of the following courses:		8
BUSN 3127	Business Analytics	
MGMT 4035	Strategic Management	
MRKT 1005	Marketing Principles	
MATH 4020	Quantitative Methods for Management	
INFT 3005	Data Analytics	

Accounting Practices: Governmental and Not-For Profit
Governmental and Not-for-Profit Accountants perform similar tasks as financial/corporate accountants but in the public sector. This includes, but is not limited to, not-for-profit organizations, voluntary health and welfare organizations, colleges and universities, religious and charity organizations, and federal, state, and local governmental agencies.

In addition to the Accounting Practice Core Courses, students are expected to take the following courses:

Code	Title	Credits
ACCT 3010	Cost Accounting	4
ACCT 4015	Auditing	4
ACCT 3005	Accounting For Governmental & Not-For-Profit Organizations	4
ECON 3100	Public Finance	4

In addition to two (2) of the following courses:

ACCT 3035	Principles of Fraud Examination & Financial Forensics
MGMT 3045	Not-For-Profit Management
PAFF 3137	Managing Municipal Government
PAFF 2122	Introduction to Public Administration
POLI 2005	New York State & Local Government

Accounting Practices: Forensic Accounting

Forensic accounting is a vast growing practice professional career in accounting. Forensic accountants work in the areas of fraud: examination, prevention, detection, deterrence, and investigation. They are considered investigative auditors. Forensic accountants perform a full range of tasks from diagnostic analysis to consulting and serving as expert-witnesses in various litigations.

In addition to the Accounting Practice Core Courses, students are expected to take the following courses:

Code	Title	Credits
ACCT 4010	Advanced Accounting	4
ACCT 3015	Federal Income Tax I: Individual Income Tax	4
ACCT 4015	Auditing	4
ACCT 3035	Principles of Fraud Examination & Financial Forensics	4
FSMA 3010	Corporate Finance	4
In addition to two (2) of the following courses:		8
BUSN 3127	Business Analytics	
INFT 3020	Cyber Crime & Computer Forensics	
PSYC 4080	Forensic Psychology	
INFT 3010	Advanced Digital Crime & Digital Terrorism	
CRJS 3020	Law Enforcement Intelligence Analysis	
INFT 4010	Data Analytics & Data Mining	

Accounting Practices: Internal Auditing

Students may choose the practice of internal auditor, who is an employee of the business, as opposed to an external auditor (CPA). Internal auditors evaluate risk exposures relevant to an organization and governance's structure, effectiveness and efficiency of its operations, reliability of its internal control procedures, integrity of the accounting information system, and compliance with laws, regulations, and contracts.

In addition to the Accounting Practice Core Courses, students are expected to take the following courses:

Code	Title	Credits
ACCT 4010	Advanced Accounting	4
ACCT 3015	Federal Income Tax I: Individual Income Tax	4
ACCT 4015	Auditing	4
ACCT 3020	Federal Income Tax II: Business Income Tax (Recommended, yet optional.)	4
FSMA 3010	Corporate Finance	4
ACCT 3035	Principles of Fraud Examination & Financial Forensics	4

PATHWAYS TO THE CPA & Graduate STudies

An Empire State University bachelor's degree – whether it is the B.S. in Accounting (https://catalog.sunyempire.edu/undergraduate/areas-study-degrees-certificates/bs-accounting/), (p. 7) or the B.S./B.P.S. in BME with an Accounting Practices concentration (https://catalog.esc.edu/undergraduate/areas-study-degrees-certificates/areas-study-concentration-guidelines/business-management-economics/#Practices) -- its total credits is less than the minimum 150-credits total educational requirements for the CPA 150/150E licensure. (https://www.op.nysed.gov/professions/certified-public-accountants/initial-license-requirements/) Therefore, students must sign an Accounting Certification Disclaimer (https://www.sunyempire.edu/media/academic-affairs/aos/Accounting-Certificate-Disclaimer-9.4.2018ADA.pdf) indicating that they understand this total credits requirements.

Students interested in pursuing a career in Public Accountancy as (CPA) or in graduate studies may follow any of the following pathways [cost and time saving opportunity]

1. Students may complete the additional credits necessary to meet the 150-credit hour educational requirement, and its distribution (https://www.op.nysed.gov/professions/certified-public-accountants/initial-license-requirements/), through graduate and/or undergraduate courses. For information on the NYS Public Accountancy requirements, go to New York State Education Department's Public Accountancy web page (https://www.op.nysed.gov/certified-public-accountants/). Students may enroll in three (9-cr.) graduate courses while they are undergraduates (https://www.sunyempire.edu/registrar/forms-services/undergrad-enrollment-grad-courses/). Refer to the policy (https://catalog.sunyempire.edu/undergraduate/academic-policies-procedures/undergraduate-enrollment-graduate-courses/). Students pay undergraduate tuition fees for these courses. This is a wonderful way to save time and money. The undergraduate student must be within thirty-two (32) credits of completing a bachelor's degree and must have a concurred degree program.

2. Students may enroll directly in the Combined program (https://sunyempire.edu/graduate-studies/combined-programs/) where they may combine the BS/BPS in BME Concentration Accounting Practices (https://catalog.esc.edu/undergraduate/areas-study-degrees-certificates/areas-study-concentration-guidelines/business-management-economics/#Practices) with the MBA Business Management program (https://www.sunyempire.edu/graduate-studies/combined-programs/). Students must plan their degree early in their career to benefit from the four cross-registered graduate courses that would satisfy both requirements for the Accounting Practices concentration & MBA. Students may enroll in up to four courses. The Combined Program (https://www.sunyempire.edu/graduate-studies/combined-programs/) may be completed at 148-cr. [Bachelor + Master]. However, students must be cognizant of the total educational credits' requirements for the CPA 150-cr. Students must complete any missing credits below 150-cr. if they are planning to apply for the CPA license. Students do not have to have a concurred degree program to apply for a combined program. At the time of their application, if students meet the following criteria, then they are officially accepted: * 3.2 GPA in the most recent 60 credits, * completed between 60 - 92 credits (SUNY Empire + non-SUNY Empire), and * completed the prerequisite courses in accounting, statistics, macroeconomics, and microeconomics with a C or better grade. If the students have **less than 60 credits** at the time of their applications, then they are **conditionally accepted to the program if they have a minimum GPA of 3.2 in the credits they completed**. They will be continuously monitored until they complete at least sixty credits and the program prerequisites. If their GPA goes below 3.2 during their conditional acceptance, then they will be dismissed from the program. Officially admitted students can start taking graduate courses. There is no monitoring after official acceptance. After this

point, students must meet graduate expectations for academic progress and grade point average in their master's level courses to remain in the combined degree pathway.

3. Students may switch (if eligible) to **the (https://www.sunyempire.edu/graduate-studies/combined-programs/dual-degree-bs-accounting-mba-business-management/)Dual Degree (https://catalog.esc.edu/graduate/programs/bs-accounting-mba-combined-pathway/) registered 150/150E [Evolution] (NYS) CPA Licensure Qualifying program (https://catalog.esc.edu/graduate/programs/bs-accounting-mba-combined-pathway/);** BS in Accounting (p. 7)/ (p. 7)MBA Business Management. (https://catalog.esc.edu/graduate/programs/bs-accounting-mba-combined-pathway/) The program requires 152 credits total, 36 of which are master's credits leading to the MBA in Business Management. Students do not have to have a concurred degree program to apply for the Dual Program. Students must plan their degree early in their career to benefit from the three cross-registered graduate courses that would satisfy both the BS in Accounting & MBA. The Dual program is listed among the licensure-qualifying programs by **the NYS Education Department's inventory of Registered Programs CPA 150** and **CPA 150E.** At the time of their application, if students meet the following criteria, then they are officially accepted: * 3.2 GPA in the most recent 60 credits, * completed between 60 - 92 credits (SUNY Empire + non-SUNY Empire), and * completed the prerequisite courses in accounting, statistics, macroeconomics, and microeconomics with a C or better grade. If the students have **less than 60 credits** at the time of their applications, then they are **conditionally accepted to the program if they have a minimum GPA of 3.2 in the credits they completed**. They will be continuously monitored until they complete at least sixty credits and the program prerequisites. If their GPA goes below 3.2 during their conditional acceptance, then they will be dismissed from the program. Officially admitted students can start taking graduate courses. There is no monitoring after official acceptance. After this point, students must meet graduate expectations for academic progress and grade point average in their master's level courses to remain in the combined degree pathway.

- MGMT 6020 Leadership & Executive Development, 3c r = UG MGMT 3060 Organizational Behavior
- MGMT 6025 Strategic Perspectives of Global Management, 3cr = UG Business Elective
- MGMT 6075 International Financial Management, 3cr = UG FSMA 3010 Corporate Finance

The three elective courses in the MBA program replaced by the required three courses for the Dual Program: 1- FSMA 6060 Strategic Cost Analysis, 3cr, 2- FSMA 6080 International Accounting, 3cr, and 3- APAN 6025 Applied Management Analytics.

*Contact School of Graduate Studies: Dr. Joseph Angiello.

Economics Concentration For Students Matriculated After Jan. 1, 2020

BACKGROUND

A focus on economics within the Business, Management and Economics Area of Study deals with how people make choices and organize production, distribution and consumption of goods and services.

A concentration in economics provides a foundation for employment in a wide range of fields, including teaching, business research, policy analysis, government service, banking, insurance, and general business. All require a solid theoretical base and ability to analyze data. Therefore, a blend of theoretical and applied studies is advisable.

All concentrations in economics should reflect a progression of studies from the introductory to the advanced level, which respond to the student's own personal, academic, and professional goals. They can cover a range of possibilities such as (a) a purely theoretical orientation, especially for those interested in graduate study; (b) an applied orientation for those whose interest is in working in industry; and (c) a policy orientation for those who wish to pursue careers with the government.

FOUNDATION

Students will develop an understanding of the language of macroeconomics; the structure of the aggregate economy; the roles and impacts of government and institutions on the economy; tools of fiscal and monetary policy; an ability to use algebraic graphical analysis in problem solving; and the ability to apply these concepts to the real world. This would normally be accomplished in a study of Principles of Macroeconomics or equivalent study.

Students will develop an understanding of the language of microeconomics; roles of economic decision making at the individual and firm level; an ability to use graphical analysis in problem solving; and the ability to identify an appropriate concept for application and reason through to logical conclusions. This would normally be accomplished in a study of Principles of Microeconomics or equivalent study.

The study of economics requires facility with algebra, statistics (including probability) and one semester of calculus. Building on the vocabulary and concepts learned at the introductory level, as well as facility with the tools learned in algebra, statistics and calculus, students must deepen their understanding of both macroeconomics and microeconomics.

ADVANCED

At the advanced level, students will demonstrate increasing levels of sophistication in solving problems as well as becoming familiar with professional literature. Tools for analysis include both calculus and more advanced graphical analysis, as well as a deeper understanding of theory. Students typically gain this knowledge in studies of Intermediate Macroeconomics and Intermediate Microeconomics.

To both understand the economics literature and apply economic concepts to real-world data, students must study data analysis at the advanced level (e.g., econometrics; financial data analysis; advanced statistics; or forecasting).

Students are expected to demonstrate that they can apply sophisticated analysis to a broad range of fields. They will do this by including at least three additional advanced level studies in economics. These studies must be distributed across different fields of economics. (Including, but not limited to: International Economics, Behavioral Economics, Labor Economics, Economics of Gender, Work & Family, Environmental Economics and Policy, Ecological Economics, Healthcare Economics, History of Economic Thought, Industrial Organization, Applied Economics, Money and Banking, International Political Economy. Students may wish to add focus to one or more fields by adding additional advanced level studies.

Students pursuing Economics Concentration under Business Management and Economics must satisfy the Business, Management & Economics Area of Study Guidelines under the "Program Details" tab.

For more information on careers and fields of study, students may wish to consult the **American Economic Association**

PATHWAYS TO THE GRADUATE PROGRAMS:

Students may follow any of the following pathways [cost and time saving opportunity] to the graduate programs:

1.   Students may **enroll in graduate courses while they are still undergraduates**, by selecting three (9-cr.) graduate courses that may be equivalent to undergraduate required courses and/or electives.   Students pay undergraduate tuition fees for these courses. This is a wonderful way to save time and money. The undergraduate student must be within thirty-two (32) credits of completing a bachelor's degree and must have a concurred degree program.

2.   Students may enroll directly, in Combined Program (http://catalog.sunyempire.edu/undergraduate/areas-study-degrees-certificates/areas-study-concentration-guidelines/business-management-economics/Combined Bachelor's/Master's Degrees | Empire State University (sunyempire.edu) where students may combine the **BS/BPS/BA In BME Economics Concentration** with the MBA Business Management program (https://www.sunyempire.edu/graduate-studies/combined-programs/). Students must plan their degree early in their career to benefit from the four cross-registered graduate courses that would satisfy both equirements for the Economics concentration & MBA. Students may enroll in up to four courses. The Combined Program (https://www.sunyempire.edu/graduate-studies/combined-programs/) may be completed at 148-cr. [Bachelor + Master]. Students do not have to have a concurred degree program to apply for a combined program. At the time of their application, if students meet the following criteria, then they are officially accepted: * 3.2 GPA in the most recent 60 credits, * completed between 60 - 92 credits (SUNY Empire + non-SUNY Empire), and * completed the prerequisite courses in accounting, statistics, macroeconomics, and microeconomics with a C or better grade. If the students have **less than 60 credits** at the time of their applications, then they are **conditionally accepted to the program if they have a minimum GPA of 3.2 in the credits they completed**. They will be continuously monitored until they complete at least sixty credits and the program prerequisites. If their GPA goes below 3.2 during their conditional acceptance, then they will be dismissed from the program. Officially admitted students can start taking graduate courses. There is no monitoring after official acceptance. After this point, students must meet graduate expectations for academic progress and grade point average in their master's level courses to remain in the combined degree pathway.

Finance Concentration For Students Matriculated After Jan. 1., 2020

BACKGROUND

Finance is a branch of applied economics which studies monetary and financial decision making under conditions of risk and uncertainty. Firms and investors utilize various instruments and institutions to manage the transfer of funds from those who save to those who invest in regulated markets.

CONCENTRATION

- The concentration in Finance encompasses key principles in Macroeconomics and Microeconomics, Financial and Managerial Accounting, and Business Law, among other relevant courses. It emphasizes problem-solving through quantitative methods, including statistical analysis and calculus.
- The core of finance involves activities such as assessing, analyzing, and securing the necessary financial resources for businesses (profit or non-profit) and individuals. This process is influenced by various environmental factors like political, economic, legal, informational, and social elements, requiring the use of diverse quantitative analytical methods. Students learn to evaluate a business's financial performance and recommend strategies for obtaining financial resources, through courses like Corporate Finance and Financial Management.
- Further, the curriculum delves into financial instruments, investment valuation, and risk management, offering courses like Investment Management or Security Analysis and Portfolio Management. Understanding the dynamics, structure, and regulations of the financial market is essential, particularly for courses like Money and Banking or Financial Markets and Institutions.
- The program also covers international aspects, focusing on global trade, economics, and financial activities of various organizations. It stresses the importance of understanding international financial laws and regulations, as well as risk hedging techniques, as seen in the International Finance course.
- Lastly, financial software and electronic spreadsheets are integral to the curriculum, requiring advanced quantitative skills. Courses like Econometrics, Quantitative Methods for Management, or Business Analytics are part of this focus.

CAREER PATHS

There are various career opportunities in finance. Among them are:

- Working within a corporate financial structure.
- Theoretical analyzer of finance.
- Financial professions as an investment banker or trader.
- Public finance professional.
- Wealth management advisor.

For students wishing to study finance as a path to corporate management, many of the studies in management or business administration concentrations (such as accounting, strategic management, and leadership) are also appropriate. Other students may wish to focus more on the theory of finance and would find additional studies in economics, corporate finance, portfolio theory and research methods appropriate. Those interested in pursuing a "Wall Street" path, may consider international accounting, federal income taxes, financial risk analysis, data analytics, and symbolic logic, or equivalent studies.

Students pursuing Finance Concentration under Business Management and Economics must satisfy the Business, Management & Economics Area of Study Guidelines under the "Program Details" tab.

Students who are interested in Certified Financial Planner professional may consult with the **CFP Board**.

Students who are interested in Chartered Financial Analyst may consult with the **CFA Institute**.

PATHWAYS TO THE GRADUATE PROGRAMS:

Students may follow any of the following pathways [cost saving opportunity] to the graduate programs:

1. Students may **enroll in graduate courses while they are still undergraduates**, by selecting three graduate courses (9-cr.) that may be equivalent to undergraduate required courses and/or electives. Students pay undergraduate tuition fees for these courses. This is a wonderful way to save time and money. The undergraduate student must be within thirty-two (32) credits of completing a bachelor's degree and must have a concurred degree program.

2. Students may enroll directly, in Combined Program (http://catalog.sunyempire.edu/undergraduate/areas-study-degrees-certificates/areas-study-concentration-guidelines/business-management-economics/Combined Bachelor's/Master's Degrees | Empire State University (sunyempire.edu) where students may combine the **BS/BPS/BA In BME Finance Concentration** with the MBA Business Management program (https://www.sunyempire.edu/graduate-studies/combined-programs/). Students must plan their degree early in their career to benefit from the four cross-registered graduate courses that would satisfy both requirements for the Finance concentration & MBA. Students may enroll in up to four courses. The Combined Program (https://www.sunyempire.edu/graduate-studies/combined-programs/) may be completed at 148-cr. [Bachelor + Master]. Students do not have to have a concurred degree program to apply for a combined program. At the time of their application, if students meet the following criteria, then they are officially accepted: * 3.2 GPA in the most recent 60 credits, * completed between 60 - 92 credits (SUNY Empire + non-SUNY Empire), and * completed the prerequisite courses in accounting, statistics, macroeconomics, and microeconomics with a C or better grade. If the students have **less than 60 credits** at the time of their applications, then they are **conditionally accepted to the program if they have a minimum GPA of 3.2 in the credits they completed**. They will be continuously monitored until they complete at least sixty credits and the program prerequisites. If their GPA goes below 3.2 during their conditional acceptance, then they will be dismissed from the program. Officially admitted students can start taking graduate courses. There is no monitoring after official acceptance. After this point, students must meet graduate expectations for academic progress and grade point average in their master's level courses to remain in the combined degree pathway.

Information Systems Concentration Guidelines For Students Matriculated Effective Sept. 1, 2015
Statements
ABOUT INFORMATION SYSTEMS
Information systems specialists focus on integrating information technology solutions and business processes to meet the information needs of businesses and other enterprises, enabling them to achieve their objectives in an effective, efficient way. This discipline's perspective on information technology emphasizes information and views technology as an instrument for generating, processing, and distributing information. Professionals in the discipline are primarily concerned with the information that computer systems can provide an enterprise to aid in defining and achieving its goals and the processes that an enterprise can implement or improve using information technology. Students of IS must understand both technical and organizational factors and they must be able to help an organization determine how information and technology-enabled business processes can provide a competitive advantage.

"The information systems specialist plays a key role in determining the requirements for an organization's information systems and is active in their specification, design, and implementation. As a result, such professionals require a sound understanding of organizational principles and practices so that they can serve as an effective bridge between the technical and management communities within an organization, enabling them to work in harmony to ensure that the organization has the information and the systems it needs to support its operations. Information systems professionals are also involved in designing technology-based organizational communication and collaboration systems."' (Computing Curricula 2005, p. 14).

Our guiding authority for this document is Computing Curricula 2005 and the IS 2010 Body of Knowledge. This joint effort by the Association for Computing Machinery (ACM), the Association for Information Systems (AIS) and The Computer Society (IEEE-CS) includes current curricular recommendations from the leading professional organizations in the computing fields. Students should read Computing Curricula 2005 to understand how computing disciplines are related. It is important for students to think carefully about their primary interests. Information systems, as a disciplinary concentration, would not be the best choice for someone primarily interested in computing infrastructure needs of the organization; for such individuals, a concentration in information technology would be more appropriate. On the other hand, students interested primarily in the abstract, theoretical concepts of computing would be better served by a concentration in computer science.

There are, of course, many ways to approach information systems. Many professionals and educators have tried to identify different approaches by adding adjectives, which has led to terms such as "management information systems" and "computer information systems." The general understanding was that MIS would be more focused on the management aspects, while CIS focused on the technical aspects. However, as the area has developed, the differentiation between the managerial and the technical has certainly blurred. These guidelines have, therefore, adopted the more general title of "Information Systems," but they apply to both of those titles as well. Similarly, titles such as "Information Systems Management" also cover the same content.

At Empire State University, the variation among degrees in information systems occurs with the identification of the area of study. Each student must design a degree program that meets the general guidelines for an area of study. The information systems curricular guidelines represent a common core of knowledge, which any information systems degree will contain within those general guidelines. Students who are interested in information systems within the business and managerial perspective might find it appropriate to place their concentration within the Business Management and Economics area of study, while students who are interested in the technological perspective might find it appropriate to place their concentration within the Science, Mathematics and Technology area of study (or, if they are seeking the narrower BPS, this would be done as a concentration within the registered program Technology). All students should make sure that the degree they are interested in is appropriate for their future career and education goals.

FOUNDATION

Communication: All students should already have (or develop) skills and confidence with communication, particularly communicating in writing. Technical communication, which is the specialty of communicating technical information, is of value to individuals in this field.

Quantitative reasoning: Students must develop their quantitative reasoning and mathematical skills. At the most basic level, students should have the facility with statistics to support in-depth analysis of data. Typically, to be prepared for a course in statistics, students should have facility with algebra.

The choice of mathematical subject matter for development of quantitative reasoning will depend on the student's background and interest. It should be recognized that, as a part of these studies and any other work in mathematics, students should develop skill and confidence with the interpretation of material containing quantitative information and mathematical symbols, and they should have (or develop) an ability to express ideas using mathematical symbols and language. That is, it is important to be able to articulate an understanding of mathematics, not just be able to do calculations.

SMT students must develop their quantitative reasoning and mathematical skills in areas such as discrete mathematics. Discrete mathematics supports algorithmic thinking, and such study would cover logic, the concept of complexity, introduction to methods of proof and graph theory. Typically, students need facility in the knowledge gained from pre-calculus to have a strong experience in discrete mathematics.

BME students would benefit from a study in advanced quantitative methods for management, which includes topics such as decision making under uncertainty and linear programming and applications of regression analysis in management.

INFORMATION TECHNOLOGY

Foundational learning in IT: SMT students should already have (or develop) an understanding of programming, not just coding. This involves using problem solving with logic. BME students should understand the fundamentals of computing in organizations and the use of information systems in organizations.

Databases: Students should also demonstrate an understanding of data modeling, database programming and basic database administration concepts at the enterprise-scale.

IT infrastructure: Students should be familiar with the technical foundations of information systems. This typically includes knowledge of operating systems and networks. Students are expected to be able to explain the capabilities and limitations of different networking devices. Students have a clear understanding of diverse types of networks and network protocols, layers, standards, and topologies. Students can explain the benefits of small office/home office (SOHO) networks and the technology requirements essential to install, configure and maintain them. Students should be prepared to keep up with new developments in the networking field. For BME students, their understanding of IT infrastructure should include the technologies of e-commerce.

Security: Students can describe d types of security risks and threats against networks and information assets and have basic knowledge in designing secure systems and detecting and mitigating threats to the systems.

PROFESSIONAL BEHAVIOR AND RESPONSIBILITIES

Professional, legal, and ethical i: Students must understand their ethical, social, and professional responsibilities as information systems professionals. This would typically include analysis of professional roles and responsibilities, exploration of major categories of issues, and identification of ethical issues and value conflicts, analysis and evaluation of claims using ethical frameworks. For SMT students, this also should include analysis of the context for the technological system, including recognizing the organizational and legal context and identifying the stakeholders.

Organizational understanding and professional behavior: Students should develop an understanding of how individuals and group's function or behave in organizations. It is expected that students will develop, either through direct study or as a part of other activities, their skills in leadership, collaboration, and negotiation.

THEORY, DEVELOPMENT, AND MANAGEMENT OF SYSTEMS

Systems analysis and design: Students must include systems analysis and design as central to understanding information systems. This knowledge should encompass an understanding of the system's lifecycle along with issues in requirements definition and system implementation. This knowledge should be at an advanced level. The student should know the system analysis and design lifecycle from analyzing the business case through requirements modeling and system architecture to system operations and support and the major activities in each phase, as well as understand how the process helps address the larger organizational needs.

Project management: Students must also have skills in and knowledge of project management methodologies and skills in applying the techniques of project management. This would include the project lifecycle from planning to closing, and the key knowledge areas such as scope, cost, and time management to ensure that organizational resources are planned and deployed effectively, and that evaluation and quality are maintained in the system development process.

Information Systems in the Broader Context: Students are expected to apply the concepts of IT strategy to evaluate the organization's use of IT in the context of its overall strategy, analyze the relationships between business and IT and apply these concepts to real-world situation.

INDIVIDUAL CONTEXT

Each student brings his or her own goals and background to the study of IS. It is these goals for future study or work which will provide the context for the student's degree. Students should address their choice in the rationale.

Students in SMT should develop an appreciation for the type(s) of organization in which they work, or intend to work, as well as the interpersonal and communication skills needed to be successful in that environment. For example, a student who intends to work in government (federal, state, local) should understand bureaucracies, politics and regulations, while a student who works in a scientific research environment should understand how scientists view data, design studies, etc., and a student who works in a health care setting should include informatics as well as policy issues.

Students in BME *are expected* to understand the business context within which they will be working. As such, they need a background in at least two of the functional areas, such as accounting, finance, marketing, human resources, and operations management. Since this expectation is very dependent on the student's individual goals, it is vital that students,

in consultation with their mentor, identify their learning needs and explain their reasoning in their rationale.

CURRENCY

Information systems and the environment in which they exist are always changing. Degree programs must demonstrate currency in the field and show understanding of emerging and evolving technology and environment relevant to their individual context.

Currency can be viewed in two ways: on the one hand, currency refers to current technologies; on the other hand, currency can be seen as not obsolete. If students want to use earlier learning in their programs, they should consider several issues related to how old, how specialized, and how extensive the earlier learning is. Courses which encompass analysis, problem definition, algorithms, data structures, programming concepts and testing methodology may provide a useful foundation to explore recent developments in computer technology. Courses which are product-specific (hardware or software) may be less useful. When earlier learning is judged to provide a useful foundation within the program, students should be sure to incorporate opportunities to bridge to newer platforms or applications within their degree program.

RATIONALE

Students should explicitly discuss in their rationale essay how each of the above topics is incorporated in their degree program, how the program is designed to meet their goals and how the program meets the currency criteria discussed above. It is not necessary that the specific terms used above appear in individual study titles.

ADDITIONAL STUDIES

Students who wish to enhance their knowledge and skills might consider incorporating additional areas into their studies including human-computer interaction, which would include concepts and approaches, such as user differences, user experience and collaboration, human factors, ergonomics, accessibility issues and standards, user and task analysis and the ability to implement user-centered design and evaluation methods.

PATHWAYS TO THE GRADUATE PROGRAMS:

Students may follow any of the following pathways [cost and time saving opportunity] to the graduate programs:

1. Students may enroll in graduate courses while they are still undergraduates (https://www.sunyempire.edu/registrar/forms-services/undergrad-enrollment-grad-courses/), by selecting three graduate courses (9-cr.) that may be equivalent to undergraduate required courses and/or electives.   Students pay undergraduate tuition fees for these courses. This is a wonderful way to save time and money. The undergraduate student must be within thirty-two (32) credits of completing a bachelor's degree and must have a concurred degree program.

2. Students may enroll directly, in Combined Program (http://catalog.sunyempire.edu/undergraduate/areas-study-degrees-certificates/areas-study-concentration-guidelines/business-management-economics/Combined Bachelor's/Master's Degrees | Empire State University (sunyempire.edu) where students may combine the **BS/BPS/BA In BME Information Systems Concentration** with the MBA Business Management program (https://www.sunyempire.edu/graduate-studies/combined-programs/). Students must plan their degree early in their career to benefit from the four cross-registered graduate courses that would satisfy both requirements for the Information Systems concentration (https://catalog.sunyempire.edu/undergraduate/areas-study-degrees-certificates/areas-study-concentration-guidelines/business-management-economics/#Information) & MBA. Students may enroll in up to four courses. The Combined Program (https://www.sunyempire.edu/graduate-studies/combined-programs/) may be completed at 148-cr. [Bachelor + Master]. Students do not have to have a concurred degree program to apply for a combined program. At the time of their application, if students meet the following criteria, then they are officially accepted: * 3.2 GPA in the most recent 60 credits, * completed between 60 - 92 credits (SUNY Empire + non-SUNY Empire), and * completed the prerequisite courses in accounting, statistics, macroeconomics, and microeconomics with a C or better grade. If the students have **less than 60 credits** at the time of their applications, then they are **conditionally accepted to the program if they have a minimum GPA of 3.2 in the credits they completed**. They will be continuously monitored until they complete at least sixty credits and the program prerequisites. If their GPA goes below 3.2 during their conditional acceptance, then they will be dismissed from the program. Officially admitted students can start taking graduate courses. There is no monitoring after official acceptance. After this point, students must meet graduate expectations for academic progress and grade point average in their master's level courses to remain in the combined degree pathway.

* General Inquiry: grad@sunyempire.edu (grad@esc.edu)

International Business Concentration For Students Matriculated After July 1, 2013

For the concentration in international business, an awareness of the different sociocultural, political and legal environments in international business and the resultant consequences on international business planning and decision-making processes adopted by managers operating in that context is crucial.

Because international business concentrations may offer many diverse career opportunities, the career exploration in the research phase of degree program planning is particularly important. Many career opportunities exist in private industry, global commerce, international organizations, government, or banking, among others. In some careers, specialized knowledge specific to employers' needs may be desirable for employment (for example, banking or government work). However, for the majority of industry careers, specialized knowledge may not be required. Instead, a basic program in international business and then on-the-job experience in the industry and/or any international experience inside or outside of the home country is helpful to career progression. Students should carefully consider their employment options and expectations in the design of their degree programs. These experiences often can be complemented or enhanced through individualized learning contracts, which allow students to pursue topics relevant to their employment situations or goals.

The guidelines that follow provide guidance to a basic program in International Business. These should be augmented with additional knowledge in areas personally relevant. Students pursuing an International Business concentration should meet the General AOS Guidelines for Business, Management and Economics, and demonstrate fundamental knowledge in each of the following areas:

- economics
- management
- accounting
- marketing
- finance.

Students should demonstrate a broad-based understanding of the International Business domain through study or college-level equivalent experience in the following areas:

- international business
- international economics
- international marketing
- international finance
- international business law.

Additionally, knowledge in the following optional areas would enrich the degree plan:

- international cross-cultural management
- economic geography
- emerging markets
- ethics in a cross-cultural perspective
- global strategy
- global business history
- international accounting
- comparative political economy
- business and the state
- international organizations
- international negotiations
- international financial institutions
- international human resource management
- international relations
- comparative management
- sustainable development
- outsourcing
- globalization.

In addition, students can pursue studies with specific geographic focus or studies in international or comparative development.

A focus of the general education requirements might consider areas that could provide a foundation for and enrich the concentration. Appropriate choices include American history, world history, Western and other world civilizations, political science (world governments and U.S. government), comparative literature or world literature, art history, statistics or algebra, world philosophies and religions and a language other than English (with at least an intermediate level of competence). Depending on the world region on which the student wants to focus in his/her career, theme-based or geographic area knowledge related to that area would be valuable. Students should be sensitive to the impression that their concentration titles may have on prospective employers or graduate school admission committees. Programs may be quite traditional (e.g., Business Administration) or much more individualized (e.g., Organizational Studies or Non-Profit Management), and the titles should reflect those.

Empire State University offers the opportunity to complete a number of different concentrations related to international business. There are also a number of international affairs-related concentration titles that a student may design. These may include some knowledge of international business, but an "International Business" concentration should reflect the guidelines provided here. In addition to international business, BME concentrations with an international emphasis might include international marketing, international finance, international economics, international human resource management, or international management.

Labor Relations Concentration

The area of labor relations is related to economics, personnel management and labor studies. Whether students approach labor relations from a managerial perspective or a union perspective, the basic core concepts are the same.

The study of labor-management relations is only one subject area within the diverse field of industrial relations. By its very nature, a degree in labor relations must be broad. Programs that go beyond studies in classic labor areas and business will be most helpful to students who intend to work in this field.

The labor relations concentration addresses issues that affect relations among organized groups of workers, employers and government officials and agencies, and requires integration of knowledge from sociology, psychology, law, economics, politics and history.

Students who seek a concentration in the area of labor relations will be prepared to work in union management negotiations (collective bargaining), contract administration, union organizing efforts and what management calls "preventative labor relations."

The guidelines that follow provide a basic program outline that can be augmented with additional relevant studies.

Highly recommended foundation studies include:

- psychology
- sociology
- macro and micro economics
- American business or labor history
- logic
- the use of computers
- oral communication skills
- writing skills
- math
- statistics.

Studies that are specific and essential to the field of labor relations include:

- labor economics: looks at the underlying relationship between wages, skills, number of people looking for work and related issues
- labor relations: examines the relationship between organized labor and management
- labor law: looks at all of the laws that govern the work place (but with an emphasis on the National Labor Relations Act and amendments, which govern the formal relationship between labor and management)

- labor history: looks at the social, political and legal history of organized labor within the United States
- collective bargaining: examines the formal process between labor and management in arriving at a labor contract.

Depending on a student's goals and interests, additional studies in the field of labor relations could include studies in:

- labor arbitration or dispute settlement
- labor and politics
- international labor relations
- state labor laws
- labor leaders
- issues dealing with unions, multinational firms and globalization
- free trade and its impact on unions
- human resources
- wage and price theory
- employee benefits theory
- employee assistance programs
- total quality management
- participative management concepts
- organizational behavior
- how science and technology is impacting society and the workplace
- demographics
- changing nature of the work force (women, minorities, different cultures)
- women in unions
- the role of minorities in unions
- accounting
- finance
- other related topics.

Marketing Concentration For Students Matriculated After July 1, 2010
Background
A concentration in marketing will prepare students to make decisions to deliver value to consumers, their organizations and the wider environment. Career opportunities are numerous, as a need for marketing expertise is developing in every profit and nonprofit arena, in business-to-business (B2B) and business-to-consumer (B2C) relationships and in small businesses and multinational corporations. Roles vary, including those in advertising, international marketing, e-marketing, promotions, direct marketing, public relations, sales, marketing research and brand management.

Issues that currently face professionals in this field include:

- the drive for new products
- technological changes impacting research, production and promotion
- increased consumer awareness and fatigue
- globalization of production and marketing channels
- ethical concerns at all levels.

Preparatory Knowledge/Studies
To prepare for a career or studies in marketing, a broad liberal arts background is expected. This includes fulfilling SUNY's minimum general education requirements. Recommended studies could include: statistics, psychology, sociology and oral and written communications. These types of studies prepare students to understand consumers and the market and to be able to present and communicate well with clients.

Students should have an understanding of ethics, globalization, diversity and cross-cultural differences and organizations. Additional related competencies and skills that all marketing students should have include technology, communication and teamwork. Knowledge of these areas can be obtained through studies directly addressing them or prior learning, or can be integrated into other general-education, business or marketing studies.

Please see the "Program Details" tab for a review of the business-related knowledge that students are expected to have.

Marketing Knowledge/Studies
All students are expected to take marketing at the introductory level followed by at least three out of the four following upper level studies:

1. marketing communications or equivalent
2. marketing research
3. consumer behavior or buyer behavior
4. marketing management or marketing strategy

In addition, students could consider the following studies that help in the development of knowledge and competencies in specialized areas of marketing:

- advertising
- brand management
- direct marketing
- international marketing
- marketing communications
- marketing research
- Internet marketing
- business-to-business marketing
- sales management
- logistics
- supply chain management
- purchasing
- database marketing
- new product development
- e-commerce
- nonprofit marketing
- public relations

Potential Titles Of Related And/Or Subconcentrations
- advertising
- brand management
- direct marketing
- international marketing
- marketing studies
- marketing communications
- marketing research
- Internet marketing
- sales
- logistics

- supply chain management
- purchasing
- public relations

Students may wish to develop individual concentrations or subconcentrations through consultation with their mentors.

Public Administration Concentration

Public administration combines preparation for administrative responsibility in the public service with the study of the political environment.

The delivery of government services and the concern for the public welfare include:

- study of organization and management, the nature of the government and political decision making
- analysis of the public policy process
- evaluation of the results of government action.

Note: Public administration differs from business administration in that the focus is on the public sector and the dynamics of governmental and bureaucratic processes which impact the administrative role.

The study of public administration involves an appreciation of the tension between political values (e.g., individual rights, representation, advocacy) and administrative values (e.g., ethics, bureaucratic efficiency, political neutrality) and the way in which the process of policy implementation affects the nature of these values.

A student with a concentration in public administration would be expected to develop an understanding of the following areas, which are essential to such a concentration:

- administrative or management theory
- American government (national, state, local)
- public personnel and/or labor relations
- public budgeting, finance and/or financial administration
- organizational theory and/or organizational behavior
- quantitative/research tools (e.g., statistics, computer)
- and public policy.

While the study of public policy would be expected to include policy concepts, it may well be addressed by using specific policy issues (e.g., environmental, health care, education, civil rights, etc.) for qualitative and quantitative analysis.
For an understanding of the role and function of government bureaucracy in society and the issues and challenges faced by an administrator in such bureaucracy, students are encouraged to include studies in areas such as:

- economics
- law (constitutional or administrative)
- intergovernmental relations
- governmental accounting
- history of public administration
- bureaucracy
- political parties and interest groups
- comparative politics

- international relations
- public sector ethics.

Public administration has traditionally been studied as a graduate discipline. Students who expect to continue with graduate-level work are advised to investigate graduate-program requirements to minimize duplication of core studies. Their degree programs may benefit from the inclusion of ample supportive studies from other disciplines to broaden their understanding of the political and societal issues which concern and influence the practice of public administration.

Degree programs in public administration may be submitted under the registered area of business, management and economics or under social theory, social structure and change, depending on whether the degree program is constructed to be predominately reflective of administrative aspects or of the political environment in which public administration is practiced.

The general guidelines for the area of study should be consulted for those elements common to all degree programs in that registered area.

Community and Human Services: A.A., A.S.

Studying for a degree in Community and Human Services expands understanding of the relationship between human needs and values and social conditions. Students develop analytical and communication skills, as well as the knowledge and expertise to contribute to the development and maintenance of healthy communities, groups and individuals.

Degree programs in Community and Human Services offer students the opportunity to develop individualized degree plans based on their intellectual, professional, and personal interests. General program guidelines can be found on the "Program Details" tab, and students will work with an academic mentor to choose courses that meet the guidelines and address each student's individual interests. Students can also work with their academic mentors to identify applicable transfer credit, prior college-level learning, and possible course equivalencies. Working with a mentor and using SUNY Empire's educational planning process, students can develop a specialized concentration in Community and Human Services by following the general program guidelines as well as any applicable concentration guidelines. For sample degree programs and other degree planning resources, please visit the Department of Health and Human Services Degree Planning Resources web page (https://www.esc.edu/health-human-services/degree-planning-resources/).

For more information about general undergraduate degree requirements, please visit Earning an Undergraduate Degree (p. 185).

For more information about Health and Human Services, please visit the Health and Human Services webpage (https://www.esc.edu/health-human-services/).

For more information about Child and Family Studies, please visit the Child and Family Studies webpage (https://www.esc.edu/child-family-studies/).

Program Details
Degree Guidelines for Associate in Arts and Associate of Science

Community and Human Services is a field of study that aims to prepare learners to improve the quality of life of individuals, families, groups, and communities; develop, enhance, and improve access to services for people in need; and promote equality and social justice.

Studies in Community and Human Services emphasize five foundations. For the associate degree, students are expected to meet a minimum of at least three foundations through courses and/or prior learning assessment and explain in the rationale essay how these foundations are met. Below are suggested courses that can be utilized to meet each foundation; these courses have been mapped to meet the learning outcomes for the foundation. Courses in other disciplines may also be utilized; students are expected to discuss how the course in the other discipline meets the foundation in the rationale essay.

Essential Foundation #1: Human Behavior
- Learning outcome: The student will be able to explain human behavior within the context of various social, developmental, global, economic, political, biological, and/or environmental systems.
- Courses which meet this guideline include (but are not limited to):

Code	Title	Credits
ADDS 2005	Addiction & Dependency: Introduction	4
ADDS 2040	Introduction to Pharmacology of Psychoactive Drugs	4
ADDS 4005	Adolescence & Addictions	4
CHFS 1005	Intimate Relationships & Marriage	4
CHFS 2005	Child Abuse & Neglect	4
CHFS 2027	Stress and Resilience in Families	4
CHFS 2122	Introduction to Family Studies	4
CHFS 2132	Introduction to Cyberbullying	4
CHFS 3010	Cultural Perspectives on Aging	4
CHFS 3020	Childhood Trauma: Theory Treatment & Recovery	4
CHFS 3050	Interpersonal Violence	4
CHFS 3127	Understanding Mental Illness in Children and Adolescents	4
CHFS 4020	Interventions with Vulnerable Youth	4
CHFS 4025	Pregnancy & Parenting	4
CHFS 4030	Processes of Divorce	4
CHFS 4035	Trauma & Recovery in Adults	4
DISB 3005	ADHD & Neurodiversity	4
HLHS 3015	Grief & Loss	3-4
HLHS 4010	Exploring Happiness	4
HUSV 3127	Coping with Life Challenges	4
HUSV 4045	Secondary Trauma in Human Service Workers	4
HUSV 4152	Counseling Lesbian Gay Bisexual Transgender and Queer Populations	4
HUSV 4157	Health and Wellness for Human Service Professionals	4

Essential Foundation #2: Service Delivery
- Learning outcome: The student will be able to identify institutions and policies that are specific to the delivery of services in the proposed field of study.
- Courses which meet this guideline include (but are not limited to):

Code	Title	Credits
CHFS 2010	Exploring the Professions: Careers in Gerontology	2
CHFS 2015	Helping Children & Adolescents Cope with Bullying	4
CHFS 3015	Child Welfare in the United States	4
CHFS 3035	Global Perspectives on Aging	4
CHFS 3040	Understanding Adoption	4
CHFS 3050	Interpersonal Violence	4
CHFS 3137	Child and Family Policy	4
DISB 3025	Psychosocial Impact of Illness & Disability	4
DISB 3030	The Disability Rights Movement: Policy and Legislation	4
HLAD 2010	The United States Health Systems	4
HLAD 3005	Community Health	4
HLAD 3015	Comparative Health Systems	4

HLAD 3025	Economic Issues in Health Care	4
HLAD 3040	Health Disparities	4
HLAD 3055	Managed Care	4
HLAD 3122	Principles of Public Health	4
HLAD 3127	Infections and Epidemics: Biocultural Perspectives	4
HLAD 4015	Healthcare Policy	4
HLAD 4020	Leadership in Healthcare	4
HLHS 1023	Introduction to Community & Public Health	4
HLHS 2006	Women's Health & Social Transformation	4
HLHS 2017	Introduction to Global Health	4
HLHS 3011	Vulnerable Populations: Health & Social Justice	4
HLHS 3127	Patient Engagement in Today's Healthcare System	4
HLHS 3132	U.S. Healthcare: Structure & Financing	4
HLHS 4127	Women and the Business of Healthcare	4
HUSV 2005	Women in Helping Professions	4
HUSV 2035	Introduction to Human Services	4
HUSV 2040	Recareering into Human Services	4
HUSV 2045	The Call to Service	4
HUSV 3015	Delivering Human Services	4
HUSV 3035	History of US Social Welfare Policy	4
HUSV 3040	Human Services Management	4
HUSV 3045	Outreach & Marketing in Human Service Organizations	4
HUSV 3068	Social Welfare Policy	4
HUSV 3132	War on Poverty: Implications and Perspectives for Human Service Professionals	4
HUSV 3142	Disaster Mental Health Theory & Practice	4
HUSV 3147	Human Services in Disaster	4
HUSV 4015	Contemporary Issues in Human Services	4
HUSV 4023	Stigma & Mental Illness	4
HUSV 4050	Social Policy Analysis	4
HUSV 4132	Refugees and Displaced Populations	4

Essential Foundation #3: Skills & Application
- Learning outcome: The student will be able to identify skills in assessment, intervention, and evaluation with individuals, families, groups, and/or communities.
- Learning outcome: The student will be able to apply knowledge, values, and skills related to the proposed field of study.
- Courses which meet this guideline include (but are not limited to):

Code	Title	Credits
ADDS 3005	Interventions for Substance Use Disorders	4
ADDS 3010	Substance Use Interventions in the Workplace	4
ADDS 3020	Substance Use with Special Populations	4
ADDS 3122	Virtual Addictions in the 21st Century	4
ADDS 4005	Adolescence & Addictions	4
ADDS 4006	Women and Addiction	4
ADDS 4010	Advanced Substance Use Counseling	4
ADDS 4015	Evidence-Based Substance Use Counseling	4
CHFS 2005	Child Abuse & Neglect	4
CHFS 2010	Exploring the Professions: Careers in Gerontology	2
CHFS 2015	Helping Children & Adolescents Cope with Bullying	4
CHFS 2122	Introduction to Family Studies	4

CHFS 3015	Child Welfare in the United States	4
CHFS 3020	Childhood Trauma: Theory Treatment & Recovery	4
CHFS 3022	Counseling Children & Adolescents	4
CHFS 3025	Elder Abuse	4
CHFS 3030	Family Intervention	4
CHFS 3045	Human Service Practice with Older Adults	4
CHFS 3050	Interpersonal Violence	4
CHFS 3055	Investigation for Protective Services	4
CHFS 3065	Supporting Active Military Veterans & their Families	4
CHFS 3127	Understanding Mental Illness in Children and Adolescents	4
CHFS 3137	Child and Family Policy	4
CHFS 4005	Cognitive Behavioral Strategies	4
CHFS 4020	Interventions with Vulnerable Youth	4
CHFS 4035	Trauma & Recovery in Adults	4
DISB 1010	Direct Support Professional Course 1	4
DISB 2005	Creative Arts Therapy with Children with Autism & Other Special Needs	4
DISB 2010	Disabilities in the Workplace	4
DISB 2020	Health & Disabilities in Human Services Advocacy	4
DISB 2025	Human Services Practice with Disabilities	4
DISB 2030	Direct Support Professional Course 2 – Individual	4
DISB 2035	Direct Support Professional Course 2 - Community	4
DISB 2040	Direct Support Professional Course 3	4
DISB 2045	Frontline Supervisors for Direct Support Professionals	4
DISB 3005	ADHD & Neurodiversity	4
DISB 3020	Human Service Practice with Children with Disabilities	4
DISB 3025	Psychosocial Impact of Illness & Disability	4

Essential Foundation #4: Ethics

- Learning outcome: The student will be able to articulate the code of ethics and/or the professional standards within the proposed field of study.
- Learning outcome: The student will be able to identify possible conflicts between one's own values and professional expectations.
- Courses which meet this guideline include (but are not limited to):

Code	Title	Credits
HLAD 3045	Healthcare Ethics	4
HLAD 3050	Healthcare Management	4
HUSV 2035	Introduction to Human Services	4
HUSV 4030	Human Service Ethics	4

Essential Foundation #5: Diversity

- Learning outcome: The student will be able to articulate the range of human diversity, including but not limited to, race, ethnicity, gender, class, socioeconomic status, age, culture, religious beliefs, sexual orientation, sexual identify, geographic differences, and/or ability.
- Learning outcome: The student will be able to identify the impact of one's own power, privilege, and oppression on work with individuals, families, groups, and communities.
- Courses which meet this guideline include (but are not limited to):

Code	Title	Credits
ADDS 3020	Substance Use with Special Populations	4
CHFS 2027	Stress and Resilience in Families	4
CHFS 3010	Cultural Perspectives on Aging	4
CHFS 3035	Global Perspectives on Aging	4
CHFS 3045	Human Service Practice with Older Adults	4

HUSV 4162	Human Services with Special Populations	4

Learning Outcomes

- Foundation 1: Human Behavior, Students will be able to explain human behavior within the context of various social, developmental, global, economic, political, biological, and/or environmental systems.
- Foundation 2: Service Delivery, Students will be able to identify institutions and policies that are specific to the delivery of services in the proposed field of study.
- Foundation 3: Skills and Application, Students will be able to identify skills in assessment, intervention, and evaluation with individuals, families, groups, and/or communities.
- Foundation 3: Skills and Application, Students will be able to apply knowledge, values, and skills related to the proposed field of study.
- Foundation 4: Ethics, Students will be able to articulate the code of ethics and/or the professional standards within the proposed field of study.
- Foundation 4: Ethics, Students will be able to identify possible conflicts between one's own values and professional expectations.
- Foundation 5: Diversity, Students will be able to articulate the range of human diversity, including but not limited to, race, ethnicity, gender, class, socioeconomic status, age, culture, religious beliefs, sexual orientation, sexual identify, geographic differences, and/or ability.
- Foundation 5: Diversity, Students will be able to identify the impact of one's own power, privilege, and oppression on work with individuals, families, groups, and communities.

Community and Human Services: B.A., B.S., B.P.S.

Studying for a degree in Community and Human Services expands understanding of the relationship between human needs and values and social conditions. Students develop analytical and communication skills, as well as the knowledge and expertise to contribute to the development and maintenance of healthy communities, groups and individuals.

Degree programs in Community and Human Services offer students the opportunity to develop individualized degree plans based on their intellectual, professional, and personal interests. General program guidelines can be found on the "Program Details" tab, and students will work with an academic mentor to choose courses that meet the guidelines and address each student's individual interests. Students can also work with their academic mentors to identify applicable transfer credit, prior college-level learning, and possible course equivalencies. Working with a mentor and using SUNY Empire's educational planning process, students can develop a specialized concentration in Community and Human Services by following the general program guidelines as well as any applicable concentration guidelines. For sample degree programs and other degree planning resources, please visit the Department of Health and Human Services Degree Planning Resources web page (https://www.sunyempire.edu/health-human-services/degree-planning-resources/).

For more information about general undergraduate degree requirements, please visit Earning an Undergraduate Degree (p. 185).

For more information about Health and Human Services, please visit the Health and Human Services webpage (https://www.sunyempire.edu/health-human-services/).

For more information about Child and Family Studies, please visit the Child and Family Studies webpage (https://www.sunyempire.edu/child-family-studies/).

Program Details

Degree Guidelines for Bachelor of Arts, Bachelor of Science, and Bachelor of Professional Studies

Community and Human Services is a field of study that aims to prepare learners to improve the quality of life of individuals, families, groups, and communities; develop, enhance, and improve access to services for people in need; and promote equality and social justice.

For the bachelor degree, students are expected to meet all of the five foundations through courses and/or prior learning assessment. Students will explain how they meet each of these foundations in the rationale essay. Below are suggested courses that can be utilized to meet each foundation; these courses have been mapped to meet the learning outcomes for the foundation. Courses in other disciplines may also be utilized; students are expected to discuss how the course in the other discipline meets the foundation in the rationale essay.

Essential Foundation #1: Human Behavior

- Learning outcome: The student will be able to explain human behavior within the context of various social, developmental, global, economic, political, biological, and/or environmental systems.
- Courses which meet this guideline include (but are not limited to):

Code	Title	Credits
ADDS 2005	Addiction & Dependency: Introduction	4
ADDS 2040	Introduction to Pharmacology of Psychoactive Drugs	4
ADDS 4005	Adolescence & Addictions	4
CHFS 1005	Intimate Relationships & Marriage	4
CHFS 2005	Child Abuse & Neglect	4
CHFS 2027	Stress and Resilience in Families	4
CHFS 2122	Introduction to Family Studies	4
CHFS 2132	Introduction to Cyberbullying	4
CHFS 3010	Cultural Perspectives on Aging	4
CHFS 3020	Childhood Trauma: Theory Treatment & Recovery	4
CHFS 3050	Interpersonal Violence	4
CHFS 3127	Understanding Mental Illness in Children and Adolescents	4
CHFS 4020	Interventions with Vulnerable Youth	4
CHFS 4025	Pregnancy & Parenting	4
CHFS 4030	Processes of Divorce	4
CHFS 4035	Trauma & Recovery in Adults	4
DISB 3005	ADHD & Neurodiversity	4
HLHS 3015	Grief & Loss	3-4
HLHS 4010	Exploring Happiness	4
HUSV 3127	Coping with Life Challenges	4
HUSV 4045	Secondary Trauma in Human Service Workers	4
HUSV 4152	Counseling Lesbian Gay Bisexual Transgender and Queer Populations	4
HUSV 4157	Health and Wellness for Human Service Professionals	4

Essential Foundation #2: SERVICE DELIVERY

- Learning outcome: The student will be able to examine institutions and/or policies that are specific to the delivery of services in the proposed field of study.
- Courses which meet this guideline include (but are not limited to):

Code	Title	Credits
CHFS 2010	Exploring the Professions: Careers in Gerontology	2
CHFS 2015	Helping Children & Adolescents Cope with Bullying	4
CHFS 3015	Child Welfare in the United States	4
CHFS 3035	Global Perspectives on Aging	4
CHFS 3040	Understanding Adoption	4
CHFS 3050	Interpersonal Violence	4
CHFS 3137	Child and Family Policy	4
DISB 3025	Psychosocial Impact of Illness & Disability	4
DISB 3030	The Disability Rights Movement: Policy and Legislation	4
HLAD 2010	The United States Health Systems	4
HLAD 3005	Community Health	4
HLAD 3015	Comparative Health Systems	4
HLAD 3025	Economic Issues in Health Care	4
HLAD 3040	Health Disparities	4
HLAD 3055	Managed Care	4
HLAD 3122	Principles of Public Health	4
HLAD 3127	Infections and Epidemics: Biocultural Perspectives	4

HLAD 4015	Healthcare Policy	4
HLAD 4020	Leadership in Healthcare	4
HLHS 1023	Introduction to Community & Public Health	4
HLHS 2006	Women's Health & Social Transformation	4
HLHS 2017	Introduction to Global Health	4
HLHS 3011	Vulnerable Populations: Health & Social Justice	4
HLHS 3127	Patient Engagement in Today's Healthcare System	4
HLHS 3132	U.S. Healthcare: Structure & Financing	4
HLHS 4127	Women and the Business of Healthcare	4
HUSV 2005	Women in Helping Professions	4
HUSV 2035	Introduction to Human Services	4
HUSV 2040	Recareering into Human Services	4
HUSV 2045	The Call to Service	4
HUSV 3015	Delivering Human Services	4
HUSV 3035	History of US Social Welfare Policy	4
HUSV 3040	Human Services Management	4
HUSV 3045	Outreach & Marketing in Human Service Organizations	4
HUSV 3068	Social Welfare Policy	4
HUSV 3132	War on Poverty: Implications and Perspectives for Human Service Professionals	4
HUSV 3142	Disaster Mental Health Theory & Practice	4
HUSV 3147	Human Services in Disaster	4
HUSV 4015	Contemporary Issues in Human Services	4
HUSV 4023	Stigma & Mental Illness	4
HUSV 4050	Social Policy Analysis	4
HUSV 4132	Refugees and Displaced Populations	4

Essential Foundation #3: SKILLS & APPLICATION

- Learning outcome: The student will be able to identify skills in assessment, intervention, and evaluation with individuals, families, groups, and/or communities.
- Learning outcome: The student will be able to apply knowledge, values, and skills related to the proposed field of study.
- Courses which meet this guideline include (but are not limited to):

Code	Title	Credits
ADDS 3005	Interventions for Substance Use Disorders	4
ADDS 3010	Substance Use Interventions in the Workplace	4
ADDS 3020	Substance Use with Special Populations	4
ADDS 3122	Virtual Addictions in the 21st Century	4
ADDS 4005	Adolescence & Addictions	4
ADDS 4006	Women and Addiction	4
ADDS 4010	Advanced Substance Use Counseling	4
ADDS 4015	Evidence-Based Substance Use Counseling	4
CHFS 2005	Child Abuse & Neglect	4
CHFS 2010	Exploring the Professions: Careers in Gerontology	2
CHFS 2015	Helping Children & Adolescents Cope with Bullying	4
CHFS 2122	Introduction to Family Studies	4
CHFS 3015	Child Welfare in the United States	4
CHFS 3020	Childhood Trauma: Theory Treatment & Recovery	4
CHFS 3022	Counseling Children & Adolescents	4
CHFS 3025	Elder Abuse	4
CHFS 3030	Family Intervention	4

CHFS 3045	Human Service Practice with Older Adults	4
CHFS 3050	Interpersonal Violence	4
CHFS 3055	Investigation for Protective Services	4
CHFS 3065	Supporting Active Military Veterans & their Families	4
CHFS 3127	Understanding Mental Illness in Children and Adolescents	4
CHFS 4005	Cognitive Behavioral Strategies	4
CHFS 3137	Child and Family Policy	4
CHFS 4020	Interventions with Vulnerable Youth	4
CHFS 4035	Trauma & Recovery in Adults	4
DISB 1010	Direct Support Professional Course 1	4
DISB 2005	Creative Arts Therapy with Children with Autism & Other Special Needs	4
DISB 2010	Disabilities in the Workplace	4
DISB 2020	Health & Disabilities in Human Services Advocacy	4
DISB 2025	Human Services Practice with Disabilities	4
DISB 2030	Direct Support Professional Course 2 – Individual	4
DISB 2035	Direct Support Professional Course 2 - Community	4
DISB 2040	Direct Support Professional Course 3	4
DISB 2045	Frontline Supervisors for Direct Support Professionals	4
DISB 3005	ADHD & Neurodiversity	4
DISB 3020	Human Service Practice with Children with Disabilities	4
DISB 3025	Psychosocial Impact of Illness & Disability	4
DISB 4005	Aging With a Developmental Disability	4
DISB 4010	Assessment & Evaluation of Disabilities	4
HLAD 3020	Cultural Competency in Health Care	4
HLAD 3025	Economic Issues in Health Care	4
HLAD 3040	Health Disparities	4
HLAD 3050	Healthcare Management	4
HLAD 3122	Principles of Public Health	4
HLAD 4015	Healthcare Policy	4
HLAD 4020	Leadership in Healthcare	4
HLAD 4030	Understanding Medical Marijuana: Multidisciplinary Perspectives	4
HLHS 3010	Creativity & Healing	4
HLHS 3015	Grief & Loss	3-4
HLHS 3020	Healing Through Music	4
HLHS 3030	Understanding Forgiveness and Healing in the Human Services	4
HLHS 4010	Exploring Happiness	4
HUSV 2010	Case Management	4
HUSV 2020	Crisis Intervention: Theory & Practice	4
HUSV 2025	Helping & Counseling Skills	4
HUSV 2035	Introduction to Human Services	4
HUSV 3005	Advocacy in Human Services	4
HUSV 3010	Animals Society and Human Services	4
HUSV 3015	Delivering Human Services	4
HUSV 3020	Documentation in Human Services	4
HUSV 3022	Crisis Intervention II: Counseling Skills and Models	4
HUSV 3025	Funding & Human Service Organizations	4

HUSV 3030	Group Work	4
HUSV 3040	Human Services Management	4
HUSV 3045	Outreach & Marketing in Human Service Organizations	4
HUSV 3050	Personal Coaching	4
HUSV 3055	Powerful Questions	4
HUSV 3065	Spirituality in the Helping Relationship	4
HUSV 3070	Supervision in Human Services	4
HUSV 3122	Conflict Management & Resolution in Human Services	4
HUSV 3127	Coping with Life Challenges	4
HUSV 3142	Disaster Mental Health Theory & Practice	4
HUSV 3147	Human Services in Disaster	4
HUSV 4005	Bereavement Counseling	4
HUSV 4010	Community Organizing	4
HUSV 4023	Stigma & Mental Illness	4
HUSV 4025	Understanding Holistic Healing in Human Services	4
HUSV 4035	Internship in Human Services	4
HUSV 4040	Program Evaluation	4
HUSV 4050	Social Policy Analysis	4
HUSV 4132	Refugees and Displaced Populations	4
HUSV 4152	Counseling Lesbian Gay Bisexual Transgender and Queer Populations	4
HUSV 4157	Health and Wellness for Human Service Professionals	4
HUSV 4162	Human Services with Special Populations	4

CHFS 3045	Human Service Practice with Older Adults	4
CHFS 3060	Multicultural Study of Children & Families	4
CHFS 3122	African American Relationships Marriages and Families	4
CHFS 3137	Child and Family Policy	4
CHFS 4020	Interventions with Vulnerable Youth	4
DISB 2010	Disabilities in the Workplace	4
DISB 2015	Disabled in America	4
DISB 2020	Health & Disabilities in Human Services Advocacy	4
DISB 3010	Cross-Cultural Perspectives on Disabilities	4
HLAD 3005	Community Health	4
HLAD 3015	Comparative Health Systems	4
HLAD 3020	Cultural Competency in Health Care	4
HLAD 3040	Health Disparities	4
HLHS 2013	Culture, Illness, and Healing	4
HLHS 3011	Vulnerable Populations: Health & Social Justice	4
HLHS 4127	Women and the Business of Healthcare	4

HUSV 4020	Diversity in Human Services	4
HUSV 4132	Refugees and Displaced Populations	4
HUSV 4162	Human Services with Special Populations	4

Students pursuing degrees in Community and Human Services cannot use the terms "counseling" or "therapy" in their concentration titles. Students should consult with their mentors about concentration titles appropriate for their degree plans.

Learning Outcomes

- Foundation 1: Human Behavior, Students will be able to explain human behavior within the context of various social, developmental, global, economic, political, biological, and/or environmental systems.
- Foundation 2: Service Delivery, Students will be able to examine institutions and/or policies that are specific to the delivery of services in the proposed field of study.
- Foundation 3: Skills Application, Students will be able to identify skills in assessment, intervention, and evaluation with individuals, families, groups, and/or communities.
- Foundation 3: Skills Application, Students will be able to apply knowledge, values, and skills related to the proposed field of study.
- Foundation 4: Ethics, Students will be able to articulate the code of ethics and/or the professional standards within the proposed field of study.
- Foundation 4: Ethics, Students will be able to identify possible conflicts between one's own values and professional expectations.
- Foundation 5: Diversity, Students will be able to articulate the range of human diversity, including but not limited to, race, ethnicity, gender, class, socioeconomic status, age, culture, religious beliefs, sexual orientation, sexual identify, geographic differences, and/or ability.
- Foundation 5: Diversity, Students will be able to identify the impact of one's own power, privilege, and oppression on work with individuals, families, groups, and communities.

ESSENTIAL Foundation #4: ETHICS

- Learning outcome: The student will be able to articulate the code of ethics and/or the professional standards within the proposed field of study.
- Learning outcome: The student will be able to identify possible conflicts between one's own values and professional expectations.
- Courses which meet this guideline include (but are not limited to):

Code	Title	Credits
HLAD 3045	Healthcare Ethics	4
HLAD 3050	Healthcare Management	4
HUSV 2035	Introduction to Human Services	4
HUSV 4030	Human Service Ethics	4

Essential Foundation #5: DIVERSITY

- Learning outcome: The student will be able to articulate the range of human diversity, including but not limited to, race, ethnicity, gender, class, socioeconomic status, age, culture, religious beliefs, sexual orientation, sexual identify, geographic differences, and/or ability.
- Learning outcome: The student will be able to identify the impact of one's own power, privilege, and oppression on work with individuals, families, groups, and communities.
- Courses which meet this guideline include (but are not limited to):

Code	Title	Credits
ADDS 3020	Substance Use with Special Populations	4
CHFS 2027	Stress and Resilience in Families	4
CHFS 3010	Cultural Perspectives on Aging	4
CHFS 3035	Global Perspectives on Aging	4

Criminal Justice: B.S.

The Bachelor of Science (B.S.) degree in Criminal Justice is a 120-credit program designed to prepare students interested in or currently working in public service, law enforcement, corrections, emergency services and community leadership positions.

The contemporary criminal justice environment is continuously evolving in response to critical social needs and new approaches to policing, addressing criminal behavior, and community/government relations. This program provides a rigorous examination of the social, economic and cultural contexts of criminal justice today from all perspectives. Students will become more effective in their roles within criminal justice and related fields.

The B.S. in Criminal Justice includes a set of required courses that all students must take, along with SUNY General Education and other academic requirements (p. 185), in order to be eligible to receive a degree. Courses are offered online, through independent studies, or through a blended approach. The required courses for programs in Criminal Justice can be found on the "Program Details" tab.

Students interested in leveraging their law enforcement academy training towards the B.S. in Criminal Justice program should consult with their mentor to explore credit recognition options through individualized Prior Learning Assessment (iPLA) (https://www.sunyempire.edu/degree-planning-academic-review/prior-learning-assessment/individualized-prior-learning-assessment/) or Professional Learning Evaluation (PLE) (p. 168). This is particularly relevant for graduates from certain New York city and state law enforcement academies, including but not limited to the New York City Police Department (NYPD) and Suffolk County Police Department. Moreover, training completed with agencies following the Municipal Police Training Council's curriculum may also be eligible for consideration.

Our evaluation process is designed to map specific academy training components against our program's course requirements, potentially allowing for course substitutions and credit allocation. Below are examples of course substitutions previously approved for academy-trained professionals:

Criminal Justice Course Substitutions

Course Substitutions for Criminal Justice Program - MPTC (https://sunyempire.edu/media/academic-affairs/division-social-behavioral-science/Course-Substitutions-for-Criminal-Justice-Program---MPTC.pdf) (PDF 99kB) (https://sunyempire.edu/media/academic-affairs/division-social-behavioral-science/Course-Substitutions-for-Criminal-Justice-Program---MPTC.pdf)

For more information about general undergraduate degree requirements, please visit Earning an Undergraduate Degree (p. 185).

Program Details

Students pursuing a bachelor's degree in criminal justice must complete the following courses:

Code	Title	Credits
CRJS 1005	Introduction to Criminal Justice	4
CRJS 3009	Criminal Law & Procedure	4
CRJS 3065	Race Crime & Justice	4
or CRJS 4025	Police Community Relations	
CRJS 4005	American Corrections	4
PAFF 4132	Legal & Ethical Foundations of Public Service	4
SOCI 1005	Exploring Society: An Introduction to Sociology	4
SOSC 3025	Social Science Research Methods	4
or SOSC 2010	Statistics for the Social Sciences	
or CRJS 3030	Criminal Investigation	
or SOSC 3020	Qualitative Social Science Research: Design & Methods	
CRJS 3005	Alternatives to Incarceration	4
CRJS 2005	Introduction to Criminology: Theorizing Crime	4
CRJS 3015	Courts & the Administration of Justice	4
Total Credits		**40**

Advanced- level electives

Students will be asked to complete two additional advanced-level courses chosen from the list below in consultation with a faculty mentor. The list below includes some of the available choices:

Code	Title	Credits
CRJS 3020	Law Enforcement Intelligence Analysis	4
CRJS 3045	Forensic Science	4
CRJS 3050	Juvenile Justice & Delinquency	4
CRJS 4010	Comparative Criminal Justice Systems	4
CRJS 4030	Women Crime & Criminology	4
INFT 3020	Cyber Crime & Computer Forensics	4
SOCI 3040	Deviance & Social Control	4
SOCI 4030	Power & Privilege	4
CRJS 3036	Principles of Fraud Examination & Financial Forensics	4
CRJS 3055	Organized Crime	4
CRJS 4015	Criminal Justice Management & Policy	4
ECON 3035	Economics of Crime	4
INFT 3010	Advanced Digital Crime & Digital Terrorism	4
LEST 3015	Mental Health & The Law	4
PAFF 3005	Terrorism & Homeland Security	4
PAFF 4005	Counterterrorism in a Changing World	4
PSYC 4080	Forensic Psychology	4
SOCI 3065	Perspectives on Terrorism	4
SOCI 3145	Violence: Systems & Solutions	4
SOSC 3010	Family Violence: Legal & Social Perspectives	4

*Note that some prior learning may substitute for some required courses. Faculty review and approval is required before a substitution can be made.

Learning Outcomes

- Students will be able to describe the function and structure of the criminal justice system in the United States of America.
- Students will be able to articulate and discuss the basic ethical dilemmas and issues in criminal justice.
- Students will be able to discuss the relationship between the legal system, criminal justice system, and political system.
- Students will be able to conduct research or investigation in criminal justice.
- Students will be able to explain the role of diverse experiences, perspectives, and identities in the American criminal justice system.
- Students will be able to compare alternative approaches to addressing criminal activity.

Cultural Studies: A.A., A.S.

Students in Cultural Studies will explore the ways in which human beings understand, organize, interpret and communicate their world. Students examine and analyze philosophical, literary, and artistic expressions; social structures, values, norms, belief systems and historical perspectives across time, place, and cultures on issues such as race, class, and gender. Cultural Studies students will sharpen their skills in critical thinking, reading, writing, and research.

Degree programs in Cultural Studies offer students the opportunity to develop individualized degree plans based on their intellectual, professional, and personal interests. Concentrations in Cultural Studies can be developed using concentration guidelines or they can be developed individually. Students can also work with their academic mentors to identify applicable transfer credit, prior college-level learning, and possible course equivalencies.

For more information about Cultural Studies, please visit the Literature, Communication and Cultural Studies webpage (https://www.esc.edu/literature-communication-culture/).

For sample degree programs and other degree planning resources, please visit the Department of Literature, Communication and Cultural Studies Degree Planning Resources web page (https://www.esc.edu/literature-communication-culture/degree-planning-resources/).

For more information about general undergraduate degree requirements, please visit

DEGREE GUIDELINES

Cultural studies explore how human beings make sense of our world and the qualities that make us most human. Disciplines such as communications and media, language, literature, philosophy, religion, and writing develop our awareness; our abilities to think, feel, and speak; our appreciation of the values and knowledge underlying these fields; and our sense of ourselves as connected to a greater whole.

Associate degree programs in Cultural Studies should address the following four guidelines. Courses listed below meet each foundation, but this list is not exhaustive. Students should work with their mentor ensure proper course choices.

Foundation #1: KNOWLEDGE OF A FIELD OR FIELDS

Code	Title	Credits
COMM 1020	Introduction to Communication	4
CUST 4020	Medical Humanities	4
LING 1005	Introduction to Linguistics	4

Learning Outcomes

- Foundation 1: Knowledge of a field or fields, Students will demonstrate knowledge and understanding of the historical foundations, current issues, and major texts in an area of Cultural Studies inquiry.
- Foundation 2: Theoretical knowledge, Students will examine, explain, and apply theories, critical approaches, and methodologies in an area of Cultural Studies inquiry.
- Foundation 3: Diverse perspectives and social responsibility, Students will examine and reflect on diverse cross-cultural perspectives in an area of inquiry (e.g., questions of race, gender, class, ethnicity, religion, sexual identity, disability, migration, etc.); and consider the responsibilities of members in a just society.
- Foundation 4: Critical thinking, reading, and writing, Students will read, write and evaluate print-based and digital media sources of information critically, i.e., with sustained attention to meaning, presentation, and argument. Build the capacity to identify and describe main ideas, underlying assumptions, and valid conclusions. Create and share information using a range of collaborative technologies; evaluate and cite sources correctly.

CONCENTRATION GUIDELINES

Concentrations in Cultural Studies begin with foundational studies, which prepare the student for more advanced-level work. Advanced-level competency should be developed in those areas which are most relevant to the specific concentration design and to the specific organizing framework. In planning the concentration, consideration should be given both to depth and breadth. Students wishing to pursue individualized concentrations should use the general Cultural Studies degree guidelines as an organizing framework for their degree plans.

Specific guidelines have been developed for concentrations in the following areas:

Students interested in journalism or broadcasting should consult the concentration guidelines for Communication and Media, Writing, or a combination of these. Students interested in English should consult the concentration guidelines for Literature, Writing, Communication and Media, or a combination of these.

If you are interested in an area not listed here, please contact your mentor about designing your own concentration.

CONCENTRATION IN COMMUNICATION AND MEDIA

Concentrations in communication and media studies should demonstrate knowledge of processes, procedures, methodologies and media involved in interactions between people and within groups, and the dissemination of information and ideas. Twenty-first-century studies in communication and media include an examination of media's impact on culture, democracy and digital identity in an era of rapid technological change and emerging environments as well as practical skills for the 21st century workplace.

ASSOCIATE DEGREES IN CULTURAL STUDIES WITH CONCENTRATION IN COMMUNICATIONS AND MEDIA

Associate students should take at least one course for each of the following outcomes and choose one professional skills track.

WRITING SKILLS (CORRELATES WITH THE CRITICAL THINKING, READING, AND WRITING GUIDELINE)

- Learning Outcome: demonstrate basic writing and research skills

FIELD KNOWLEDGE (CORRELATES WITH THE KNOWLEDGE OF A FIELD OR FIELDS GUIDELINE)

- Learning Outcome: explain fundamental principles of the field of communication including individual, group, and mass communication or media communication.
- Learning Outcome: interpret media artifacts, which may include examples from print, radio, television, and/or the internet
- Learning Outcome: Explain principles of individual and group communications

PROFESSIONAL SKILLS

- Learning Outcome: demonstrate basic skills in **one** of the following tracks

MARKETING TRACK

Courses which meet this guideline include (but are not limited to):

Code	Title	Credits
MRKT 1005	Marketing Principles	4
MRKT 3010	Consumer Behavior	4
MRKT 3025	Digital and Social Media Marketing	4
MRKT 3055	Public Relations	4
MRKT 3045	Marketing Management	4
MRKT 4035	Marketing Research	4
MRKT 4040	Marketing Strategy	4

WRITING/JOURNALISM TRACK

Courses which meet this guideline include (but are not limited to):

Code	Title	Credits
COMM 3030	News & Feature Writing	4
COMW 2005	Effective Academic Writing	2,3
COMW 3015	Technical Writing	4
COMW 3122	Proposal Writing	2
CRWR 1000	Introduction to Creative Writing	4
CRWR 1015	Creative Nonfiction: Introductory	4

CRWR 3015	Creative Nonfiction: Advanced	4
DIGA 3040	Digital Storytelling	4

DIGITAL COMMUNICATIONS TRACK
Courses which meet this guideline include (but are not limited to):

Code	Title	Credits
COMM 2016	Digital Communication Strategies I	2
COMM 3015	Social Media: Communication & Culture	4
DIGA 1010	Digital Art & Design: Introductory	4
DIGA 3035	Digital Art & Design: Advanced	4
DIGA 3040	Digital Storytelling	4
DIGA 3045	Game Design & Development	4
DIGA 3050	Information Design	4
DIGA 3065	Digital Media Arts	4

INTERPERSONAL AND GROUP COMMUNICATIONS TRACK
Courses which meet this guideline include (but are not limited to):

Code	Title	Credits
COMM 1030	Public Speaking	4
COMM 2016	Digital Communication Strategies I	2
COMM 3005	Communication Analysis	4
COMM 3055	Organizational Communication	3
COMM 3060	Political Communication	3
COMM 4025	Communication Decisions	4

CONCENTRATION IN LITERATURE

The literature concentration is designed to develop students' critical thinking, expository writing and analytic abilities through a study of works of literature written primarily in English. Through a study of texts from different periods, genres and national origins, students will develop a breadth and depth of knowledge and understanding of literature, including authors, themes and literary works. Students are expected to learn about formal aspects of writing as well as the broader cultural and historical contexts of literary texts.

Literature concentrations should address the following:

FOUNDATIONAL KNOWLEDGE (CORRELATES WITH THE KNOWLEDGE OF A FIELD GUIDELINE)
• Learning Outcome: demonstrate an understanding of the field of literary studies.

A course which meets this guideline include (but is not limited to):

Code	Title	Credits
LITR 1005	Introduction to Literature	4

THEORY AND CRITICISM (CORRELATES WITH THE THEORETICAL KNOWLEDGE GUIDELINE)
• Learning Outcomes: demonstrate an understanding of critical approaches to literature. B.A. degree plans should also demonstrate an advanced knowledge of literary theory

Courses which meet this guideline include (but are not limited to):

Code	Title	Credits
LITR 2035	Introduction to Literature: Hamlet	3
LITR 3050	Literary Theory	4

DIVERSITY (CORRELATES WITH THE DIVERSE PERSPECTIVES AND SOCIAL RESPONSIBILITY GUIDELINE)
• Learning Outcome: demonstrate an understanding of issues of diversity in literary studies (African-American literature, Native-American literature, Asian-American literature, Latino-American literature, multicultural writers, women writers, women's and gender studies, queer fiction, immigrant literature, social protest fiction and disability studies)

Courses which contribute to the meeting of this guideline include (but are not limited to):

Code	Title	Credits
LITR 2006	African American Literature: Intro	4
LITR 2040	World Literature: Introductory	4
LITR 3008	African American Literature: Advanced	4
LITR 3015	Cultural Diversity through Literary Art	4
LITR 3030	World Literature: Advanced	4
LITR 3080	Native American Literature	4
LITR 3130	US Multicultural Fiction	4
LITR 3132	Asian American Writers	4
LITR 3133	American Women Writers	4
LITR 3135	U.S. Women's Multicultural Life Writings	4
LITR 3060	Literature of Addiction: Advanced	4

GENRES OF LITERATURE
• Learning Outcome: demonstrate an understanding of several genres of literature, including poetry, fiction, and drama (may also include knowledge of creative writing, memoir and more experimental techniques)

Courses which contribute to the meeting of this guideline include (but are not limited to):

Code	Title	Credits
LITR 2020	An Introduction to The Modern Short Story	4
LITR 2030	Children's Literature: Introductory	4
LITR 2050	Science Fiction & the Human Dynamic: Introduction	4
LITR 3010	Children's Literature: Advanced	4
LITR 3022	Ekphrasis Poetry	4
LITR 3025	Folktales, Fairy Tales, & Fantasy Literature	4
LITR 3035	Utopian Literature	4
LITR 3046	Poetry	4
LITR 3090	Science Fiction & the Human Dynamic: Advanced	4
LITR 3095	Shakespeare	4
LITR 3115	The Modern Short Story	4
LITR 3120	The Popular Romance Novel	4
LITR 3127	The Graphic Novel	4
LITR 3145	Young Adult Literature	4
LITR 3207	American Poetry	3

LITERARY PERIODS
• Learning Outcome: demonstrate an understanding of literary periods (may include knowledge of early/late British literature and/or/early/late American literature; it may include comparative literature from other literatures in English)

Courses which contribute to the meeting of this guideline include (but are not limited to):

Code	Title	Credits
LITR 2010	American Literature to 1865	4
LITR 2015	American Literature 1865-Present	4
LITR 3040	Jane Austen	4
LITR 3075	Literature & the Culture of the Vampire	4
LITR 3095	Shakespeare	4
LITR 3141	Modern American Literature	4
LITR 3192	20th Century American Literature	3

CONCENTRATION IN PHILOSOPHY

Existing both as an academic discipline in its own right and as the activity of philosophical inquiry (or "philosophizing") that is integral to numerous other academic areas (political theory, literary theory, fine arts, comparative religion, sociology of scientific knowledge, linguistics, etc.), philosophy is a cornerstone of the humanities. A concentration in philosophy can be organized in many different ways and should therefore reflect the student's particular learning goals. Note that students who are considering the pursuit of a graduate degree in the actual *discipline* of philosophy should research the expectations of graduate programs offering such a degree and plan their concentration accordingly.

Philosophy concentrations at both the Associates level should address the following:

ETHICS
- Learning Outcome: Articulate philosophical questions, perspectives, and arguments in:
- Ethics using vocabulary, concepts, and methods deriving from the discipline of
- Philosophy and/or other academic areas with significant philosophical components.

Courses which meet this guideline include (but are not limited to):

Code	Title	Credits
PHIL 2005	Introduction to Philosophy	4
PHIL 2020	Introduction to Ethics	4

Courses which contribute to the meeting of this guideline include (but are not limited to):

Code	Title	Credits
HIST 2155	The Pursuit of Happiness in American History	4

POLITICS
- Learning Outcome: Articulate philosophical questions, perspectives, and arguments in politics using vocabulary, concepts, and methods deriving from the discipline of philosophy and/or other academic areas with significant philosophical components.

Courses which meet this guideline include (but are not limited to):

Code	Title	Credits
PHIL 2005	Introduction to Philosophy	4
POLI 3080	Modern Political Theory	4
POLI 3005	America's Founding Ideas	4
POLI 4010	Global Perspectives on Political Theory	4

METAPHYSICS (QUESTIONS OF "REALITY")
- Learning Outcome: Articulate philosophical questions, perspectives, and arguments in metaphysics using vocabulary, concepts, and methods deriving from the discipline of philosophy and/or other academic areas with significant philosophical components.

Courses which meet this guideline include (but are not limited to):

Code	Title	Credits
PHIL 2005	Introduction to Philosophy	4

EPISTEMOLOGY (QUESTIONS OF "KNOWING")
- Learning Outcome: Articulate philosophical questions, perspectives, and arguments in epistemology using vocabulary, concepts, and methods deriving from the discipline of philosophy and/or other academic areas with significant philosophical components.

Courses which meet this guideline include (but are not limited to):

Code	Title	Credits
PHIL 2005	Introduction to Philosophy	4

LOGIC AND REASONING
- Learning Outcome: Articulate philosophical questions, perspectives, and arguments in logic and reasoning using vocabulary, concepts, and methods deriving from the discipline of philosophy and/or other academic areas with significant philosophical components.

Courses which meet this guideline include (but are not limited to):

Code	Title	Credits
PHIL 2005	Introduction to Philosophy	4
CUST 2030	Introduction to Critical Thinking	2

Philosophy concentrations at the Bachelor's level should also address the following:

Two (or more) specialized areas of advanced-level philosophical inquiry. Examples of such areas include but are not limited to social and cultural theory (e.g., social justice, queer theory, feminist theory), philosophy of art (aesthetics), literary theory, environmental ethics, political philosophy/theory, philosophy of religion, African philosophy, East Asian philosophy, history of Western philosophy, philosophy of language, and logic.

- Learning Outcome: Articulate at an advanced-level philosophical questions, perspectives, and arguments in at least two specialized areas using vocabulary, concepts, and methods deriving from the discipline of philosophy and/or other academic areas with significant philosophical components.

Courses that contribute to the meeting of this guideline include (to fully meet the guideline, two or more areas need to be addressed):

FOR SOCIAL AND CULTURAL THEORY

Code	Title	Credits
GSST 3015	Feminist Theory	4
SOSC 3015	Great Conversations in Social Thought	4
GSST 3152	Queering American Culture	4

Code	Title	Credits
SOCI 4035	Privacy Security & Freedom: Social Concerns for the 21st Century	4

FOR PHILOSOPHY OF ART
Code	Title	Credits
ARTS 4070	What Is Art?	4
ARTP 4010	Performance Theory	4

FOR LITERARY THEORY
Code	Title	Credits
LITR 3050	Literary Theory	4

FOR POLITICAL PHILOSOPHY/THEORY
Code	Title	Credits
POLI 3005	America's Founding Ideas	4
POLI 3080	Modern Political Theory	4
POLI 4010	Global Perspectives on Political Theory	4

FOR HISTORY OF WESTERN PHILOSOPHY
Code	Title	Credits
HIST 3415	Renaissance & Reformation: Origin & Impacts	4
HIST 3490	The Enlightenment	4

FOR MISCELLANEOUSADVANCED-LEVEL TOPICS
Code	Title	Credits
LITR 3035	Utopian Literature	4
PHIL 3998	Individualized Studies in Philosophy (PHIL)	1-8

Note: Applied philosophy courses (e.g., professional ethics courses) may be included as part of a philosophy concentration but do not meet (partially or fully) the guideline for advanced-level philosophical inquiry.

Examples of such courses include:

Code	Title	Credits
BUSN 3010	Business Ethics	4
COMM 3025	Media Ethics & Law	4
DIGA 3036	Ethics of Digital Art & Design	4
EDST 3036	Legal and Ethical Dimensions of Technology for Educators	2
FSMA 3020	Finance Society & Ethics	4
HLAD 3045	Healthcare Ethics	4
MGMT 3015	Ethics for a Global Economy	4
PAFF 3122	Ethics and the Public Sector	4
PAFF 4132	Legal & Ethical Foundations of Public Service	4
PSYC 3065	Ethical Issues in Psychology	4

CONCENTRATION IN RELIGIOUS STUDIES

Religious stories and devotional behaviors are a core part of most human societies. Throughout time, religions and their varying communities and traditions of interpretation have played vital roles in culturally and politically shaping and reshaping our lives and world. To elucidate this complex of personal, social and historical interconnections requires multiple perspectives and the consideration of diverse religious texts, beliefs and practices.

Although individuals may find religious studies useful in the exploration of their personal beliefs, a degree in Cultural Studies with a concentration in Religious Studies shall also adopt a pluralistic perspective that examines multiple schools of religious thought, including critiques of religion itself, reflecting the tacit understanding that no tradition has exclusive access to religious truth, however that is defined.

Religious Studies concentrations at the Associates level should address the following:

THEORIES THAT DEFINE RELIGION
- Learning Outcome: Evaluate theories that define the phenomenon of religion by analyzing recurring religious themes, patterns, structures, language and practices; identifying and analyzing core components such as deity, cosmogony, theodicy and ethics; and critically examining the significance of sacred texts, scriptures, traditions, rituals and devotional practices.

A course which meets this guideline include (but are not limited to):

Code	Title	Credits
RELI 2025	Introduction to Religious Studies	4

RELIGIOUS TRADITIONS
- Learning Outcome: Investigate traditions from at least two of the following categories: religions of "The Book" (Judaism, Christianity, Islam) scriptural Asian religions (Hinduism, Buddhism, Confucianism, Daoism) indigenous Asian religions (Shintoism, Bonism, Shamanism) North and/or South American native religions, African and/or African diaspora religions.

Courses which meet this guideline include (but are not limited to):

Code	Title	Credits
RELI 3998	Individualized Studies in RELI	2-8
HIST 1080	History of World Religions	4

Courses that partially meet this guideline include (to fully meet this guidelines at least two of these areas must be addressed):

FOR RELIGIONS OF "THE BOOK"
Code	Title	Credits
HIST 3260	History of Christianity	4

FOR NORTH AND/OR SOUTH AMERICAN NATIVE RELIGIONS
Code	Title	Credits
INDG 3015	First Peoples of North America	4

FOR AFRICAN AND/OR AFRICAN DIASPORA RELIGIONS
Code	Title	Credits
HIST 3010/ CUST 3167	African History & Culture	4

THEORETICAL FOUNDATIONS OF ALLIED DISCIPLINES
- Learning Outcome: Understand theoretical foundations of at least two academic disciplines that support the pluralistic study of religion, such as anthropology, art, philosophy, history, literature, political science, psychology, or sociology.

Courses that partially meet this guideline include (to fully meet this guideline at least two areas need to be addressed):

FOR ANTHROPOLOGY
Code	Title	Credits
ANTH 1010	Introduction to Cultural Anthropology	4

FOR ARTS

Code	Title	Credits
ARTS 1050	Humanities Through the Arts	4
ARTS 2020	Art History I: Prehistory to Renaissance	4
ARTS 2025	Art History II: Baroque to Modern	4
ARTS 4010	Art History: Methods and Theories	4

FOR HISTORY

Code	Title	Credits
HIST 1070	Global History from the 1500	4
HIST 1075	Global History to 1500	4
HIST 1115	Western Civilization I	4
HIST 2025	US History to 1865: What Does it Mean to be a Free Nation?	4
HIST 2030	US History From 1865 to the Present	4

FOR POLITICAL SCIENCE

Code	Title	Credits
POLI 3005	America's Founding Ideas	4
POLI 4010	Global Perspectives on Political Theory	4

FOR LITERATURE

Code	Title	Credits
LITR 1005	Introduction to Literature	4

FOR PHILOSOPHY

Code	Title	Credits
PHIL 2005	Introduction to Philosophy	4

FOR PSYCHOLOGY

Code	Title	Credits
PSYC 1005	Introduction to Psychology	4

FOR SOCIOLOGY

Code	Title	Credits
SOCI 1005	Exploring Society: An Introduction to Sociology	4
SOCI 2010	Introduction to Race Class & Gender	4
SOSC 3015	Great Conversations in Social Thought	4

CONCENTRATION IN WORLD LANGUAGES

Studies in world languages (e.g., ASL, French, Italian, Spanish, etc.) aim to foster cross-national and cross-cultural understanding and to facilitate the development of skills associated with language acquisition, such as speaking, writing, reading and listening. These skills are particularly important in the 21st century, when local and world cultures are increasingly intertwined. Indeed, linguistic and cultural competency opens numerous opportunities to experience and contribute to globalization and enhances learners' professional and personal growth.

World Languages concentrations should address the following general guidelines:

LANGUAGE SKILLS
- Learning Outcome: demonstrate the ability to use resources in the target language and to access cultural information

Courses which meet this guideline include (but are not limited to):

Code	Title	Credits
SPAN 3005	Advanced Spanish Composition	4
SPAN 3010	Spanish for Health Care Professionals: Advanced	4
SPAN 3015	Advanced Spanish: Language & Culture	4
SPAN 3020	Civilizations of the Spanish Speaking World	4
SPAN 4020	Spanish Avant-Garde(s): Literature Painting Film	4

ATTITUDE
- Learning Outcome: demonstrate an inquiring and open-minded attitude when faced with otherness.

Courses which meet this guideline include (but are not limited to):

Code	Title	Credits
LING 3020	Language & Culture	4
SPAN 3030	Latinx in the US	4
SPAN 3025	Contemporary Spanish American Theater	4

LANGUAGE AND LITERATURE
In their studies of world languages, students might want to focus on literature or language.

LITERATURE
If the focus is in literature, students' programs should address the following guidelines:

LITERARY KNOWLEDGE
- Learning Outcome: demonstrate an understanding of the literary, cultural, and political contexts of literature in the target language.

Courses which meet this guideline include (but are not limited to):

Code	Title	Credits
SPAN 3025	Contemporary Spanish American Theater	4
SPAN 4005	Contemporary Latin American Literature	4
SPAN 4015	Jorge Luis Borges	4
SPAN 4020	Spanish Avant-Garde(s): Literature Painting Film	4

LINGUISTIC KNOWLEDGE
- Learning Outcome: demonstrate advanced-level knowledge of the target language and/or familiarity with theories of second language acquisition.

Courses which meet this guideline include (but are not limited to):

Code	Title	Credits
SPAN 4010	History of Spanish Language	4
LING 4010	Second Language Acquisition	4
LING 4030	Foreign Language Pedagogy	4

HISTORICAL/CULTURAL KNOWLEDGE
- Learning Outcome: demonstrate advanced-level knowledge of the civilization or history that focuses on the region where the target language is spoken

Courses which meet this guideline include (but are not limited to):

Code	Title	Credits
SPAN 3020	Civilizations of the Spanish Speaking World	4
SPAN 3030	Latinx in the US	4

LANGUAGE

If the focus is in language, students' programs should address the following guidelines:

LINGUISTIC KNOWLEDGE

- Learning Outcome: demonstrate knowledge of linguistic theory, the structure of the target language in the context of linguistic theory and/or familiarity with theories of second language acquisition

Courses which meet this guideline include (but are not limited to):

Code	Title	Credits
SPAN 4010	History of Spanish Language	4
LING 1005	Introduction to Linguistics	4
LING 3020	Language & Culture	4
LING 4010	Second Language Acquisition	4
LING 4030	Foreign Language Pedagogy	4

LANGUAGE SKILLS

Learning Outcome: demonstrate advanced-level language and linguistics skills in the target language.

Courses which meet this guideline include (but are not limited to):

HISTORICAL/CULTURAL KNOWLEDGE

- Learning Outcome: demonstrate advanced-level knowledge of the civilization or history that focuses on the region where the target language is spoken.

Courses which meet this guideline include (but are not limited to):

Code	Title	Credits
SPAN 3020	Civilizations of the Spanish Speaking World	4
SPAN 3030	Latinx in the US	4

CONCENTRATION IN WRITING

EXPOSITORY WRITING

Concentrations in expository writing generally reflect a competency-based program that enables students to become more effective writers of expository prose. It is a program of studies for students who have mastered:

- Basic lower-division writing skills, including correct use of grammar, diction, punctuation, sentence and paragraph structures.
- Clarity, coherence and concreteness in the development of thought.

Well-developed concentrations in expository writing should address the following guidelines:

THEORY

- Learning Outcome: demonstrate an understanding of at least one of rhetoric, grammar, logic, style, or linguistics

Courses which meet this guideline include (but are not limited to):

Code	Title	Credits
COMW 2005	Effective Academic Writing	2,3
COMW 3006	Research Writing: Advanced	3-4

HISTORY

- Learning Outcome: demonstrate an understanding of the development of the English language either through linguistic or literary studies

Courses which meet this guideline include (but are not limited to):

Code	Title	Credits
LING 1005	Introduction to Linguistics	4
LING 3005	Introduction to Pragmatics	4
LITR 2010	American Literature to 1865	4
LITR 2015	American Literature 1865-Present	4
LITR 3040	Jane Austen	4
LITR 3075	Literature & the Culture of the Vampire	4
LITR 3095	Shakespeare	4
LITR 3141	Modern American Literature	4
LITR 3192	20th Century American Literature	3

PRACTICE

- Learning Outcome: demonstrate advanced-level facility in the writing of expository prose, professional writing and research

Courses that partially meet this guideline include (to fully meet this guideline at least two areas need to be addressed):

Code	Title	Credits
DIGA 2020	Writing for New Media	4
COMM 3030	News & Feature Writing	4
COMM 3060	Political Communication	3
COMM 3127	Advanced Public Relations	3,4
COMW 3005	Proposal Writing and Logical Argument	3
COMW 3006	Research Writing: Advanced	3-4
COMW 3015	Technical Writing	4
COMW 3122	Proposal Writing	2
CRWR 3015	Creative Nonfiction: Advanced	4

While much of the work in the concentration should include practice in expository writing, the degree program could reflect a broad range of cultural studies in other liberal arts and sciences, including studies that will give students the opportunity to write in subject areas in the humanities and social sciences.

CREATIVE WRITING

Concentrations in creative writing generally include studies that will focus on the form, structure and uses of language as it is applied to fiction, poetry or drama. For disciplinary concentrations in creative writing, major emphasis will be placed on the practice of writing with supporting attention to theoretical and historical studies.

Creative writing is a competency-based concentration which should address:

THEORY

- Learning Outcome: demonstrate an understanding of critical theory, particularly in the student's genre of primary interest

Courses which meet this guideline include (but are not limited to):

Code	Title	Credits
LITR 2035	Introduction to Literature: Hamlet	3
LITR 3050	Literary Theory	4

HISTORY

- Learning Outcome: demonstrate an appreciation of at least one literary genre in historical perspective through the study of literary texts, major authors or literary criticism.

Courses which meet this guideline include (but are not limited to):

Code	Title	Credits
LITR 2010	American Literature to 1865	4
LITR 2015	American Literature 1865-Present	4
LITR 3040	Jane Austen	4
LITR 3075	Literature & the Culture of the Vampire	4
LITR 3095	Shakespeare	4
LITR 3141	Modern American Literature	4
LITR 3192	20th Century American Literature	3

PRACTICES

- Learning Outcome: demonstrate facility in writing fiction, poetry or drama.

Courses that partially meet this guideline include (to fully meet this guideline at least two areas need to be addressed):

- Any CRWR course

Cultural Studies: B.A., B.S.

Students in Cultural Studies will explore the ways in which human beings understand, organize, interpret and communicate the world. Students will have the opportunity to consider philosophical, literary, and artistic expressions, and social structures, values, norms, belief systems and historical perspectives across time, place and cultures on issues such as ethics, gender, class and race.

Cultural studies will enhance awareness and understanding of people all over the world. Students will sharpen skills in writing and research and critical reading and thinking, as, together with a faculty mentor, they create a program to meet their own specific needs and goals.

Students pursuing degrees in Cultural Studies design individualized degree plans based on their academic, professional, and/or personal goals and interests. General program guidelines can be found on the "Program Details" tab. Students can work with their academic mentors to choose courses and to identify applicable transfer credit, prior college-level learning, and possible course equivalencies. Working with a mentor and using SUNY Empire's educational planning process, students can develop a specialized concentration in Cultural Studies by following applicable concentration guidelines or by proposing a concentration of their own design.

For more information about general undergraduate degree requirements, please visit Earning an Undergraduate Degree (p. 185).

For sample degree programs and other degree planning resources, please visit the Department of Literature, Communication and Cultural Studies Degree Planning Resources web page (https://www.sunyempire.edu/literature-communication-culture/degree-planning-resources/).

For more information about Cultural Studies, please visit the Literature, Communication and Cultural Studies webpage (https://www.sunyempire.edu/literature-communication-culture/).

Program Details

Cultural studies explore how human beings make sense of our world and the qualities that make us most human. Disciplines such as communications and media, language, literature, philosophy, religion, and writing develop our awareness; our abilities to think, feel, and speak; our appreciation of the values and knowledge underlying these fields; and our sense of ourselves as connected to a greater whole.

All bachelor's degree programs in Cultural Studies should address the following four guidelines. Courses listed below meet each foundation, but this list is not exhaustive. Students should work with their mentor ensure proper course choices.

Foundation #1: Knowledge of a Field or Fields

Code	Title	Credits
COMM 1020	Introduction to Communication	4
CUST 4020	Medical Humanities	4
LING 1005	Introduction to Linguistics	4
LING 3020	Language & Culture	4
LITR 1005	Introduction to Literature	4
PHIL 2005	Introduction to Philosophy	4
RELI 2025	Introduction to Religious Studies	4

Foundation #2: Theoretical Knowledge

Code	Title	Credits
ARTS 1140	Media and Visual Literacy	4
CUST 3015	Food & Drink in Cultural Context: Advanced	4
CUST 3152	Queering American Culture	4
CUST 3425	Sex and Sexuality: Facts and Fictions	4
CUST 4020	Medical Humanities	4
DIGA 4015	History & Theory of New Media	4
LING 1005	Introduction to Linguistics	4
LING 3020	Language & Culture	4
LITR 2035	Introduction to Literature: Hamlet	3
LITR 3050	Literary Theory	4
PHIL 2005	Introduction to Philosophy	4
PHIL 2020	Introduction to Ethics	4
RELI 2025	Introduction to Religious Studies	4
RELI 4010	Religious Thought in World Perspective	4

Foundation #3: Diverse Perspectives and Social Responsibility

Code	Title	Credits
ASLG 1005	American Sign Language and Deaf Culture I	4
COMM 1005	Intercultural Communication	2-3
COMM 3025	Media Ethics & Law	3,4
COMM 3045	Television & Culture	4
COMM 4015	Women, Girls & the Media	4
CUST 3015	Food & Drink in Cultural Context: Advanced	4
CUST 3152	Queering American Culture	4
CUST 3182	Exploring Place History: Advanced	4
CUST 3425	Sex and Sexuality: Facts and Fictions	4
CUST 4010	Exploring Place: Humanities	4

DIGA 4015	History & Theory of New Media	4
LING 3020	Language & Culture	4
LITR 2006	African American Literature: Intro	4
LITR 2040	World Literature: Introductory	4
LITR 3008	African American Literature: Advanced	4
LITR 3015	Cultural Diversity through Literary Art	4
LITR 3030	World Literature: Advanced	4
LITR 3080	Native American Literature	4
LITR 3130	US Multicultural Fiction	4
LITR 3132	Asian American Writers	4
LITR 3135	U.S. Women's Multicultural Life Writings	4
LITR 3160	Literature of the Holocaust	4
LITR 3172	Mythology	4
PHIL 2005	Introduction to Philosophy	4
PHIL 2020	Introduction to Ethics	4
RELI 2025	Introduction to Religious Studies	4
RELI 4010	Religious Thought in World Perspective	4
SPAN 1005	Spanish for Health Care Professionals	4
SPAN 3030	Latinx in the US	4

Foundation #4: Critical Thinking, Reading, and Writing

Code	Title	Credits
COMM 2010	Writing for Digital Media	4
COMM 3030	News & Feature Writing	4
COMM 3045	Television & Culture	4
COMM 4015	Women, Girls & the Media	4
COMW 1005	College Writing	3,4
COMW 1015	College Reading & Writing	3,4
COMW 2005	Effective Academic Writing	2,3
COMW 3005	Proposal Writing and Logical Argument	3
COMW 3006	Research Writing: Advanced	4
COMW 3122	Proposal Writing	2
Any CUST Course		4
Any LING Course		4
Any LITR Course		4
Any PHIL Course		4
Any RELI course		4

Learning Outcomes

- Foundation 1: Knowledge of a field or fields, Students will demonstrate knowledge and understanding of the historical foundations, current issues, and major texts in an area of Cultural Studies inquiry.
- Foundation 2: Theoretical knowledge, Students will examine, explain, and apply theories, critical approaches, and methodologies in an area of Cultural Studies inquiry.
- Foundation 3: Diverse perspectives and social responsibility, Students will examine and reflect on diverse cross-cultural perspectives in an area of inquiry (e.g., questions of race, gender, class, ethnicity, religion, sexual identity, disability, migration, etc.); and consider the responsibilities of members in a just society.
- Foundation 4: Critical thinking, reading, and writing, Students will read, write and evaluate print-based and digital media sources of information critically, i.e., with sustained attention to meaning, presentation, and argument. Build the capacity to identify and

describe main ideas, underlying assumptions, and valid conclusions. Create and share information using a range of collaborative technologies; evaluate and cite sources correctly.

Concentration Guidelines

Concentrations in Cultural Studies begin with foundational studies, which prepare the student for more advanced-level work. Advanced-level competency should be developed in those areas which are most relevant to the specific concentration design and to the specific organizing framework. In planning the concentration, consideration should be given both to depth and breadth. Students wishing to pursue individualized concentrations should use the general Cultural Studies degree guidelines as an organizing framework for their degree plans.

Specific guidelines have been developed for concentrations in the following areas:

- Communication and Media (p. 57)
- Literature (p. 59)
- Philosophy (p. 59)
- Religious Studies (p. 61)
- World Languages (p. 62)
- Writing (p. 63)

Students interested in journalism or broadcasting should consult the concentration guidelines for Communication and Media, Writing, or a combination of these. Students interested in English should consult the concentration guidelines for Literature, Writing, Communication and Media, or a combination of these.

If you are interested in an area not listed here, please contact your mentor about designing your own concentration.

Concentration In Communication And Media

Concentrations in communication and media studies should demonstrate knowledge of processes, procedures, methodologies and media involved in interactions between people and within groups, and the dissemination of information and ideas. Twenty-first-century studies in communication and media include an examination of media's impact on culture, democracy and digital identity in an era of rapid technological change and emerging environments as well as practical skills for the 21st century workplace.

Bachelor students should take at least one course for each of the following outcomes.

Field Knowledge (Correlates with the Knowledge of a Field Guideline)
- Learning Outcome: Explain fundamental principles of the field of communication including individual, group, and mass communication or media communication.

Courses which meet this guideline include (but are not limited to):

Code	Title	Credits
COMM 1020	Introduction to Communication	4

- Learning Outcome: Interpret media artifacts, which may include examples from print, radio, television, and/or the internet

Courses which meet this guideline include (but are not limited to):

Code	Title	Credits
ARTS 1140	Media and Visual Literacy	4

Historical Knowledge and Currency
- Learning Outcome: Trace the development of the history of at least one form of media, including past and future technologies and products.

Courses which meet this guideline include (but are not limited to):

Code	Title	Credits
COMM 3045	Television & Culture	4
COMM 4015	Women, Girls & the Media	4
DIGA 4015	History & Theory of New Media	4

- Learning Outcome: Demonstrate advanced usage of current media technologies

Courses which meet this guideline include (but are not limited to):

Code	Title	Credits
COMM 3015	Social Media: Communication & Culture	4

Theoretical or Methodological Application (Correlates with Theoretical Knowledge)
- Learning Outcome: examine, explain, and apply theories, critical approaches, and/or methodologies in communication and/or media.

Courses which meet this guideline include (but are not limited to):

Code	Title	Credits
DIGA 4015	History & Theory of New Media	4

Diverse Perspectives and Social Responsibility (Correlates with Diverse Perspectives and Social Responsibility Outcome)
- Learning Outcome: examine and reflect on diverse cross-cultural perspectives in communication and/or media (e.g., questions of race, gender, class, ethnicity, religion, sexual identity, disability, migration, etc.); and consider the responsibilities of members in a just society.

Courses which meet this guideline include (but are not limited to):

Code	Title	Credits
COMM 3045	Television & Culture	4
COMM 4015	Women, Girls & the Media	4

- Learning Outcome: Apply ethical and legal principles of communication and media

Courses which meet this guideline include (but are not limited to):

Code	Title	Credits
COMM 3025	Media Ethics & Law	3,4

Synthesis of Understanding and Future Preparation
- Learning Outcome: Synthesize knowledge and skills to prepare for future

Courses which meet this guideline include (but are not limited to):

COMM-3998 Capstone in Media & Communications

Skills
- Learning Outcome: Demonstrate basic writing and research skills

Courses which meet this guideline include (but are not limited to):

Code	Title	Credits
COMW 1005	College Writing	3,4
COMW 1015	College Reading & Writing	3,4
COMW 2005	Effective Academic Writing	2,3
COMW 3005	Proposal Writing and Logical Argument	3
COMW 3006	Research Writing: Advanced	4
COMW 3122	Proposal Writing	2

- Learning Outcome: Explain principles of individual and group communications

Courses which meet this guideline include (but are not limited to):

Code	Title	Credits
COMM 1010	Interpersonal Communication	4
COMM 2016	Digital Communication Strategies I	2

- Learning Outcome: Demonstrate advanced skills in **one** of the following tracks (choose at least one course)

Courses which meet this guideline include (but are not limited to):

Marketing Track

Code	Title	Credits
MRKT 1005	Marketing Principles Prerequisite for all other Marketing courses	4
MRKT 3010	Consumer Behavior	4
MRKT 3025	Digital and Social Media Marketing	4
MRKT 3055	Public Relations	4
MRKT 3045	Marketing Management	4
MRKT 4035	Marketing Research pre-requisite, Statistics and Marketing Principles	4
MRKT 4040	Marketing Strategy	4

Writing/Journalism Track

Code	Title	Credits
CRWR 1000	Introduction to Creative Writing	4
CRWR 1015	Creative Nonfiction: Introductory	4
COMW 2005	Effective Academic Writing	2,3
COMM 2010	Writing for Digital Media	4
COMM 3030	News & Feature Writing	4
CRWR 3015	Creative Nonfiction: Advanced	4
COMW 3015	Technical Writing	4
COMW 3122	Proposal Writing	2
DIGA 3040	Digital Storytelling	4

Interpersonal and Group Communications Track

Code	Title	Credits
COMM 1030	Public Speaking	4
COMM 2016	Digital Communication Strategies I	2
COMM 3055	Organizational Communication	3
COMM 3060	Political Communication	3
COMM 3005	Communication Analysis	4
COMM 4025	Communication Decisions	4

Concentration In Literature

The literature concentration is designed to develop students' critical thinking, expository writing and analytic abilities through a study of works of literature written primarily in English. Through a study of texts from different periods, genres and national origins, students will develop a breadth and depth of knowledge and understanding of literature, including authors, themes and literary works. Students are expected to learn about formal aspects of writing as well as the broader cultural and historical contexts of literary texts.

Literature concentrations should address the following:

Foundational Knowledge (Correlates with the Knowledge of a Field Guideline)

- Learning Outcome: demonstrate an understanding of the field of literary studies.

A course which meets this guideline include (but is not limited to):

Code	Title	Credits
LITR 1005	Introduction to Literature	4

Theory and Criticism (Correlates with the Theoretical knowledge Guideline)

- Learning Outcomes: demonstrate an understanding of critical approaches to literature. B.A. degree plans should also demonstrate an advanced knowledge of literary theory

Courses which meet this guideline include (but are not limited to):

Code	Title	Credits
LITR 2035	Introduction to Literature: Hamlet	3
LITR 3050	Literary Theory	4

Diversity (Correlates with the Diverse Perspectives and Social Responsibility Guideline)

- Learning Outcome: demonstrate an understanding of issues of diversity in literary studies (African-American literature, Native-American literature, Asian-American literature, Latino-American literature, multicultural writers, women writers, women's and gender studies, queer fiction, immigrant literature, social protest fiction and disability studies)

Courses which contribute to the meeting of this guideline include (but are not limited to):

Code	Title	Credits
LITR 2006	African American Literature: Intro	4
LITR 2040	World Literature: Introductory	4
LITR 3008	African American Literature: Advanced	4
LITR 3015	Cultural Diversity through Literary Art	4
LITR 3030	World Literature: Advanced	4
LITR 3080	Native American Literature	4
LITR 3130	US Multicultural Fiction	4
LITR 3132	Asian American Writers	4
LITR 3133	American Women Writers	4
LITR 3135	U.S. Women's Multicultural Life Writings	4
LITR 3160	Literature of the Holocaust	4

Genres of Literature

- Learning Outcome: demonstrate an understanding of several genres of literature, including poetry, fiction, and drama (may also include knowledge of creative writing, memoir and more experimental techniques)

Courses which contribute to the meeting of this guideline include (but are not limited to):

Code	Title	Credits
LITR 2020	An Introduction to The Modern Short Story	4
LITR 2030	Children's Literature: Introductory	3-4
LITR 2050	Science Fiction & the Human Dynamic: Introduction	4
LITR 3010	Children's Literature: Advanced	4
LITR 3022	Ekphrasis Poetry	4
LITR 3025	Folktales, Fairy Tales, & Fantasy Literature	4
LITR 3035	Utopian Literature	4
LITR 3046	Poetry	4
LITR 3090	Science Fiction & the Human Dynamic: Advanced	4
LITR 3095	Shakespeare	4
LITR 3115	The Modern Short Story	4
LITR 3120	The Popular Romance Novel	4
LITR 3127	The Graphic Novel	4
LITR 3145	Young Adult Literature	4
LITR 3207	American Poetry	3

Literary Periods

- Learning Outcome: demonstrate an understanding of literary periods (may include knowledge of early/late British literature and/or early/late American literature; it may include comparative literature from other literatures in English)

Courses which contribute to the meeting of this guideline include (but are not limited to):

Code	Title	Credits
LITR 2010	American Literature to 1865	4
LITR 2015	American Literature 1865-Present	4
LITR 3040	Jane Austen	4
LITR 3075	Literature & the Culture of the Vampire	4
LITR 3095	Shakespeare	4
LITR 3141	Modern American Literature	4
LITR 3192	20th Century American Literature	3

Depth (Applies only to B.A. degree plans)

- Learning Outcome: demonstrate advanced knowledge of one or more major authors, literary movements, themes, or genres

Courses which meet this guideline include any appropriate advanced-level literature course.

Concentration In Philosophy

Existing both as an academic discipline in its own right and as the activity of philosophical inquiry (or "philosophizing") that is integral to numerous other academic areas (political theory, literary theory, fine arts, comparative religion, sociology of scientific knowledge, linguistics, etc.), philosophy is a cornerstone of the humanities. A concentration in philosophy can be organized in many different ways and should therefore reflect the student's particular learning goals. Note that students who are

considering the pursuit of a graduate degree in the actual *discipline* of philosophy should research the expectations of graduate programs offering such a degree and plan their concentration accordingly.

Philosophy concentrations at both the Associates and Bachelor's level should address the following:

Ethics
- Learning Outcome: Articulate philosophical questions, perspectives, and arguments in:
- Ethics using vocabulary, concepts, and methods deriving from the discipline of
- Philosophy and/or other academic areas with significant philosophical components.

Courses which meet this guideline include (but are not limited to):

Code	Title	Credits
PHIL 2005	Introduction to Philosophy	4
PHIL 2020	Introduction to Ethics	4

Courses which contribute to the meeting of this guideline include (but are not limited to):

Code	Title	Credits
HIST 2155	The Pursuit of Happiness in American History	4

Politics
- Learning Outcome: Articulate philosophical questions, perspectives, and arguments in politics using vocabulary, concepts, and methods deriving from the discipline of philosophy and/or other academic areas with significant philosophical components.

Courses which meet this guideline include (but are not limited to):

Code	Title	Credits
PHIL 2005	Introduction to Philosophy	4
POLI 3080	Modern Political Theory	4
POLI 3005	America's Founding Ideas	4
POLI 4010	Global Perspectives on Political Theory	4

Metaphysics (Questions of "Reality")
- Learning Outcome: Articulate philosophical questions, perspectives, and arguments in metaphysics using vocabulary, concepts, and methods deriving from the discipline of philosophy and/or other academic areas with significant philosophical components.

Courses which meet this guideline include (but are not limited to):

Code	Title	Credits
PHIL 2005	Introduction to Philosophy	4

Epistemology (Questions of "Knowing")
- Learning Outcome: Articulate philosophical questions, perspectives, and arguments in epistemology using vocabulary, concepts, and methods deriving from the discipline of philosophy and/or other academic areas with significant philosophical components.

Courses which meet this guideline include (but are not limited to):

Code	Title	Credits
PHIL 2005	Introduction to Philosophy	4

Logic and Reasoning
- Learning Outcome: Articulate philosophical questions, perspectives, and arguments in logic and reasoning using vocabulary, concepts, and methods deriving from the discipline of philosophy and/or other academic areas with significant philosophical components.

Courses which meet this guideline include (but are not limited to):

Code	Title	Credits
PHIL 2005	Introduction to Philosophy	4
CUST 2030	Introduction to Critical Thinking	2

Philosophy concentrations at the Bachelor's level should also address the following:

Two (or more) specialized areas of advanced-level philosophical inquiry. Examples of such areas include but are not limited to social and cultural theory (e.g., social justice, queer theory, feminist theory), philosophy of art (aesthetics), literary theory, environmental ethics, political philosophy/theory, philosophy of religion, African philosophy, East Asian philosophy, history of Western philosophy, philosophy of language, and logic.

- Learning Outcome: Articulate at an advanced-level philosophical questions, perspectives, and arguments in at least two specialized areas using vocabulary, concepts, and methods deriving from the discipline of philosophy and/or other academic areas with significant philosophical components.

Courses that contribute to the meeting of this guideline include (to fully meet the guideline, two or more areas need to be addressed):

For Social and Cultural Theory

Code	Title	Credits
GSST 3015	Feminist Theory	4
SOSC 3015	Great Conversations in Social Thought	4
GSST 3152	Queering American Culture	4
SOCI 4035	Privacy Security & Freedom: Social Concerns for the 21st Century	4

For Philosophy of Art

Code	Title	Credits
ARTS 4070	What Is Art?	4
ARTP 4010	Performance Theory	4

For Literary Theory

Code	Title	Credits
LITR 3050	Literary Theory	4

For Political Philosophy/Theory

Code	Title	Credits
POLI 3080	Modern Political Theory	4
POLI 3005	America's Founding Ideas	4
POLI 4010	Global Perspectives on Political Theory	4

For History of Western Philosophy

Code	Title	Credits
HIST 3490	The Enlightenment	4
HIST 3415	Renaissance & Reformation: Origin & Impacts	4

For miscellaneous Advanced-Level Topics

Code	Title	Credits
LITR 3035	Utopian Literature	4
PHIL 3998	Individualized Studies in Philosophy (PHIL)	1-8
PHIL 4998	Individualized Studies in Philosophy (PHIL)	1-8

Note: Applied philosophy courses (e.g., professional ethics courses) may be included as part of a philosophy concentration but do not meet (partially or fully) the guideline for advanced-level philosophical inquiry.

Examples of such courses include:

Code	Title	Credits
BUSN 3010	Business Ethics	4
COMM 3025	Media Ethics & Law	3,4
DIGA 3036	Ethics of Digital Art & Design	4
EDET 6020	Issues and Ethics in the Digital Age	3
EDST 3036	Legal and Ethical Dimensions of Technology for Educators	2
FSMA 3020	Finance Society & Ethics	4
HCLM 6045	Case Studies in Bioethics	3
HLAD 3045	Healthcare Ethics	4
MGMT 3015	Ethics for a Global Economy	4
PAFF 3122	Ethics and the Public Sector	4
PAFF 4132	Legal & Ethical Foundations of Public Service	4
PSYC 3065	Ethical Issues in Psychology	4

Concentration In Religious Studies

Religious stories and devotional behaviors are a core part of most human societies. Throughout time, religions and their varying communities and traditions of interpretation have played vital roles in culturally and politically shaping and reshaping our lives and world. To elucidate this complex of personal, social and historical interconnections requires multiple perspectives and the consideration of diverse religious texts, beliefs and practices.

Although individuals may find religious studies useful in the exploration of their personal beliefs, a degree in Cultural Studies with a concentration in Religious Studies shall also adopt a pluralistic perspective that examines multiple schools of religious thought, including critiques of religion itself, reflecting the tacit understanding that no tradition has exclusive access to religious truth, however that is defined.

Religious Studies concentrations at both the Associates and Bachelor's level should address the following:

Theories that Define Religion
- Learning Outcome: Evaluate theories that define the phenomenon of religion by analyzing recurring religious themes, patterns, structures, language and practices; identifying and analyzing core components such as deity, cosmogony, theodicy and ethics; and critically examining the significance of sacred texts, scriptures, traditions, rituals and devotional practices.

Courses which meet this guideline include (but are not limited to):

Code	Title	Credits
RELI 2025	Introduction to Religious Studies	4

Religious Traditions
- Learning Outcome: Investigate traditions from at least two of the following categories: religions of "The Book" (Judaism, Christianity, Islam) scriptural Asian religions (Hinduism, Buddhism, Confucianism, Daoism) indigenous Asian religions (Shintoism, Bonism, Shamanism) North and/or South American native religions, African and/or African diaspora religions.

Courses which meet this guideline include (but are not limited to):

Code	Title	Credits
RELI 3998	Individualized Studies in RELI	2-8
HIST 1080	History of World Religions	4

A course that partially meets this guideline include (to fully meet this guideline at least two of these areas must be addressed):

For Religions of "The Book"

Code	Title	Credits
HIST 3260	History of Christianity	4

For North and/or South American Native Religions

Code	Title	Credits
INDG 3015	First Peoples of North America	4

For African and/or African Diaspora Religions

Code	Title	Credits
HIST 3010	African History & Culture	4
CUST 3167	African History & Culture	4

Theoretical Foundations of Allied Disciplines
- Learning Outcome: Understand theoretical foundations of at least two academic disciplines that support the pluralistic study of religion, such as anthropology, art, philosophy, history, literature, political science, psychology, or sociology.

Courses that partially meet this guideline include (to fully meet this guideline at least two areas need to be addressed):

For Anthropology

Code	Title	Credits
ANTH 1010	Introduction to Cultural Anthropology	4

For Arts

Code	Title	Credits
ARTS 1050	Humanities Through the Arts	4
ARTS 2020	Art History I: Prehistory to Renaissance	4
ARTS 2025	Art History II: Baroque to Modern	4
ARTS 4010	Art History: Methods and Theories	4

For History

Code	Title	Credits
HIST 1070	Global History from the 1500	4
HIST 1075	Global History to 1500	4
HIST 1115	Western Civilization I	4
HIST 2025	US History to 1865: What Does it Mean to be a Free Nation?	4
HIST 2030	US History From 1865 to the Present	4

For Political Science

Code	Title	Credits
POLI 4010	Global Perspectives on Political Theory	4
POLI 3005	America's Founding Ideas	4

For Literature

Code	Title	Credits
LITR 1005	Introduction to Literature	4

For Philosophy

Code	Title	Credits
PHIL 2005	Introduction to Philosophy	4

For Psychology

Code	Title	Credits
PSYC 1005	Introduction to Psychology	4

For Sociology

Code	Title	Credits
SOCI 1005	Exploring Society: An Introduction to Sociology	4
SOCI 2010	Introduction to Race Class & Gender	4
SOSC 3015	Great Conversations in Social Thought	4

Religious Studies concentrations at the Bachelor's level should also address the following:

Comparison of Religious Traditions

- Learning Outcome: Compare traditions from at least three of the following categories: religions of "The Book" (Judaism, Christianity, Islam) scriptural Asian religions (Hinduism, Buddhism, Confucianism, Daoism) indigenous Asian religions (Shintoism, Bonism, Shamanism) North and/or South American native religions African and/or African diaspora religions.

Courses that meet this guideline include (but are not limited to):

Code	Title	Credits
RELI 4010	Religious Thought in World Perspective	4

Critical Issues

- Learning Outcome: Investigate and compare critical issues in religious studies. Such issues might include but are not limited to:
- The place of religion in societies both as an institution and as an ethical and/or moral authority.
- How diverse traditions account for male and female roles.
- The role of religions as a political force from both historical and contemporary perspectives.

Courses that meet this guideline include (but are not limited to):

Code	Title	Credits
RELI 4010	Religious Thought in World Perspective	4
RELI 4005	Comparative Religious Ethics	4
SOCI 3135	Religion in the US Today	4
HIST 3260	History of Christianity	4
HIST 3100	American Religious History I	4
HIST 3242	American Religious History II	4
HIST 3415	Renaissance & Reformation: Origin & Impacts	4
HIST 3490	The Enlightenment	4

Concentration In World Languages

Studies in world languages (e.g., ASL, French, Italian, Spanish, etc.) aim to foster cross-national and cross-cultural understanding and to facilitate the development of skills associated with language acquisition, such as speaking, writing, reading and listening. These skills are particularly important in the 21st century, when local and world cultures are increasingly intertwined. Indeed, linguistic and cultural competency opens numerous opportunities to experience and contribute to globalization and enhances learners' professional and personal growth.

World Languages concentrations should address the following general guidelines:

Language Skills

- Learning Outcome: demonstrate the ability to use resources in the target language and to access cultural information

Courses which meet this guideline include (but are not limited to):

Code	Title	Credits
SPAN 3015	Advanced Spanish: Language & Culture	4
SPAN 3010	Spanish for Health Care Professionals: Advanced	4
SPAN 3005	Advanced Spanish Composition	4
SPAN 4020	Spanish Avant-Garde(s): Literature Painting Film	4
SPAN 3020	Civilizations of the Spanish Speaking World	4

Attitude

- Learning outcome: demonstrate an inquiring and open-minded attitude when faced with otherness.

Courses which meet this guideline include (but are not limited to):

Code	Title	Credits
LING 3020	Language & Culture	4
SPAN 3030	Latinx in the US	4
SPAN 3025	Contemporary Spanish American Theater	4

Language and Literature

In their studies of world languages, students might want to focus on literature or language.

Literature

If the focus is in literature, students' programs should address the following guidelines:

Literary Knowledge

- Learning Outcome: demonstrate an understanding of the literary, cultural, and political contexts of literature in the target language.

Courses which meet this guideline include (but are not limited to):

Code	Title	Credits
SPAN 3025	Contemporary Spanish American Theater	4
SPAN 4005	Contemporary Latin American Literature	4
SPAN 4015	Jorge Luis Borges	4
SPAN 4020	Spanish Avant-Garde(s): Literature Painting Film	4

Linguistic Knowledge
- Learning Outcome: demonstrate advanced-level knowledge of the target language and/or familiarity with theories of second language acquisition.

Courses which meet this guideline include (but are not limited to):

Code	Title	Credits
SPAN 4010	History of Spanish Language	4
LING 4030	Foreign Language Pedagogy	4
LING 4010	Second Language Acquisition	4

Historical/Cultural Knowledge
- Learning Outcome: demonstrate advanced-level knowledge of the civilization or history that focuses on the region where the target language is spoken

Courses which meet this guideline include (but are not limited to):

Code	Title	Credits
SPAN 3030	Latinx in the US	4
SPAN 3020	Civilizations of the Spanish Speaking World	4

Language
If the focus is in language, students' programs should address the following guidelines:

Linguistic Knowledge
- Learning Outcome: demonstrate knowledge of linguistic theory, the structure of the target language in the context of linguistic theory and/or familiarity with theories of second language acquisition

Courses which meet this guideline include (but are not limited to):

Code	Title	Credits
SPAN 4010	History of Spanish Language	4
LING 1005	Introduction to Linguistics	4
LING 3020	Language & Culture	4
LING 4010	Second Language Acquisition	4
LING 4030	Foreign Language Pedagogy	4

Language Skills
Learning Outcome: demonstrate advanced-level language and linguistics skills in the target language.

Courses which meet this guideline include (but are not limited to):

Code	Title	Credits
SPAN 3005	Advanced Spanish Composition	4
SPAN 3015	Advanced Spanish: Language & Culture	4
SPAN 3010	Spanish for Health Care Professionals: Advanced	4

Historical/Cultural Knowledge
- Learning Outcome: demonstrate advanced-level knowledge of the civilization or history that focuses on the region where the target language is spoken.

Courses which meet this guideline include (but are not limited to):

Code	Title	Credits
SPAN 3020	Civilizations of the Spanish Speaking World	4
SPAN 3030	Latinx in the US	4

Concentration In Writing
Expository Writing
Concentrations in expository writing generally reflect a competency-based program that enables students to become more effective writers of expository prose. It is a program of studies for students who have mastered:

- Basic lower-division writing skills, including correct use of grammar, diction, punctuation, sentence and paragraph structures.
- Clarity, coherence and concreteness in the development of thought.

Well-developed concentrations in expository writing should address the following guidelines:

Theory
- Learning Outcome: demonstrate an understanding of at least one of rhetoric, grammar, logic, style, or linguistics

Courses which meet this guideline include (but are not limited to):

Code	Title	Credits
COMW 2005	Effective Academic Writing	2,3
COMW 3006	Research Writing: Advanced	3-4

History
- Learning Outcome: demonstrate an understanding of the development of the English language either through linguistic or literary studies

Courses which meet this guideline include (but are not limited to):

Code	Title	Credits
LING 1005	Introduction to Linguistics	4
LING 3005	Introduction to Pragmatics	4
LITR 2010	American Literature to 1865	4
LITR 2015	American Literature 1865-Present	4
LITR 3040	Jane Austen	4
LITR 3075	Literature & the Culture of the Vampire	4
LITR 3095	Shakespeare	4
LITR 3141	Modern American Literature	4
LITR 3192	20th Century American Literature	3

Practice
- Learning Outcome: demonstrate advanced-level facility in the writing of expository prose, professional writing and research

Courses that partially meet this guideline include (to fully meet this guideline at least two areas need to be addressed):

Code	Title	Credits
DIGA 2020	Writing for New Media	4
COMM 3030	News & Feature Writing	4
COMM 3060	Political Communication	3
COMM 3127	Advanced Public Relations	3,4
COMW 3005	Proposal Writing and Logical Argument	3

COMW 3006	Research Writing: Advanced	3-4
COMW 3015	Technical Writing	4
COMW 3122	Proposal Writing	2
CRWR 3015	Creative Nonfiction: Advanced	4

While much of the work in the concentration should include practice in expository writing, the degree program could reflect a broad range of cultural studies in other liberal arts and sciences, including studies that will give students the opportunity to write in subject areas in the humanities and social sciences.

Creative Writing

Concentrations in creative writing generally include studies that will focus on the form, structure and uses of language as it is applied to fiction, poetry or drama. For disciplinary concentrations in creative writing, major emphasis will be placed on the practice of writing with supporting attention to theoretical and historical studies.

Creative writing is a competency-based concentration which should address:

Theory
- Learning Outcome: demonstrate an understanding of critical theory, particularly in the student's genre of primary interest

Courses which meet this guideline include (but are not limited to):

Code	Title	Credits
LITR 2035	Introduction to Literature: Hamlet	3
LITR 3050	Literary Theory	4

History
- Learning Outcome: demonstrate an appreciation of at least one literary genre in historical perspective through the study of literary texts, major authors or literary criticism.

Courses which meet this guideline include (but are not limited to):

Code	Title	Credits
LITR 2010	American Literature to 1865	4
LITR 2015	American Literature 1865-Present	4
LITR 3040	Jane Austen	4
LITR 3075	Literature & the Culture of the Vampire	4
LITR 3095	Shakespeare	4
LITR 3141	Modern American Literature	4
LITR 3192	20th Century American Literature	3

Practices
- Learning Outcome: demonstrate facility in writing fiction, poetry or drama.

Courses that partially meet this guideline include (to fully meet this guideline at least two areas need to be addressed):

- Any CRWR course

Digital Communication: B.S.

The Bachelor of Science (B.S.) in Digital Communication is designed for students pursuing careers in fields such as digital journalism, social media management or marketing; or who aspire to be social media influencers or to otherwise promote a message through social or virtual media; those who plan to work in media professions such as broadcasting or film making that require digital skills; or those who wish to study media history, theory and culture, with particular consideration of digital media's place in history.

This flexible program of study integrates both theory and practice as students consider the cultural influences of digital media, ethical ways to utilize new media tools and interpret data, and practice skills they will use in future careers utilizing digital tools and media. Following a core of communication and media studies principles, students will learn to use a variety of online channels—including tools such as websites, social media such as Facebook, Twitter, Instagram, LinkedIn, and more specialized tools such as YouTube or Tiktok, online newspapers and magazines, and virtual meetings—to communicate effective messages. Students will consider the role of social media; conduct a campaign; utilize virtual media for small and large groups; learn about the history of digital media; consider global ramifications and regulations; learn to apply principles of diversity, equity and inclusion; learn to use digital media products, tools, and techniques in a legally and socially responsible way; and to apply academic theories to their work.

For more information about general undergraduate degree requirements, please visit Earning an Undergraduate Degree (p. 185).

MRKT 3025	Digital and Social Media Marketing	4
MRKT 3030	Marketing Communications: Advertising & Promotion	4
MRKT 3055	Public Relations	4
MRKT 4035	Marketing Research	4
MRKT 4040	Marketing Strategy	4
MUSE 3015	Museum Studies	4
PHOT 3015	History of Photography: Advanced	4

Select one Capstone course from the below list:

Code	Title	Credits
COMM 4015	Women, Girls & the Media	4
COMM 4120	21st Century Journalism	4
DIGA 4122	Professional Digital Portfolio	4
MRKT 4050	Career Self-Management and Self-Marketing	4

Learning Outcomes

Students completing a Digital Communications degree will be able to:

- Students will be able to distinguish among appropriate digital tools for various uses including journalistic,marketing or promotional, artistic, professional networking, influencing and virtual meeting purposes.
- Students will be able to write effectively in a variety of styles appropriate to digital and social media using reliable data and valid research.
- Students will be able to utilize data visualization and visual communication to communicate using digital and social media.
- Students will be able to analyze data visualization and visual communication to communicate using digital and social media.
- Students will be able to analyze the historical, cultural and global contexts for digital communication.
- Students will be able to apply ethical and legal considerations to digital communication.

- Students will be able to differentiate facts and accurate reporting from misinformation and other forms of misleading media manipulations.
- Students will be able to create inclusive and accessible digital communication experiences and materials that consider diversity, equity, sustainability and social justice.
- Students will be able to evaluate communication theories, media theories, digital and new media theories and data visualization theories and apply them to communication practices and the use of social media.
- Students will be able to produce individual and collaborative projects and communication campaigns that use social and virtual media tools.
- Students will be able to synthesize their professional or theoretical abilities in program electives.
- Students will be able to integrate coursework in a capstone course.

Digital Media Arts: B.A., B.S.

The Bachelor of Arts (B.A.) and the Bachelor of Science (B.S.) in Digital Media Arts are designed for students pursuing careers in the digital media arts and design-related fields.

The B.A./B.S. in Digital Media Arts includes a set of required courses that all students must take, along with SUNY General Education and other academic requirements (p. 185), in order to be eligible to receive a degree.#The required courses for programs in Digital Media Arts can be found on the "Program Details" tab. Students should speak with their mentor to see if any credit earned through individualized Prior Learning Assessment (iPLA) (https://www.sunyempire.edu/degree-planning-academic-review/prior-learning-assessment/individualized-prior-learning-assessment/) or Professional Learning Evaluation (PLE) (p. 168) might fulfill these course requirements. Courses are offered online, through independent studies, or through a blended approach.

This flexible program of study integrates both theory and practice into the design and development of digital media art. Students will critically evaluate digital media content and examine the ethical considerations of creating and designing with digital technologies. They will explore the historical, cultural, political, and societal contexts of digital media art and design. This program prepares students to be individual and collaborative producers of digital media with digital images, digital stories, graphic design, information design, web design, multimedia production, media art, animation, and digital art. The program culminates in a digital media capstone experience based on individual student interests and prepares learners to produce a substantial digital media project and/or digital portfolio. Students who complete the B.A. or B.S. in Digital Media Arts will pursue career paths in fields that require the effective evaluation, production, and design of digital media content with emerging technologies. Graduates from this program will pursue careers such as graphic designers, media writers, visual artists, photographers, information designers, art directors, animators, filmmakers, digital storytellers, game developers, and web designers.

For more information about general undergraduate degree requirements, please visit Earning an Undergraduate Degree (p. 185).

DIGA 4999	Capstone in Digital Media Arts	4
Two Advanced Level Electives		8
Total Credits		**64**

Advanced Level Electives
Students will be asked to complete two additional advanced level courses chosen from the list below in consultation with a faculty mentor.

Code	Title	Credits
ARTS 3035	Advanced Graphic Design	4
ARTS 3075	Arts Management	4
DIGA 3015	Advanced Digital Photography	4
DIGA 3025	Advanced Web Design	4
DIGA 3045	Game Design & Development	4
DIGA 3080	Digital Painting	4

Learning Outcomes

Students completing a Digital Media Arts degree will be able to:

- Analyze the artistic theory of digital media in relation to art practice.
- Discuss the historical, cultural, political, and societal contexts for digital media arts.
- Apply the ethical considerations of digital media arts.
- Evaluate digital media content for authenticity and reliability.
- Describe the artistic practice of digital media art and artists.
- Design with an understanding of diversity, equity, and inclusion.
- Produce individual and collaborative digital media art and design projects.

Early Childhood Education: B.S.

Students enrolled in the Early Childhood Education program will examine the processes involved in teaching and learning for children from birth through grade 2. The program philosophy is rooted in the Professional Standards and Competencies for Early Childhood Educators (NAEYC, 2020) and the core body of knowledge, skills, values, and dispositions early childhood educators must demonstrate to effectively promote the development, learning, and well- being of all young children. The curriculum provides a strong foundation in planning and implementing intentional, developmentally, culturally, and linguistically appropriate learning experiences that encourage the social and emotional

development, physical development and health, cognitive development, language and literacy development, and general learning competencies of each child served utilizing evidence-based practices. The majority of this program will be virtual with some evening virtual study groups, in-person observation hours, and practicum student teaching placements in the community.

A separate application for this degree completion program is required. In order to apply, students must have at least 60 credits that encompass a liberal arts and sciences major or the equivalent with a 2.5 GPA and coursework that covers the SUNY General Education Framework.

The following SUNY Transfer Path courses are required and should be included in an associate degree, whenever possible. However, they can be taken after admittance into the program:

- Foundations of Education

Code	Title	Credits
EDST 2005	Schooling in America	4

- Childhood Psychology

Code	Title	Credits
HUDV 1005	Child Development: Introductory	4

- Introduction to Early Childhood/Childhood Education

Code	Title	Credits
ECET 1010	Introduction to Early Childhood Education	4

Content Core

All candidates must provide academic transcripts documenting fulfillment of the NYSED requirements for a content core in the liberal arts and sciences. The AA/AS program may be in a content area such as English Language Arts, Science, Math, History, or the Arts, or include at least 30 credits in a concentration. A distributed concentration across Math, Science, English, History, and Social Science is also acceptable. Please find the planning charts for the liberal arts and sciences content core **here (https://sunyempire.edu/educational-studies/early-childhood-education/).**

Mandatory Professional Licensure Disclosure

New York State takes pride in the high quality of its licensed and certified professionals. For the protection of its citizens, each license and certificate has requirements that individuals must meet in order to be licensed or certified in New York State. SUNY's academic programs leading to licensure or certification are carefully designed to meet and exceed these State requirements. This is a role SUNY plays in protecting the public. Other states frequently have their own requirements, so if your goal is to practice in another state, this disclosure will help you check to see what that state requires. The full details regarding this disclosure related to the applicable SUNY Empire degree programs may be found here (https://sunyempire.edu/online-compliance/licensure/).

Program Details

Required Courses of the Degree
Below are two tables showing the required courses for the B.S. in Early Childhood Education program. Table One shows the required courses based on a student completing their first 60 credits at SUNY Empire, while Table Two shows the required courses based on a student transferring to SUNY Empire and completing their first 60 credits

elsewhere. Please note that there is a range of credits required in this program due to transfer equivalency courses. Students who bring in the three required transfer courses for 3 credits each are likely to require 61 total credits. Since the SUNY Empire equivalent courses are 4 credits each, students completing them at SUNY Empire will require 64 total credits in their program. In some cases, courses such as Introduction to Special Education, or the equivalent, may also be transferred into the program.

Table One (Based On First 60 Credits Completed at SUNY Empire)

Code	Title	Credits
SOSC 2005	Schooling in America	4

[1] Course includes clinical observation hours.

[2] Course includes full-time student teaching placements/practicum.

Learning Outcomes

- Foundation # 1: Professional standards: Define the professional standards including ethics in early childhood education.
- Foundation # 2: Foundational knowledge: Analyze the foundational knowledge of the field from either a historical, philosophical, or sociological perspective.
- Foundation # 3: Human development: Interpret stages of, and the diversity within, human development from birth through age 8 and the impact of development on learning.
- Foundation # 4: Curricular design, instructional strategies, and assessment: Analyze environments and comprehensive curriculum design including assessment, effective practices for planning and designing co-teaching and collaboration with peers and provide individualized instruction from birth through grade 2.
- Foundation # 5: Language and literacy development: Analyze language and literacy development for both native English speakers and students who are English Language Learners from birth to age 8.
- Foundation # 6: Learners and learning: Critically analyze knowledge of learners and the theoretical approaches that support the learning process.
- Foundation # 7: Uses of technology: Evaluate the appropriate use of technology in teaching and learning and evaluate its effectiveness in applied situations.
- Foundation # 8: Diversity: Analyze the impact and importance of human diversity and the implications for educational settings including building relationships between home, school, and community.
- Foundation # 9: Methods of Inquiry: Evaluate teaching practices that include curriculum development, implementation, and self-assessment of professional practices in early childhood educational settings.

Educational Studies: A.A., A.S.

There is an increasing need for individuals who can help others both learn new things and apply what they know in various settings. Students who choose to design a degree program in educational studies have

careers in diverse settings including training, teaching in certain settings or contexts, researching, and policymaking.

Students in educational studies will examine the processes involved in teaching and learning through courses that examine topics such as learning theories or the social context of learning, as well as be exposed to practical applications such as technology in the classroom and curriculum development. Through examination of current issues, innovations and research, students will build a foundation of historical, philosophical, sociological, political, and multicultural and gender perspectives in relation to education. Students will sharpen their skills in writing and research and critical reading and thinking.

Degree programs in Educational Studies offer students the opportunity to develop individualized degree plans based on their intellectual, professional, and personal interests. General program guidelines can be found on the "Program Details" tab, and students will work with an academic mentor to choose courses that meet the guidelines and address each student's individual interests. Students can also work with their academic mentors to identify applicable transfer credit, prior college-level learning, and possible course equivalencies. Working with a mentor and using Empire State University's educational planning process, students can develop a specialized concentration in Educational Studies by following the general program guidelines as well as any applicable concentration guidelines. Students may also develop their own concentrations.

For more information about general undergraduate degree requirements, please visit Earning an Undergraduate Degree (p. 185).

For more information about Educational Studies, including degree program resources, please visit the Educational Studies webpage (https://sunyempire.edu/educational-studies/).

Note: A degree in Educational Studies from Empire State University does not lead to teacher certification at the undergraduate level. Students who are seeking teacher certification should consider either Early Childhood Education (p. 66), or the Empire State University's Master of Arts in Teaching (MAT). All students need to submit an Undergraduate Teaching Certification Disclaime (https://banner.esc.edu/BannerExtensibility/customPage/page/ESC_TeacherCertification/)r.

NONDEGREE STUDENTS

Taking individual courses as a nondegree student (https://www.sunyempire.edu/degrees-programs/nondegree-study/) is possible and will offer the same range of courses and rigorous standards as degree-seeking undergraduate students. Even if you're not pursuing a degree, you can take courses (https://www.sunyempire.edu/educational-studies/courses/) to prepare for university-level study, stay current in your field, or improve your job skills.

Note: Information regarding Continuing Teacher and Leader Education (https://www.sunyempire.edu/graduate-studies/graduate-degrees/education-programs/continuing-teacher-leader-education/) is available.

Professional PREPARATION AND Credentials

- New York State Early Childhood Credentials (https://nyaeyc.org/) including the Infant Toddler Credential (https://nyaeyc.org/itc/) and the Children's Program Administration Credential (https://nyaeyc.org/cpac/) are recommended for individuals planning to work with young children in settings such as childcare or Head Start. Students can complete these credentials as non-matriculated students, or as part of a degree program.

- The Child Development Associate (CDA) (https://www.cdacouncil.org/en/) is available. Students would begin by taking HUDV 1005 Child Development: Introductory, then ECET 2075 Early Childhood Curriculum Planning and Assessment, followed by ECET 2010 Early Childhood Professionalism where they will begin to develop the required portfolio in a Virtual Study Group, completing other required components on their own.

Professional PREPARATION and certification

- Starting in Fall of 2024, SUNY Empire has a new program in **Early Childhood Education** leading to New York State B-2 Initial Certification. This is the only undergraduate program leading to initial certification at this time.
- Teacher certification is available at the graduate level in a variety of content areas through the Master of Arts in Teaching (https://www.esc.edu/graduate-studies/masters-degrees/education-programs/mat/). The M.A.T. program leads to Adolescent (grades 7-12) and Middle Childhood (grades 5-9) NYS Initial Certification in Biology, Chemistry, Earth Science, English Language Arts, Spanish, Mathematics, Physics, Social Studies, and Agricultural Education (pre-K to 12). Special Education is also available at the graduate level.
- Certification Areas and Content Requirements (https://sunyempire.edu/graduate-studies/combined-programs/) web page includes information about how degree study at the university can be relevant to certification, and outlines all content area requirements that should be included in the undergraduate degree.
- Combined Degree Programs in the Master of Arts in Teaching (https://sunyempire.edu/graduate-studies/combined-programs/) allow students to take specified master's level courses during their bachelor's degree and complete their program at an accelerated rate.

Program Details
Degree Guidelines for Associate of Arts and Associate of Science

Associate degree programs in Educational Studies are required to meet at least 5 essential foundations (the first five are recommended). Students will explain how they meet each relevant learning outcome in their rationale essay. Knowledge of each outcome can be demonstrated through transcript credit, individual prior learning assessment (iPLA), prior learning evaluation (PLE), or credit by examination, or specific courses at Empire State University. While many students will take one or more courses for each essential foundation, some courses may meet more than one essential foundation.

The concentrations in Educational Studies begin with the 10 essential foundations which prepare the student for more advanced-level work. Students who wish to concentrate in a specific area should review the concentration guidelines below to guide course selection.

Foundation #1: Professional Standards

Code	Title	Credits
ECET 1005	Exploring the Professions: Children & Child Care	2
ECET 1010	Introduction to Early Childhood Education	4
ECET 2010	Early Childhood Professionalism Family & Culture	4
ECET 3020	Children's Programs: Ethical & Professional Standards	4
EDST 1005	Introduction to Teaching	2

Learning Outcomes

- Foundation 1: Professional Standards, Students will be able to define the professional standards including ethics, related to the chosen concentration.
- Foundation 2: Foundational Knowledge, Students will be able to analyze the foundational knowledge of the field from either a

historical or philosophical perspective, grounding them in the chosen concentration.

- Foundation 3: Human Development, Students will be able to interpret stages of human development appropriate to the chosen concentration.
- Foundation 4: Social Contexts of Learning, Students will be able to illustrate the sociological perspective of learning including the relationships between home, school, and community.
- Foundation 5: Curricular Design, Instructional Strategies, and Assessment, Students will be able to analyze comprehensive curriculum design appropriate to the concentration.
- Foundation 6: Language and Literacy Development, Students will be able to analyze language and literacy development appropriate to the concentration.
- Foundation 7: Learners and Learning, Students will be able to critically analyze knowledge of learners and the theoretical approaches that support the learning process.
- Foundation 8: Uses of Technology, Students will be able to evaluate the appropriate use of technology in teaching and learning and evaluate its effectiveness in applied situations appropriate to the concentration.
- Foundation 9: Diversity, Students will be able to analyze the impact and importance of human diversity, the impact of individual and collective power, privilege, and oppression, and potential implications for educational settings.
- Foundation 10: Methods of Inquiry, Students will be able to demonstrate skills in locating, evaluating, and critically thinking about research related to the chosen field.

CONCENTRATION GUIDELINES

Concentrations in Educational Studies begin with the ten foundations which prepare the student for more advanced-level work. Courses should be selected from those areas which are most relevant to the specific concentration design and to the specific organizing framework. In planning the concentration, consideration should be given to both the depth and breadth of knowledge. Students wishing to pursue individualized concentrations should use the general area of study guidelines as an organizing framework for their degree plans. Specific guidelines have been developed for a concentration core in the following areas:

- Early Childhood Studies (p. 71)
- Educational Technology (p. 71)
- Students with Exceptionalities (p. 71)
- Child Care Administration (p. 72)

EARLY CHILDHOOD STUDIES

Make a difference in the lives of young children and their families with a concentration in early childhood studies. This concentration is designed for students who wish to provide high-quality early learning for all young children, birth through age 8, in formal and informal settings such as childcare, Head Start, and private preschool programs. By connecting early childhood practice, policy, and research, students will be prepared to serve as leaders in this exciting field. Within the 10 essential foundations, students in Early Childhood Studies should specify in their rationale essay how they met the following objectives within their concentration of early childhood studies:

- Learning Outcome: Students will be able to define professionalism including ethics and the NAEYC Code of Ethical Conduct.

- Learning Outcome: Students will be able to interpret stages of human development with emphasis on birth through age 8.
  - Please note: A minimum of one developmental course is expected, and it's highly recommended that students also include HUDV 2035 Attachment in Early Childhood and/or HUDV 4015 Development and Meaning Play.
- Learning Outcome: Students will be able to analyze comprehensive curriculum design that supports learning standards with an emphasis on curriculum and environments that support play.
  - Please note: A minimum of one course related to curriculum is expected and it's highly recommended that students also include HUDV 4015 Development and Meaning Play.
- Learning Outcome: Students will be able to analyze language and literacy development from birth through age 8 that includes a family literacy component.
- Learning Outcome: Students will be able to evaluate the appropriate use of technology in teaching and learning from birth through age 8.
- Learning Outcome: Student will be able to demonstrate skills in locating, evaluating, and critically thinking about research related to their field including observation and assessment of children birth through age 8.

EDUCATIONAL TECHNOLOGY

Technological tools are as common to the modern educational experience as paper and pencil. From preschool programs to high schools and beyond, we see the incorporation of digital aids increasing our abilities to teach and learn. The mere presence of technology does not achieve learning goals. Students who choose to concentrate in Educational Technology will embark on a journey to understand the many dimensions of digital tools so that they can employ them in an informed and purposeful way across variety of settings to meet learning outcomes. Within the 10 foundations, students in Educational Technology should specify in their rationale essay how they met the following objectives within their concentration of educational technology:

- Learning Outcome: Students will be able to define professionalism in the field including a knowledge of relevant standards in areas such as cyber ethics and digital citizenship.
- Learning Outcome: Student will be able to analyze the foundational knowledge of the field from either a historical or philosophical perspective, exploring the impact of technology in the classroom-on-classroom transformation.
- Learning Outcome: Students will be able to analyze comprehensive curriculum design that supports learning standards with an emphasis on instructional design in virtual environments.
- Learning Outcome: Students will be able to interpret relevant standards and expectations for digital literacy including digital fluency and the impact of computing and computational thinking.
- Learning Outcome: Students will be able to evaluate the appropriate use of technology in teaching and learning demonstrating both breadth and depth.

STUDENTS WITH EXCEPTIONALITIES

The Students with Exceptionalities concentration is for those who have a passion for creating equitable and just environments for diverse learners within educational settings. Students who select this concentration are committed to enhancing the learning of students with exceptionalities and will find opportunities to expand their own knowledge and develop skills and proficiency through courses, applied practices, and research. Students will also explore topics of particular interest in their own practice through action research projects and directed readings. In

addition to the 10 foundations, students should specify in their rationale essay how they gained the specific knowledge of the following objectives:

- Learning Outcome: Students will be able to define professionalism in the field including the Council for Exceptional Children's (CEC) Ethical Principles and Professional Practice Guidelines for special educators.
- Learning Outcome: Students will be able to analyze the foundational knowledge of the field from either a historical or philosophical perspective, including the history of disability in America, and the historical and current legislation that supports students with exceptionalities.
- Learning Outcome: Students will be able to interpret stages of human development with emphasis on human exceptionalities.
- Learning Outcome: Students will be able to analyze comprehensive curriculum design that supports learning standards for inclusive learning environments with emphasis on evidence-based practices.
- Learning Outcome: Students will be able to analyze language and literacy development including research and practice for children with exceptionalities.
- Learning Outcome: Students will be able to evaluate the appropriate use of technology in teaching and learning, with an emphasis on assistive technology.

CHILD CARE ADMINISTRATION

Become a leader as an administrator of children's programs that make a difference in the lives of young children and their families with a concentration in Child Care Administration. This concentration is designed for students who wish to develop and/or lead high-quality early learning programs for all young children, birth through age 8, in formal and informal settings such as childcare and private preschool programs.

Please Note: For a concentration in Child Care Administration, students are expected to meet the first 4 learning outcomes listed below. The 5th learning outcome is optional, but is required for students who wish to apply for the Children's Program Administration Credential

- Learning Outcome: Students will be able to define professionalism from the perspective of an administrator including the principles and responsibilities fundamental to professionals working with children, families, staff, and the community.
- Learning Outcome: Students will be able to Summarize the administration of an effective organizational structure for children's programs including personnel and human resource management.
- Learning Outcome: Students will be able to analyze various professional practices associated with children's programs including curriculum development, design of the learning environment, and program assessment and evaluation.
- Learning Outcome: Students will be able to assess the critical nature of financial planning and budgeting and the process for children's educational programs.
- Learning Outcome: Students will be able to demonstrate breadth and depth through the integration of the information and principles and practices of children's program administration.

CHILD DEVELOPMENT ASSOCIATE (CDA)

A Child Development Associate (CDA) is for:

- A qualified caregiver that works with children from birth to age 5 years;
- Able to meet the specific needs of children;
- Works with parents, families, and other adults to nurture children's physical, social, emotional, and intellectual growth in a child development framework;
- Evaluated using the CDA Competency Standards: 6 Competency Goals and 13 Functional Areas.

The CDA process is based upon 3 parts:

Training:

- Complete 480 hours (about 1-year full time) of experience working with infants, toddlers, or young children within the past 5 years.
- Complete 120 clock hours of formal education/training/coursework.

Assessment:

- Assessment is done through a combination of observation, parent opinion questionnaires, and written and oral evaluation. Students will be required to locate and arrange for support of these components on their own.

Credentialing:

- Upon recommendation of the Local Assessment Team, the CDA National Credentialing Program will either award the credential or invite the applicant to reapply for assessment.

Students complete the required 120 clock hours of formal education/ training/coursework by taking the following sequence of courses at SUNY Empire University. Students will begin writing the required competencies for the application process in courses, but they will need to arrange for the required observation by an authorized observer, parent opinion questionnaires, and written and oral evaluation through their employer within their local communities. Students are required to be employed and working in an age-appropriate childcare setting for the required observation.

Code	Title	Credits
Required Courses		
ECET 2075	Early Childhood Curriculum Planning and Assessment Fall, Spring, Summer	4
HUDV 1005	Child Development: Introductory Fall, Spring, Summer	4
ECET 2010	Early Childhood Professionalism Family & Culture Fall, Spring	4
Total Credits		**12**

It is recommended that students begin by taking HUDV 1005 Child Development: Introductory, then ECET 2075 Early Childhood Curriculum Planning and Assessment, followed by ECET 2010 Early Childhood Professionalism where students will begin to develop the required portfolio in a Virtual Study Group.

For registration information, go to https://www.sunyempire.edu/admissions/

INFANT-TODDLER EARLY CARE AND EDUCATION CREDENTIAL

The Infant-Toddler Early Care and Education Credential has been developed by the New York State Association for the Education of Young Children to assure that professionals have the specialized knowledge and skills needed to provide excellent programs for infants and toddlers.

The credential requires a combination of formal education and practical experience bound together by an individual portfolio. SUNY Empire State has all of the courses needed to meet the formal education requirements. Please visit https://nyaeyc.org/ for information about how to apply for the credential and submit the portfolio.

ELIGIBILITY REQUIREMENTS

College Coursework in infant toddler development and professional practice:

- Twelve (12) credits from a nationally accredited college in early childhood coursework that covers the standards of the New York State Infant Toddler Competencies. Three of these 12 credits must have been completed within the last five years.
- Experience: One year caring for infants and/or toddlers in NYS licensed center, family child care home or formal program serving infants and/or toddlers, or two semesters of supervised field work course with infants and toddlers and six months work experience in the above, or Floater or substitute with 480 hours of documented experience.

Educational Studies: B.A., B.S.

There is an increasing need for individuals who can help others both learn new things and apply what they know in various settings.#Students who choose to design a degree program in educational studies have careers in diverse settings including training, teaching in certain settings or contexts, researching, and policymaking.

Students in educational studies will examine the processes involved in teaching and learning through courses that examine topics such as learning theories or the social context of learning, as well as be exposed to practical applications such as technology in the classroom and curriculum development. Through examination of current issues, innovations and research, students will build a foundation of historical, philosophical, sociological, political, and multicultural and gender perspectives in relation to education. Students will sharpen their skills in writing and research and critical reading and thinking. Students will broaden their knowledge and hone valuable skills related to teaching and learning, whether or not it is the goal to be a teacher.

Degree programs in Educational Studies offer students the opportunity to develop individualized degree plans based on their intellectual, professional, and personal interests. General program guidelines can be found on the "Program Details" tab, and students will work with an academic mentor to choose courses that meet the guidelines and address each student's individual interests. Students can also work with their academic mentors to identify applicable transfer credit, prior college-level learning, and possible course equivalencies. Working with a mentor and using Empire State University's educational planning process, students can develop a specialized concentration in Educational Studies by following the general program guidelines as well as any applicable concentration guidelines. Students may also develop their own concentrations.

For more information about general undergraduate degree requirements, please visit Earning an Undergraduate Degree (p. 185).

For more information about Educational Studies, including degree program resources, please visit the Educational Studies webpage (https://sunyempire.edu/educational-studies/).

WHY CHOOSE A DEGREE IN EDUCATIONAL STUDIES?
Students often pursue a degree in educational studies in order to prepare for:

- Early Childhood Studies and Child Care Administration
- Teaching or training programs for adults
- Workforce development
- Community education
- International training and development
- Advanced study in education such as the Master of Arts in Teaching (https://www.sunyempire.edu/graduate-studies/graduate-degrees/education-programs/mat/)
- Research in education

Note: A degree in Educational Studies from Empire State University does not lead to teacher certification at the undergraduate level. Students who are seeking teacher certification should consider either Early Childhood Education (p. 66), or the Empire State University's Master of Arts in Teaching (MAT). All students need to submit an Undergraduate Teaching Certification Disclaime (https://banner.esc.edu/BannerExtensibility/customPage/page/ESC_TeacherCertification/)r.

NONDEGREE STUDENTS
Taking individual courses as a nondegree student (https://www.sunyempire.edu/degrees-programs/nondegree-study/) is possible and will offer the same range of courses and rigorous standards as degree-seeking undergraduate students. Even if you're not pursuing a degree, you can take courses (https://www.sunyempire.edu/educational-studies/courses/) to prepare for university-level study, stay current in your field, or improve your job skills.

Note: Information regarding Continuing Teacher and Leader Education (https://www.sunyempire.edu/graduate-studies/graduate-degrees/education-programs/continuing-teacher-leader-education/) is available.

Professional PREPARATION AND Credentials
- New York State Early Childhood Credentials (https://nyaeyc.org/) including the Infant Toddler Credential (https://nyaeyc.org/itc/) and the Children's Program Administration Credential (https://nyaeyc.org/cpac/) are recommended for individuals planning to work with young children in informal settings such as childcare or Head Start. Students can complete these credentials as non-matriculated students, or as part of a degree program.
- The Child Development Associate (CDA) (https://www.cdacouncil.org/en/) is available. Students can earn 12 undergraduate credits in early childhood studies that can be applied toward associate or bachelor's degree programs. Students would begin by taking HUDV 1005 Child Development: Introductory, then ECET 2075 Early Childhood Curriculum Planning and Assessment, followed by ECET 2010 Early Childhood Professionalism where they

will begin to develop the required portfolio in a Virtual Study Group, completing other required components on their own.

Professional PREPARATION and certification

- Starting in Fall of 2024, SUNY Empire has a new program in **Early Childhood Education** leading to New York State B-2 Initial Certification. This is the only undergraduate program leading to initial certification at this time.
- Teacher certification is available at the graduate level in a variety of content areas through the Master of Arts in Teaching (https://www.esc.edu/graduate-studies/masters-degrees/education-programs/mat/). The M.A.T. program leads to Adolescent (grades 7-12) and Middle Childhood (grades 5-9) NYS Initial Certification in Biology, Chemistry, Earth Science, English Language Arts, Spanish, Mathematics, Physics, Social Studies, and Agricultural Education (pre-K to 12). Special Education is also available at the graduate level.
- Certification Areas and Content Requirements (https://sunyempire.edu/graduate-studies/combined-programs/) web page includes information about how degree study at the university can be relevant to certification, and outlines all content area requirements that should be included in the undergraduate degree.
- Combined Degree Programs in the Master of Arts in Teaching (https://sunyempire.edu/graduate-studies/combined-programs/) allow students to take specified master's level courses during their bachelor's degree and complete their program at an accelerated rate.

Empire State University has a partnership with New York Association for the Education of Young Children Partnership (NYAEYC) that allows students to work towards a credential from NYAEYC. For more information on this partnership visit New York Association for the Education of Young Children Partnerships (p. 77).

Program Details

Degree Guidelines FOR Bachelor of Arts and Bachelor of Science

Bachelor's Degree programs in Educational Studies must meet the 10 essential foundations listed below. Students will explain how they meet each relevant learning outcome in their rationale essay. Knowledge of each outcome can be demonstrated through transcript credit, individual prior learning assessment (iPLA), prior learning evaluation (PLE), or credit by examination, or specific courses at Empire State University. While many students will take one or more courses for each essential foundation, some courses may meet more than one essential foundation.

The concentrations in Educational Studies begin with the 10 essential foundations which prepare the student for more advanced-level work.

Please note: Associate degree programs are required to meet at least 5 essential foundations (the first five are recommended).

Learning Outcomes

- Foundation 1: Professional Standards, Students will be able to define the professional standards including ethics, related to the chosen concentration.
- Foundation 2: Foundational Knowledge, Students will be able to analyze the foundational knowledge of the field from either a historical or philosophical perspective, grounding them in the chosen concentration.
- Foundation 3: Human Development, Students will be able to interpret stages of human development appropriate to the chosen concentration.
- Foundation 4: Social Contexts of Learning, Students will be able to illustrate the sociological perspective of learning including the relationships between home, school, and community.
- Foundation 5: Curricular Design, Instructional Strategies, and Assessment, Students will be able to analyze comprehensive curriculum design appropriate to the concentration.
- Foundation 6: Language and Literacy Development, Students will be able to analyze language and literacy development appropriate to the concentration.
- Foundation 7: Learners and Learning, Students will be able to critically analyze knowledge of learners and the theoretical approaches that support the learning process.
- Foundation 8: Uses of Technology, Students will be able to evaluate the appropriate use of technology in teaching and learning and evaluate its effectiveness in applied situations appropriate to the concentration.
- Foundation 9: Diversity, Students will be able to analyze the impact and importance of human diversity, the impact of individual and collective power, privilege, and oppression, and potential implications for educational settings.
- Foundation 10: Methods of Inquiry, Students will be able to demonstrate skills in locating, evaluating, and critically thinking about research related to the chosen field.

Concentration Guidelines

Concentrations in Educational Studies begin with the ten foundations which prepare the student for more advanced-level work. Courses should be selected from those areas which are most relevant to the specific concentration design and to the specific organizing framework. In planning the concentration, consideration should be given to both the depth and breadth of knowledge. Students wishing to pursue individualized concentrations should use the general area of study guidelines as an organizing framework for their degree plans. Specific guidelines have been developed for a concentration in the following areas:

Early Childhood Studies

Make a difference in the lives of young children and their families with a concentration in early childhood studies. This concentration is designed for students who wish to provide high-quality early learning for all young children, birth through age 8, in formal and informal settings such as childcare, Head Start, and private preschool programs. By connecting early childhood practice, policy, and research, students will be prepared to serve as leaders in this exciting field. Within the 10 essential foundations, students in Early Childhood Studies should specify in their rationale essay how they met the following objectives within their concentration of early childhood studies:

- Learning Outcome: Students will be able to define professionalism including ethics and the NAEYC Code of Ethical Conduct.

- Learning Outcome: Students will be able to interpret stages of human development with emphasis on birth through age 8.
  - Please note: A minimum of one developmental course is expected, and it's highly recommended that students also include HUDV 2035 Attachment in Early Childhood and/or HUDV 4015 Development and Meaning Play.
- Learning Outcome: Students will be able to analyze comprehensive curriculum design that supports learning standards with an emphasis on curriculum and environments that support play.
  - Please note: A minimum of one course related to curriculum is expected and it's highly recommended that students also include HUDV 4015 Development and Meaning Play.
- Learning Outcome: Students will be able to analyze language and literacy development from birth through age 8 that includes a family literacy component.
- Learning Outcome: Students will be able to evaluate the appropriate use of technology in teaching and learning from birth through age 8.
- Learning Outcome: Student will be able to demonstrate skills in locating, evaluating, and critically thinking about research related to their field including observation and assessment of children birth through age 8.

As expectations for the educational preparation of workers in the fields of early care and education rise, Empire State University offers you the coursework that prepares you to work and advance in the early childcare and education profession, such as day care programs, infant/toddler and nursery school settings, preschool programs, and Head Start. Your individually designed degree program may be an associate or#bachelor's degree, or both.

SUNY Empire offers the flexibility a childcare provider needs. You can choose from a variety of opportunities at the university, including study groups, online courses and guided independent study.

Note: SUNY Empire does not offer teacher certification programs at the **undergraduate** level which is required to teach in public schools. To find out about the teaching certification requirements in your state, contact your state education department. In New York state, go to the New York State Office of Teaching Initiatives (http://www.highered.nysed.gov/tcert/).

Educational Technology

Technological tools are as common to the modern educational experience as paper and pencil. From preschool programs to high schools and beyond, we see the incorporation of digital aids increasing our abilities to teach and learn. The mere presence of technology does not achieve learning goals. Students who choose to concentrate in Educational Technology will embark on a journey to understand the many dimensions of digital tools so that they can employ them in an informed and purposeful way across variety of settings to meet learning outcomes. Within the 10 foundations, students in Educational Technology should specify in their rationale essay how they met the following objectives within their concentration of educational technology:

- Learning Outcome: Students will be able to define professionalism in the field including a knowledge of relevant standards in areas such as cyber ethics and digital citizenship.
- Learning Outcome: Student will be able to analyze the foundational knowledge of the field from either a historical or philosophical

perspective, exploring the impact of technology in the classroom-on-classroom transformation.
- Learning Outcome: Students will be able to analyze comprehensive curriculum design that supports learning standards with an emphasis on instructional design in virtual environments.
- Learning Outcome: Students will be able to interpret relevant standards and expectations for digital literacy including digital fluency and the impact of computing and computational thinking.
- Learning Outcome: Students will be able to evaluate the appropriate use of technology in teaching and learning demonstrating both breadth and depth.

Students With Exceptionalities

The Students with Exceptionalities concentration is for those who have a passion for creating equitable and just environments for diverse learners within educational settings. Students who select this concentration are committed to enhancing the learning of students with exceptionalities and will find opportunities to expand their own knowledge and develop skills and proficiency through courses, applied practices, and research. Students will also explore topics of particular interest in their own practice through action research projects and directed readings. Within the 10 foundations, students should specify in their rationale essay how they gained the specific knowledge of the following objectives:

- Learning Outcome: Students will be able to define professionalism in the field including the Council for Exceptional Children's (CEC) Ethical Principles and Professional Practice Guidelines for special educators.
- Learning Outcome: Students will be able to analyze the foundational knowledge of the field from either a historical or philosophical perspective, including the history of disability in America, and the historical and current legislation that supports students with exceptionalities.
- Learning Outcome: Students will be able to interpret stages of human development with emphasis on human exceptionalities.
- Learning Outcome: Students will be able to analyze comprehensive curriculum design that supports learning standards for inclusive learning environments with emphasis on evidence-based practices.
- Learning Outcome: Students will be able to analyze language and literacy development including research and practice for children with exceptionalities.
- Learning Outcome: Students will be able to evaluate the appropriate use of technology in teaching and learning, with an emphasis on assistive technology.

Child Care Administration

Become a leader as an administrator of children's programs that make a difference in the lives of young children and their families with a concentration in Child Care Administration. This concentration is designed for students who wish to develop and/or lead high-quality early learning programs for all young children, birth through age 8, in formal and informal settings such as childcare and private preschool programs.

Please Note: For a concentration in Child Care Administration, students are expected to meet the first 4 learning outcomes listed below. The 5th learning outcome is optional, but is required for students who wish to apply for the Children's Program Administration Credential.

- Learning Outcome: Students will be able to define professionalism from the perspective of an administrator including the principles and responsibilities fundamental to professionals working with children, families, staff, and the community.
- Learning Outcome: Students will be able to Summarize the administration of an effective organizational structure for children's programs including personnel and human resource management.
- Learning Outcome: Students will be able to analyze various professional practices associated with children's programs including curriculum development, design of the learning environment, and program assessment and evaluation.
- Learning Outcome: Students will be able to assess the critical nature of financial planning and budgeting and the process for children's educational programs.
- Learning Outcome: Students will be able to demonstrate breadth and depth through the integration of the information and principles and practices of children's program administration.

CHILD DEVELOPMENT ASSOCIATE (CDA)

A Child Development Associate (CDA) is for:

- A qualified caregiver that works with children from birth to age 5 years;
- Able to meet the specific needs of children;
- Works with parents, families, and other adults to nurture children's physical, social, emotional, and intellectual growth in a child development framework;
- Evaluated using the CDA Competency Standards: 6 Competency Goals and 13 Functional Areas.

The CDA process is based upon 3 parts:

Training:

- Complete 480 hours (about 1-year full time) of experience working with infants, toddlers, or young children within the past 5 years.
- Complete 120 clock hours of formal education/training/coursework.

Assessment:

- Assessment is done through a combination of observation, parent opinion questionnaires, and written and oral evaluation. Students will be required to locate and arrange for support of these components on their own.

Credentialing:

- Upon recommendation of the Local Assessment Team, the CDA National Credentialing Program will either award the credential or invite the applicant to reapply for assessment.

Students complete the required 120 clock hours of formal education/training/coursework by taking the following sequence of courses at SUNY Empire University. Students will begin writing the required competencies for the application process in courses, but they will need to arrange for the required observation by an authorized observer, parent opinion questionnaires, and written and oral evaluation through their employer within their local communities. Students are required to be employed and working in an age-appropriate childcare setting for the required observation.

Code	Title	Credits
Required Courses		
ECET 2075	Early Childhood Curriculum Planning and Assessment Fall, Spring, Summer	4
HUDV 1005	Child Development: Introductory Fall, Spring, Summer	4
ECET 2010	Early Childhood Professionalism Family & Culture Fall, Spring	4
Total Credits		**12**

It is recommended that students begin by taking HUDV 1005 Child Development: Introductory, then ECET 2075 Early Childhood Curriculum Planning and Assessment, followed by ECET 2010 Early Childhood Professionalism where students will begin to develop the required portfolio in a Virtual Study Group.

For registration information, go to https://www.sunyempire.edu/admissions/

INFANT-TODDLER EARLY CARE AND EDUCATION CREDENTIAL

The Infant-Toddler Early Care and Education Credential has been developed by the New York State Association for the Education of Young Children to assure that professionals have the specialized knowledge and skills needed to provide excellent programs for infants and toddlers.

The credential requires a combination of formal education and practical experience bound together by an individual portfolio. SUNY Empire State has all of the courses needed to meet the formal education requirements. Please visit https://nyaeyc.org/ for information about how to apply for the credential and submit the portfolio.

ELIGIBILITY REQUIREMENTS

College Coursework in infant toddler development and professional practice:

- Twelve (12) credits from a nationally accredited college in early childhood coursework that covers the standards of the New York State Infant Toddler Competencies. Three of these 12 credits must have been completed within the last five years.
- Experience: One year caring for infants and/or toddlers in NYS licensed center, family child care home or formal program serving infants and/or toddlers, or two semesters of supervised field work course with infants and toddlers and six months work experience in the above, or Floater or substitute with 480 hours of documented experience.

Code	Title	Credits
Required Courses		
ECET 2010	Early Childhood Professionalism Family & Culture	4
HUDV 2025	Infant/Toddler Development: Introductory	4
ECET 3030	Curriculum & Environments for Infants & Toddlers	4
Total Credits		**12**

For registration information, go to https://www.sunyempire.edu/admissions/

CHILDREN'S PROGRAMS ADMINISTRATOR CREDENTIAL (CPAC)

The Children's Programs Administrator Credential has been developed by the New York State Association for the Education of Young Children

to assure that childcare administrators have the knowledge and skills needed to provide excellent programs.

The credential requires a combination of formal education and practical experience bound together by an individual portfolio. SUNY Empire State College has all of the courses needed to meet the formal college education requirements. Please visit https://nyaeyc.org/ for information about how to apply for the credential and submit the portfolio.

College Credits Needed for Candidacy:
1. An Associate's Degree (or 60 credits towards a bachelor's degree).
2. 18 credits in child development or related courses (could be part of associate degree).
3. 18 credits in children's program administration.

Total college credits routinely needed is 78. On a rare occasion a candidate may have a combination of courses that would reduce that number.

It is strongly recommended that the courses be taken in the order listed and students are required to complete the first 4 courses before taking the final capstone course.

Code	Title	Credits
Required Courses		
ECET 3010	Children's Programs: Administration Spring, Summer	4
ECET 3015	Children's Programs: Design & Supervision Fall, Spring	4
ECET 3020	Children's Programs: Ethical & Professional Standards Fall, Spring	4
ECET 3025	Children's Programs: Financial Planning & Budgeting Spring	4
ECET 4005	Children's Program Administration: Capstone Fall, Spring	4
Total Credits		**20**

 Please note: Students seeking the credential will need to complete 200 hours in administration in order to submit their application to the New York State Association for the Education of Young Children.

For registration information, go to https://www.sunyempire.edu/admissions/

NYC PARAPROFESSIONAL PROGRAM

Empire State University is proud to serve Paraprofessionals in partnership with the United Federation of Teachers (UFT), the New York State United Teachers (NYSUT) Education and Learning Trust, and the Department of Education (DOE).

Paraprofessionals can use their DOE vouchers to take college-level courses online, virtually, or at SUNY Empire and UFT locations throughout the NYC Boroughs in pursuit of a SUNY Empire degree to advance their career in any field of study—including education.

Empire's program provides Paraprofessionals with a full range of support services which include assistance with admissions and registration, an assigned primary faculty mentor, access to special events and training, and the support of dedicated tutors and coaches.

PARAPROFESSIONAL PROGRAM HIGHLIGHTS

- Use your voucher – SUNY Empire is an approved college at which your voucher can cover tuition costs, up to 6 credits per term.

- Career Advancement – Credits received may be eligible for use toward salary upgrades.
- Dedicated Guidance – A designated faculty-mentor provides guidance to help you plan and complete an associate or bachelor's degree in any field of study.
- CTLE Courses – SUNY Empire is an approved CTLE provider and offers courses that have been reviewed and approved for CTLE credit.
- Improve your skills – You develop key skills needed in your workplace, such as classroom management, time management, student teacher interaction, problem solving, socio-emotional intervention, and stress management.
- Become a role model – As a student, you become a role model for your own students and your own children.
- Join a community of learners – Connect with students and professionals through special programming targeting your needs and interests.
- Convenience and Flexibility – We're committed to helping you find a way to learn that makes sense for where you are right now, and where you want to be in the future. Whether you prefer instruction online, in-person, or a combination of both, we have courses and degree programs that meet your unique needs.

For more information, please contact Chanel Clark at chanel.clark@sunyempire.edu or (347) 695-9606, ext #1733.

General Studies: A.A., A.S.

Our Associate in Arts (A.A.) or Associate in Science (A.S.) in General Studies is a 64-credit program that is designed to allow students with a variety of college credits and life experiences without a completed degree to quickly complete an associate degree and move into a bachelor's degree program at the university. This is accomplished by maximizing transferrable credit and prior learning assessment, not requiring an area of concentration, and requires a minimum of 12 credits taken at Empire State University.

The broad approach of the program makes it possible for students to explore their academic interests without having to define a disciplinary focus, while laying a foundation for the next step in their educational path.

For more information about general undergraduate degree requirements, please visit Earning an Undergraduate Degree .

Program Details

This program allows for a maximum of 52 transfer and life experience credits with a minimum of 12 credits earned at Empire State University for a total of 64 credits.

Of these 64 credits, a minimum of 30 must meet SUNY General Education requirements.

Code	Title	Credits
Transfer/Prior Learning Credits: May use up to		**52**
Minimum Residency Requirements:		
Required Course #1: Elective or Gen Ed		4
Required Course #2: Elective or Gen Ed		4
Required Course #3: Elective or Gen Ed		4
Total Credits		**64**

Specific credit requirements for the Associate in Arts and Associate in Science are specified below.

Keep in mind that General Education and credits designated as Liberal may come from a combination of transfer credits, prior learning credits, and/or courses taken at Empire State University.

Degree	Total Credits Required	Minimum Credits to be Earned at SUNY Empire	Minimum Liberal Arts and Sciences Credits Required	Minimum General Education Credits	Minimum Advanced-level Credit in Concentra	Minimum Advanced-level Credits in Degree Program
A.A. in General Studies	64	12	48	30	NA	NA
A.S. in General Studies	64	12	32	30	NA	NA

Learning Outcomes

- Students will be able to fulfill all of the SUNY general education requirements in at least seven content areas, with a minimum of 30 credits.
- Students will be able to examine potential college-level learning completed outside of a traditional college setting which may be included.
- Students will have completed the requisite number of liberal credits (48 credits for the A.A. or 32 credits for the A.S.).

Historical Studies: A.A., A.S.

Historical Studies students will explore human history and the nature of human existence by examining topics such as the development of social, political and religious groups; national experiences; a particular time period or important historic figure or event; or themes such as women in history. Students also will develop valuable research, analytical and communications skills as, together with a faculty mentor, create a program to meet specific needs and goals.

Degree programs in Historical Studies offer students the opportunity to develop individualized degree plans based on their intellectual, professional, and personal interests.General program guidelines can be found on the "Program Details" tab, and students will work with an academic mentor to choose courses that meet the guidelines and address each student's individual interests.Students can also work with their academic mentors to identify applicable transfer credit, prior college-level learning, and possible course equivalencies.Working with a mentor and using SUNY Empire's educational planning process, students can develop a specialized concentration in Historical Studies by following the general program guidelines as well as any applicable concentration guidelines.Students may also develop their own concentrations.

For more information about general undergraduate degree requirements, please visit Earning an Undergraduate Degree (p. 185).

For more information about programs in Historical Studies, please visit the Department of Historical Studies website (https://www.esc.edu/historical-studies/).

Program Details
Associate Degree Guidelines
Students seeking an A.A. degree in Historical Studies will complete at least 12 credits of coursework in Historical Studies, demonstrating a foundation for advanced level learning/course work in the discipline.

Faculty in Historical Studies are available to consult with generalist mentors and their students about creating individualized concentrations and selecting courses that align with the department guidelines.

Learning Outcomes
- Students will be able to demonstrate an understanding of historical processes and historical developments that have shaped social change and contemporary human problems as presented in a survey course or courses.
- Students will be able to demonstrate a foundation for advanced level learning in historical studies by completing one or more introductory courses (depending on concentration) in their area or topic.
- Students will be able to demonstrate learning that goes beyond a single time period, national or cultural experience, and reflects an understanding of diversity.
- Students will be able to explain how the study of history is related to other disciplines. At least one course must link the student's program to other disciplines, including but not limited to literature, languages, or political science.
- Students will be able to analyze and evaluate primary and secondary sources.

Historical Studies: B.A., B.S.

As a Historical Studies student, you will explore human history and the nature of human existence by examining topics such as the development of social, political and religious groups; national experiences; a particular time period or important historic figure or event; or themes such as women in history. You also will develop valuable research, analytical and communications skills as, together with a faculty mentor, you create a program to meet your specific needs and goals.

Degree programs in Historical Studies offer students the opportunity to develop individualized degree plans based on their intellectual, professional, and personal interests.General program guidelines can be found on the "Program Details" tab, and students will work with an academic mentor to choose courses that meet the guidelines and address each student's individual interests.Students can also work with their academic mentors to identify applicable transfer credit, prior college-level learning, and possible course equivalencies.Working with a mentor and using SUNY Empire's educational planning process, students can develop a specialized concentration in Historical Studies by following the general program guidelines as well as any applicable concentration guidelines.Students may also develop their own concentrations.

For more information about general undergraduate degree requirements, please visit Earning an Undergraduate Degree (p. 185).

For more information about programs in Historical Studies, please visit the Department of Historical Studies website (https://www.sunyempire.edu/historical-studies/).

Program Details
Historical Studies concentrations should be tailored to students' needs and interests. The result of the educational planning process should be a degree program with a coherent set of courses that are affiliated with and build upon each other. A sample of concentration titles in Historical Studies, approved by the academic review process, include American History, Historical Studies, Military History, Western or European History, and World History.

Students can make a case for courses outside of those mapped here that meet the same learning objectives in their rationales.

The history faculty expects that bachelor degree programs in historical studies will consist of the following elements and allow students to acquire specific enabling skills and competencies. As students write their rationale essays, they should demonstrate how their degree program meets these guidelines, aligning their courses and other learning activities to the elements below. The courses listed below will meet each foundation, though these lists are not exhaustive.

Foundation # 1: Introductory Learning
Students will be able to demonstrate a foundation for advanced learning in historical studies by completing one or more introductory courses (depending on concentration) in their area or topic.

Code	Title	Credits
Concentration in American History		
HIST 2025	US History to 1865: What Does it Mean to be a Free Nation?	4
HIST 2030	US History From 1865 to the Present	4

HIST 1075	Global History to 1500	4
HIST 1115	Western Civilization I	4
HIST 1120	Western Civilization II	4
HIST 2025	US History to 1865: What Does it Mean to be a Free Nation?	4
HIST 2030	US History From 1865 to the Present	4

Concentration in Global History

HIST 1070	Global History from the 1500	4
HIST 1075	Global History to 1500	4
HIST 1115	Western Civilization I	4
HIST 1120	Western Civilization II	4

Foundation #2: Breadth

The intention of this foundation is for mentors and students to locate one or more courses that broaden the learning in the concentration. Breadth might be defined in terms of geography, time period, national or cultural experience, or, even, methodology. A concentration in American History or Historical Studies, for example, might include one or more courses on Africa, China, or Europe.

Foundation #3: Diversity

Code	Title	Credits
HIST 1010	African- American History to 1861	4
HIST 1015	African-American History: 1861 −1941	4
HIST 1030	American Military History	4
HIST 2013	Race in United States Politics	4
HIST 2025	US History to 1865: What Does it Mean to be a Free Nation?	3-4
HIST 2030	US History From 1865 to the Present	3,4
HIST 2035	Women & Work in American History	4
HIST 2045	American Environmental History: Introduction	4
HIST 2050	History of American Medicine and Public Health: Introductory	4

HIST 3590	Hip Hop America: The Evolution of a Cultural Movement	4
HIST 3605	Madness in American History	4
HIST 3630	The Civil Rights Movement	4
HIST 3635	Foundations in American History: Advanced	4
HIST 3650	Civil War History	4
HIST 3655	Adirondack History	4
HIST 3665	Long Island History: Advanced	4
HIST 3690	History of Antisemitism	4
HIST 3710	Jews in US History: 1654-present	4
HIST 3715	Movin' on Up: Class in America in the Movies	4
HIST 3720	The Holocaust	4
HIST 4005	Mad Men Mad Women: History of Women in the Twentieth Century	4
HIST 4010	Rock and Roll History	4

Foundation #4: Links to Other Disciplines

At least one course must link the student's program to other disciplines, including but not limited to anthropology, economics, literature, political science, psychology, and sociology. The department encourages mentors and students to choose courses outside of the department that supports learning in the student's concentration.

A concentration in World History might, for example, incorporate a course outside of the discipline in economics (e.g., ECON 3110 Social and Economic Contexts of Globalization), literature (e.g., LITR 3140 West African Literature), or political science (POLI 3065 International Politics and Relations).

Foundation #5: Independent Inquiry, Research, and Analysis

At least one upper-level course must require the student to conduct independent inquiry and research.

In that course the student is asked to evaluate primary and secondary sources that record and interpret the past toward completion of a final research project, documented using the Chicago Manual of Style.

One or more of the following courses, equivalent transcript credit, or prior learning will meet this guideline:

Code	Title	Credits
HIST 3005	19th Century Eastern Europe	4
HIST 3012	Hillary vs. Trump: The 2016 Presidential Election	4
HIST 3050	American Colonial History: Advanced	4
HIST 3090	American Military History: Advanced	4
HIST 3110	American Urban & Suburban History	4
HIST 3125	Ancient Rome: Republic & Empire: Advanced	4
HIST 3152	History of Social Welfare in the US: Advanced	4
HIST 3180	Enlightenment: Advanced Research	4

HIST 4020	Senior Thesis I: Research	4
HIST 4025	Senior Thesis II: Writing & Presentation	4
HIST 4122	Contemporary Issues in US Immigration	4

Students need at least 24 advanced level credits in their concentration area for bachelor's degrees.

Learning Outcomes

- Foundation 1: Introductory Learning, Students will be able to demonstrate an understanding of historical processes and historical developments that have shaped social change and contemporary human problems as presented in a survey course or courses.
- Foundation 2: Breadth, Students will be able to demonstrate learning that goes beyond a single time period, national or cultural experience.
- Foundation 3: Diversity, Students will be able to demonstrate learning that reflects an understanding of diversity.
- Foundation 4: Links to Other Disciplines, Students will be able to explain how the study of history is related to other disciplines.
- Foundation 5: Independent Inquiry, Research, and Analysis, Students will be able to analyze and evaluate primary and secondary sources.

Concentration in Public History

Students who wish to pursue a concentration in Public History must complete the courses listed below along with additional courses to meet all of the Historical Studies guidelines.

Code	Title	Credits
HIST 3410	Public History: A Shared Conversation with the Past	4
HIST 3240	Historic Preservation	4
HIST 4050	Historical Studies Internship	4
MUSE 3015	Museum Studies	4

Human Development: A.A., A.S.

Students of Human Development gain an understanding of changes across the lifespan and how the social environments we inhabit influence those changes. The study of Human Development enables students to better understand themselves and others, enhances their ability to work with people in various capacities, and prepares them for more advanced study in fields including, but not limited to, the mental health and health-care professions, law, business, education, and nonprofit agencies.

Degree programs in Human Development offer students the opportunity to develop individualized degree plans based on their intellectual, professional, and personal interests. General program guidelines can be found on the "Program Details" tab, and students will work with an academic mentor to choose courses that meet the guidelines and address each student's individual interests. Students can also work with their academic mentors to identify applicable transfer credit, prior college-level learning, and possible course equivalencies. Working with a mentor and using Empire State University's educational planning process, students can develop a specialized concentration in Human Development by following the general program guidelines as well as any applicable concentration guidelines. Students may also develop their own concentrations.

For more information about general undergraduate degree requirements, please visit Earning an Undergraduate Degree (p. 185).

For sample degree programs and other degree planning resources, please visit the Department of Psychology and Human Development Degree Planning Resources web page (https://www.esc.edu/psychology-human-development/degree-planning-resources/).

Program Details

Associate degrees in Human Development include the lifespan foundation and three of the other foundations listed here:

1. Lifespan Development
2. Biological Bases of Development
3. Cognitive Bases of Development
4. Social & Emotional Bases of Development
5. Cultural Diversity
6. Methodology & Ethics

These foundations may be met through transcript credit; college-level knowledge demonstrated through individual prior learning assessment (iPLA), professional learning evaluations (PLE), or credit by examination; or individual courses, a series of courses, or components within individual courses with Empire State University. The student's degree plan rationale essay should clearly explain how the degree plan meets each of the foundations in the concentration, what will be learned, and how the student will build on these foundations to meet personal, academic, or career goals.

Associate in Arts (A.A.) and Associate in Science (A.S.)

For an associate degree, students must address the lifespan development foundation plus three of the remaining foundations.

Associate Degree in Human Development Concentration – Psychology: Students who are interested in psychology may earn an Associate in Arts or Associate in Science degree in Human Development with a concentration in Psychology. For this concentration, Introduction to Psychology is a required course, in addition to the required lifespan

development foundation. Students would still choose three more of the remaining foundations.

Students should consult the B.A. in Psychology to make informed choices about courses in the associate degree in case they continue for the bachelor's degree in psychology.

Foundation #1: Lifespan Development

Code	Title	Credits
HUDV 1015	Human Development: Introductory	4
HUDV 3025	Human Development: Advanced	4

Students may learn about lifespan development through a series of developmental courses that cover the whole lifespan (i.e., childhood, adolescence, adulthood, and later life) rather than in one lifespan human development course.

To cover **child development** the student may take (pick one):

Code	Title	Credits
HUDV 1005	Child Development: Introductory	4
OR		
HUDV 3015	Child Development: Advanced	4
OR		
HUDV 1010	Child & Adolescent Development: Introductory	4
OR		
HUDV 3020	Child & Adolescent Development: Advanced	4

To cover **adolescent development**, students who have not covered it in one of the combined child and adolescent development courses mentioned above may take (pick one):

Code	Title	Credits
HUDV 2005	Adolescent Development: Introductory	4
OR		
HUDV 3080	Adolescent Development: Advanced	4

To cover **adult development** the student may take (pick one):

Code	Title	Credits
HUDV 2015	Adult Development: Introductory	4
OR		
HUDV 3005	Adult Development: Advanced	4
OR		
HUDV 2020	Adult Development & Aging: Introductory	4
OR		
HUDV 3010	Adult Development & Aging: Advanced	4

To cover the **aging** years, students who have not covered it in one of the combined adult development and aging courses listed above may take one of the following (pick one):

Code	Title	Credits
HUDV 2010	Gerontology	4
OR		
PSYC 3115	Psychology of Aging	4

Foundation #2: Biological Bases of Development

Code	Title	Credits
HUDV 3055	Developmental Neurobiology: A Lifespan View	2
HUDV 3056	Developmental Neurobiology: A Lifespan View	4
PSYC 2005	Brain & Behavior	4
PSYC 3040	Biological Psychology	4
BIOL 1002	Human Biology	4

Students may use a combination of courses to learn about biological processes and how they change over time by learning about development through the major age phases of childhood, adolescence, adulthood, and aging.

Foundation #3: Cognitive Bases of Development

Code	Title	Credits
HUDV 3057	Cognitive Development	4
PSYC 2025	Educational Psychology: Introductory	4
PSYC 3015	Educational Psychology: Advanced	4
EDST 4005	Adults as Learners: Theories & Strategies	4
EDST 4010	Human Learning: A Developmental Approach	4

Students may use a combination of courses to learn about cognitive bases of development and how they change over time by learning about development through the major age phases of childhood, adolescence, adulthood, and aging.

Foundation #4: Social and Emotional Bases of Development

Code	Title	Credits
HUDV 2035	Attachment in Early Childhood: Introductory	4
HUDV 3065	Human Exceptionalities	4
HUDV 3066	Developmental Psychopathology	4
HUDV 3035	Attachment Across the Lifespan	4
ECET 4015	Development & Meaning of Play	4

Students may use a combination of courses to learn about social and emotional bases of development and how they change over time by learning about development through the major age phases of childhood, adolescence, adulthood, and aging.

Foundation #5: Cultural Diversity

Code	Title	Credits
HUDV 3065	Human Exceptionalities	4
HUDV 3075	Western Civilization & Human Development	4
HUDV 4010	Development of Gender Identity	4
PSYC 3055	Cultural Psychology	4
PSYC 4030	Media Psychology	4
PSYC 4035	Multicultural Counseling	4
ANTH 1010	Introduction to Cultural Anthropology	4
GSST 1005	Introduction to Women's Gender & Sexuality Studies	4
GSST 2005	Introduction to LGBTQ+ Studies	4
SOCI 2010	Introduction to Race Class & Gender	4
ANTH 3020	Families in Global Perspective	4
ANTH 3030	Immigration Today: Gender & Family	4
CHFS 3060	Multicultural Study of Children & Families	4
GSST 3030	Sex & Gender in Global Perspective	4

Foundation #6: Methodology and Ethics

Code	Title	Credits
HUDV 3085	Research Methods for Lifespan Development	4
SOSC 3025	Social Science Research Methods	4

*Note: Students interested in attending graduate school are strongly encouraged to add a course in Statistics (such as SOSC 2010: Statistics for the Social Sciences), which is usually required for admission to master-level programs in the behavioral sciences (e.g., Master of Social Work, Master of Mental Health).

Learning Outcomes

- Foundation 1: Lifespan Development, Students will be able to describe development (e.g., physical, biological/neural, cognitive, emotional, and social) across the lifespan in relation to theories of human development.
- Foundation 2: Biological Bases of Development, Students will be able to analyze biological influences on emotional, cognitive, and behavioral change over time.
- Foundation 3: Cognitive Bases of Development, Students will be able to apply primary theories of cognitive development across the lifespan.
- Foundation 4: Social and Emotional Bases of Development, Students will be able to analyze intrapersonal and interpersonal processes of normative and non-normative human behavior and development.
- Foundation 5: Cultural Diversity, Students will be able to analyze human diversity, including the impact of power, privilege, and oppression on individuals who differ in race, ethnicity, gender, class, socioeconomic status, age, culture, religious beliefs, sexual orientation, gender identity, national origin, and/or ability.
- Foundation 6: Methodology and Ethics, Students will be able to develop ethical research skills for gathering, interpreting, analyzing, and drawing evidence-based conclusions about human development and behavior.

Human Development: B.A., B.S.

Students of Human Development gain an understanding of changes across the lifespan and how the social environments we inhabit influence those changes. The study of Human Development enables students to better understand themselves and others, enhances their ability to work with people in various capacities, and prepares them for more advanced study in fields including, but not limited to, the mental health and health-care professions, law, business, education, and nonprofit agencies.

Degree programs in Human Development offer students the opportunity to develop individualized degree plans based on their intellectual, professional, and personal interests. General program guidelines can be found on the "Program Details" tab, and students will work with an academic mentor to choose courses that meet the guidelines and address each student's individual interests. Students can also work with their academic mentors to identify applicable transfer credit, prior college-level learning, and possible course equivalencies. Working with a mentor and using Empire State University's educational planning process, students can develop a specialized concentration in Human Development by following the general program guidelines as well as any applicable concentration guidelines. Students may also develop their own concentrations.

For more information about general undergraduate degree requirements, please visit Earning an Undergraduate Degree (p. 185).

For sample degree programs and other degree planning resources, please visit the Department of Psychology and Human Development Degree Planning Resources web page (https://www.sunyempire.edu/psychology-human-development/degree-planning-resources/).

Program Details

Bachelor's degrees in Human Development include the following six foundations:

1. Lifespan Development
2. Biological Bases of Development
3. Cognitive Bases of Development
4. Social & Emotional Bases of Development
5. Cultural Diversity
6. Methodology & Ethics

These foundations may be met through transcript credit; college-level knowledge demonstrated through individual prior learning assessment (iPLA), professional learning evaluations (PLE), or credit by examination; or individual courses, a series of courses, or components within individual courses with Empire State University. The student's degree plan rationale essay should clearly explain how the degree plan meets each of the foundations in the concentration, what will be learned, and how the student will build on these foundations to meet personal, academic, or career goals.

Bachelor of Arts (B.A.) and Bachelor of Science (B.S.)

Students must meet all six of the foundations for a bachelor's degree in Human Development.

Foundation #1: Lifespan Development

Code	Title	Credits
HUDV 1015	Human Development: Introductory	4
HUDV 3025	Human Development: Advanced	4

Students may learn about lifespan development through a series of developmental courses that cover the whole lifespan (i.e., childhood, adolescence, adulthood, and later life) rather than in one lifespan human development course.

To cover **child development** the student may take (pick one):

Code	Title	Credits
HUDV 1005	Child Development: Introductory	4
OR		
HUDV 3015	Child Development: Advanced	4
OR		
HUDV 1010	Child & Adolescent Development: Introductory	4
OR		
HUDV 3020	Child & Adolescent Development: Advanced	4

To cover **adolescent development**, students who have not covered it in one of the combined child and adolescent development courses mentioned above may take (pick one):

Code	Title	Credits
HUDV 2005	Adolescent Development: Introductory	4
OR		
HUDV 3080	Adolescent Development: Advanced	4

To cover **adult development** the student may take (pick one):

Code	Title	Credits
HUDV 2015	Adult Development: Introductory	4
OR		
HUDV 3005	Adult Development: Advanced	4
OR		
HUDV 2020	Adult Development & Aging: Introductory	4
OR		
HUDV 3010	Adult Development & Aging: Advanced	4

To cover the **aging** years, students who have not covered it in one of the combined adult development and aging courses listed above may take one of the following (pick one):

Code	Title	Credits
HUDV 2010	Gerontology	4
OR		
PSYC 3115	Psychology of Aging	4

Foundation #2: Biological Bases of Development

Code	Title	Credits
HUDV 3055	Developmental Neurobiology: A Lifespan View	2
HUDV 3056	Developmental Neurobiology: A Lifespan View	4
PSYC 2005	Brain & Behavior	4
PSYC 3040	Biological Psychology	4
BIOL 1002	Human Biology	4

Students may use a combination of courses to learn about biological processes and how they change over time by learning about development through the major age phases of childhood, adolescence, adulthood, and aging.

Foundation #3: Cognitive Bases of Development

Code	Title	Credits
HUDV 3057	Cognitive Development	4
PSYC 2025	Educational Psychology: Introductory	4
PSYC 3015	Educational Psychology: Advanced	4
EDST 4005	Adults as Learners: Theories & Strategies	4
EDST 4010	Human Learning: A Developmental Approach	4

Students may use a combination of courses to learn about cognitive bases of development and how they change over time by learning about development through the major age phases of childhood, adolescence, adulthood, and aging.

Foundation #4: Social and Emotional Bases of Development

Code	Title	Credits
HUDV 2035	Attachment in Early Childhood: Introductory	4
HUDV 3065	Human Exceptionalities	4
HUDV 3066	Developmental Psychopathology	4

| HUDV 3035 | Attachment Across the Lifespan | 4 |
| ECET 4015 | Development & Meaning of Play | 4 |

Students may use a combination of courses to learn about social and emotional bases of development and how they change over time by learning about development through the major age phases of childhood, adolescence, adulthood, and aging.

Foundation #5: Cultural Diversity

Code	Title	Credits
HUDV 3065	Human Exceptionalities	4
HUDV 3075	Western Civilization & Human Development	4
HUDV 4010	Development of Gender Identity	4
PSYC 3055	Cultural Psychology	4
PSYC 4030	Media Psychology	4
PSYC 4035	Multicultural Counseling	4
ANTH 1010	Introduction to Cultural Anthropology	4
GSST 1005	Introduction to Women's Gender & Sexuality Studies	4
GSST 2005	Introduction to LGBTQ+ Studies	4
SOCI 2010	Introduction to Race Class & Gender	4
ANTH 3020	Families in Global Perspective	4
ANTH 3030	Immigration Today: Gender & Family	4
CHFS 3060	Multicultural Study of Children & Families	4
GSST 3030	Sex & Gender in Global Perspective	4

Foundation #6: Methodology and Ethics

Code	Title	Credits
HUDV 3085	Research Methods for Lifespan Development	4
SOSC 3025	Social Science Research Methods	4

*Note: Students interested in attending graduate school are strongly encouraged to add a course in Statistics (such as SOSC 2010: Statistics for the Social Sciences), which is usually required for admission to master-level programs in the behavioral sciences (e.g., MSW, MMH).

Students interested in studying psychology at the baccalaureate degree level should consult the B.A. in Psychology.

Learning Outcomes

- Foundation 1: Lifespan Development, Students will be able to describe development (e.g., physical, biological/neural, cognitive, emotional, and social) across the lifespan in relation to theories of human development.
- Foundation 2: Biological Bases of Development, Students will be able to analyze biological influences on emotional, cognitive, and behavioral change over time. Students may use a combination of courses to learn about biological processes and how they change over time by learning about development through the major age phases of childhood, adolescence, adulthood, and aging.
- Foundation 3: Cognitive Bases of Development, Students will be able to apply primary theories of cognitive development across the lifespan.
- Foundation 4: Social and Emotional Bases of Development, Students will be able to analyze intrapersonal and interpersonal processes of normative and non-normative human behavior and development.
- Foundation 5: Cultural Diversity, Students will be able to analyze human diversity, including the impact of power, privilege, and oppression on individuals who differ in race, ethnicity, gender, class, socioeconomic status, age, culture, religious beliefs, sexual orientation, gender identity, national origin, and/or ability.
- Foundation 6: Methodology and Ethics, Students will be able to develop ethical research skills for gathering, interpreting, analyzing, and drawing evidence-based conclusions about human development and behavior.

Human Resource Management: B.S.

The Bachelor of Science (B.S.) degree in Human Resource Management is a 124-credit program designed to serve students who are interested in pursuing future careers in the field of human resource management.

The B.S. in Human Resource Management includes a set of required courses that all students must take, along with SUNY General Education (p. 188) and other academic requirements (p. 185), in order to be eligible to receive a degree.#The required courses for programs in Human Resource Management can be found on the "Program Details" tab. Students should speak with their mentor to see if any credit earned through individualized Prior Learning Assessment (iPLA) (https://www.sunyempire.edu/degree-planning-academic-review/prior-learning-assessment/individualized-prior-learning-assessment/) or Professional Learning Evaluation (PLE) (p. 168) might fulfill these course requirements. Courses are offered online, through independent studies, or through a blended approach.

The Human Resource Management (HRM) professional is an essential partner in developing and executing the strategy of the organization. Another important function of the HR manager is to oversee many laws that protect the individual, as well as the organization, from unethical or unsafe conditions. Human Resource managers must carry out many different functions in the organization. The areas of responsibility include recruitment and selection, compensation and benefits, training and development, employee relations, employment and labor law, and other related functions. It is the HRM professional's responsibility to ensure HRM policies, procedures and practices are matched effectively with the organization's strategies. This includes functions such as:

- recruiting/staffing
- training
- planning and development
- reward systems including direct and indirect monetary rewards
- workplace safety and health
- employee/labor relations.

To perform these functions, an HR professional needs to interact with people across the organization. The HR professional is in a trusted position; those who serve in this field are held to high standards of integrity, discretion and discernment.

Issues that currently face professionals in this field are numerous and complex. The legal, economic and political environments at the local, state, country and international levels impact how HR strategies can be achieved. In addition to understanding the broad framework of the relevant laws (e.g., for equal opportunity, income security, safety and health, labor-management relations), the HR professional also needs to understand the economic, social and political environments and their impact on HR activities within an organization. Of critical importance are issues such as globalization, rise of knowledge worker and technology. The HR function is frequently asked to implement policies and programs to enhance the organization's ability to thrive in environments undergoing rapid change.

It is important for any business student to understand the roles and functions of a manager; to understand the basic accounting forms managers use; to understand how economics impact the business environment; to understand the impact of financial risk and debt, and to understand the purpose of marketing initiatives. Students who seek a B.S. in Human Resource Management will eventually work in HR settings that require them to interact with personnel from all departments, and thus, will benefit from understanding the workings of all facets of their organizations.

Human Resource managers are often asked to handle complex problems and collaborate with strategic problems that require ability to synthesize complex material. A capstone course is included in this program so that students have opportunity to practice this kind of synthesis.

Program Details

Code	Title	Credits
MGMT 1005	Principles of Management	4
ACCT 2005	Introductory Accounting I: Financial Accounting	4
ECON 2015 & ECON 2020	Macroeconomics and Microeconomics (4 Cr. ea.)	6-8
or ECON 2010	Introductory Economics: Micro & Macro 6 Cr.	
MRKT 1005	Marketing Principles	4
FSMA 3010	Corporate Finance	4
BUSN 3010	Business Ethics	4
BUSN 2010	Business Statistics	4
HRMS 3020	Human Resources Information System	4
HRMS 3015	Human Resource Management	4
HRMS 3040	Staffing the Organization	4
HRMS 3005	Compensation & Benefits	4
HRMS 4010	Employment & Labor Law	4
HRMS 3010	Diversity in the Workplace	4
HRMS 3043	Training & Development	4
MGMT 3060	Organizational Behavior	4
HRMS 3025	International Human Resources Management	4
HRMS 4020	Strategic Human Resource Management	4
Total Credits		**70-72**

Learning Outcomes

- Knowledge of Business: Students will be able to define the basic roles and functions of managers in general and in specific departments critical to the organization.
- Ethical Standards and Conduct: Students will be able to apply learning in business ethics to the supervision of ethical standards in the organization.
- Quantitative and Analytical Skills and Knowledge: Students will be able to apply quantitative knowledge and skills to the development of databases and analysis pertinent to HR.
- The Human Resource Management Portfolio of Responsibility: Students will be able to apply laws and regulations that pertain to the recruitment and compensation, and ethical treatment of employees to the solution of case studies.
- Understanding and Developing People and Organizations: Students will be able to develop sample training programs that reflect optimal attention to different learning styles and motivational needs.
- Understanding and Developing People and Organizations: Students will be able to use organizational behavior concepts to develop practices that assist leaders to attain organizational goals.
- Global Competency: Students will be able to develop programs (such as compensation, benefits, or training) that impact employees in different cultural environments.

- Comprehensive Skills, Knowledge, and Abilities to Perform in a Human Resource Management Role: Students will be able to integrate knowledge earned, either through course work or experience in the key functional areas of Human Resource Management, to provide responses to real life case studies.

Interdisciplinary/Multidisciplinary Studies: A.A., A.S.

Interdisciplinary/Multidisciplinary Studies will allow students to explore a particular area of interest, theme, theory, concern, profession or topic from more than one perspective. Close, interdisciplinary examination will be the basis of both discovery and integration of interconnected ideas from different areas. Students will sharpen their skills in writing and research and critical reading and thinking, as, together with a faculty mentor, create a program to meet specific needs and goals.

Degree programs in Interdisciplinary/Multidisciplinary Studies offer students the opportunity to develop individualized degree plans based on their intellectual, professional, and personal interests. General program guidelines can be found on the "Program Details" tab, and students will work with an academic mentor to choose courses that meet the guidelines and address each student's individual interests. Students can also work with their academic mentors to identify applicable transfer credit, prior college-level learning, and possible course equivalencies. Working with a mentor and using Empire State University's educational planning process, students can develop a specialized concentration in Interdisciplinary/Multidisciplinary Studies by following the general program guidelines as well as any applicable concentration guidelines. Students may also develop their own concentrations.

For more information about general undergraduate degree requirements, please visit Earning an Undergraduate Degree (p. 185).

For sample degree programs and other degree planning resources, please visit the Interdisciplinary and Multidisciplinary Studies Degree Planning web page (https://www.esc.edu/interdisciplinary-multidisciplinary-studies/degree-planning-resources/).

For more information about Interdisciplinary and Multidisciplinary Studies, please visit the Interdisciplinary and Multidisciplinary Studies web site (https://www.esc.edu/interdisciplinary-multidisciplinary-studies/).

Program Details

Guidelines for an Associate of Science or Associate in Arts degree

Students will develop a concentration in multiple areas that combine around a well-explained problem, question, theme, or interdisciplinary field. Concentrations must have a title, in addition to the Area of Study in Interdisciplinary and Multidisciplinary Studies.

Foundation #1: Foundations
- Learning Outcome: Students will be able to explain fundamental concepts and principles of at least two of the fields involved in the concentration, at least one of which must be a liberal arts and sciences field. These fields include The Arts (including visual, performing, or digital arts), Cultural Studies (including literature, communication, creative writing, expository writing, languages/linguistics, literature, philosophy religion), Historical Studies, Social and Behavioral Sciences (including anthropology, economics, human development, political science, public affairs, sociology, or psychology), Natural Sciences (including biology, chemistry, environmental science, physical sciences) and Mathematics, but not professional disciplines such as Human Services, Educational Studies, or Business.

These fields include The Arts (including visual, performing, or digital arts), Cultural Studies (including literature, communication, creative writing, expository writing, languages/linguistics, literature, philosophy religion), Historical Studies, Social and Behavioral Sciences (including anthropology, economics, human development, political science, public affairs, sociology, or psychology), Natural Sciences (including biology, chemistry, environmental science, physical sciences) and Mathematics, but not professional disciplines such as Human Services, Educational Studies, or Business.

These foundations will vary based on student interest and focus but are likely met through survey courses at the 1000-level with titles that might include words such as introduction/introductory, principles, exploring, foundations, or literacy, but may be a single subject that serves as a prerequisite to further study in that field. Examples include, but are not limited to: Introduction to Literature, Media and Visual Literacy, Introduction to Psychology, Biology I, Foundations of Anatomy and Physiology, Marketing Principles, or Statistics.

Foundation #2: Communication
- Learning Outcome: Students will be able to develop effective arguments in writing and speech, including demonstrating critical listening, reading and interpretation skills, in multiple contexts and through multiple strategies.

This guideline may be met by any course that meets the General Education category of Basic Communication, but most often is met through courses such as College Writing, Composition, Effective Academic Writing, or Public Speaking.

foundation #3: Critical Thinking and Problem Solving
- Learning Outcome: Students will develop abilities in reading, writing, and evaluating information critically, i.e., with sustained attention to meaning, presentation, and argument.
- Learning Outcome: Students will build the capacity to identify and describe main ideas, underlying, assumptions, and valid conclusions.

These guidelines are most often met through courses that specifically deal with reasoning, such as Introduction to Critical Thinking, Introduction to Philosophy or Proposal Writing and Logical Argument.

foundation #4: Quantitative Literacy
- Learning Outcome: Students will be able to apply basic quantitative skills to the analysis and interpretation of real-world quantitative information to draw conclusions.
- Learning Outcome: Students will be able to apply and present quantitative information to support personal, professional, and societal goals.

These guidelines are most often met through any course meeting the General Education category of Mathematics. Courses include Statistics, Algebra, Contemporary Mathematics, Visualizing Math, The History of Math, and Discovering Math Across Generations.

foundation #5: Research Skills and Information and Digital Literacy
- Learning Outcome: Students will be able to apply information from a variety of media, including digital media, with an emphasis on scholarly sources.

- Learning Outcome: Students will be able to critically evaluate sources and reach well-reasoned conclusions, attributing sources appropriately, to effectively convey information.
- Learning Outcome: Students will be able to use digital tools to advance learning, as well as personal and professional development.

    These guidelines may be met through courses that infuse digital research skills, such as Digital Literacy, or Media and Visual Literacy, or by courses that discuss the transformation of culture and society due to digital technologies, such as Communication through New Media, Digital Culture and Society, Ethics of Digital Art and Design, History and Theory of New Media or Digital Storytelling.

foundation #6: Social Responsibility
- Learning Outcome: Students will be able to engage in ethical reasoning and reflect on issues such as: democratic citizenship; diversity, such as gender, race, class, sexuality; social justice; and environmental sustainability, both locally and globally.

    Courses to meet this guideline might include references to subjects such as ethics, diversity, equity and inclusion, or the environment in their titles and include titles such as Introduction to Ethics, Business Ethics, Media, Ethics and Law, Sex and Gender in Western Culture, Images of Women in Western Civilization, African American Literature, Environmental Studies, Social, Professional, and Ethical Issues in Computing or Sustainability and Agriculture.

All students at SUNY Empire are expected to demonstrate Breadth and Depth of Knowledge. Students may use Educational Planning as an integrating study or capstone in order to explore connections and patterns within their learning, including prior learning. They do this through the following guidelines:

Foundation #7: Building on Foundations
- Learning Outcome: Students will be able to apply learning in at least two of the fields involved in the concentration and a progression that builds on fundamental concepts and principles. This will be demonstrated through courses from at least the 2000 level in the foundation areas.

Foundation #8: Interconnections
- Learning Outcome: Students will be able to describe how their concentration combines two or more distinct disciplinary areas.
- Learning Outcome: Students will be able to identify connections and contrasts among two or more disparate approaches or perspectives, or multiple fields that combine to respond to a question, topic, or theme.

Students earning associate degrees must earn at least 8-12 credits in each of two areas, or 16-24 credits from three or more areas that come together to constitute a response to a well-explained problem, question, theme, or interdisciplinary field.

Learning Outcomes
- Foundations: Students will be able to explain fundamental concepts and principles of at least two of the fields involved in the concentration, at least one of which must be a liberal arts and sciences field.
- Communication: Students will be able to develop effective arguments in writing and speech, including demonstrating critical listening, reading and interpretation skills, in multiple contexts and through multiple strategies.

- Critical Thinking and Problem Solving: Students will develop abilities in reading, writing, and evaluating information critically, i.e., with sustained attention to meaning, presentation, and argument.
- Critical Thinking and Problem Solving: Students will build the capacity to identify and describe main ideas, underlying, assumptions, and valid conclusions.
- Quantitative Literacy: Students will be able to apply basic quantitative skills to the analysis and interpretation of real-world quantitative information to draw conclusions.
- Quantitative Literacy: Students will be able to apply and present quantitative information to support personal, professional, and societal goals.
- Research Skills and Information and Digital Literacy: Students will be able to apply information from a variety of media, including digital media, with an emphasis on scholarly sources.
- Research Skills and Information and Digital Literacy: Students will be able to critically evaluate sources and reach well-reasoned conclusions, attributing sources appropriately, to effectively convey information.
- Research Skills and Information and Digital Literacy: Students will be able to use digital tools to advance learning, as well as personal and professional development.
- Social Responsibility: Students will be able to engage in ethical reasoning and reflect on issues such as: democratic citizenship; diversity, such as gender, race, class, sexuality; social justice; and environmental sustainability, both locally and globally.
- Building on Foundations: Students will be able to apply learning in at least two of the fields involved in the concentration and a progression that builds on fundamental concepts and principles. This will be demonstrated through courses from at least the 2000 level in the foundation areas.
- Interconnections: Students will be able to describe how their concentration combines two or more distinct disciplinary areas.
- Interconnections: Students will be able to identify connections and contrasts among two or more disparate approaches or perspectives, or multiple fields that combine to respond to a question, topic, or theme.

Interdisciplinary/Multidisciplinary Studies: B.A., B.S., B.P.S.

Degree programs in Interdisciplinary/Multidisciplinary Studies offer students the opportunity to develop individualized degree plans based on their intellectual, professional, and personal interests. Interdisciplinary/Multidisciplinary Studies will allow students to explore a particular area of interest, theme, theory, concern, profession, or topic from more than one perspective. The close, interdisciplinary examination will be the basis of both discovery and integration of interconnected ideas from different areas. Students will sharpen their skills in writing and research and critical reading and thinking. Together with a faculty mentor, students create a program to meet their specific needs and goals.

General program guidelines can be found on the "Program Details" tab, and students work with an academic mentor to choose courses that meet the guidelines and address each student's individual interests. Students can also work with their academic mentors to identify applicable transfer credit, prior college-level learning, and possible course equivalencies. Working with a mentor and using Empire State University's educational planning process, students develop a specialized concentration

in Interdisciplinary/Multidisciplinary Studies by following the general program guidelines as well as any applicable concentration guidelines. Students may also develop their own concentrations.

For more information about general undergraduate degree requirements, please visit Earning an Undergraduate Degree (p. 185).

For sample degree programs and other degree planning resources, please visit the Interdisciplinary and Multidisciplinary Studies Degree Planning web page (https://www.sunyempire.edu/interdisciplinary-multidisciplinary-studies/degree-planning-resources/).

For more information about Interdisciplinary and Multidisciplinary Studies, please visit the Interdisciplinary and Multidisciplinary Studies web site (https://www.sunyempire.edu/interdisciplinary-multidisciplinary-studies/).

Program Details

Students will develop a concentration in multiple areas that combine around a well-explained problem, question, theme, or interdisciplinary field. Concentrations must have a title, in addition to the Area of Study in Interdisciplinary and Multidisciplinary Studies.

Foundation #1: Foundations

- Learning outcome: Students will be able to explain fundamental concepts and principles of at least two of the fields involved in the concentration, at least one of which must be a liberal arts and sciences field. These fields include The Arts (including visual, performing, or digital arts), Cultural Studies (including literature, communication, creative writing, expository writing, languages/linguistics, literature, philosophy religion), Historical Studies, Social and Behavioral Sciences (including anthropology, economics, human development, political science, public affairs, sociology, or psychology), Natural Sciences (including biology, chemistry, environmental science, physical sciences) and Mathematics, but not professional disciplines such as Human Services, Educational Studies, or Business.

  These foundations will vary based on student interest and focus but are likely met through survey courses at the 1000-level with titles that might include words such as introduction/introductory, principles, exploring, foundations, or literacy, but may be a single subject that serves as a prerequisite to further study in that field. Examples include, but are not limited to: Introduction to Literature, Media and Visual Literacy, Introduction to Psychology, Biology I, Foundations of Anatomy and Physiology, Marketing Principles, or Statistics.

Foundation #2: Communication

- Learning outcome: Students will be able to develop effective arguments in writing and speech, including demonstrating critical listening, reading and interpretation skills, in multiple contexts and through multiple strategies.

  This guideline may be met by any course that meets the General Education category of Basic Communication, but most often is met through courses such as College Writing, Composition, Effective Academic Writing, or Public Speaking.

Foundation #3: Critical Thinking and Problem Solving

- Learning outcome: Students will develop abilities in reading, writing, and evaluating information critically, i.e., with sustained attention to meaning, presentation, and argument.

- Learning outcome: Students will build the capacity to identify and describe main ideas, underlying assumptions, and valid conclusions.

  These guidelines are most often met through courses that specifically deal with reasoning, such as Introduction to Critical Thinking, Introduction to Philosophy or Proposal Writing and Logical Argument.

Foundation #4: Quantitative Literacy

- Learning outcome: Students will be able to apply basic quantitative skills to the analysis and interpretation of real-world quantitative information to draw conclusions.
- Learning outcome: Students will be able to apply and present quantitative information to support personal, professional, and societal goals.

  These guidelines are most often met through any course meeting the General Education category of Mathematics. Courses include Statistics, Algebra, Contemporary Mathematics, Visualizing Math, The History of Math, and Discovering Math Across Generations.

Foundation #5: Research Skills and Information and Digital Literacy

- Learning outcome: Students will be able to apply information from a variety of media, including digital media, with an emphasis on scholarly sources.
- Learning outcome: Students will be able to critically evaluate sources and reach well-reasoned conclusions, attributing sources appropriately, to effectively convey information.
- Learning outcome: Students will be able to use digital tools to advance learning, as well as personal and professional development.

  These guidelines may be met through courses that infuse digital research skills, such as Digital Literacy, or Media and Visual Literacy, or by courses that discuss the transformation of culture and society due to digital technologies, such as Communication through New Media, Digital Culture and Society, or The Digital Environment in a Post-Truth World.

Foundation #6: Social Responsibility

- Learning outcome: Students will be able to engage in ethical reasoning and reflect on issues such as: democratic citizenship; diversity, such as gender, race, class, sexuality; social justice; and environmental sustainability, both locally and globally.

  Courses to meet this guideline might include references to subjects such as ethics, diversity, equity and inclusion, or the environment in their titles and include titles such as Introduction to Ethics, Business Ethics, Media, Ethics and Law, Sex and Gender in Western Culture, Images of Women in Western Civilization, African American Literature, Environmental Studies, Social, Professional, and Ethical Issues in Computing or Sustainability and Agriculture.

All students at SUNY Empire are expected to demonstrate Breadth and Depth of Knowledge. Students in IMS with a specific concentration do this through the following guidelines:

Foundation #7: Development of Knowledge and Current Perspectives

- Learning outcome: Students will be able to analyze the system of ideas on which a field or discipline is based. This may mean tracing the definition, foundations, vocabulary, and scope of a field or it might mean discussing the environment in which ideas or priorities change and explain current thinking in the field.

Courses meeting this guideline will be at the advanced (3000, 4000 or graduate) level, and include courses such as Art History, History and Theories of New Media, Globalization: Business and Society in the Information Age, Economic Issues in Health Care or Contemporary Environmental Issues.

Foundation #8: Theoretical and/or Methodological Knowledge

- Learning outcome: Students will be able to evaluate, critique, and apply theories, critical approaches, and/or methodologies in at least two of the areas of inquiry within the concentration or a single already well-established interdisciplinary field.

  Courses meeting this guideline will be at the advanced (3000, 4000 or graduate) level, and typically include courses with words such as theory/theories, methods, critical in their titles such as Performance Theory, Communication Theories, Social Science Research Methods, Theory of Computation, Travel and Tourism: A Critical Perspective, and/or course descriptions that refer to these concepts such as Literature and Culture of the Vampire, Advertising and Society, or Evolution.

Foundation #9: Synthesis of knowledge

- Learning outcome: Students will be able to analyze and form critical perspectives through the synthesis of two or more areas of study through either a capstone study, a senior project or thesis, or through identifying a study or through Prior Learning Assessment that combine at least two areas as discussed thoroughly in the degree rationale.
- Learning outcome: Students will be able to identify connections and contrasts between two or more disparate approaches or perspectives, or multiple fields.

Learning Outcomes

- Foundations: Students will be able to explain fundamental concepts and principles of at least two of the fields involved in the concentration, at least one of which must be a liberal arts and sciences field.
- Communication: Students will be able to develop effective arguments in writing and speech, including demonstrating critical listening, reading and interpretation skills, in multiple contexts and through multiple strategies.
- Critical Thinking and Problem Solving: Students will develop abilities in reading, writing, and evaluating information critically, i.e., with sustained attention to meaning, presentation, and argument.
- Critical Thinking and Problem Solving: Students will build the capacity to identify and describe main ideas, underlying assumptions, and valid conclusions.
- Quantitative Literacy: Students will be able to apply basic quantitative skills to the analysis and interpretation of real-world quantitative information to draw conclusions.
- Quantitative Literacy: Students will be able to apply and present quantitative information to support personal, professional, and societal goals.
- Research Skills and Information and Digital Literacy: Students will be able to apply information from a variety of media, including digital media, with an emphasis on scholarly sources.
- Research Skills and Information and Digital Literacy: Students will be able to critically evaluate sources and reach well-reasoned conclusions, attributing sources appropriately, to effectively convey information.

- Research Skills and Information and Digital Literacy: Students will be able to use digital tools to advance learning, as well as personal and professional development.
- Social Responsibility: Students will be able to engage in ethical reasoning and reflect on issues such as: democratic citizenship; diversity, such as gender, race, class, sexuality; social justice; and environmental sustainability, both locally and globally.
- Development of Knowledge and Current Perspectives: Students will be able to analyze the system of ideas on which a field or discipline is based. This may mean tracing the definition, foundations, vocabulary, and scope of a field or it might mean discussing the environment in which ideas or priorities change and explain current thinking in the field.
- Theoretical and/or Methodological Knowledge: Students will be able to evaluate, critique, and apply theories, critical approaches, and/or methodologies in at least two of the areas of inquiry within the concentration or a single already well-established interdisciplinary field.
- Synthesis of Knowledge: Students will be able to analyze and form critical perspectives through the synthesis of two or more areas of study through either a capstone study, a senior project or thesis, or through identifying a study or through Prior Learning Assessment that combine at least two areas as discussed thoroughly in the degree rationale.
- Synthesis of Knowledge: Students will be able to identify connections and contrasts between two or more disparate approaches or perspectives, or multiple fields.

Concentration Guidelines

Specific guidelines have been developed for concentrations in General Studies (Bachelor degree only) and Environmental Studies. Students can work with their mentor to develop an individualized concentration, and should use the general area of study guidelines as an organizing framework for their degree plans.

Concentration In General Studies

Guidelines For A Bachelor Of Science Degree

Students will explain what led them to make the decision to earn a concentration in General Studies rather than a degree with more of a disciplinary or interdisciplinary focus.

Foundation #1: Foundations

- Learning Outcome: Students will be able to explain fundamental concepts and principles of at least two of the fields involved in the degree.

  These foundations will vary based on student interest and focus but are likely met through survey courses at the 1000-level with titles that might include words such as introduction/introductory, principles, exploring, foundations, or literacy, but may be a single subject that serves as a prerequisite to further study in that field. Examples include, but are not limited to:

Code	Title	Credits
LITR 1005	Introduction to Literature	4
ARTS 1140	Media and Visual Literacy	4
PSYC 1005	Introduction to Psychology	4
BIOL 1210	Biology I: Lecture	3
BIOL 1300	Anatomy & Physiology I	4

MRKT 1005	Marketing Principles	4
MATH 1065	Statistics	3-4

Foundation #2: Communication

- Learning Outcome: Students will be able to develop effective arguments in writing and speech, including demonstrating critical listening, reading and interpretation skills, in multiple contexts and through multiple strategies.

This guideline may be met by any course that meets the General Education category of Basic Communication, but most often is met through courses such as:

Code	Title	Credits
COMW 1005	College Writing	3,4
COMW 2005	Effective Academic Writing	2,3
COMM 1030	Public Speaking	4

Foundation #3: Critical Thinking And Problem Solving

Learning Outcome: Students will develop abilities in reading, writing, and evaluating information critically, i.e., with sustained attention to meaning, presentation, and argument.

Learning Outcome: Students will build the capacity to identify and describe main ideas, underlying assumptions, and valid conclusions.

These guidelines are most often met through courses that specifically deal with reasoning, such as:

Code	Title	Credits
CUST 2030	Introduction to Critical Thinking	2
PHIL 2005	Introduction to Philosophy	4
COMW 3005	Proposal Writing and Logical Argument	3

Foundation #4: Quantitative Literacy

- Learning Outcome: Students will be able to apply basic quantitative skills to the analysis and interpretation of real-world quantitative information to draw conclusions.
- Learning Outcome: Students will be able to apply and present quantitative information to support personal, professional, and societal goals.

These guidelines are most often met through any course meeting the General Education category of Mathematics. Courses include:

Code	Title	Credits
MATH 1065	Statistics	3-4
MATH 1040	Algebra	3,4
MATH 1005	Contemporary Mathematics	4
MATH 1030	Visualizing Mathematics	4
MATH 2005	History of Mathematics: Introductory	4
MATH 1010	Discovering Math Across Generations	4

Foundation #5: Research Skills And Information And Digital Literacy

- Learning Outcome: Students will be able to apply information from a variety of media, including digital media, with an emphasis on scholarly sources.
- Learning Outcome: Students will be able to critically evaluate sources and reach well-reasoned conclusions, attributing sources appropriately, to effectively convey information.

- Learning Outcome: Students will be able to use digital tools to advance learning, as well as personal and professional development.

These guidelines may be met through courses that infuse digital research skills, such as:

Code	Title	Credits
CUST 3015	Food & Drink in Cultural Context: Advanced	4
ARTS 1140	Media and Visual Literacy	4

or by courses that discuss the transformation of culture and society due to digital technologies, such as:

Code	Title	Credits
COMM 3015	Social Media: Communication & Culture	4

Foundation #6: Social Responsibility

- Learning Outcome: Students will be able to engage in ethical reasoning and reflect on issues such as: democratic citizenship; diversity, such as gender, race, class, sexuality; social justice; and environmental sustainability, both locally and globally.

Courses to meet this guideline might include references to subjects such as ethics, diversity, equity and inclusion, or the environment in their titles and include titles such as:

Code	Title	Credits
PHIL 2020	Introduction to Ethics	4
BUSN 3010	Business Ethics	4
COMM 3025	Media Ethics & Law	3,4
ANTH 3122	Sex & Gender in Global Perspective	4
ARTS 4035	Images of Women in Western Art	4
LITR 2006	African American Literature: Intro	4
ENSC 1200	Environmental Science	4
INFT 3045	Social, Professional & Ethical Issues in Computing	4
ENST 3010	Sustainability & Agriculture	4

All students at SUNY Empire are expected to demonstrate Breadth and Depth of Knowledge. Students may use Educational Planning as an integrating study or capstone in order to explore connections and patterns within their learning, including prior learning. They do this through the following guidelines:

Foundation #7: Building On Foundations

- Learning outcome: Students will be able to explain concepts in at least one subject or topic in their degree plan or PLA and a progression that builds on fundamental concepts and principles and includes intermediate and advanced study.

8. Interconnections

- Learning Outcome: Students will be able to describe how their concentration combines two or more distinct disciplinary areas.
- Learning Outcome: Students will be able to identify connections and contrasts between two or more disparate approaches or perspectives, or multiple fields.

Students concentrating in General Studies must earn at least 12 upper-level credits in a single area of focus, which may include any liberal arts and sciences subject, professional disciplines such as Business, Education, or Human Services, or topics assessed through PLA, and 8 upper-level credits in any second area of focus, discipline, or PLA.

Concentration In Environmental Studies

About Environmental Studies

Environmental Studies is the interdisciplinary academic field that focuses on human interactions with the natural environment. Concentrations with Interdisciplinary and Multidisciplinary designs contain more than one academic discipline focused on a theme, question, problem, or issue. A concentration in Environmental Studies has natural sciences as one of its foundation academic fields to provide the student with a broad perspective on the complex dynamics of natural environmental systems. If you are interested in this area, you are encouraged to think broadly about how you would like to explore human-environmental interactions.

To more fully understand human interactions with the natural environment, you have the opportunity to integrate natural science with any number of other disciplines, depending on your goals and interests. For example, you might choose education, art, history, business, the social sciences (anthropology, economics, political science, psychology, sociology, law, public affairs), and/or cultural studies (philosophy, religious studies, communications, media studies, literature) in order to study human relationships with nature.

If your primary interest is studying the environment from a scientific perspective, you would be best served by a degree in Science, Mathematics and Technology with a concentration in Environmental Science (p. 118).

If your primary interests in human-environmental interactions fall outside the sciences, you can design a concentration with a title other than Environmental Studies in Interdisciplinary Studies or any other Area of Study. Examples of possible concentration titles include: Environment and Culture, Business and the Environment, Environmental Policies.

If you are interested in integrating the study of the environment with studies in business, you could consider incorporating Empire State University's Business and Environmental Sustainability certificate (p. 146) into your degree plan.

Learning Outcomes

After completing a concentration in Environmental Studies, you will be able to:

- Apply multiple modes of inquiry to analyze human interactions with the natural environment
- Demonstrate a foundation in the Natural Sciences
- Demonstrate an advanced understanding of systems in the natural environment 2
- Demonstrate a foundation in one or more additional disciplines
- Demonstrate advanced level understanding in your selected disciplines
- Acquire skills necessary to your individual inquiry which will vary by discipline (for example, specialized skills in mathematics, technology, literary analysis, media analysis, social science, and research methods)
- Analyze a specific individualized inquiry about an environmental problem, theme, or issue through a multidisciplinary or interdisciplinary approach (see paragraph below for more information)
- Apply understanding of the ethical relationship between people and the natural environment to your individualized inquiry.

For a full explanation of these terms and outcomes, see the guidelines below.

Guidelines

You should explain in your rationale essay what elements in your degree plan, including past learning experiences, meet each of these guidelines.

I. Natural Sciences Foundation

At the introductory level, learning experiences should focus on physical and biological systems in the natural environment. Learning experiences should include introductory biology, chemistry, and physics. Studies with all three titles are not required, but sources of learning in each of these disciplines should be discussed in the rationale essay. Knowledge in the natural sciences should be sufficient to support the Environmental Science Core. Advanced studies in the natural sciences can be added if they meet your interests and goals. For example, if the plan focuses on chemistry or physics, advanced studies applicable to your research agenda can be included in the concentration.

II. Environmental Science Core

You should include environmental science studies in your degree plan that cover the breadth of the discipline and demonstrate progression of learning. At the introductory level, learning experiences should focus on physical and biological systems in the natural environment.

Advanced environmental science studies should build upon introductory studies and can be tailored to your interests and goals. You might be interested in topics such as conservation, environmental mitigation, natural resources, or sustainable development. The advanced studies chosen would allow you to learn about your selected topic in greater depth and could focus on either advanced knowledge in biological systems (examples might include forest ecology, marine biology, ornithology, and wildlife management,) or physical systems (examples might include climate change, hydrology, natural disasters, and soil science).

III. Interdisciplinary Design

Please refer to the Interdisciplinary Studies Area of Study and learn about how to combine disciplines in order to pursue your particular interests. First choose the disciplines that best address your interests. Then, choose between a multidisciplinary or interdisciplinary approach to degree program design. In either case, you will focus through natural science and one or more additional disciplines.

In designing your program, work closely with your mentor to explore and define your interests, to understand multidisciplinary or interdisciplinary design, and to select studies and learning experiences that meet the guidelines and allow you to pursue your interests and goals. A multidisciplinary approach enables you to compare the distinctly different ways that two or more disciplines approach human relationships with the environment. An Interdisciplinary approach takes the additional step of synthesizing two or more disciplines for integrated learning, which reaches new understanding of a theme or issue or suggests new solutions to a problem or question.

For example, a multidisciplinary approach to understanding human interactions with the environment might lead a student to study environmental science and psychology. The focus would be on comparing how each of these disciplines uses different concepts, theories, and methods to consider the theme, problem, or issue of particular interest to you. For example, if your interest was pollution, you might consider how and why humans contribute to pollution from a

science perspective and from a psychological perspective and how these approaches differ in understanding this issue.

An interdisciplinary approach using the same fields would focus on synthesizing or integrating the concepts, theories, and methods of both disciplines to arrive at new ideas and knowledge that relate to your focus. Using the above example, an interdisciplinary approach to understanding pollution might focus on how psychological principles can be used to convey scientific ideas in a way that would affect behavior and reduce pollution.

IV. Additional Skills And Knowledge
Environmental Ethics
Environmental ethics is a branch of philosophy that concerns the ethical relationship between people and the natural environment and is a typical knowledge component of a Concentration in Environmental Studies degree program. You should either take an Environmental Ethics course, or identify learning that demonstrates ethical reasoning in the context of the environment.

Mathematics
You will need sufficient quantitative skills to help you understand the natural environment. The amount and level of quantitative studies will depend on your area of 4 interest, and in many cases, mathematics studies which fulfill the general education requirement will meet this guideline. Knowledge of statistics is recommended because it enables students to analyze environmental data and understand the results of research on environmental issues.

Technology
In addition to the information literacy requirement for an ESC degree, knowledge of specific technology may be appropriate for your Concentration in Environmental Studies. Information about the natural environment is often collected using specialized technology and having skills in the use of such technology could position you for a particular career path.

Research, Data Collection, And Analytic Tools
You should understand the research methods and analytic tools associated with the disciplines in your degree plan. For example, if you are combining natural science and social science, you will need to understand research methods for both academic fields and should explain in your rationale how you have acquired that knowledge.

Communication
Communicating information about the environment is an important component of an environmental studies degree. Depending on your interests and goals, skills in public speaking may be appropriate. Being able to communicate in written forms through various modes, such as social media, is also important.

V. Capstone Experience Or Study
All Concentrations in Environmental Studies should include a capstone study or experience. You might work with a mentor to design your own research project, identify an internship, fieldwork, or service learning opportunity within the local community.

If you choose a multidisciplinary approach, you should identify a capstone that compares your learning from two or more selected disciplines to gain varied perspectives of your theme, question, problem, or issue. If you choose an interdisciplinary approach, you should identify a capstone that synthesizes your learning from two or more selected disciplines to gain an integrated perspective of your theme, question,

problem, or issue that can lead to new knowledge. In your rationale essay, you should discuss the way your capstone meets these requirements.

To illustrate: suppose your second field of interest is human behavior; you might design an Environmental Studies concentration which includes studies in environmental science and psychology.

For a multidisciplinary capstone, you might apply your scientific learning to look at how yard fertilizer with phosphorus contributes to runoff, affecting the water quality of streams and rivers. You might apply your learning from psychology to look at how peer pressure related to maintaining a green lawn influences neighborhood lawn maintenance practices. In this multidisciplinary capstone, you would compare two aspects this type of water pollution. You might uncover interesting similarities and differences between the dynamics of the larger natural system and the dynamics of human communities.

In contrast, for an interdisciplinary capstone with the same disciplines and content, you would integrate and apply what you learned about these similarities and differences. Integration typically leads to conclusions beyond both disciplines. You might apply synthesized learning about these two aspects of this particular kind of water pollution to consider how behavioral reinforcement methods might be introduced to shift neighborhood priorities from uniformly green lawns to clean water.

Labor Studies: A.A., A.S., B.A., B.S.

Students of Labor Studies will examine the topics of work, workers and worker organizations. Students will study the history of the labor movement, labor law and collective bargaining, and focus on current problems and policies generated by changes in the global economy, technology, the workforce and the workplace.

Students will sharpen skills in writing and research and critical reading and thinking, as, together with a faculty mentor, create a program to meet specific needs and goals. Labor Studies is an interdisciplinary field, which draws on the methodologies and subject matter of the social sciences and humanities and other interdisciplinary areas, such as American studies, women's studies and African-American studies.

Degree programs in Labor Studies offer students the opportunity to develop individualized degree plans based on their intellectual, professional, and personal interests. General program guidelines can be found on the "Program Details" tab, and students will work with an academic mentor to choose courses that meet the guidelines and address each student's individual interests. Students can also work with their academic mentors to identify applicable transfer credits, prior college-level learning, and possible course equivalencies. Working with a mentor and using Empire State University's educational planning process, students can develop a specialized concentration in Labor Studies by following the general program guidelines as well as any applicable concentration guidelines. Students may also develop their own concentrations.

For more information about general undergraduate degree requirements, please visit Earning an Undergraduate Degree (p. 185).

Labor Studies degrees are offered through The Harry Van Arsdale, Jr. School of Labor Studies (https://www.sunyempire.edu/labor-studies-school/) in New York City and online.

Program Details

Labor studies comprises an examination of work, workers, and worker organizations, both historically and in contemporary contexts. It provides the opportunity for workers/students to critically examine the forces and relations of power that shape their lives, and to collectively assess ideas, policies, and worker-centered strategies for social change and justice.

A liberal arts/social science-based mode of inquiry, Labor Studies draws upon the methodologies and subject matter of a wide range of academic disciplines in order to bring into focus the social, cultural and political presence of workers and the organizations that represent them. The goal is to engage in an educational process that enables workers to situate themselves in relation to broader processes of political-economic and cultural change and encourage informed and active citizenship.
  In a Labor Studies classroom, students' experience, as workers, is a point of departure for ongoing academic inquiry into the historical and contemporary role of work, workers, and the institutions they create in the making of a democratic society.   Labor Studies courses also provide understanding of relevant methodological approaches.

Below are the Labor Studies program's foundational outcomes and examples of the courses that meet them.

FOUNDATION 1: EXAMINE LABOR HISTORY, AND THE ROLE OF WORKERS AND WORKER-BASED INSTITUTIONS IN EFFECTIVE SOCIAL AND POLITICAL CHANGE.

Code	Title	Credits
LABR 2010	US History: Workers' Perspectives	4
LABR 3042	Labor, Education, and Social Progress	4
LABR 3072	United States Labor History	4
LABR 3090	Labor & the Sociological Imagination	4
LABR 3120	The Political Economy of New York City: Workers' Perspectives	4
LABR 3155	Global History: Workers Beyond the West	4

FOUNDATION 2: EXPLORE RELATIONS AND INSTITUTIONS OF POLITICAL ECONOMIC POWER IN THE WORKPLACE, INCLUDING THOSE RELATED TO ENDURING CLASS, GENDER, AND RACIAL INEQUALITIES.

Code	Title	Credits
LABR 1010	Class Race & Gender for Workers	4
LABR 1040	Economics for Workers	4
LABR 3005	Collective Bargaining	4
LABR 3025	Diversity in the Workplace: Union Perspectives	4
LABR 3060	Labor Law	4
LABR 3130	Women, the Economy & the Trades	4

FOUNDATION 3: ANALYZE THE RELATIONSHIP BETWEEN CULTURAL EXPRESSION THROUGH THE ARTS, THE LABOR MOVEMENT, AND WORKER POWER.

Code	Title	Credits
LABR 1050	Literature & Society for Workers	4
LABR 3135	Working-class Themes in Literature	4
LABR 3150	Labor on Film	4
LABR 3160	Public Art as Social Practice: Labor & Cultural Organizing	4

A variety of degree designs can correspond to the above foundational outcomes. While no individual degree program need include all of the following, Labor Studies students consider such topics as:

• The breadth of labor studies — the interdisciplinary characteristics of Labor Studies; methodologies that labor studies specialists draw from the social sciences and humanities; subject matter from other disciplines relevant to labor studies.

• Labor history — the impact of workers and labor movements on historical development; how history has shaped labor's role in society; how organized workers and those outside trade unions have come to recognize distinct interests and traditions; how workers formulated strategies for defending and extending their interests in light of employer interests and government policy.

• Institutional dynamics — what labor organizations do and how they function; how workers utilize political institutions to achieve their goals; how family, community and educational structures define labor; how racial, gender and ethic identities influence work, the workplace and the labor movement.

• Social and cultural factors — how class, racial, ethnic and gender divisions function within society; how social identities are formed and social inequalities maintained or modified; how people experience and affect social structures and institutions.

• How the economy affects labor — how market economies create the framework for labor movements; how worker and employer interests

manifest themselves in the workplace; how wages are determined; how local, regional and international economic development affect labor.

- Labor-management relations — how workers organize unions; how workers bargain for and enforce contracts; how labor addresses such issues as wages, hours, health and safety, and social benefits; how management responds to worker strategies; how legislation mirrors and influences labor relations; how government's role in labor-management relations changes.
- Workers outside the United States — the degree to which the histories, interests and institutions of workers in other countries are similar to those of their counterparts in the U.S.; regional or global trends that affect workers in different parts of the world.
- Images of workers — how images of work, workers and their organizations are depicted in literature, the arts and the media; how workers create images of themselves.
- Theories of the labor movement — philosophies that analyze, influence and reflect labor's growth; how the labor movement shifts divergent perspectives regarding short-term and long-term objectives.

NOTE: The Labor Studies area of study is offered only in New York City and through online study.

Learning Outcomes

- Students will be able to examine labor history, the role of workers and worker-based institutions in effecting social and political change.
- Students will be able to explore relations and institutions of political economic power in the workplace, including those related to enduring class, gender, and racial inequalities.
- Students will be able to analyze the relationship between cultural expression through the arts, the labor movement, and worker power.

Liberal Arts: B.A.

The Bachelor of Arts (B.A.) degree in Liberal Arts is a 124-credit program perfect for students who are relentlessly inquisitive about the world, for students who thrive on understanding how things work, and for leaders who want to learn from the great thinkers, artists, and scientists of the past in order to create the future worthy of this greatness.

While the B.A. degree in Liberal Arts does not have a set of specific required courses, it does require students to take courses in five different subject areas, as well as taking 16 advanced level credits in one of 13 designated subject areas. Students must also take 8 additional advanced level credits in any course designated as Liberal Arts and Sciences in the course catalog. Details about the degree requirements can be found on the "Program Details" tab. Students will work with a faculty mentor to develop a degree plan that matches their goals and meets all program requirements. Students should speak with their mentor to see if any credit earned through individualized Prior Learning Assessment (iPLA) (https://www.sunyempire.edu/degree-planning-academic-review/prior-learning-assessment/individualized-prior-learning-assessment/) or Professional Learning Evaluation (PLE) (p. 168) might fulfill these course requirements. Courses are offered online, through independent studies, or through a blended approach.

The Liberal Arts program is a flexible choice. It can be:

- A "completion" degree. Are you a student with most of your coursework already completed and just want to get your degree? Empire State University's student-friendly transfer policies and expertise with evaluating prior learning make the Liberal Arts degree an attractive option for students who are returning to school after taking a break.
- An issue-driven program. Are there issues you really care about? Do you want to know how your education can make a difference? Choose courses, residencies, and faculty closely connected to issues that are important to you.
- A "Great Books" program. Do you want to understand the world around you in a deeper way? Work with your faculty mentor to identify classics in philosophy, history, cultural studies, art, literature, and politics from around the globe.
- An employment readiness program. Are you interested in acquiring the skills employers are looking for? A solid liberal arts education at SUNY Empire provides students with the skills needed to become lifelong learners and adapt with the times or as you change careers.

Program Details

A. Students must demonstrate learning in social responsibility.

Courses that fulfill this requirement include:

Code	Title	Credits
PHIL 2020	Introduction to Ethics	4
POLI 3080	Modern Political Theory	4
ENSC 2000	Principles of Environmental Sustainability	4

Other SUNY Empire courses, transfer courses, or prior learning may be applied towards this requirement. Students wishing to use credits other than those from these courses are advised to consult with their academic mentors and to provide in their program portfolio rationale essay an explanation of how this degree requirement is being met.

B. Students must demonstrate learning in communication.

Any course carrying a Basic Communication SUNY General Education designation can be used to satisfy this requirement.

C. Students must demonstrate learning in critical thinking and problem solving.

Courses that fulfill this requirement include:

Code	Title	Credits
CUST 2030	Introduction to Critical Thinking	2
PHIL 2005	Introduction to Philosophy	4

Other SUNY Empire courses, transfer courses, or prior learning may be applied towards this requirement. Students wishing to use credits other than those from these courses are advised to consult with their academic mentors and to provide in their program portfolio rationale essay an explanation of how this degree requirement is being met.

D. Students must demonstrate learning in quantitative literacy.

Any course carrying a Mathematics SUNY General Education designation can be used to satisfy this requirement.

E. Students must demonstrate learning in information and digital literacy.

Courses that fulfill this requirement include:

Code	Title	Credits
EDST 1122	Introduction to Digital Literacy	4

Other SUNY Empire courses, transfer courses, or prior learning may be applied towards this requirement. Students wishing to use credits other than those from these courses are advised to consult with their academic mentors and to provide in their program portfolio rationale essay an explanation of how this degree requirement is being met.

F. Students must take a minimum of 16 advanced level credits in one of the following subject areas:

ANTH - Anthropology

ARTS - Arts

BIOL - Biology

COMM - Communications

CUST - Cultural Studies

DIGA - Digital Arts

LITR - Literature

PHIL - Philosophy

POLI - Political Science

SOCI - Sociology

PSYC - Psychology

HIST - Historical Studies

SOSC - Social Science

G. minimum of 8 additional advanced level credits designated as Liberal Arts and Sciences

In addition to the credits in a single subject area outlined in F (above), students must take a minimum of 8 additional advanced level credits in any courses designated as Liberal Arts and Sciences courses in the college catalog.

Learning Outcomes

- Social Responsibility: Students will be able to engage in ethical reasoning and reflect on issues such as democratic citizenship, diversity, social justice and environmental sustainability, both locally and globally.
- Communication: Students will be able to express and receive ideas effectively, in multiple contexts and through mutiple strategies.
- Critical Thinking and Problem Solving: Students will be able to evaluate, analyze, synthesize and critique key concepts and experiences and apply diverse perspectives to find creative solutions to problems concerning human behavior, society and the natural world.
- Quantitative Literacy: Students will be able to read, interpret, use, and present quantitative information effectively.
- Information and Digital Media Literacy: Students will be able to critically assess, evaluate, understand, create, and share information using a range of collaborative technologies to advance learning, as well as personal and professional development.

Management: B.S.

The Bachelor of Science (B.S.) in Management is a 124-credit program is designed to serve students who are interested in pursuing future careers as managers or small business owners. The program provides the foundation of core competencies, theoretical and technical bodies of knowledge in the content areas of management, business, as well as SUNY liberal arts and general education requirements.

The B.S. in Management includes a set of required courses that all students must take, along with SUNY General Education (p. 188) and other academic requirements (p. 185), in order to be eligible to receive a degree.The required courses for programs in Management can be found on the "Program Details" tab. Students should speak with their mentor to see if any credit earned through individualized Prior Learning Assessment (iPLA) (https://www.sunyempire.edu/degree-planning-academic-review/prior-learning-assessment/individualized-prior-learning-assessment/) or Professional Learning Evaluation (PLE) (p. 168) might fulfill these course requirements. Courses are offered online, through independent studies, or through a blended approach.

The B.S. in Management is organized around a core of set of knowledge and skills (competencies) that can be demonstrated through studies, course work and/or prior learning assessment. These competencies encompass a wide range of topics within the fields of management history and theory, the social sciences, quantitative and analytical business skills, globalization, leadership, organizational behavior, human resources and strategic management. A well-designed, comprehensive degree program will, in turn, address each of these through the key learning outcomes. A capstone study will help provide the student with the opportunity to synthesize several different studies into a final learning experience.

Program Details

Code	Title	Credits
LOWER DIVISION		
ACCT 2005 & ACCT 2010	Introductory Accounting I: Financial Accounting and Introductory Accounting II: Managerial Accounting	6,8
or ACCT 1005	Accounting for Decision Makers	
BUSN 1010	Business Law I	4
BUSN 2010	Business Statistics	4
or MATH 1065	Statistics	
ECON 2015 & ECON 2020	Macroeconomics and Microeconomics (4 Cr. ea.)	6,8
or ECON 2010	Introductory Economics: Micro & Macro 6 Cr.	
MGMT 1005	Principles of Management	3,4
MRKT 1005	Marketing Principles	4
UPPER DIVISION		
BUSN 3010	Business Ethics	4
BUSN 3122	Management Information Systems	4
FSMA 3010	Corporate Finance	4
HRMS 3010	Diversity in the Workplace	4
HRMS 3015	Human Resource Management	4
MGMT 3020	International Cross Cultural Management	4
MGMT 3025	Leadership	4
MGMT 3060	Organizational Behavior	4

MGMT 4035	Strategic Management	3-4
Total Credits		**62-68**

Learning Outcomes

- Broad-Based Knowlege of Management Fundamentals: Students will identify, analyze, and resolve management-related challenges.
- Specific Knowledge of Management Practice: Students will define and evaluate management roles, functions, methods, processes, and technologies while demonstrating the ability to apply them to a variety of organizations in local and global-management contexts.
- Critical Thinking and Applied Learning Skills: Students will evaluate the effective use of the management function in support of organizational development in highly competitive, diverse markets.
- Ethically and Globally Responsibility Management: Students will evaluate justice, equality, sustainability, and ethical standards for effective leaders who conduct business in culturally and ethically complex global environments.
- Building on all prior management learning, students will be able to apply management knowledge to real life case studies.

Nursing: B.S.N.

The Bachelor of Science in Nursing (RN to B.S.N.) degree program at Empire State University is a 124-credit program designed for registered nurses (RN) looking to advance their leadership capabilities and advance their career in healthcare settings.

The B.S.N. degree program includes a set of required courses that all students must take, along with SUNY General Education (p. 188) and other academic requirements, (p. 185) in order to be eligible to receive a degree.The required courses for the B.S.N. can be found on the "Program Details" tab. Students should speak with their mentor to see if any credit earned through individualized Prior Learning Assessment (iPLA) (https://www.sunyempire.edu/degree-planning-academic-review/prior-learning-assessment/individualized-prior-learning-assessment/) or Professional Learning Evaluation (PLE) (p. 168) might fulfill these course requirements. Courses are offered online, through independent studies, or through a blended approach.

RN To BSN Program Admission Requirements

- An admissions application.
- An active, unencumbered New York state RN license.
- An associate degree or diploma from an accredited nursing program.

Program Details

The RN to BSN program requires a total of 124 credits completed through a combination of nursing component requirements, transfer credits and credits earned by meeting Empire State University general learning requirements.

This upper-division nursing program includes online courses and two, community-based, precepted experiences. Most students enroll on a part-time basis and complete the program in as little as three terms.*

Students should be prepared to spend approximately the following hours per week (reading, research, discussions, and writing) in a 4-credit hour course:

- 8-week course – 22.5 hours per week
- 15-week course – 12 hours per week

Code	Title	Credits
Nursing Component		
Core		
NURS 3005	Transition to Baccalaureate Nursing	4
NURS 3010	Health Assessment	4
NURS 3015	Pharmacology	4
NURS 3020	Nursing Informatics	4
NURS 3025	Nursing Research	4
NURS 4005	Health Care Delivery Systems & Policy	4
NURS 4010	Leadership and Management	4
NURS 4015	Population and Community Health Nursing	4
NURS 4020	Baccalaureate Nursing Capstone (This requirement may not be met via of transfer credit or prior learning assessment.)	5
Elective Requirement		
Examples of nursing courses that can be used to meet the elective requirement are:		4

NURS 3035	Interdisciplinary Perspectives in Global Health	
NURS 3040	Foundations of Palliative Care	

More than 50 online courses have been approved by the nursing faculty to meet the elective requirement.

In addition, the following professional certifications also have been approved to meet the elective requirement:

- AACN Certification Corporation: Certification for Adult Critical Care Nurses (CCRN Adult)
- AACN Certification Corporation: Certification for Neonatal Critical Care Nurse (CCRN Neonatal)
- AACN Certification Corporation: Certification for Pediatric Critical Care Nurses (CCRN Pediatric)
- AACN Certification Corporation: Certification for Progressive Care Nurses (PCCN)
- American Board of Neuroscience Nursing (ABNN): Certified Neuroscience Registered Nurse (CNRN) [3]
- American Board of Perianesthesia Nursing Certification: Certified Ambulatory Perianesthesia Nurse (CAPA)
- American Board of Perianesthesia Nursing Certification: Certified Post Anesthesia Nurse (CPAN)
- American Board of Wound Management (ABWM): Certified Wound Specialist (CWS)
- American Heart Association (ACLS)
- American Heart Association (PALS)
- American Nurses Credentialing Center: Certified Gerontological (ADN) Nurse
- American Nurses Credentialing Center: Psychiatric and Mental Health Nurse Generalist
- Board of Certification for Emergency Nursing: Certified Emergency Nurse (CEN)
- Competency and Credentialing Institute: Certified Perioperative Nurse (CNOR)
- Medical-Surgical Nursing Certification Board: Certified MedicalSurgical Registered Nurse (CMSRN)
- National Board for Cert of Hospice and Palliative Nurses: Certified Hospice and Palliative Nurse (CHPN)
- Nursing Case Management Certification (ANCC)
- Oncology Nursing Certifications Corporation (ONCC): Certified Breast Care Nurse (CBNC)
- Pediatric Nursing Certification Board: Certified Pediatric Nurse (CPN)
- Wound, Ostomy, and Continence Nurse Cert Board: Certified Continence Care Nurse (CCCN)
- Wound, Ostomy, and Continence Nurse Cert Board: Certified Ostomy Care Nurse (COCN)
- Wound, Ostomy, and Continence Nurse Cert Board: Certified Wound Care Nurse (CWCN)

General Learning Component

The remaining 83 credits are obtained via the transfer of credits and by completing SUNY Empire State College general learning requirements. Students are required to meet all of the SUNY undergraduate General Education Requirements outlined in the Undergraduate Catalog.	83
Total Credits	**124**

*based on required individual degree planning

Undergraduate Precepted Practice Experiences

Precepted practice experience requirements are embedded in the Population and Community Health Nursing and Baccalaureate Nursing Capstone courses. These practice experiences are designed to meet both predetermined and personal learning objectives. Students design practice experiences with a faculty member, in collaboration with a local preceptor.

These courses are completed near the end of the program and are offered in the fall, spring and summer terms. Advance planning to integrate the clinical experiences and course work into employment and family schedules is required. The faculty recommend that students begin the planning process at least six months before course registration.

Students initiate the planning process by contacting the School of Nursing's clinical coordinator to receive approval for both the preceptor and clinical agency. **This contact should be made by Oct. 1 for a spring precepted experience, Feb. 1 for a summer precepted experience and June 1 for a fall precepted experience.**

Guidelines For Practice Experiences

The Community Health Nursing course requires 45 direct practice experience hours working with a preceptor in a community health setting. This course focuses on community health nursing and involves viewing populations and aggregates as the client. Some examples are entire communities within a geographic region, migrant workers, teen parents, older adults, veterans or children with special needs. Some examples of appropriate settings include, a public health agency, school, community hospice, and parish nurse program or outpatient clinic with community outreach programs.

The preceptor for this experience must be an experienced RN with a minimum of a bachelor's degree in nursing. In some instances, upon approval from the dean or her designee, a professional colleague from another licensed health care discipline, such as a physician or social worker may be deemed an appropriate preceptor for the clinical practice experience.

The Baccalaureate Nursing Capstone requires 90 direct practice hours over the 15-week term. This is a nursing leadership course with four specialty tracks, including administration, clinical, education and informatics. Students choose practice sites based on their area of interest. Examples of appropriate settings include: a hospital, long-term-care facility, school, clinic, medical office or hospice. Community settings also may be utilized as long as the experience focuses on leadership. The preceptor must be an experienced RN in a leadership role with a minimum of a bachelor's degree in nursing.

Professional Expectations

The nursing program prepares nurses to function as professional nurses. In completing their academic program, nursing students come into direct contact with health agency staff and patients as part of their precepted practice experience. SUNY Empire State College has an obligation to protect patients and staff; cannot tolerate student behavior that exploits, endangers, compromises or threatens the welfare, safety or rights of staff and patients. SUNY Empire State College expects students to demonstrate a set of values and attitudes consistent with the highest professional standards, and to comply with professional nursing standards and institutional codes of conduct.

As noted by the ANA, The Standards of Professional Performance (2010) are as follows:

> The Standards of Professional Performance describe a competent level of behavior in the professional role. All registered nurses are expected to engage in professional role activities, including leadership, reflective of their education, experience, and position. The competencies accompanying each standard may be evidence of demonstrated compliance with the corresponding standard. The list of competencies is not exhaustive. Whether a particular standard or competency applies depends on the context, circumstances, or situation. Registered nurses are accountable for their professional actions to themselves, healthcare consumers, peers, and ultimately to society.

Learning Outcomes

- Integrate knowledge from the nursing, biological and social sciences, and the humanities to provide culturally competent care to individuals, families and communities;
- Apply a variety of communication strategies in establishing positive relationships with patients, families and members of the health care team;
- Use evidence and information technology to enhance patient safety and promote quality care outcomes;
- Integrate principles of leadership in promoting collaboration with interdisciplinary teams;
- Analyze how the baccalaureate-prepared nurse develops professional role identity, including consideration of values, and legal and ethical aspects to nursing practice.

Nursing: B.S.N. Multi-Award with Nassau Community College

Nassau Community College (NCC) and Empire State University offer a multi-award program with the awarding of the Associate in Science (A.S.) degree by NCC and the Bachelor of Science in Nursing (B.S.N.) by SUNY Empire. Nassau's Associate in Science nursing (https://collegecatalog.ncc.edu/current/programs/nursing/) program, is accredited by the Accreditation Commission for Education in Nursing (ACEN*), leading to eligibility for the National Council Licensure Examination (NCLEX) and to become licensed as Registered Nurses. The Bachelor of Science in nursing (https://www.esc.edu/nursingalliedhealth/rn-to-bsn/) degree program, is accredited by Commission on Collegiate Nursing Education (CCNE), and open to individuals who hold a registered nurse (RN) license.

The goal of the multi-award program is to prepare pre-licensure and post-licensure nursing students to practice safe and competent patient-centered nursing care in a variety of health settings and to optimize human health and wellness potential across the life span, within a rapidly changing health care system.

These programs are designed to empower students with the knowledge and skills that are essential in meeting the health care needs of a diverse population within the community, and to inspire in the nursing student a sense of integrity, commitment and competence.

Throughout these programs, students' competencies will grow incrementally in the attainment and utilization of nursing knowledge, critical thinking, clinical reasoning, communication, leadership and technology skills essential to their role within the profession and the health care team.

The multi-award program requires the completion of 124 credits (53 credits of Liberal Arts/ Sciences/ General Education and 71 credits of Professional Nursing Education). The program is designed to be completed in four (4) years of full-time study. This integrated curriculum includes classroom instruction at Nassau Community College, with on-campus laboratory and clinical placements throughout Nassau County. Empire State University courses will be delivered using an online platform, with NCC as the home campus throughout the Nursing program.

1. Associate of Science Degree in Nursing will be awarded by NCC after the completion of the required 84 credits (39 Nursing credits and 45 General Education credits).
2. Nursing students must PASS the NCLEX-RN Exam to continue into the sixth semester of the program.
3. Bachelor of Science Degree in Nursing awarded by Empire State University after completion of the required 124 credits.

All interested students must apply to this program (https://www.ncc.edu/admissions/) at Nassau Community College.

Program Requirements

Students in the multi-award program should follow the below program to ensure proper sequence and pre-requisites are met. Please check with you advisor/mentor for questions regarding when you take your courses.

Term 1	Credits
ENG 101, ENG 100, ENG 108 NCC	3
MAT 102 Introduction to Statistics NCC	3
PSY 203 General Psychology I NCC	3
PHI 110 Biomedical Ethics NCC	3
HIST 3345 Modern American History	4
Credits	**16**

Term 2		
NUR 101 Fundamentals of Nursing NCC		7
AHS 131 Anatomy & Physiology I NCC		4
PSY 216 Lifespan Human Development NCC		3
ALLH 3030	Contemporary Applications of Diversity, Equity, Inclusion, and Social Justice in Healthcare	4
Credits		**18**

Term 3		
NUR 105 Comprehensive Nursing Care I NCC		8
AHS 132 Anatomy & Physiology II NCC		4
NURS 3010	Health Assessment	4
Credits		**16**

Term 4		
NUR 203 Comprehensive Nursing Care II		8
AHS 202 Medical Microbiology NCC		4
NURS 3015	Pharmacology	4
Credits		**16**

Term 5		
NUR 204 Comprehensive Nursing Care III NCC		8
ENG 102, ENG 103, ENG 109 NCC		3
BIO 131 Pathophysiology NCC		3
NURS 3005	Transition to Baccalaureate Nursing	4
Credits		**18**

Term 6		
NURS 3025	Nursing Research	4
NURS 4005	Health Care Delivery Systems & Policy	4
NURS 3020	Nursing Informatics	4
SOCI 3010	Aging & Society	4
Credits		**16**

Term 7		
NURS 4010	Leadership and Management	4
HLAD 3020	Cultural Competency in Health Care	4
NURS 4015	Population and Community Health Nursing *	4
Credits		**12**

Term 8		
NURS 6010	Professional Role Development & Ethics	3
NURS 4020	Baccalaureate Nursing Capstone *	5
NURS 3035 or NURS 3040	Interdisciplinary Perspectives in Global Health or Foundations of Palliative Care	4
Credits		**12**
Total Credits		**124**

NCC- Course to be taken at Nassau Community College

*- Courses have clinical placement

Learning Outcomes

- Integrate knowledge from the nursing, biological and social sciences, and the humanities to provide culturally competent care to individuals, families and communities;
- Apply a variety of communication strategies in establishing positive relationships with patients, families and members of the health care team;
- Use evidence and information technology to enhance patient safety and promote quality care outcomes;
- Integrate principles of leadership in promoting collaboration with interdisciplinary teams;

- Analyze how the baccalaureate-prepared nurse develops professional role identity, including consideration of values, and legal and ethical aspects to nursing practice.

Psychology: B.A.

Psychology is the study of behavior, mental processes, and experience. It is an empirical science focused on expanding our understanding of individuals through both research and clinical work. Subjects include, but are not limited to, how the brain, behavior, and environment interact; how people develop cognitive, emotional, and behavioral problems, as well as how to intervene; how people interact with the world around them, and how these processes are integrated into personality under interpersonal, social, and cultural influences.

The Bachelor of Arts (B.A.) in Psychology is a 120-credit program that includes study in biological, cognitive, developmental, social, cultural, and individual aspects of people, as well as specific study of research methodologies (including statistics) employed within the discipline and how psychology can be applied in real life. Once this foundational knowledge is gained, students may customize their program based on their personal, educational, and career goals by choosing from a variety of courses to fulfill the degree requirements. The bachelor's degree in psychology serves as good preparation for most careers that involve working with others, as well as for graduate study in psychology and related fields.

The B.A. in Psychology includes a set of required courses that all students must take, along with SUNY General Education (p. 188) and other academic requirements (p. 185), in order to be eligible to receive a degree.The required courses for programs in Psychology can be found on the "Program Details" tab. Students should speak with their mentor to see if any credit earned through individualized Prior Learning Assessment (iPLA) (https://www.sunyempire.edu/degree-planning-academic-review/prior-learning-assessment/individualized-prior-learning-assessment/) or Professional Learning Evaluation (PLE) (p. 168) might fulfill these course requirements. Courses are offered online, through independent studies, or through a blended approach.

Learning Outcomes

- Students will be able to describe overarching themes in the field of psychology, as well as key concepts in major domain and application areas of psychology.
- Students will be able to use scientific reasoning and methodology to interpret psychological and behavioral phenomena, including demonstrating psychology information literacy.
- Students will be able to articulate ethical values in evaluating psychological science and practice in a diverse world.
- Students will be able to interact effectively with others, including demonstration effective writing and presentation skills.
- Students will develop meaningful professional direction that can utilize psychological knowledge and skills.

Program Details

Students completing the B.A. in Psychology will need to complete the following course requirements.

Code	Title	Credits
HUDV 1015	Human Development: Introductory	4
or HUDV 3025	Human Development: Advanced	
PSYC 1005	Introduction to Psychology	4
PSYC 2030	Social Psychology: Introductory	4
or PSYC 3020	Social Psychology: Advanced	
PSYC 3010	Abnormal Psychology: Advanced	4
PSYC 3040	Biological Psychology	4
PSYC 3045	Cognitive Psychology	4
or PSYC 3100	Learning & Memory	
PSYC 3055	Cultural Psychology	4
SOSC 2010	Statistics for the Social Sciences	4
SOSC 3025	Social Science Research Methods	4
Two Advanced Level PSYC or HUDV Electives		8
Total Credits		**44**

Public Affairs: B.A., B.S., B.P.S.

Students of Public Affairs will be well-equipped to serve society through public service, civic engagement, political and government careers, public communications or nonprofit service. The interdisciplinary Public Affairs area of study will prepare students with leadership and decision-making skills to operate in the public interest, addressing social issues and societal concerns.

As students work toward their degree, they will examine the theoretical and philosophical underpinnings of their chosen concentration, meanwhile gaining an understanding of American governmental and public institutions, within their social context, and becoming familiar with the broad and complex economic, financial and legal environments within which public institutions function. Students in Public Affairs have the opportunity to engage intellectually with ethical questions related to their area of concentration, and the values that drive the development of public policy. Public Affairs students will sharpen their skills in writing, research and critical reading and thinking, as, together with a faculty mentor, create a program to meet your specific needs and goals.

Degree programs in Public Affairs offer students the opportunity to develop individualized degree plans based on their intellectual, professional, and personal interests. General program guidelines can be found on the "Program Details" tab, and students will work with an academic mentor to choose courses that meet the guidelines and address each student's individual interests. Students can also work with their academic mentors to identify applicable transfer credit, prior college-level learning, and possible course equivalencies. Working with a mentor and using Empire State University's educational planning process, students can develop a specialized concentration in Public Affairs by following the general program guidelines as well as any applicable concentration guidelines. Students may also develop their own concentrations.

For some concentrations, specific technical or scientific knowledge might be necessary.

For more information about general undergraduate degree requirements, please visit Earning an Undergraduate Degree (p. 185).

For sample degree programs and other degree planning resources, please visit the Department of Social Science and Public Affairs Degree Planning Resources web page. (https://www.sunyempire.edu/social-science-public-affairs/degree-planning-resources/)

Program Details

Public Affairs is an interdisciplinary field devoted to the study of organizations and individuals that operate in what is considered the public interest, including social issues and problems. The area of study is designed for those who are interested in serving and bettering society through public service, civic engagement, political and government careers, public communications or non-profit service. The Public Affairs Area of Study is commonly pursued with the aim of advancing careers in Public Administration, Public Policy, Homeland Security, and Emergency Management to name a few.

Students with a degree in Public Affairs should demonstrate knowledge and understanding of the nine foundations listed below. Knowledge of each outcome can be demonstrated through transfer credit, individual prior learning assessment (iPLA), professional learning evaluation (PLE), credit by examination, or specific courses at Empire State University.

Foundation #1: Theoretical and Philosophical Concepts
Courses that meet this guideline include but are not limited to:

Code	Title	Credits
EMGT 2005	Introduction to Emergency Management	4
LEST 1005	Introduction to Law & the Legal System	4
PAFF 1005	Introduction to Security Studies	4
PAFF 2005	Introduction to Homeland Security	4
PAFF 2122	Introduction to Public Administration	4
PAFF 2132	Introduction to Public Policy	4
PAFF 3127	Public Policy	4
POLI 3005	America's Founding Ideas	4
SOCI 1005	Exploring Society: An Introduction to Sociology	4

Foundation #2: Comparative Perspectives
Courses that meet this guideline include (but are not limited to):

Code	Title	Credits
ANTH 3122	Sex & Gender in Global Perspective	4
CRJS 4010	Comparative Criminal Justice Systems	4
HLAD 3015	Comparative Health Systems	4
PAFF 3003	Security Implications of Global Climate Change	4
PAFF 4005	Counterterrorism in a Changing World	4
POLI 3020	Comparative Politics	4
POLI 3065	International Politics & Relations	4
SOCI 3065	Perspectives on Terrorism	4

Foundation #3: Historical Perspectives
Courses that meet this outcome include (but are not limited to):

Code	Title	Credits
HIST 2025 & HIST 2030	US History to 1865: What Does it Mean to be a Free Nation? and US History From 1865 to the Present	6-8
HLAD 2010	The United States Health Systems	4
POLI 2005	New York State & Local Government	4
POLI 3005	America's Founding Ideas	4
POLI 3105	The American Presidency	4
POLI 3110	The United States Congress	4
POLI 3115	The United States Constitution	4

Foundation #4: Social Contexts of Power and Privilege
Courses that meet this guideline include (but are not limited to):

Code	Title	Credits
ANTH 3122	Sex & Gender in Global Perspective	4
CRJS 3065	Race Crime & Justice	4
CRJS 4030	Women Crime & Criminology	4
CUST/GSST 3152	Queering American Culture	4
GSST 2005	Introduction to LGBTQ+ Studies	4
POLI 4015	Race Law & Politics	4
SOCI 1005	Exploring Society: An Introduction to Sociology	4
SOCI 2010	Introduction to Race Class & Gender	4
SOCI 3010	Aging & Society	4
SOCI 3025	Contemporary Global Social Issues	4
SOCI 3040	Deviance & Social Control	4

SOCI 3045	Disaster & Society	4
SOCI 3055	Family & Society	4
SOCI 3090	Social Movements	4
SOCI 3095	Sociology of Education	4
SOCI 4030	Power & Privilege	4

Foundation #5: Legal Environment
Courses that meet this guideline include (but are not limited to):

Code	Title	Credits
CRJS 3009	Criminal Law & Procedure	4
EMGT 3045	Mass Disasters: Implications for Public Policy	4
LEST 3015	Mental Health & The Law	4
LEST 4005	Constitutional Law I: Institutional Powers & Constraints	4
LEST 4010	Constitutional Law II: Civil Rights & Civil Liberties	4
PAFF 3127	Public Policy	4
PAFF 4132	Legal & Ethical Foundations of Public Service	4
POLI 3115	The United States Constitution	4

Foundation #6: Economic, Financial or Budgetary Issues
Courses that meet this guideline include (but are not limited to):

Code	Title	Credits
ECON 2005	Principles of Economics	4
ECON 2015	Macroeconomics	4
ECON 2020	Microeconomics	4
ECON 3035	Economics of Crime	4
ECON 3085	International Economics	4
ECON 3100	Public Finance	4
ECON 3105	Public Finance & Economics	4
INFT 4005	Business Continuity Planning & Disaster Recovery	4
PAFF 4122	Public Budgeting and Finance	4

Foundation #7: Ethics and Values
Courses that meet this guideline include (but are not limited to):

Code	Title	Credits
PAFF 3122	Ethics and the Public Sector	4
PAFF 4132	Legal & Ethical Foundations of Public Service	4
SOCI 4035	Privacy Security & Freedom: Social Concerns for the 21st Century	4

Foundation #8: Research Skills and Information Analysis
Courses that meet this guideline include (but are not limited to):

Code	Title	Credits
BUSN 3127	Business Analytics	4
COMM 3027	Data Visualization	4
CRJS 3020	Law Enforcement Intelligence Analysis	4
GSCI 3200	Geographic Information Systems	4
INFT 2015	Introduction to Business Analytics with Microsoft Excel	4
INFT 3005	Data Analytics	4
INFT 4010	Data Analytics & Data Mining	4
MATH 1065	Statistics	3-4
MATH 2065	Statistics II	3

PAFF 4127	Public Administration Capstone	4
SOSC 2010	Statistics for the Social Sciences	4
SOSC 3020	Qualitative Social Science Research: Design & Methods	4
SOSC 3025	Social Science Research Methods	4

Foundation #9: Technical Knowledge
Courses that meet this guideline include (but are not limited to):

Code	Title	Credits
ACCT 1005	Accounting for Decision Makers	6
BUSN 2015	Computer Applications in Business Management & Economics	4
BUSN 3122	Management Information Systems	4
CRJS 3045	Forensic Science	4
EDST 1122	Introduction to Digital Literacy	4
EMGT 3015	Emergency Communications	4
EMGT 3020	Hazardous Materials & Public Awareness	4
EMGT 3025	Incident Management & Leadership	4
EMGT 3050	Risk Analysis & Hazard Mitigation	4
EMGT 3035	Managing Biological Terrorism as a Public Health Emergency	4
EMGT 4122	Disaster Intervention	4
ENSC 3304	Environmental Health	4
GSCI 2200	GPS & The New Geography	4
GSCI 3200	Geographic Information Systems	4
HLAD 3005	Community Health	4
HLHS 1023	Introduction to Community & Public Health	4
HSCI 3200	Health Informatics	4
HSCI 4200	Epidemiology	4
HUSV 3147	Human Services in Disaster	4
HUSV 3142	Disaster Mental Health Theory & Practice	4
HUSV 4045	Secondary Trauma in Human Service Workers	4
HUSV 4157	Health and Wellness for Human Service Professionals	4
INFT 2015	Introduction to Business Analytics with Microsoft Excel	4
INFT 2020	Introduction to Digital Crime & Digital Terrorism	4
INFT 3020	Cyber Crime & Computer Forensics	4
PAFF 3003	Security Implications of Global Climate Change	4
PAFF 4127	Public Administration Capstone	4
PAFF 4000	International Dimensions of Security	4

Learning Outcomes
- Foundation 1: Theoretical and Philosophical Concepts, Students will be able to define fundamental concepts and theories related to government, public administration, and/or public policy.
- Foundation 2: Comparative Perspectives, Students will be able to compare ideologies and practices that define public sector organizations.
- Foundation 2: Comparative Perspectives, Students will discuss how public institutions vary across time, place and culture.
- Foundation 3: Historical Perspectives, Students will be able to examine the historical origins of U.S. public institutions.

- Foundation 4: Social Contexts of Power and Privilege, Students will be able to explain perspectives on power and privilege using concepts and theories from the Social Sciences.
- Foundation 4: Social Contexts of Power and Privilege, Students will be able to analyze social institutions and their influence on systems of power and privilege.
- Foundation 5: Legal Environment, Students will be able to discuss practical issues of law, rulemaking, and judicial decisions that influence public affairs theory and practice in the U.S.
- Foundation 5: Legal Environment, Students will be able to assess how constitutional dynamics affect policy-making processes across the public sector.
- Foundation 6: Economic, Financial, or Budgetary Issues, Students will be able to analyze the economic and financial environments in which public institutions operate.
- Foundation 6: Economic, Financial, or Budgetary Issues, Students will be able to explain how budgeting and financial practices affect public policy processes and procedures, and shape fiscal outcomes.
- Foundation 7: Ethics and Values, Students will be able to analyze ethical issues related to the values – good, bad, or indifferent -- that society place on the development of public policy.
- Foundation 8: Research Skills and Information Analysis, Students will be able to summarize tools and methods used in social scientific research.
- Foundation 8: Research Skills and Information Analysis, Students will be able to apply quantitative, qualitative, or other relevant research skills.
- Foundation 9: Technical Knowledge, Students will be able to apply specific technical or scientific knowledge and skills relevant to their concentration or professional goals.

Public Health: B.S.

The Bachelor of Science (B.S.) degree in Public Health is a 124-credit program designed to serve students who are interested in working in the diverse field of public health or prepare students for graduate school. The program is structured around courses that address fundamental aspects of public health to prevent and protect the health of communities while addressing the health needs of various communities.

The B.S. in Public Health is guided by the competencies model from the Association of Schools & Programs of Public Health (ASPPH) Undergraduate Learning Outcomes model. The curriculum is focused on equipping students with fundamental skills (e.g., policy, epidemiology, statistics) through core courses. Once the foundational knowledge and skills are met, students have the opportunity to customize their courses to match their educational and career goals. Students will have the option of completing the degree program through various delivery modes such as online, independent study, blended, and/or face-to-face study.

Students completing a bachelor's degree in Public Health will be able to:

1. Discuss the key fundamental public health values, concepts, and functions.
2. Evaluate the social determinants of health and equity on population health and health disparities.
3. Analyze the role played by biological, social, environmental, cultural, and economic factors in shaping human health and disease.
4. Apply public health data analytical principles to health-related issues.
5. Explain the legal and ethical aspects of public health practice; and,
6. Evaluate public health research and policy interventions.

PSYC 3090	Health Psychology	4
SOCI 3010	Aging & Society	4
SOSC 3010	Family Violence: Legal & Social Perspectives	4

Learning Outcomes

- Students will be able to discuss the key fundamental public health values, concepts, and functions.
- Students will be able to evaluate the social determinants of health and equity on population health and health disparities.
- Students will be able to analyze the role played by biological, social, environmental, cultural, and economic factors in shaping human health and disease.
- Students will be able to apply public health data analytical principles to health-related issues.
- Students will be able to explain the legal and ethical aspects of public health practice.
- Students will be able to evaluate public health research and policy interventions.

Science, Mathematics, and Technology: A.A., A.S.

Students of Science, Mathematics and Technology will explore the natural sciences (physics, chemistry and biology), mathematics, computer science and a range of technological, applied-science and health-related fields. Students will study the fundamental laws and concepts of their concentration, develop their knowledge of scientific methodology and learn the skills important for successful practice and communication, whether they are entering a new field or honing skills in their current occupation. Students will sharpen skills in critical reading and thinking, as, together with a faculty mentor, create a program to meet your specific needs and goals.

Degree programs in Science, Mathematics and Technology offer students the opportunity to develop individualized degree plans based on their intellectual, professional, and personal interests. General program guidelines can be found on the "Program Details" tab, and students will work with an academic mentor to choose courses that meet the guidelines and address each student's individual interests. Students can also work with their academic mentors to identify applicable transfer credit, prior college-level learning, and possible course equivalencies. Working with a mentor and using Empire State University's educational planning process, students can develop a specialized concentration in Science, Mathematics and Technology by following the general program guidelines as well as any applicable concentration guidelines. Students may also develop their own concentrations.

For more information about general undergraduate degree requirements, please visit Earning an Undergraduate Degree (p. 185).

For sample degree programs and other degree planning resources, please visit the Department of Computer Science and Technology (https://www.esc.edu/computer-science-tech/degree-planning-resources/), Mathematics (https://www.esc.edu/mathematics/degree-planning-resources/), or Natural Sciences (https://www.esc.edu/natural-sciences/degree-planning-resources/) Degree Planning Resources web page.

Please note:

- Empire State University does not offer degrees in engineering. You may study the mathematics and the theoretical sciences that comprise the traditional engineering curriculum, but the title of the degree cannot contain the word "engineering"
- In the sciences there are many opportunities for experimentation, research, and analytical work. These include virtual labs, courses with lab kits, field experience courses and residencies. Students can also engage in scientific internships and pursue college credit for prior learning in their fields. Students should be aware that they may need specific laboratory and/or field courses to meet entrance requirements for graduate studies; they should confirm such requirements with these institutions

Taking individual courses as a nondegree nonmatriculated student also is possible and will offer you the same range and depth of courses and rigorous standards as matriculated undergraduate students.

Program Details

These area of study guidelines address the broad needs of students interested in pursuing degrees in Science, Mathematics, and Technology. Degree programs at the associate level must address these five program outcomes, minimally at the introductory level. Foundational knowledge in their field prepares students for progression to the bachelor's degree.

Students should refer to the university's concentration guidelines for program outcomes specific to their fields. Otherwise, students must research their field and describe academic and professional expectations for their concentration in their rationale essay.

Knowledge in science, mathematics, and technology is continually evolving. Thus, degree programs should demonstrate currency in their fields. In addition, students are expected to develop life-long learning skills and engage in ongoing inquiry to acquire new knowledge and maintain currency.

Students earning degrees in Science, Mathematics, and Technology will achieve the following program outcomes:

Program Details for Computer Science and Technology

Foundation #1: Breadth and Depth of Knowledge

Code	Title	Credits
CSCI 1010	Introduction to Computers	4
CSCI 1020	Introduction to Networks	4
CSCI 3000	Computer Operations & Security	4
CSCI 4000	Advanced Computing Models: Virtualization Cloud & Mobile Computing	4
CSCI 4005	Software Engineering	4
CSCI 4015	Theory of Computation	4
INFS 2000	Exploring the Disciplines: Information Systems: Introductory	2
INFS 3010	Database Systems	4
INFT 2020	Introduction to Digital Crime & Digital Terrorism	4
INFT 3010	Advanced Digital Crime & Digital Terrorism	4
INFT 3040	Social Media Management	4
INFT 3050	Systems Analysis & Design	3-4
INFT 4005	Business Continuity Planning & Disaster Recovery	4
INFT 4005	Business Continuity Planning & Disaster Recovery	4

Foundation #2: Problem Solving and Critical Thinking

Code	Title	Credits
CSCI 1015	Introduction to Database Design	4
CSCI 1020	Introduction to Networks	4
CSCI 2010	Introduction to C++ & OOP	4

Learning Outcomes

Foundation 1: Breadth and Depth of Knowledge
Foundation 2: Problem Solving and Critical Thinking
Foundation 3: Methodological, Quantitative, and Digital Expertise
Foundation 4: Communication
Foundation 5: Social Responsibility

Detailed Foundation Learning Outcomes

- Foundation 1a: Students will be able to demonstrate a conceptual understanding of their field by articulating foundational knowledge, including key concepts, methodologies, and theories.
- Foundation 1b: Students will be able to demonstrate a conceptual understanding of their field by explaining how their program includes breadth of knowledge in their subject area.
- Foundation 2a: Students will be able to demonstrate skills to analyze and solve unique situations and problems by designing, implementing, and evaluating strategies for answering open-ended questions for which solutions are not immediately evident.
- Foundation 2b: Students will be able to demonstrate skills to analyze and solve unique situations and problems by thinking critically and objectively about problems and identifying the best solutions.
- Foundation 3a: Students will be able to demonstrate a working knowledge of investigative, quantitative, and technological approaches and skills to engage in their fields by applying the quantitative and technical skills necessary to engage in their fields.
- Foundation 3b: Students will be able to demonstrate a working knowledge of investigative, quantitative, and technological approaches and skills to engage in their fields by evaluating information, analyzing data, and utilizing technologies relevant to their disciplines.
- Foundation 4: Students will be able to demonstrate the skills needed to communicate scientific, mathematical, and/or technical concepts to a variety of audiences.
- Foundation 5: Students will be able to demonstrate an awareness of the societal context in which science, mathematics, and technology operate by demonstrating a social awareness in order to understand the interplay between their field and society.

Science, Mathematics and Technology: B.A., B.S.

Students of Science, Mathematics and Technology will explore the natural sciences (physics, chemistry and biology), mathematics, computer science and a range of technological, applied-science and health-related fields. Students will study the fundamental laws and concepts of their concentration, develop their knowledge of scientific methodology and learn the skills important for successful practice and communication, whether they are entering a new field or honing skills in their current occupation. Students will sharpen skills in critical reading and thinking, as, together with a faculty mentor, create a program to meet your specific needs and goals.

Degree programs in Science, Mathematics and Technology offer students the opportunity to develop individualized degree plans based on their intellectual, professional, and personal interests. General program guidelines can be found on the "Program Details" tab, and students will work with an academic mentor to choose courses that meet the guidelines and address each student's individual interests. Students can also work with their academic mentors to identify applicable transfer credit, prior college-level learning, and possible course equivalencies. Working with a mentor and using Empire State University's educational planning process, students can develop a specialized concentration in Science, Mathematics and Technology by following the general program

guidelines as well as any applicable concentration guidelines. Students may also develop their own concentrations.

For more information about general undergraduate degree requirements, please visit Earning an Undergraduate Degree (p. 185).

For sample degree programs and other degree planning resources, please visit the Department of Computer Science and Technology (https://www.sunyempire.edu/computer-science-tech/degree-planning-resources/), Mathematics (https://www.sunyempire.edu/mathematics/degree-planning-resources/), or Natural Sciences (https://www.sunyempire.edu/natural-sciences/degree-planning-resources/) Degree Planning Resources web page.

Please note:

- Empire State University does not offer degrees in engineering. You may study the mathematics and the theoretical sciences that comprise the traditional engineering curriculum, but the title of the degree cannot contain the word "engineering".
- In the sciences there are many opportunities for experimentation, research, and analytical work. These include virtual labs, courses with lab kits, field experience courses and residencies. Students can also engage in scientific internships and pursue college credit for prior learning in their fields. Students should be aware that they may need specific laboratory and/or field courses to meet entrance requirements for graduate studies; they should confirm such requirements with these institutions.

Taking individual courses as a nondegree nonmatriculated student also is possible and will offer you the same range and depth of courses and rigorous standards as matriculated undergraduate students.

Program Details

These area of study guidelines address the broad needs of students interested in pursuing degrees in Science, Mathematics, and Technology. Bachelor's degree programs must fully address five program outcomes, which align with the Empire State University Learning Goals.

Students must discuss in their rationale essay how each outcome is met in ways relevant to their field. Learning related to these outcomes can be demonstrated through coursework and prior learning.

Students should refer to the university's concentration guidelines for program outcomes specific to their fields. Otherwise, students must research their field and describe academic and professional expectations for their concentration in their rationale essay.

Knowledge in science, mathematics, and technology is continually evolving. Thus, degree programs should demonstrate currency in their fields. In addition, students are expected to develop life-long learning skills and engage in ongoing inquiry to acquire new knowledge and maintain currency. We offer courses in computer science and technology (p. 114), mathematics (p. 115), and the natural sciences (p. 116).

Students earning degrees in Science, Mathematics, and Technology will achieve the following program outcomes:

Program Details for Computer Science and Technology

FOUNDATION #1 BREADTH AND DEPTH OF KNOWLEDGE

Code	Title	Credits
CSCI 1010	Introduction to Computers	4
CSCI 1020	Introduction to Networks	4
CSCI 3000	Computer Operations & Security	4

Learning Outcomes

Foundation 1: Breadth and Depth of Knowledge
Foundation 2: Problem Solving and Critical Thinking
Foundation 3: Methodological, Quantitative, and Digital Expertise
Foundation 4: Communication
Foundation 5: Social Responsibility

Detailed Foundation Learning Outcomes

- Foundation 1a: Students will be able to demonstrate a conceptual understanding of their field by articulating foundational knowledge, including key concepts, methodologies, and theories.
- Foundation 1b: Students will be able to demonstrate a conceptual understanding of their field by explaining how their program includes breadth of knowledge in their subject area.
- Foundation 1c: Students will be able to demonstrate a conceptual understanding of their field by demonstrating how their program progresses from introductory-level to advanced-level knowledge.
- Foundation 2a: Students will be able to demonstrate skills to analyze and solve unique situations and problems by designing, implementing, and evaluating strategies for answering open-ended questions for which solutions are not immediately evident.
- Foundation 2b: Students will be able to demonstrate skills to analyze and solve unique situations and problems by thinking critically and objectively about problems and identifying the best solutions.
- Foundation 3a: Students will be able to demonstrate a working knowledge of investigative, quantitative, and technological approaches and skills to engage in their fields by applying the quantitative and technical skills necessary to engage in their fields.
- Foundation 3b: Students will be able to demonstrate a working knowledge of investigative, quantitative, and technological approaches and skills to engage in their fields by evaluating information, analyzing data, and utilizing technologies relevant to their disciplines.
- Foundation 4: Students will be able to demonstrate the skills needed to communicate scientific, mathematical, and/or technical concepts to a variety of audiences.
- Foundation 5a: Students will be able to demonstrate an awareness of the societal context in which science, mathematics, and technology operate by demonstrating a social awareness in order to understand the interplay between their field and society.
- Foundation 5b: Students will be able to demonstrate an awareness of the societal context in which science, mathematics, and technology operate by applying ethical principles and evaluating the impact of activities and research on their field and on society.
- Foundation 5c: Students will be able to demonstrate an awareness of the societal context in which science, mathematics, and technology operate by analyzing multiple issues including diversity, equity, sustainability, gender, or social justice in their field.

Concentration Guidelines

Specific guidelines have been developed for concentrations in the following areas:

If you are interested in an area not listed here, please contact your mentor about designing your own concentration.

Biology Concentration - For Students Matriculated On Or After Jan. 1, 2020

I. Overview

Biology is among the broadest of science disciplines and as such lays a foundation for a multitude of career paths. Students with concentrations in Biology may seek employment in education; academic, clinical, or research fields; environment and ecology-related fields; and allied health science professions. Additionally, a Biology concentration could serve as the foundation for future graduate studies in a variety of occupations.

Biology is one of the core fields in the natural sciences and as such, Biology concentrations must fulfill the guidelines for the Science,

Mathematics and Technology Area of Study. Concentrations in Biology include a range of approaches; however, they share a common core of knowledge and an approach to progression within the individualized specialization. Students interested in focusing on the life sciences without meeting the full expectation of these guidelines, should consider a different concentration title that accounts for their interests and degree plan (e.g., Studies in Biology).

II. Degree Design

The study of biology involves four levels of analysis. The molecular level includes the expression of genetic information, the chemistry of macromolecules, and metabolism. The cellular level focuses on the structure and function of cells with nuclei (known as eukaryotic cells) and cells without nuclei (known as prokaryotic cells). The level of the organism covers the form and function of animals and plants. Finally, the ecological level analyzes the evolution and diversity of organisms and their interactions in the natural world. Degree plans in Biology should have a holistic perspective which accounts for these levels of study.

The field of biology also draws upon knowledge in chemistry, physics, and mathematics. These supporting disciplines inform advanced level study in biology at all levels of analysis. Therefore, degree plans in Biology should include introductory study in each of these fields as discussed below.

A. Foundation Of Knowledge
Biology

To cover the breadth of biological theory discussed above, introductory biology is typically divided into a sequence of courses. The content of the introductory sequence, typically two courses, is expected to include the following: A) at the molecular level: DNA structure and replication, gene expression, respiration, and photosynthesis; B) at the cellular level: cell structure and function, the cell cycle, mechanisms of cell division, and modes of inheritance; C) at the organismal level: a survey of animal organ systems, plant form and reproduction, and regulation of homeostasis; D) at the ecological level: systematics and survey of biological taxa, evolutionary mechanisms, the function of populations, communities and ecosystems.

The two course Biology I and II with Laboratory sequence and the three course Introduction to Cell Biology and Genetics, Introduction to Organismal Biology, and Introduction to Population Biology sequence are both examples of acceptable sequences. Students should explain in their rationale essays how the sequence of introductory courses they select covers the content for foundational knowledge.

Chemistry

The foundation in chemistry should include two courses of introductory chemistry and at least the first semester of organic chemistry. For example, the General Chemistry I and II, or Chemistry I and II with Laboratory sequences, and Organic Chemistry I will provide this knowledge. Students are encouraged to consider including a second course in organic chemistry in their degree plans (e.g., Organic Chemistry II) especially if they plan to pursue graduate studies.

Physics

The foundation in physics should include a two-course sequence of introductory physics, such as Physics I and II with Laboratory or equivalent. Physics taught using either an algebra or calculus platform is acceptable.

Mathematics

Biology programs should include a course that covers statistics and probability (or a course that can similarly assist with quantitative

analyses) and the first semester of calculus. For example, Statistics and Calculus I will provide this knowledge. Calculus II is strongly recommended and becomes more important if a student is interested in graduate studies.

B. Advanced Level Knowledge

Degree plans in Biology should include advanced level study in each of the four levels of analysis: molecular, cellular, organismal, and ecological.

To accomplish this goal, students should include in their programs at least one advanced level course in each area as follows:

A) at the molecular level: students are required to take Genetics or its equivalent. In addition, students may include in the degree programs other courses in this area such as Biochemistry, or Molecular Biology:

B) at the cellular level: students are required to take Cell Biology or its equivalent. Students may also include in their degree programs other courses in this area such as Biology of Microorganisms:

C) at the organismal level: students may choose from a variety of courses such as Biology of the Brain, Ornithology, Plant Ecology, Forest Ecology, Herpetology, or Mammalogy:

D) at the ecological level: students may choose from a variety of courses such as Animal Behavior, Evolution, Ecology, Marine Biology, or Conservation Biology.

The remaining advanced level studies in the concentration can be either focused in a single area of biology or distributed among the different areas according to the student's specific interests in biology or their professional goals.

Studies in different biological subjects often cover the same topics in different context. For example, the mechanism of cell division is addressed in courses in the areas of cell biology, genetics, zoology and botany. This overlap is advantageous; repetition allows the student to view the topic from several perspectives. The resultant integration permits the development of an understanding of the functional relatedness of living organisms and demonstrates the unity of the various disciplines within biology.

C. Research And Experimental Skills

Students pursuing a biology concentration should learn problem-solving and research skills, as well as knowledge of basic experimental and application methodologies, including data collection and analysis. They should demonstrate this learning through the progression of courses and/or experiences.

The foundational courses in biology and chemistry should include opportunities for experimentation. For other natural science courses, research and experimental activities are encouraged. For introductory and advanced level knowledge, there are many ways in which research and analytical skills can be integrated into the course work. These include virtual labs, courses with lab kits, field experience courses and residencies. In addition, the student may plan to include an internship in the degree program, as well as assessment of prior learning knowledge for credit.

Students should be aware that they may need specific laboratory and/or field courses to meet entrance requirements for graduate studies.

III. Rationale

In addition to addressing the guidelines for the Science, Mathematics and Technology Area of Study, students must explicitly discuss in their

rationale essay how each of the above topics are incorporated in their degree program.

Chemistry Concentration - For Students Matriculated On Or After Feb. 1993

The science of chemistry is concerned in the broadest sense with the structure and "behavior" (properties and reactions) of the material world. On one end of the spectrum (atomic structure) it overlaps strongly with physics, while on the other end (biochemistry), it overlaps with biology. Traditional disciplinary majors in chemistry typically include 32-40 credits of study in chemistry, and 16-24 credits in mathematics, computers and cognate sciences.

Concentration studies in chemistry should provide an understanding of the primary principles, concepts, facts and theories across the discipline.

The concentration should include study in:

- chemical structure
- synthesis
- dynamics
- analysis

In a traditional chemistry major this is accomplished by course work in general/inorganic, organic, analytical and physical chemistry.

Chemistry is an experimental science; therefore, whatever the focus, the concentration should provide:

- a working knowledge of chemical laboratory methods, including basic techniques and skills of careful quantitative measurement
- experience with application of the most commonly used instrumental methods and purification methods
- ability to present and interpret laboratory results in a clear and well-organized fashion

Additional expectations:

- **Some skill in mathematics and quantitative reasoning** is important for understanding chemistry and working in the discipline. At the very least, a good working knowledge of algebra is needed, as well as an understanding of the application of statistics to scientific measurement and some basic understanding of the fundamental concepts and principles of calculus. The amount of mathematics needed beyond this will depend on the focus of the concentration.
- **Fundamental knowledge of the topics usually covered in general physics** (including electricity and magnetism, electro-magnetic radiation, heat and energy and work) should be provided for in the degree program. Depending on the focus of the concentration, additional study or learning in physics, biology or other science areas may be important. History and philosophy of science can provide a useful broader perspective.
- **The computer** has become an essential tool for work in almost all areas of chemistry. At least basic proficiency in the use of a computer, as well as some understanding of its range of applications in chemistry (data collection, analysis and presentation, modeling, simulation and problem solving, information storage and retrieval) is important.
- **Progression and depth in the discipline** can be demonstrated by evidence of learning or additional studies across the discipline

at the more advanced level, or by focused learning on selected areas or topics (e.g., physical organic chemistry, polymer chemistry, chemical thermodynamics, coordination chemistry, biochemistry, environmental chemistry, theoretical and quantum chemistry, etc.). Advanced laboratory experience should be included, and might be focused on one or more areas, such as physical chemistry measurement or synthetic methods including purification, separation and characterization methods, or analytical methods.

- **Familiarity with some of the major journals and primary literature of the discipline** should be provided for in the concentration. A final integrative study or research project provides an excellent opportunity to develop or demonstrate skill in the use of this literature.

Computer Science Concentration - For Students Matriculated On Or After Jan. 2009

Computer science focuses on aspects of the computer field that have a well-defined set of abstract concepts and principles. The objective of a concentration in computer science is to demonstrate strong comprehension of those abstract concepts and principles — the theory of the field — and to implement, demonstrate and test this theory via computer. As a result, a concentration in computer science would be a good choice for someone interested mostly in algorithms, systems programming, or computer hardware design.

Computer science, as a disciplinary concentration, probably would not be the best choice for someone primarily interested in specific, real-world problem solving in the business world. For such individuals, concentrations in information systems, information technology, or computer studies generally would be more appropriate.

These recommendations for formulating concentrations in computer science are based on "Computing Curricula 2001: Computer Science" by the Joint Task Force on Computing Curricula: IEEE Computer Society and Association for Computing Machinery [1]. These are general guidelines; students must consider these guidelines from the perspective of their individual goals. For example, students considering graduate school should do further research into the expectations for preparation for graduate work.

Mathematics

Mathematics forms the foundation for much of computer science. [2] Students are expected to develop facility with mathematical language and symbols.

Because of the central and prerequisite position of discrete mathematical ideas within the field of computer science, study of discrete math is required. If a student does not have prior learning in discrete mathematics, that student should consider appropriate mathematical preparation in an early contract (though not necessarily the first). In the study of discrete math, the student should acquire a working knowledge of:

- functions, relations and sets
- basic logic
- proof techniques
- basics of counting
- graphs and trees
- discrete probability

Additional studies commonly include linear algebra, calculus, or finite mathematics, although there are other possibilities. [3]

Programming

Students are expected to develop their understanding of programming beyond the skill level (that is, beyond the particular commands and syntax of a specific language) and develop an understanding of the general principles and characteristics of programming and programming languages. This includes:

- algorithms and problem solving with an emphasis on fundamental data structures
- recursion
- object-oriented programming
- event-driven programming

At least some portion of a study should be devoted to object-oriented programming.

Note About Coding

Computer programming is one step in the software-development process; it is the implementation of the solutions to problems. Within a computer-science degree, it is not an end unto itself. The implementation of a problem solution or an algorithm in a particular language is coding, and while coding is a valuable skill, the conceptual understanding of the principles involved in developing solutions and algorithms, implementing them via standard reproducible methods and explaining them clearly are as, or more, important than coding. Therefore, it would not be expected that students would have a large number of programming languages as the focus of their degree plan.

Algorithms And Complexity

Computer science studies are expected to include the study of algorithms and complexity including:

- basic algorithmic analysis
- algorithmic strategies
- fundamental computing algorithms
- distributed algorithms
- basic computability

Architecture, Organization, Operating Systems And Net-Centric Computing

Students are expected to demonstrate knowledge of:

- computer architecture and organization
- operating systems
- net-centric computing

Software Engineering

Students should develop an understanding of software engineering that links theory with practice. Such study might include:

- software design
- using APIs (application programming interfaces)
- software tools and environment
- software processes
- software requirements and specifications
- software validation and reliability (quality)
- software evolution

Note: Systems analysis and design is different from software engineering and it is possible that students might develop a program that would include the former along with additional components to achieve the desired linking of theory and practice.

Social And Professional Issues

The science, mathematics and technology area of study guidelines specify that, "a student's degree studies should provide an awareness of the wider context in which science and technology operate."

In the case of computer science, it is expected that such study would be focused on social and professional issues, which might include such topics as:

- social context of computing
- professional and ethical responsibility
- methods and tools of analysis of issues, risks and liabilities of computer-based systems
- intellectual property
- privacy
- civil liberties and history of computing
- other appropriate topics to be determined

Additional Studies

Computer science concentrations might be strengthened by the inclusion of one or more of the following topics:

- human-computer interaction
- graphics and visual computing
- intelligent systems
- information management (including databases)
- computational science and numerical methods

While the above material constitutes general guidelines, students must consider these guidelines from the perspective of their individual goals. In particular, students going on to graduate school will need to review the expectations for mathematics and content such as theory of computation.

Students who will be seeking employment based on their computer science degree must review the current professional expectations for their intended career path. It should be noted that some knowledge not emphasized here, such as knowledge of information management and databases, is a common expectation. Similarly, some industries and professions have very specific expectations for specific programming languages.

Students should explicitly discuss in their rationale essay how each of the above foundation topics are incorporated and demonstrated in their degree program and how the program is designed to meet their goals. It is not necessary that the specific terms used above appear in individual study titles.

Endnote 1: www.acm.org (https://www.acm.org/), accessed 7/20/06

Endnote 2: Students pursuing concentrations in computer science are assumed to have facility and confidence with algebra. Algebraic symbols are the language of all higher mathematics and the assumption is that students understand the meaning of algebraic expressions and can carry through algebraic computations with confidence. Students who do not have skill and confidence with algebra must address this issue very early in their program, before they undertake any study related to computing.

Endnote 3: The study of calculus has been the traditional method by which students have developed mathematical skills. Because of this tradition, there are usually several examples and some algorithms in advanced-level study which draw on ideas of calculus. So, studying calculus is still useful. But calculus is about continuous variables, while computers work with discrete variables. For that reason, topics such as linear algebra or finite math are usually more directly relevant to computing.

Environmental Science Concentration - For Students Matriculated On Or After July 1, 2013

Environmental Science is a broad interdisciplinary study within Science, Mathematics and Technology, which draws upon the knowledge of biology, chemistry and physics to help learners explore and understand complex, dynamic processes operating within natural environmental systems. Within the concentration of Environmental Science, students may focus on specific themes such as agroecology, alternative energy, climate change, ecology, soil science, sustainability and water resources.

The interdisciplinary nature of the Environmental Science concentration offers many occupational possibilities. Possible career opportunities for students with concentrations in Environmental Science may include, but are not limited to environmental consulting, education, environmental law, research, positions with the Department of Environmental Conservation (DEC), resource management, restoration and conservation, watershed management and sustainable agriculture. This concentration also will prepare students for graduate school programs with focuses in the Environmental Sciences.

Students interested in focusing on human interactions with environmental systems, e.g., environmental policy, economics, education and communications, should consider a concentration in Environmental Studies rather than Environmental Science. This concentration can be developed within the Interdisciplinary Studies area of study.

Concentrations in Environmental Science include a range of approaches and titles; however, they share a common core of knowledge and an approach to progression within the individual specialization.

Foundation In Biological And Physical Sciences

Because Environmental Science is an interdisciplinary field, students designing such concentrations should have a broad knowledge of the scientific disciplines that form the main foundation for work in the field. Introductory knowledge of biology, chemistry and physics will provide students with the solid foundation they need to develop a concentration in Environmental Science and to succeed in the advanced-level course work they will need to include in their degree plan. Foundational knowledge and experiences must include coverage of the core methodologies and theories of the discipline, as well as participation in experiential learning provided in laboratory and/or field activities.

- **Biology:** Students should develop an understanding of biological concepts and sub-disciplines, which typically are covered in college-level introductory biology studies. Knowledge areas should include cellular and molecular biology, microbial, plant and animal biology, as well as introductions to population and community ecology.
- **Chemistry:** Students should develop an understanding of the basic principles of chemistry and acquire the ability to perform relevant calculations, which are typically covered in introductory chemistry studies. Essential areas of knowledge include chemical bonding, molecular structure, periodic properties, thermochemistry and gases

along with kinetics, equilibrium, ionic and redox equations, acid-base theory, electrochemistry, thermodynamics and gases.
- **Physics:** Students should develop an understanding of the concepts related to the major topic areas typically covered in introductory physics studies. Essential areas of knowledge include mechanics, electromagnetism, waves and optics, thermodynamics and atomic and nuclear physics.

Environmental Science Core

Students are expected to develop a degree plan that encompasses the breadth of the field of environmental science and reflects progression within their area of interest. Students will build upon their foundational knowledge and experiences in the biological and physical sciences, moving to intermediate-level study in the natural environmental sciences, which provides breadth within the concentration and prepares students for in-depth advanced level study. At the advanced level, students may choose to select a particular path, one which best suits their academic interests and goals.

- **Biological Environmental Science:** Students should understand the dynamics of natural environmental systems, focusing on how species interact with each other and their physical environment. Essential knowledge areas include species, populations, communities and ecosystems. Examples of study titles that are commonly used to meet this expectation include Environmental Science and Ecology.
- **Physical Environmental Science:** Students should understand the dynamics of natural environmental systems, focusing on the processes shaping the physical environment. It is expected that this understanding would include both small-scale processes, such as the rock cycle, and large-scale processes, such as tectonics. Essential knowledge areas include rock formation, soil formation, nutrient cycling, water cycling, atmosphere dynamics and geologic history. Examples of study titles that are commonly used to meet this expectation include Geology and Earth Science.
- **In-Depth Knowledge and Skills:** Within their concentration, students must include advanced-level environmental science studies and experiences which provide them with the opportunity to acquire and develop:
  - Problem-solving and research skills, including definition, information gathering, analysis, research design, evaluation and testing, as well as knowledge of appropriate experimental and applications methodologies.
  - An increasingly critical and sophisticated understanding of the theoretical and conceptual models of the field.
  - An understanding of the field as an ever-evolving area of scientific knowledge and the skills required to maintain currency in environmental science.
  - A practical and a conceptual understanding of the scientific method.

Each student brings his or her own goals and background to the study of environmental science. In order to address their goals, it is common for students to focus their advanced-level study on a thematic area. For example, students interested in ecology within environmental science might include the study of ecology, conservation and biodiversity. Students interested in soil science within environmental science might include the study of soil science, agroecology, watershed management and environmental change. Students interested in meteorology and climate within environmental science might include the study of meteorology, global climate and natural disasters. Students are not limited to these examples, nor are they required to have a thematic

area within their concentration. A thematic area is only one way to acquire the knowledge, skills and competencies expected of students in Environmental Science.

Essential Skills And Larger Context

Students should complement their science foundation with their development of skills that enhance their ability to critically analyze and interpret environmental processes and phenomena and provide them with a greater awareness of the nature of the interactions between human activities and the surrounding environment.

- **Quantitative Reasoning:** Essential to the study of environmental processes and ecosystem dynamics is the ability to quantitatively analyze data collected during laboratory and field observations and experimentation. At a minimum, students should include a statistics study or equivalent in their degree plan. Students should consider additional quantitative studies such as calculus or advanced quantitative methods as appropriate to their educational and career goals.
- **Technology:** Proficiency in the use of tools employed by environmental scientists is vital. Students should demonstrate a familiarity with current technology centered on spatial analysis including geographic positioning systems (GPS) and geographic information systems (GIS). Due to the increasing role technology is playing in the analysis and distribution of scientific data, students should demonstrate a proficiency in the technology appropriate to their focus within Environmental Science. Students also should demonstrate the ability to use technology to acquire data in field and laboratory research projects. They also should be able to use technology to analyze and interpret data with a goal of strengthening their understanding of a particular research question and identifying future areas of research. Students might demonstrate this learning through a variety of studies and/or experiences.
- **Wider Social Context:** All science is conducted within a wider social context. Thus, students should include in their concentrations studies and experiences that develop their understanding of the relationships among society, the natural world and the work of scientists. The knowledge areas and experiences that students select to complement the science components of their concentration will vary, but they should be appropriate to their future academic and career goals. Exploration of Environmental Science within the wider context might be performed within a variety of fields, such as policy, law, ethics, education, economics, literature, or communication.
- **Practicum:** Students developing concentrations in Environmental Science must include a learning experience that will provide them with practical experience in the field. Examples of ways this practical experience could be acquired include an internship, a study designed in consultation with a mentor and the assessment of prior learning experiences. Practical study provides students with the opportunity to engage in current and innovative technological methods used for experiments and the collection of data. Topic areas for practical experience include environmental research and monitoring, conservation and restoration, environmental education and environmental policy design and implementation. For example, a student interested in agricultural sustainability may intern at a local community organic farm. Students can work with their mentor to identify appropriate practical experiences.

Capstone Experience

Students designing concentrations in Environmental Science should include a capstone study or final integrating experience in their degree plan. Within the capstone experience, students practice and reinforce the skills learned and the knowledge gained during the foundational components of their program. As a capstone experience, students might work with a mentor to design their own research projects, or they might decide to participate in a formalized research project offered through a local college or organization. The practical experience guideline may be met through the fulfillment of the capstone.

Rationale

Students should explicitly discuss in their rationale essay how each of the above topics is incorporated in their degree program, how the program is designed to meet their goals and how the program meets the currency criteria discussed above. It is not necessary that the specific terms used above appear in individual study titles.

Effective July 1, 2013

Information Systems Concentration - For Students Matriculated On Or After Sept. 1, 2015

Statements About Information Systems

Information systems (IS) specialists focus on integrating information technology solutions and business processes to meet the information needs of businesses and other enterprises, enabling them to achieve their objectives in an effective, efficient way. This discipline's perspective on information technology emphasizes information and views technology as an instrument for generating, processing and distributing information. Professionals in the discipline are primarily concerned with the information that computer systems can provide an enterprise to aid in defining and achieving its goals and the processes that an enterprise can implement or improve using information technology. Students of IS must understand both technical and organizational factors and they must be able to help an organization determine how information and technology-enabled business processes can provide a competitive advantage.

> "The information systems specialist plays a key role in determining the requirements for an organization's information systems and is active in their specification, design, and implementation. As a result, such professionals require a sound understanding of organizational principles and practices so that they can serve as an effective bridge between the technical and management communities within an organization, enabling them to work in harmony to ensure that the organization has the information and the systems it needs to support its operations. Information systems professionals are also involved in designing technology-based organizational communication and collaboration systems."' (Computing Curricula 2005, p. 14).

Our guiding authority for this document is Computing Curricula 2005 and the IS 2010 Body of Knowledge. This joint effort by the Association for Computing Machinery (ACM), the Association for Information Systems (AIS) and The Computer Society (IEEE-CS) includes current curricular recommendations from the leading professional organizations in the computing fields. Students should read Computing Curricula 2005 to understand how computing disciplines are related. It is important for students to think carefully about their primary interest. Information systems, as a disciplinary concentration, probably would not be the best choice for someone primarily interested in computing infrastructure needs of the organization; for such individuals, a concentration in information technology would be more appropriate. On the other hand, students interested primarily in the abstract, theoretical concepts of

computing would be better served by a concentration in computer science.

There are, of course, many ways to approach information systems. Many professionals and educators have tried to identify different approaches by adding adjectives, which has led to terms such as "management information systems" (MIS) and "computer information systems" (CIS). The general understanding was that MIS would be more focused on the management aspects, while CIS focused on the technical aspects. However, as the area has developed, the differentiation between the managerial and the technical has certainly blurred. These guidelines have, therefore, adopted the more general title of "Information Systems," but they apply to both of those titles as well. Similarly, titles such as "Information Systems Management" also cover the same content.

At Empire State University, the variation among degrees in information systems occurs with the identification of the area of study. Each student must design a degree program that meets the general guidelines for an area of study. The information systems curricular guidelines represent a common core of knowledge, which any information systems degree will contain within those general guidelines. Students who are interested in information systems within the business and managerial perspective might find it appropriate to place their concentration within the Business Management and Economics area of study, while students who are interested in the technological perspective might find it appropriate to place their concentration within the Science, Mathematics and Technology area of study (or, if they are seeking the narrower BPS, this would be done as a concentration within the Technology registered program). All students should make sure that the degree they are interested in is appropriate for their future career and education goals.

Foundation

Communication: All students should already have (or develop) skill and confidence with communication, particularly communicating in writing. Technical communication, that is the specialty of communicating technical information, is of particular value to individuals in this field.

Quantitative reasoning: Students must develop their quantitative reasoning and mathematical skills. At the most basic level, students should have facility with statistics to support in-depth analysis of data. Typically, in order to be prepared for a course in statistics, students should have facility with algebra.

The choice of mathematical subject matter for development of quantitative reasoning will depend on the student's background and interest. It should be recognized that, as a part of these studies and any other work in mathematics, students should develop skill and confidence with the interpretation of material containing quantitative information and mathematical symbols, and they should have (or develop) an ability to express ideas using mathematical symbols and language. That is, it is important to be able to articulate an understanding of mathematics, not just be able to do calculations.

SMT students must develop their quantitative reasoning and mathematical skill in areas such as discrete mathematics. Discrete mathematics supports algorithmic thinking and such study would cover logic, the concept of complexity, introduction to methods of proof and graph theory. Typically, students need facility in the knowledge gained from pre-calculus to have a strong experience in discrete mathematics.

BME students would benefit from a study in advanced quantitative methods for management, which includes topics such as decision making under uncertainty and linear programming and applications of regression analysis in management.

Information Technology

Foundational learning in IT: **SMT students** should already have (or develop) an understanding of programming, not just coding. This involves using problem solving with logic. BME students should have an understanding of the fundamentals of computing in organizations and the use of information systems in organizations.

Databases: Students should also demonstrate an understanding of data modeling, database programming and basic database administration concepts at the enterprise-scale.

IT infrastructure: Students should be familiar with the technical foundations of information systems. This typically includes knowledge in operating systems and networks. Students are expected to be able to explain the capabilities and limitations of different networking devices. Students have a clear understanding of different types of networks and network protocols, layers, standards and topologies. Students are able to explain the benefits of small office/home office (SOHO) networks and the technology requirements essential to install, configure and maintain them. Students should be prepared to keep up with new developments in the networking field. For BME students, their understanding of IT infrastructure should include the technologies of e-commerce.

Security: Students are able to describe different types of security risks and threats against networks and information assets and have basic knowledge in designing secure systems and detecting and mitigating threats to the systems.

Professional Behavior And Responsibilities

Professional, legal and ethical responsibilities: Students must understand their ethical, social and professional responsibilities as information systems professionals. This would typically include analysis of professional roles and responsibilities, exploration of major categories of issues, and identification of ethical issues and value conflicts, analysis and evaluation of claims using ethical frameworks. For SMT students, this also should include analysis of the context for the technological system, including recognizing the organizational and legal context and identifying the stakeholders.

Organizational understanding and professional behavior: Students should develop an understanding of how individuals and groups function or behave in organizations. It is expected that students will develop, either through direct study or as a part of other activities, their skills in leadership, collaboration and negotiation.

Theory, Development, And Management Of Systems

Systems analysis and design: Students must include systems analysis and design as central to understanding information systems. This knowledge should encompass an understanding of the systems lifecycle along with issues in requirements definition and system implementation. This knowledge should be at the advanced level. The student should know the system analysis and design lifecycle from analyzing the business case through requirements modeling and system architecture to system operations and support and the major activities in each phase, as well as understand how the process helps address the larger organizational needs.

Project management: Students must also have skills in and knowledge of project management methodologies and skill in applying the techniques of project management. This would include the project lifecycle from planning to closing, and the key knowledge areas such as scope, cost and

time management to ensure that organizational resources are planned and deployed effectively and that evaluation and quality are maintained in the system development process.

Information Systems in the Broader Context: Students are expected to apply the concepts of IT strategy to evaluate the organization's use of IT in the context of its overall strategy, analyze the relationships between business and IT and apply these concepts to real-world situation.

Individual Context

Each student brings his or her own goals and background to the study of IS. It is these goals for future study or work which will provide the context for the student's degree. Students should address their choice in the rationale.

Students in SMT should develop an appreciation for the type(s) of organization in which they work, or intend to work, as well as the interpersonal and communication skills needed to be successful in that environment. For example, a student who intends to work in government (federal, state, local) should understand bureaucracies, politics and regulations, while a student who works in a scientific research environment should understand how scientists view data, design studies, etc., and a student who works in a health care setting should include informatics as well as policy issues.

Students in BME are expected to understand the business context within which they will be working. As such, they need a background of at least two of the functional areas, such as accounting, finance, marketing, human resources and operations management. Since this expectation is very dependent on the student's individual goals, it is vital that students, in consultation with their mentor, identify their learning needs and explain their reasoning in their rationale.

Currency

Information systems and the environment in which they exist are always changing. Degree programs must demonstrate currency in the field and show understanding of emerging and evolving technology and environment relevant to their individual context.

Currency can be viewed in two ways: on the one hand, currency refers to current technologies; on the other hand, currency can be seen as not-obsolete. If students want to use earlier learning in their programs, they should consider several issues related to how old, how specialized and how extensive the earlier learning is. Courses which encompassed analysis, problem definition, algorithms, data structures, programming concepts and testing methodology may provide a useful foundation to explore recent developments in computer technology. Courses which are product-specific (hardware or software) may be less useful. When earlier learning is judged to provide a useful foundation within the program, students should be sure to incorporate opportunities to bridge to newer platforms or applications within their degree program.

Rationale

Students should explicitly discuss in their rationale essay how each of the above topics is incorporated in their degree program, how the program is designed to meet their goals and how the program meets the currency criteria discussed above. It is not necessary that the specific terms used above appear in individual study titles.

Additional Studies

Students who wish to enhance their knowledge and skills might consider incorporating additional areas into their studies including human-computer interaction, which would include concepts and approaches, such as user differences, user experience and collaboration, human factors, ergonomics, accessibility issues and standards, user and task analysis and the ability to implement user-centered design and evaluation methods.

Information Technology Concentration - For Students Matriculated On Or After July 1, 2011

About Information Technology

IT programs exist to produce graduates who possess the right combination of knowledge and practical, hands-on expertise to take care of both an organization's information technology infrastructure and the people who use it. IT specialists assume responsibility for selecting hardware and software products appropriate for an organization, integrating those products with organizational needs and infrastructure, and installing, customizing, and maintaining those applications for the organization's computer users. Examples of these responsibilities include the installation of networks; network administration and security; the design of web pages; the development of multimedia resources; the installation of communication components; the oversight of email systems; and the planning and management of the technology lifecycle by which an organization's technology is maintained, upgraded, and replaced (Computing Curricula 2005, p. 14-15).

An information technology concentration will include organizational and social context, along with technical content and theory. This is a field in which there are external expectations; our guiding authorities for this document are Information Technology 2008 and Computing Curricula 2005. These joint efforts by The Association for Computing Machinery (ACM), The Association for Information Systems (AIS), and The IEEE Computer Society (IEEE-CS) include the latest updates of curricular recommendations from the leading professional organizations in the computing fields.

Students should read Computing Curricula 2005 to understand how the various computing disciplines are related. Information technology, as a concentration, probably would not be the optimal choice for someone primarily interested in information and the use of information technology as an instrument for generating, processing and distributing information. For such individuals, a concentration in information systems would be more appropriate. On the other hand, students who are interested primarily in the abstract, theoretical concepts of computing would be better served by a concentration in computer science.

General Foundation

To be successful in the workplace, students must understand the role(s) of IT in organizations as well as develop good communication and interpersonal skills. In addition, quantitative skills are foundational for study in IT.

Communication Skills

All students already should have (or develop) skill and confidence with communication, particularly communicating in writing. Technical communication, that is the specialty of communicating technical information, is of particular value to individuals in this field.

Quantitative Reasoning And Analytic Skills

All students already should have (or develop) skill and confidence with the interpretation of material containing quantitative information and mathematical symbols, and they should have (or develop) an ability to express ideas using mathematical symbols

and language. That is, it is important to be able to articulate one's understanding of mathematics, not just be able to do calculations. The choice of mathematical subject matter for development of quantitative reasoning will depend on the student's background and interest. Facility with algebra (or technical math) is a necessary foundation. In addition, students should have an understanding of basic statistical concepts and discrete mathematics. Through these studies and others, all students already should have (or develop) skill and confidence with an analytic approach to problem solving.

Programming

All students already should have (or develop) an understanding of programming, not just coding. This involves using problem solving with logic.

Breadth In Information Technology

Students should show, through their degree program and their rationale, that they have both foundational knowledge and knowledge beyond the foundation in this area. Typically, at least some content in the information technology area will be at the advanced level.

Networking

Students should demonstrate an understanding of networking (data communications and computer network models).

Platform Technologies

Students should demonstrate an understanding of platform technologies (operating systems and computer architecture).

Database

Students should have a familiarity with database systems and database administration concepts.

Organizational And Social Context
Professional, Legal, And Ethical Context

Students must understand their social and professional responsibilities as computer professionals as well as the role(s) of IT in the organization. This might include a combination of social context of computing, professional and ethical responsibility, methods and tools of analysis of issues, risks and liabilities of computer-based systems, information security, intellectual property, privacy and civil liberties and history of computing.

Theory, Development And Management Of Systems

Students must include theory, development, and the management of systems in their degree plans. This includes analysis and design, human computer interaction, information assurance, web systems and project management.

Analysis And Design

Students should recognize analysis and design as central to understanding information technology. This knowledge must encompass an understanding of the system development lifecycle with particular emphasis on issues in requirements definition and system implementation. For a student focusing on information technology, the emphasis should be on analysis of technical requirements; it is not necessary to place much emphasis on software design. This knowledge should be at the advanced level. The student should know the system analysis and design lifecycle from analyzing the business case through requirements modeling and system architecture to system operations and support and the major activities in each phase, as well as understand how the process helps address the larger organizational needs.

Human Computer Interaction

Students must have a competence in user-centered methodologies and an understanding of how these fit within organizational contexts such as they would develop in a study of human computer interaction. Topics generally include human factors, ergonomics, accessibility issues and standards and user and task analysis.

Information Assurance

Students must have an understanding of information assurance; a well-rounded knowledge of security and policy issues is vital in this field. Such knowledge includes information security governance, organizational needs, security risks and options for addressing these risks. Security risks include the physical, infrastructure and human threats. A focused study in network security and cryptology is insufficient.

Project Management

Students must have skills in and knowledge of project management methodologies and skill in applying the techniques of project management. This would include the project lifecycle from planning to closing, and the key knowledge areas such as scope, cost and time management to insure that organizational resources are planned and deployed effectively.

Web Systems

Students are expected to have competence with design, implementation and testing of web technologies and related applications. Topics generally would include information architecture, user-centered web development, web technologies, rich media, standards and standards bodies and vulnerabilities.

Currency

Information technologies and the environment in which they exist are always changing. Degree programs must demonstrate currency in the field and show understanding of emerging and evolving technologies and environment relevant to their individual context.

Currency can be viewed in two ways: on the one hand, currency refers to current technologies; on the other hand, currency can be seen as not-obsolete. If students want to use earlier learning in their programs they should consider several issues. These relate to how old, how specialized and how extensive the earlier learning is.

- Courses that encompassed analysis, problem definition, data structures, programming concepts, computer organization, networking models and testing methodology can provide a useful foundation to explore recent developments in computer technology.
- Courses that are product-specific (hardware or software) might be less useful.

When earlier learning is judged to provide a useful foundation within the program, students should be sure to incorporate opportunities to bridge to newer platforms or applications within their degree programs.

Rationale

Students should explicitly discuss in their rationale essay how each of the above topics is incorporated in their degree program, how the program is designed to meet their goals and how the program meets the currency criteria discussed above. It is not necessary that the specific terms used above appear in individual study titles.

Mathematics Concentration - For Students Matriculated On Or After July 2012

About Mathematics

Mathematics is a continually-evolving field characterized by quantitative, deductive and analytical reasoning. Some mathematicians see mathematics as the hidden language of the universe and appreciate mathematics for its logical system of thought and the beauty of the unexpected connections discovered among different ideas. Many mathematical journeys have been followed because they are interesting, and only later was it recognized that these journeys could be used to explain parts of physical reality. However, other mathematicians take a more practical approach, focusing on mathematics as a tool for solving complex problems through modeling.

College-level mathematics builds upon the kinds of elementary mathematical objects, concepts, and structures with which we are all familiar, such as number systems and arithmetic operations. However, college-level mathematics primarily involves manipulating, applying and generally reasoning about more complex/sophisticated abstract mathematical structures, objects and ideas.

Mathematical fields are distinguished from nonmathematical fields that use mathematics extensively, yet in which the reasoning is primarily conducted in the language of the other field. For example, in accounting, the reasoning is primarily in terms of business concepts, rather than the concepts of mathematics.

Concentrations in mathematics include a range of approaches and titles. Students seeking to think and invent in the language of mathematics as an endeavor for its own sake would most likely be working toward a concentration simply titled "mathematics." Students interested in using mathematical reasoning in order to solve practical problems might consider building a concentration in "applied mathematics." The applied mathematics concentration may focus on business-oriented applications of mathematical reasoning, the study of science and engineering-related problems that arise in research and industry, or one of many other topics determined by the student's academic interests. Beyond these, there are other, typically interdisciplinary, specializations that have a strong emphasis on using mathematical reasoning as a tool, but which are not generally considered to be subfields of mathematics itself. Examples of these vary widely, and include such fields as actuarial science, quantitative psychology and theoretical physics.

Note: Empire State University cannot facilitate teacher certification directly, but can provide the mathematical content needed to prepare a student to enter a master's program leading to teacher certification. Students who are seeking to teach must consult certification requirements in the state/region in which they intend to obtain certification, and should review the Mathematical Association of America's CUPM Curriculum Guide 2004; for K-8, see the discussion on pages 38-42, and for secondary school, see the discussion beginning on page 52 and the recommendations on pages 54-56.

Note: You will need Adobe Acrobat Reader to read the CUPM Curriculum Guide. If Acrobat Reader is not installed on your computer, you can download it for free from Adobe.

Concentrations

General Foundation For All Concentrations

Concentrations in mathematics and applied mathematics should include both theoretical and applied studies, rather than focus exclusively on only one perspective in the field. Likewise, concentrations in mathematics and applied mathematics should include studies in both the continuous and the discrete, although a weighted preference may be given to one branch or the other. Similarly, concentrations in mathematics and applied mathematics should include studies in both the stochastic and deterministic, as well as in both the algebraic and the geometric.

There is a common core of foundational knowledge areas that concentrations in mathematics and applied mathematics are expected to include.

- **Calculus:** Calculus, often described as the study of continuous motion or change, forms the computational basis for classical (Newtonian) physics, and is an essential foundation for further studies in all areas of mathematics that concern continuous variables. The study of calculus is built upon the notion of a limit, which is a precise mathematical construction used to describe closeness among "infinitesimal" quantities. Calculus topics are typically studied in a sequence of either three or four terms, depending on curricular design. To address the calculus expectation, students are expected to learn differential calculus, integral calculus, multivariate calculus and vector analysis.
- **Linear Algebra:** Linear algebra is the detailed study of linear systems of equations and their properties, and forms an essential foundation to further studies in mathematics. The concepts introduced in linear algebra appear in virtually every area of advanced-level undergraduate mathematics, including the continuous and the discrete, the theoretical and the applied. Linear algebra is also known by such titles as "matrix algebra," "matrix theory" and "finite dimensional vector spaces."
- **Proofs:** Logic and the construction of proofs are essential for success in any advanced-level undergraduate study in mathematics. These core skills are best developed in a study dedicated to formal logic and the construction of proofs that can serve as a transition to advanced-level studies.
- **Tools:** Proficiency in the use of tools employed by mathematical professionals is vital. Students are expected to employ such tools in problem solving, analysis and the communication and understanding of mathematical ideas; students should be exposed to these tools throughout their concentration studies. Tools might include, but are not limited to, computer algebra systems (such as Maple, Mathematica, or MATLAB), statistical packages and an algorithmic programming language. Students should select those tools that are relevant to their academic interests.

Core For Concentration In Mathematics

In addition to the foundational knowledge described above in the General Foundation section, concentrations in mathematics should include advanced-level, proof-based studies in the core areas described below. At least one study in each of these areas is essential. A second term of study in each of these areas is recommended, and is critical for students interested in attending graduate school in mathematics.

- **Analysis:** Students in mathematics are expected to learn the theoretical underpinnings of calculus. To address this expectation, students are expected to develop the ability to understand and to create proofs about the theory of calculus, to revisit familiar concepts in the context of mathematical proof, and to analyze mathematical details and their theoretical implications. Studies that usually contain the content that would meet this expectation include real analysis, applied analysis, advanced calculus, real variables and theory of calculus.
- **Abstract Algebra:** Students in mathematics are expected to learn the theory of algebraic structures in which the sets and operations

in question do not exclusively consist of the familiar numbers and arithmetic operations. To address this expectation, students are expected to develop the ability to understand and create proofs about the abstract algebraic structures known as groups, rings and fields. Studies that would usually contain content that would meet this expectation include abstract algebra, modern algebra, introduction to group theory and Galois theory.

Students are expected to build on the core in a variety of ways, depending upon their academic interests and goals. Indeed, beyond the traditional areas mentioned above, interested students also may build on the core mathematics knowledge areas to create an individualized (possibly interdisciplinary) degree program that explores connections of mathematics to other areas of their interest, such as art, music, history or philosophy.

Core for Concentration In Applied Mathematics

In addition to the foundational knowledge described in the General Foundation section, concentrations in applied mathematics should include the following.

- **Modeling:** Students in applied mathematics are expected to learn how to formulate and analyze mathematical models. To address this expectation, students will develop the ability to investigate not only simple models, but also to analyze more complicated models. The analysis of complex models typically requires the use of technology tools.
- **Statistics:** Students in applied mathematics are expected to develop proficiency with the use of statistics and probability on data sets. This includes the identification of appropriate tools, the application of these tools and the analysis of the results. The theoretical underpinnings of probability and statistics are usually explored within this study of statistics. Studies that usually contain the content that would meet this expectation include: mathematical statistics, probability and statistics and theory of statistics.
- **Numerical Methods:** Students in applied mathematics are expected to learn classical mathematical approaches to solving real-world, large-scale problems for which it is not possible to obtain closed-form solutions using elementary functions.
- **Applied Analysis:** Students in applied mathematics are expected to learn the theoretical underpinnings of some of the mathematical methods that are commonly applied to the analysis of problems posed in the sciences. Students will develop the ability to understand and to create proofs about these methods, and to analyze mathematical details and their theoretical implications. Studies that usually contain the content that would meet this expectation include real analysis, applied analysis, advanced calculus, real variables, complex variables, partial differential equations and special functions.

Concentrations In Other Areas

A student might be interested in specializations related to the mathematical sciences, which include, but are not limited to, statistics, actuarial science and mathematical programming. Students interested in any of these specializations should investigate traditional curricula that are aligned with their area of interest. For each specialization, a variety of studies outside of mathematics will be important. Since many of these specializations are highly interdisciplinary in nature, the interested student might consider building such a degree program in the interdisciplinary studies area of study.

Rationale

Students should discuss explicitly in their rationale essay how each of the above topics is incorporated in their degree program and how the program is designed to meet their goals.

Physics Concentration - For Students Matriculated On Or After Feb. 1, 1993

Physics is the study of matter and energy. Mathematical abstraction characterizes its methodology. Physics is both empirical, based upon controlled observation, and theoretical, in the effort to relate the results of such observations together using abstract conceptual frameworks.

Physics, in fact, requires a dynamic relationship between theory and experiment, between abstract principles and observations of physical behavior. Physics is an active and ongoing attempt to improve both the theories of physics and their match with observation.

Purely theoretical work invents theory, draws testable predictions from existing principles, compares existing theories and works out the meaning of newly acquired data for existing theory Experimental work involves designing, creating and carrying out the experiments, advancing the art of making measurements at the limits of accuracy and generating the data for testing the theories of physics.

The major areas of study in physics are:

- mechanics (force and motion)
- heat
- electricity and magnetism
- optics (light) and waves
- quantum physics

A physics concentration requires:

- at the outset, strong working knowledge of algebra, trigonometry and calculus (differential and integral)
- as early as is feasible, an introductory study of physics which utilizes calculus and which covers most or all of the major areas listed above
- intermediate or advanced-level study in all of the same five major areas, as well as laboratory work covering as many of the areas as possible
- study of calculus through differential equations is essential
- additional work in mathematics such as linear algebra, partial differential equations and complex variables

Additional study in other areas of physics is also recommended, for example, acoustics and mechanical waves, computational physics, relativity, advanced experimental techniques, atomic physics, solid state physics, nuclear physics, elementary particles, lasers and quantum optics and fluid dynamics. A final, integrative contract is desirable, possibly including some kind of direct participation in ongoing research.

Students should be proficient in use of the computer for enlarging and improving understanding of physics. Possible applications of the computer to physics include collecting and analyzing data, complex calculations, exploring the nature of analytical solutions to problems, simulations and attacking classes of problems that were not solvable in the past.

Technology Concentration - For Students Matriculated On Or After Feb. 1, 1993

The technological professions require:

- an understanding of scientific and mathematical principles
- a detailed knowledge of relevant practices and procedures whereby those principles are applied operationally

The technologist is typically a practical person who is interested in the application of theoretical principles and in the organization of people for the achievement of practical ends.

Studies in technology include study of basic sciences with emphasis on application. Depending upon the specific technology and the scientific base of that technology, concentrations in technological fields should include:

- mathematics, for technologies based on physical or engineering sciences; mathematical study should go at least through introductory calculus
- physical or biological sciences
- knowledge of computers and computer applications
- hands-on exposure to processes, methods and procedures
- economics and management principles, if appropriate

Security Studies: B.S.

The Bachelor of Science (B.S.) in Security Studies is a 120 credit program (beginning in Fall 2024) that is designed to give students the interdisciplinary knowledge, tools, and strategies to understand the complex nature of security and security challenges in the twenty-first century. This program addresses complexity head on by providing coursework in homeland security, research methods and analysis, information security, and a rigorous examination of the social, economic and cultural contexts of security in the United States and internationally. Students who are currently working in public administration, emergency services, law enforcement, and homeland security positions as well as those interested in these career paths will be well served by the B.S. program in Security Studies.

Students completing a bachelor's degree in Security Studies will have accomplished the following learning objectives:

- Students will be able to analyze security concerns from various disciplinary perspectives.
- Students will be able to explain the history and strategic approaches to national and global security.
- Students will be able to analyze the interrelationship between human and natural environments in the contexts of individual and national security.
- Students will be able to employ social science research methods and techniques related to the study of security in various forms.
- Students will be able to evaluate moral and ethical implications of policies intended to address security from social, political, economic, and environmental perspectives.
- Students will be able to evaluate strategies and resources employed to maintain security of information in digital environments.

The Bachelor of Science (B.S.) in Security Studies includes a set of required courses that all students must take, along with SUNY General Education and other academic requirements (p. 185), in order to be eligible to receive a degree. The required courses for programs in Security Studies can be found on the "Program Details" tab. Students will work with a faculty mentor to develop a degree plan that matches their goals and meets all program requirements. Students should speak with their mentor to see if any credit earned through individualized Prior Learning Assessment (iPLA) (https://www.sunyempire.edu/degree-planning-academic-review/prior-learning-assessment/individualized-prior-learning-assessment/) or Professional Learning Evaluation (PLE) (p. 168) might fulfill these course requirements. Courses are offered online, through independent studies, or through a blended approach.

For additional information about this program, please visit the B.S. in Security Studies web page (https://www.sunyempire.edu/degrees-programs/bs-security-studies/).

Admission

For requirements and procedures for applying to the program, please see the information for admission (https://www.sunyempire.edu/admissions/associate-bachelors/) to the university.

Contact

If you would like more information about the Security Studies program, please contact:

Cathryn Thurston, Ph.D.

cathryn.thurston@sunyempire.edu

Program Details

Students pursuing a B.S. program in Security Studies must complete the following courses:

The following courses are required:

Code	Title	Credits
PAFF 1005	Introduction to Security Studies	4
PAFF 2005	Introduction to Homeland Security	4
PAFF 3003	Security Implications of Global Climate Change	4
or EMGT 3030	Leadership & Management in Disaster Response	
PAFF 4000	International Dimensions of Security	4
or PAFF 4005	Counterterrorism in a Changing World	
SOSC 3025	Social Science Research Methods	4
PAFF 4132	Legal & Ethical Foundations of Public Service	4
or SOCI 4035	Privacy Security & Freedom: Social Concerns for the 21st Century	
INFT 2020	Introduction to Digital Crime & Digital Terrorism	4
INFT 3020	Cyber Crime & Computer Forensics	4

Students must also take a minimum of three of the following elective courses:

Code	Title	Credits
CRJS 3020	Law Enforcement Intelligence Analysis	4
SOCI 3045	Disaster & Society	4
SOCI 3065	Perspectives on Terrorism	4
POLI 3065	International Politics & Relations	4
PAFF 4000	International Dimensions of Security [1]	4
or PAFF 4005	Counterterrorism in a Changing World	
PAFF 4132	Legal & Ethical Foundations of Public Service [1]	4
or SOCI 4035	Privacy Security & Freedom: Social Concerns for the 21st Century	
PAFF 3003	Security Implications of Global Climate Change [1]	4
or EMGT 3030	Leadership & Management in Disaster Response	

[1] One or the other, if not taken as required.

* Note that some prior learning may substitute for some required courses. Faculty review and approval is required before a substitution can be made.
** Students must also satisfy all other college academic requirements, which include the SUNY General Education requirements and working with a faculty mentor to meet additional program requirements.

The curriculum is designed to provide students with foundational courses on which to build pathways of courses specific to their interests and needs. The program design is flexible enough to provide students the opportunity to bring in college level learning obtained through work experience through our prior learning assessment process. Courses in the program are offered online, through independent studies, or through a blended approach. Students may blend different modalities and will work with a faculty mentor to develop a degree plan that matches with their goals.

Learning Outcomes

- Students will be able to analyze security concerns from various disciplinary perspectives.
- Students will be able to explain the history and strategic approaches to national and global security.
- Students will be able to analyze the interrelationship between human and natural environments in the contexts of individual and national security.
- Students will be able to employ social science research methods and techniques related to the study of security in various forms.
- Students will be able to evaluate moral and ethical implications of policies intended to address security from social, political, economic, and environmental perspectives.
- Students will be able to evaluate strategies and resources employed to maintain security of information in digital environments.

Social Science: A.A., A.S.

Students of Social Science will explore the interaction and history of social, political and economic structures, and how they affect human beings in complex society.

Students explore theories, methods and problems addressed by anthropologists, political scientists and sociologists in their examination of critical concerns for modern society, both to understand them in a historical context and to consider policies to address those issues. Students also will develop valuable research, analytical and communications skills as, together with a faculty mentor, create a program to meet your specific needs and goals.

Degree programs in Social Science offer students the opportunity to develop individualized degree plans based on their intellectual, professional, and personal interests. General program guidelines can be found on the "Program Details" tab, and students will work with an academic mentor to choose courses that meet the guidelines and address each student's individual interests. Students can also work with their academic mentors to identify applicable transfer credit, prior college-level learning, and possible course equivalencies. Working with a mentor and using SUNY Empire's educational planning process, students can develop a specialized concentration in Social Science by following the general program guidelines as well as any applicable concentration guidelines. Students may also develop their own concentrations.

For more information about general undergraduate degree requirements, please visit Earning an Undergraduate Degree (p. 185).

For sample degree programs and other degree planning resources, please visit the Department of Social Science and Public Affairs Degree Planning Resources web page. (https://www.esc.edu/social-science-public-affairs/degree-planning-resources/)

Program Details

The Social Science area of study includes a variety of academic disciplines and approaches. Social science traditions explore a range of social, political and economic issues. Students who develop programs in Social Science examine theories, methods, problems and solutions in their chosen concentrations. Students who develop degrees in Social Science develop the capacity to think critically about the social world and act as informed citizens and community members.

Associate degree programs are required to meet three foundations:

1. Broad Social Perspective
2. Historical and Comparative Perspectives
3. Perspectives on Power and Privileges

These foundations may be met through transcript credit; college-level knowledge demonstrated through individual prior learning assessment (iPLA), professional learning evaluations (PLE), or credit by examination; or individual courses, a series of courses, or components within individual courses with Empire State University. The student's Degree Program Rationale Essay should clearly explain how the degree plan meets each of the foundations in the concentration, what will be learned, and how the student will build on these foundations to meet personal, academic, or career goals.

Foundation #1: Broad Social Science Perspective
Courses that meet this guideline include (but are not limited to):

Code	Title	Credits
ANTH 1010	Introduction to Cultural Anthropology	4
SOCI 1005	Exploring Society: An Introduction to Sociology	4
SOCI 2010	Introduction to Race Class & Gender	4
SOCI 3100	Sociology of Law	4
POLI 1005	Introduction to Political Science	4
POLI 2010	The U.S. Political System	4

Foundation #2: Historical and Comparative Perspectives
Courses that meet this guideline include (but are not limited to):

Code	Title	Credits
ANTH 3015	Environmental Anthropology	4
ANTH 3020	Families in Global Perspective	4
ANTH 3025	Health & Illness in Global Perspective	4
ANTH 3035	Latin American & Caribbean Societies	4
CRJS 2005	Introduction to Criminology: Theorizing Crime	4
GSST 1005	Introduction to Women's Gender & Sexuality Studies	4
POLI 3005	America's Founding Ideas	4
POLI 3020	Comparative Politics	4
POLI 3105	The American Presidency	4
POLI 3115	The United States Constitution	4
SOSC 2005	Schooling in America	4
SOCI 2020	Social Problems in US Society	4
SOCI 3020	Memory & Society	4
SOCI 3025	Contemporary Global Social Issues	4
SOCI 3055	Family & Society	4
SOCI 4035	Privacy Security & Freedom: Social Concerns for the 21st Century	4

Foundation #3: Perspectives on Power and Privilege
Courses that meet this guideline include (but are not limited to):

Code	Title	Credits
ANTH 3122	Sex & Gender in Global Perspective	4
CRJS 4030	Women Crime & Criminology	4
GSST 2005	Introduction to LGBTQ+ Studies	4
GSST 3008	LGBTQ+ Youth & Education	4
GSST 3152	Queering American Culture	4
POLI 2013	Race in United States Politics	4
POLI 4015	Race Law & Politics	4
SOCI 3010	Aging & Society	4
SOCI 4030	Power & Privilege	4

Learning Outcomes

- Foundation 1: Broad Social Science Perspective, Students will be able to define Social Science vocabulary, questions and topics.
- Foundation 1: Broad Social Science Perspective, Students will be able to examine relationships among different elements of social life (e.g., institutions, systems of belief, cultural patterns, or political and economic structures of society).
- Foundation 2: Historical and Comparative Perspectives, Students will be able to describe how key elements of social life vary across time, place and culture.

- Foundation 3: Perspectives on Power and Privilege, Students will be able to examine the dynamics of power and privilege in relation to race, class, gender, age, sexuality, etc.

CONCENTRATION GUIDELINES

Specific guidelines have been developed for concentrations in the following areas:

- Cultural Anthropology (p. 133)
- Sociology (p. 133)

If you are interested in an area not listed here, please contact your mentor about designing your own concentration.

CULTURAL ANTHROPOLOGY

Cultural anthropology is a discipline that is devoted to the study of how people organize and create cultural systems, and in turn are shaped by those beliefs, ideas, and physical environments. Students who develop programs in Social Science with a concentration in Cultural Anthropology are often curious about how and why people live the way they do, and they are interested in learning more about people in different parts of the world.

Associate degree programs in Social Science with a concentration in Cultural Anthropology must meet the three foundations listed below. It is suggested that one course not be used to fulfill more than one foundation. Students will explain how they meet each relevant learning outcome in their rationale essay. Knowledge of each outcome can be demonstrated through transcript credit; individual prior learning assessment (iPLA), prior learning evaluation (PLE), or credit by examination; or specific courses at Empire State University.

FOUNDATION #1: BROAD SOCIAL SCIENCE PERSPECTIVE

- Learning Outcome: Students will be able to define Social Science vocabulary, questions and topics.
- Learning Outcome: Students will be able to examine relationships among different elements of social life (e.g., institutions, systems of belief, cultural patterns, or political and economic structures of society).

Code	Title	Credits
Required Course		
ANTH 1010	Introduction to Cultural Anthropology	4

FOUNDATION #2: HISTORICAL AND COMPARATIVE PERSPECTIVES

- Learning Outcome: Students will be able to describe how key elements of social life vary across time, place and culture.

Choose two courses that focus on geographic areas such as:

Code	Title	Credits
Choose two courses that focus on geographic areas		
ANTH 3035	Latin American & Caribbean Societies	4
HIST 1055	East Asia	4
HIST 2010	Mexico: History & Culture	4
HIST 2015	Native American Histories & Cultures: Introduction	4
HIST 3010	African History & Culture	4
HIST 3140	Caribbean: Cruises Carnival & Colonization	4
HIST 3330	Latin America in the Contemporary World	4
HIST 3340	Middle East	4

FOUNDATION #3: PERSPECTIVES ON POWER AND PRIVILEGE

- Learning Outcome: Students will be able to examine the dynamics of power and privilege in relation to race, class, gender, age, sexuality, etc.

Code	Title	Credits
Choose at least one of the following courses		
ANTH 3030	Immigration Today: Gender & Family	4
ANTH 3122	Sex & Gender in Global Perspective	4
SOCI 2010	Introduction to Race Class & Gender	4
SOCI 4030	Power & Privilege	4
Any GSST course		4

SOCIOLOGY CONCENTRATION

Sociology is the study of social life and social change, as well as the social structures and institutions that shape our lives. Sociologists use different empirical methods to analyze social problems. Students who develop degrees in social science with a concentration in sociology are curious about how societies function and change, why social injustice and inequalities occur, and explore the forces that unite and divide us.

Associate degree programs in Social Science with a concentration in Sociology must meet the three foundations listed below. Students will explain how they meet each relevant learning outcome in their rationale essay. Knowledge of each outcome can be demonstrated through transcript credit; individualized prior learning assessment (iPLA), professional learning evaluation (PLE); credit by examination; or specific courses at Empire State University.

FOUNDATION #1: BROAD SOCIAL SCIENCE PERSPECTIVE

- Learning Outcome: Students will be able to define Social Science vocabulary, questions, and topics.
- Learning Outcome: Students will be able to examine relationships among different elements of social life (e.g., institutions, systems of belief, cultural patterns, or political and economic structures of society).

Code	Title	Credits
Required Course		
SOCI 1005	Exploring Society: An Introduction to Sociology	4

FOUNDATION #2: HISTORICAL AND COMPARATIVE PERSPECTIVES

- Learning Outcome: Students will be able to describe how key elements of social life vary across time, place, and culture.

Code	Title	Credits
Choose at least 2 courses		
ANTH 1010	Introduction to Cultural Anthropology	4
CRJS 2005	Introduction to Criminology: Theorizing Crime	4
CRJS 4010	Comparative Criminal Justice Systems	4
GSST 2005	Introduction to LGBTQ+ Studies	4
GSST/EDST 3008	LGBTQ+ Youth & Education	4
SOCI 2020	Social Problems in US Society	4
SOCI 3020	Memory & Society	4
SOCI 3025	Contemporary Global Social Issues	4
SOCI 3045	Disaster & Society	4
SOCI 3055	Family & Society	4
SOCI 3065	Perspectives on Terrorism	4
SOCI 3095	Sociology of Education	4

Code	Title	Credits
SOCI 4035	Privacy Security & Freedom: Social Concerns for the 21st Century	4
SOSC 2005	Schooling in America	4

FOUNDATION #3: PERSPECTIVES ON POWER AND PRIVILEGE
- Learning Outcome: Students will be able to examine the dynamics of power and privilege in relation to race, class, gender, age, sexuality, etc.

Code	Title	Credits
Choose one course		
SOCI 2010	Introduction to Race Class & Gender	4
or SOCI 4030	Power & Privilege	
Additional optional courses		
GSST 2005/ EDST 3008	Introduction to LGBTQ+ Studies	4
GSST 3008	LGBTQ+ Youth & Education	4
POLI 2013	Race in United States Politics	4
POLI 4015	Race Law & Politics	4
SOCI 3010	Aging & Society	4

Social Science: B.A., B.S.

Students of Social Science will explore the interaction and history of social, political and economic structures, and how they affect human beings in complex society.

Students explore theories, methods and problems addressed by anthropologists, political scientists and sociologists in their examination of critical concerns for modern society, both to understand them in a historical context and to consider policies to address those issues. Students also will develop valuable research, analytical and communications skills as, together with a faculty mentor, create a program to meet specific needs and goals.

Degree programs in Social Science offer students the opportunity to develop individualized degree plans based on their intellectual, professional, and personal interests. General program guidelines can be found on the "Program Details" tab, and students will work with an academic mentor to choose courses that meet the guidelines and address each student's individual interests. Students can also work with their academic mentors to identify applicable transfer credit, prior college-level learning, and possible course equivalencies. Working with a mentor and using SUNY Empire's educational planning process, students can develop a specialized concentration in Social Science by following the general program guidelines as well as any applicable concentration guidelines. Students may also develop their own concentrations.

For more information about general undergraduate degree requirements, please visit Earning an Undergraduate Degree (p. 185).

For sample degree programs and other degree planning resources, please visit the Department of Social Science and Public Affairs Degree Planning Resources web page. (https://www.sunyempire.edu/social-science-public-affairs/degree-planning-resources/)

Program Details

The Social Science area of study includes a variety of academic disciplines and approaches. Social science traditions explore a range of social, political and economic issues. Students who develop programs in Social Science examine theories, methods, problems and solutions in their chosen concentrations. Students who develop degrees in Social Science develop the capacity to think critically about the social world and act as informed citizens and community members.

Bachelor's Degree programs in Social Science must meet the six foundations listed below.

Degrees in Social Science include the following six foundations:

1. Broad Social Perspective
2. Historical and Comparative Perspectives
3. Perspectives on Power and Privilege
4. Theoretical Perspectives
5. Social Science Research Methods
6. Critical Thinking and Analysis

These foundations may be met through transcript credit; college-level knowledge demonstrated through individual prior learning assessment (iPLA), professional learning evaluations (PLE), or credit by examination; or individual courses, a series of courses, or components within individual courses with Empire State University. The student's Degree Program Rationale Essay should clearly explain how the degree plan meets each of the foundations in the concentration, what will be learned, and how the student will build on these foundations to meet personal, academic, or career goals.

Foundation #1: Broad Social Science Perspective
Courses that meet this guideline include (but are not limited to):

Code	Title	Credits
ANTH 1010	Introduction to Cultural Anthropology	4

SOCI 4035	Privacy Security & Freedom: Social Concerns for the 21st Century	4

Foundation #3: Perspectives on Power and Privilege
Courses that meet this guideline include (but are not limited to):

Code	Title	Credits
ANTH 3122	Sex & Gender in Global Perspective	4
CRJS 4030	Women Crime & Criminology	4
GSST 2005	Introduction to LGBTQ+ Studies	4
GSST 3008	LGBTQ+ Youth & Education	4
GSST 3152	Queering American Culture	4
POLI 2013	Race in United States Politics	4
POLI 4015	Race Law & Politics	4
SOCI 3010	Aging & Society	4
SOCI 4030	Power & Privilege	4

Foundation #4: Theoretical Perspectives
Courses that meet this guideline include (but are not limited to):

Code	Title	Credits
POLI 3080	Modern Political Theory	4
SOCI 3125	The Sociological Imagination	4
SOSC 3015	Great Conversations in Social Thought	4

Foundation #5: Social Science Research Methods
Courses that meet this guideline include (but are not limited to):

Code	Title	Credits
SOSC 2010	Statistics for the Social Sciences	4
SOSC 3020	Qualitative Social Science Research: Design & Methods	4
SOSC 3025	Social Science Research Methods	4

Foundation #6: Critical Thinking and Analysis
Courses that meet this guideline include (but are not limited to):

Code	Title	Credits
Any 3000 or 4000 level course in ANTH		
Any 3000 or 4000 level course in GSST		
Any 3000 or 4000 level course in LEST		
Any 3000 or 4000 level course in POLI		
Any 3000 or 4000 level course in SOCI		
Any 3000 or 4000 level course in SOSC		

Learning Outcomes
- Foundation 1: Broad Social Science Perspective, Students will be able to define Social Science vocabulary, questions and topics.
- Foundation 1: Broad Social Science Perspective, Students will be able to examine relationships among different elements of social life (e.g., institutions, systems of belief, cultural patterns, or political and economic structures of society).
- Foundation 2: Historical and Comparative Perspectives, Students will be able to describe how key elements of social life vary across time, place and culture.
- Foundation 3: Perspectives on Power and Privilege, Students will be able to examine the dynamics of power and privilege in relation to race, class, gender, age, sexuality, etc.

- Foundation 4: Theoretical Perspectives, Students will be able to define relevant concepts and theories.
- Foundation 4: Theoretical Perspectives, Students will be able to analyze the strengths, limitations and significance of relevant concepts and theories.
- Foundation 5: Social Science Research Methods, Students will be able to define tools and methods used in Social Science research.
- Foundation 5: Social Science Research Methods, Students will be able to analyze strengths and limitations of Social Science research methodologies.
- Foundation 5: Social Science Research Methods, Students will be able to analyze ethical issues embedded in Social Science research.
- Foundation 6: Critical Thinking and Analysis, Students will be able to evaluate key concepts, assumptions, theories and research from a social science perspective.

Concentration guidelines
Specific guidelines have been developed for concentrations in the following areas:

If you are interested in an area not listed here, please contact your mentor about designing your own concentration.

Cultural Anthropology
Cultural anthropology is a discipline that is devoted to the study of how people organize and create cultural systems, and in turn are shaped by those beliefs, ideas, and physical environments. Students who develop programs in Social Science with a concentration in Cultural Anthropology are often curious about how and why people live the way they do, and they are interested in learning more about people in different parts of the world.

Bachelor's degree programs in Social Science with a concentration in Cultural Anthropology must meet the six foundations listed below. It is suggested that one course not be used to fulfill more than one Foundation (with the exception of foundation #6). Students will explain how they meet each relevant learning outcome in their rationale essay. Knowledge of each outcome can be demonstrated through transcript credit; individual prior learning assessment (iPLA), prior learning evaluation (PLE), or credit by examination; or specific courses at Empire State University.

Foundation #1: Broad Social Science Perspective
- Learning Outcome: Students will be able to define Social Science vocabulary, questions and topics.
- Learning Outcome: Students will be able to examine relationships among different elements of social life (e.g., institutions, systems of belief, cultural patterns, or political and economic structures of society).

Code	Title	Credits
Required Course		
ANTH 1010	Introduction to Cultural Anthropology	4

Foundation #2: Historical and Comparative Perspectives
- Learning Outcome: Students will be able to describe how key elements of social life vary across time, place and culture.

Choose two courses that focus on geographic areas such as:

Code	Title	Credits
Choose two courses that focus on geographic areas		
ANTH 3035	Latin American & Caribbean Societies	4
HIST 1055	East Asia	4
HIST 2010	Mexico: History & Culture	4
HIST 2015	Native American Histories & Cultures: Introduction	4
HIST 3010	African History & Culture	4
HIST 3140	Caribbean: Cruises Carnival & Colonization	4
HIST 3330	Latin America in the Contemporary World	4
HIST 3340	Middle East	4

Foundation #3: Perspectives on Power and Privilege
- Learning Outcome: Students will be able to examine the dynamics of power and privilege in relation to race, class, gender, age, sexuality, etc.

Code	Title	Credits
Choose at least one of the following courses		
ANTH 3030	Immigration Today: Gender & Family	4
ANTH 3122	Sex & Gender in Global Perspective	4
SOCI 2010	Introduction to Race Class & Gender	4
SOCI 4030	Power & Privilege	4
Any GSST course		4

Foundation #4: Theoretical Perspectives
In relation to their chosen topics, questions or problems:

- Learning Outcome: Students will be able to define relevant concepts and theories.
- Learning Outcome: Students will be able to analyze the strengths, limitations and significance of relevant concepts and theories.

Code	Title	Credits
Required Course		
SOSC 3015	Great Conversations in Social Thought	4
Two additional courses that address topics in anthropological theory such as		
ANTH 3015	Environmental Anthropology	4
ANTH 3020	Families in Global Perspective	4
ANTH 3025	Health & Illness in Global Perspective	4
ANTH 3030	Immigration Today: Gender & Family	4
ANTH 3045	Travel & Tourism: Critical Perspectives	4
ANTH 3122	Sex & Gender in Global Perspective	4

Foundation #5: Social Science Research Methods
In relation to their chosen topics, questions or problems:

- Learning Outcome: Students will be able to define tools and methods used in social-science research.
- Learning Outcome: Students will be able to analyze strengths and limitations of social-science research methodologies.
- Learning Outcome: Students will be able to analyze ethical issues embedded in social-science research.

Code	Title	Credits
Required Course		
SOSC 3020	Qualitative Social Science Research: Design & Methods	4
Additional elective courses		
SOSC 3025	Social Science Research Methods	4
SOSC 2010	Statistics for the Social Sciences	4

Foundation #6: Critical Thinking and Analysis
In relation to their chosen topics, questions or problems:

- Learning Outcome: Students will be able to evaluate key concepts, assumptions, theories and research from a Social Science perspective.

Code	Title	Credits
Any 3000 or 4000 level course in ANTH		

Sociology Concentration
Sociology is the study of social life and social change, as well as the social structures and institutions that shape our lives. Sociologists use different empirical methods to analyze social problems. Students who develop degrees in social science with a concentration in sociology are curious about how societies function and change, why social injustice and inequalities occur, and explore the forces that unite and divide us.

Bachelor's degree programs in Social Science with a concentration in Sociology must meet the six foundations listed below. Students will explain how they meet each relevant learning outcome in their rationale essay. Knowledge of each outcome can be demonstrated through transcript credit; individualized prior learning assessment (iPLA), professional learning evaluation (PLE); credit by examination; or specific courses at Empire State University.

Foundation #1: Broad Social Science Perspective
- Learning Outcome: Students will be able to define Social Science vocabulary, questions, and topics.
- Learning Outcome: Students will be able to examine relationships among different elements of social life (e.g., institutions, systems of belief, cultural patterns, or political and economic structures of society).

Code	Title	Credits
Required Course		
SOCI 1005	Exploring Society: An Introduction to Sociology	4

Foundation #2: Historical and Comparative Perspectives
- Learning Outcome: Students will be able to describe how key elements of social life vary across time, place, and culture.

Code	Title	Credits
Choose at least 2 courses with at least one at the 3000/4000 level		
ANTH 1010	Introduction to Cultural Anthropology	4
CRJS 4010	Comparative Criminal Justice Systems	4
GSST 1005	Introduction to Women's Gender & Sexuality Studies	4
SOCI 2020	Social Problems in US Society	4
SOCI 3020	Memory & Society	4
SOCI 3025	Contemporary Global Social Issues	4
SOCI 3045	Disaster & Society	4

Code	Title	Credits
SOCI 3055	Family & Society	4
SOCI 3065	Perspectives on Terrorism	4
SOCI 3095	Sociology of Education	4
SOCI 4035	Privacy Security & Freedom: Social Concerns for the 21st Century	4
SOSC 2005	Schooling in America	4
CRJS 2005	Introduction to Criminology: Theorizing Crime	4

Foundation #3: Perspectives on Power and Privilege

- Learning Outcome: Students will be able to examine the dynamics of power and privilege in relation to race, class, gender, age, sexuality, etc.

Code	Title	Credits
Choose one course		
SOCI 2010	Introduction to Race Class & Gender	4
or SOCI 4030	Power & Privilege	
Additional optional courses		
GSST 2005	Introduction to LGBTQ+ Studies	4
GSST/EDST 3008	LGBTQ+ Youth & Education	4
POLI 2013	Race in United States Politics	4
POLI 4015	Race Law & Politics	4
SOCI 3010	Aging & Society	4

Foundation #4: Theoretical Perspectives

- Learning Outcome: Students will be able to define relevant concepts and theories.
- Learning Outcome: Students will be able to analyze the strengths, limitations and significance of relevant concepts and theories.

Code	Title	Credits
Choose one course		
SOSC 3015	Great Conversations in Social Thought	4
or SOCI 3125	The Sociological Imagination	

Foundation #5: Social Science Research Methods

- Learning Outcome: Students will be able to define tools and methods used in social-science research.
- Learning Outcome: Students will be able to analyze strengths and limitations of Social Science research methodologies.
- Learning Outcome: Students will be able to analyze ethical issues embedded in Social Science research.

Code	Title	Credits
Required Course		
SOSC 2010	Statistics for the Social Sciences	4
Choose one additional required course		
SOSC 3020	Qualitative Social Science Research: Design & Methods	4
or SOSC 3025	Social Science Research Methods	

Foundation #6: Critical Thinking and Analysis

- Learning Outcome: Students will be able to evaluate key concepts, assumptions, theories, and research from a Social Science perspective.

Code	Title	Credits
Any 3000/4000 level course in ANTH		
Any 3000/4000 level course in CRJS		
Any 3000/4000 level course in LEST		
Any 3000/4000 level course in PAFF		
Any 3000/4000 level course in POLI		
Any 3000/4000 level course in SOCI		
Any 3000/4000 level course in SOSC		

See sample degree programs at Department of Social Science and Public Affairs website under Degree Planning Resources (https://www.sunyempire.edu/social-science-public-affairs/degree-planning-resources/).

Technology: B.P.S.

The technologist is typically a practical person who is interested in the application of theoretical principles for the achievement of practical ends. The B.P.S. in technology would be appropriate for students whose focus is on the applied technologies.

The technology professions require:

- an understanding of scientific and mathematical principles
- detailed knowledge of relevant practices and procedures whereby those principles are applied operationally

Degree programs in Technology offer students the opportunity to develop individualized degree plans based on their intellectual, professional, and personal interests. General program guidelines can be found on the "Program Details" tab, and students will work with an academic mentor to choose courses that meet the guidelines and address each student's individual interests. Students can also work with their academic mentors to identify applicable transfer credit, prior college-level learning, and possible course equivalencies. Working with a mentor and using SUNY Empire's educational planning process, students can develop their program in Technology by following the general program guidelines.

For more information about general undergraduate degree requirements, please visit Earning an Undergraduate Degree (p. 185).

For more information about Computer Science and Technology, please visit the Department of Computer Science and Technology web site (https://www.sunyempire.edu/computer-science-tech/).

A Note on the B.P.S.

Students should be aware that the B.P.S. is a terminal degree and may not allow movement to the next higher degree without additional course work. It is recommended that students look at the B.S. and B.A. options under the Science, Mathematics and Technology area of study as part of their research into their degree options.

Program Details

Studies in technology include the theoretical foundations of the field and an emphasis on application. Depending upon the specific technology and the scientific base of that technology, degrees in technological fields should include:

- hands-on experience with processes, methods and procedures
- working knowledge of needed techniques including data acquisition and interpretation
- familiarity with established computer applications to the particular field of interest
- facility with mathematics appropriate to the field
- knowledge of relevant scientific concepts appropriate to the field
- technical communication skills appropriate to the field
- ethical reasoning and reflection on issues such as social and professional responsibilities and environmental sustainability, both locally and globally.

Currency

Degree programs must demonstrate currency in the field and show understanding of emerging and evolving technologies and environment relevant to their individual context.

The Arts: A.A., A.S.

An Associates degree in The Arts develops and deepens the understanding of particular artistic interest and enhances the ability to express concepts and ideas. Students can focus on fine or graphic arts, performing arts, creative writing, media arts, art history or arts management while they explore historical and cultural context, theoretical and philosophical issues, and current developments and perspectives related to art. Courses will help refine research skills, artistic technique and ability to form and communicate ideas, images and critical judgments.

Degree programs in the Arts offer students the opportunity to develop individualized degree plans based on their intellectual, professional, and personal interests. General program guidelines can be found on the "Program Details" tab, and students will work with an academic mentor to choose courses that meet the guidelines and address each student's individual interests. Students can also work with their academic mentors to identify applicable transfer credit, prior college-level learning, and possible course equivalencies. Working with a mentor and using SUNY Empire's educational planning process, students can develop a specialized concentration in the Arts by following the general program guidelines as well as any applicable concentration guidelines. Students may also develop their own concentrations.

For more information about general undergraduate degree requirements, please visit Earning an Undergraduate Degree (p. 185).

For sample degree programs and other degree planning resources, please visit the Department of Arts and Media Degree Planning Resources web page (https://www.esc.edu/arts-media/degree-planning-resources/).

For more information about degrees in the Arts, please visit the Arts and Media web page (https://www.esc.edu/arts-media/).

Program Details

The Arts area of study encompasses a wide range of possible studies and concentrations in the arts including, but not limited to, the visual arts, the performing arts, digital arts and digital media, photography, music, creative writing, film, and museum studies. Students are encouraged to consider including learning about more than one artistic discipline and the cultures/histories of those disciplines in their degree plans.

Knowledge of each outcome can be demonstrated through transcript credit, individual prior learning assessment (iPLA), prior learning evaluation (PLE), or credit by examination, or specific courses at SUNY Empire State University.

Students should explain in their rationale essay how each foundation below is met in their individual degree plan by explaining how the learning in the course, iPLA, PLE, etc. connects to the foundation. Note that to meet a foundation, the learning must be centered on the arts.

Associate degree programs in the Arts must address at least four of the following seven foundations.

Foundation # 1: Historical Perspectives
Courses which meet this foundation include, but are not limited to:

Code	Title	Credits
ARTP 3010	History of Physical Theater	4
ARTP 3030	Performance History: The Twentieth Century	4
ARTS 1025	Body Art: Tattooing: Introduction	4

ARTS 1055	Impressionism: The Birth of Modern Art	4
ARTS 1100	Early Art of the Netherlands: Introductory	4
ARTS 2020	Art History I: Prehistory to Renaissance	4
ARTS 2025	Art History II: Baroque to Modern	4
ARTS 2041	African American Art	4
ARTS 2050	Introduction to the History of Western Architecture	4
ARTS 3010	20th Century Art History I	4
ARTS 3012	20th Century Art History II	4
ARTS 3050	American Architectural History	4
ARTS 3055	American Art History	4
ARTS 3080	Arts of Native North America	4
ARTS 3090	Baroque Art & Architecture	4
ARTS 3095	Body Art: Tattooing: Advanced	4
ARTS 3105	Graffiti: Art or Vandalism?	4
ARTS 3115	Cuba at the Crossroads: Art Culture and Identity	4
ARTS 3145	Issues in Contemporary Art	4
ARTS 3150	Italian Renaissance Art & Architecture	4
ARTS 3160	Masters of the Renaissance: Advanced	4
ARTS 3175	Medieval Art & Architecture	4
ARTS 3190	Nineteenth Century Art	4
ARTS 3215	The Odd Couple of Art History – Van Gogh & Gauguin	4
ARTS 3225	The Renaissance & Reformation	4
ARTS 4010	Art History: Methods and Theories	4
ARTS 4035	Images of Women in Western Art	4
ARTS 4040	Indigenous Knowledge in Art	4
ARTS 4055	Native North American History & Art	4
DANC 1005	Western Dance History	4
DANC 3010	DEL Foundations	6
DIGA 4015	History & Theory of New Media	4
FILM 3045	The Films of Alfred Hitchcock	4
FILM 3050	The Golden Age: Hollywood Movies of the 1930s & 40s	4
FILM 3052	The American Cinema	4
FILM 4015	Dark Dreams: Studying the Horror Film	4
HIST 1020	American Art: The New World to the Modern World	4
HIST 1122	Art Music & History I	4
HIST 3135	Art Music & History I: Advanced	4
HIST 4010	Rock and Roll History	4
MUSC 1005	Exploring the World of Music	4
MUSC 3010	American Music, American Life	4
PHOT 1005	Black Photographers 1840- Present: Intro	4
PHOT 1010	Documentary Photography: Introductory	4
PHOT 1015	History of Photography: Introductory	4
PHOT 3015	History of Photography: Advanced	4
PHOT 4010	Photography as Cultural History	4
THEA 1010	U.S. Theatre History: Introductory	4
THEA 3015	U.S. Theatre History: Advanced	4
THEA 3020	Greek Drama	4
THEA 3025	History of American Musical Theatre	4

Foundation # 2: Artistic Practice

Courses which meet this foundation include, but are not limited to:

Code	Title	Credits
ARTP 1007	Acting Songs: Introductory	4
ARTP 1015	Performing Literature: Introductory	4
ARTP 1122	Playwriting Lab: Introductory	4
ARTP 1127	Writing the Solo Play: Introductory	4
ARTP 1132	Writing the Solo Musical: Introductory	4
ARTP 1137	Playwriting: Introductory	4
ARTP 3005	Creating Solo Performance	4
ARTP 3012	Acting Songs: Advanced	4
ARTP 3015	Performing Literature: Advanced	4
ARTP 3122	Playwriting Lab Advanced	4
ARTP 4005	Performance Art & Installation	4
ARTP 4122	Writing the Solo Play: Advanced	4
ARTP 4127	Playwriting: Advanced	4
ARTP 4132	Writing the Solo Musical: Advanced	4
ARTS 1000	Arts & the Environment: Introductory	4
ARTS 1030	Collage	4
ARTS 1040	Figure Drawing	4
ARTS 1065	Introduction to Drawing	4
ARTS 1075	Introduction to Painting	4
ARTS 1080	Introduction to Studio Art	4
ARTS 1125	Watercolor Painting	4
ARTS 1127	Drawing Into Painting	4
ARTS 2040	Eco Arts	4
ARTS 2055	Sculpture: Introductory	4
ARTS 3000	Advanced Nature Drawing	4
ARTS 3020	A Sense of Place: Drawing from Nature: Advanced	4
ARTS 3025	Advanced Drawing	4
ARTS 3030	Advanced Drawing: Comics	4
ARTS 3040	Advanced Painting	4
ARTS 3105	Graffiti: Art or Vandalism?	4
ARTS 3135	Illustration	4
ARTS 3135	Illustration	4
ARTS 3180	Mixed Media	4
ARTS 3210	The Illustrated Man-Sci-Fi Metaphors & Ray Bradbury: Advanced	4
ARTS 3245	Advanced Digital Photography	4
ARTS 3260	Advanced Watercolor Painting	4
ARTS 4122	Independent Arts Project	4
CRWR 1000	Introduction to Creative Writing	4
CRWR 1005	Crafting Personal Narratives in Creative Nonfiction: Intro	4
CRWR 1015	Creative Nonfiction: Introductory	4

MUSC 3010	American Music, American Life	4
MUSC 3045	World Music Across Cultures: Advanced	4

| MUSE 3015 | Museum Studies | 4 |
| SPAN 3025 | Contemporary Spanish American Theater | 4 |

Foundation # 5: Research Skills

Any course with the subject codes of ARTP, ARTS, CRWR, DANC, DIGA, FILM, MUSC, MUSE, PHOT, or THEA that requires research skills will satisfy this foundation. Students must identify in their rationale essay which course or courses they are nominating for this foundation. They must also describe at least one research project from that course(s) (or a research project that they expect to do) that achieves the learning outcome for this foundation. As with the other Arts AOS foundations, students may also demonstrate the knowledge and skills required by this foundation through transcript credit, individual prior learning assessment (iPLA), prior learning evaluation (PLE), or credit by examination.

Foundation # 6: Critical Thinking Skills

Any course with the subject codes of ARTP, ARTS, CRWR, DANC, DIGA, FILM, MUSC, MUSE, PHOT, or THEA that requires critical thinking skills to describe, interpret, and critique artistic works will satisfy this foundation. Students must identify in their rationale essay which course or courses they are nominating for this foundation. They must also describe at least one assignment from that course(s) (or a research project that they expect to do) that achieves the learning outcomes for this foundation. As with the other Arts AOS foundations, students may also demonstrate the knowledge and skills required by this foundation through transcript credit, individual prior learning assessment (iPLA), prior learning evaluation (PLE), or credit by examination.

Foundation # 7: Ethical and Social Responsibility

Courses which meet this foundation include, but are not limited to:

Code	Title	Credits
ARTP 3035	Popular Music & Social Justice: Advanced	4
ARTP 4147	Theatre Community & Social Change: Advanced	4
ARTS 1020	Art & Sustainability	4
ARTS 2035	Diversity in the United States Arts	4
ARTS 2041	African American Art	4
ARTS 3105	Graffiti: Art or Vandalism?	4
ARTS 3145	Issues in Contemporary Art	4
CRWR 1045	Stories We Think We Know (Intro)	4
CRWR 3030	Stories We Think We Know (Adv)	4
DIGA 3036	Ethics of Digital Art & Design	4
FILM 1005	Frozen, Encanto, and Beyond: Analyzing Children's Animated Films (Introductory)	4
FILM 2005	America on Film: Race Class & Gender	4
FILM 3010	Frozen, Encanto, and Beyond: Analyzing Children's Animated Films (Advanced)	4
FILM 3025	Gender & Power in American Film	4
FILM 3040	Race & Representation in Cinema	4
MUSC 3035	Popular Music & Social Justice: Advanced	4
MUSC 3045	World Music Across Cultures: Advanced	4
MUSE 3010	Curatorial Practice	4
MUSE 3015	Museum Studies	4
PHOT 1010	Documentary Photography: Introductory	4
PHOT 1045	Street Photography: Composing the Urban Landscape: Introductory	4

PHOT 3050	Street Photography: Composing the Urban Landscape: Advanced	4
PHOT 4010	Photography as Cultural History	4
THEA 3065	Hamilton: An American Musical	4

Learning Outcomes

- Foundation 1: Historical Perspectives, Students will be able to identify the diverse historical perspectives of at least one form of creative expression.
- Foundation 2: Artistic Practice, Students will be able to analyze, create, produce, and/or perform at least one form of artistic practice.
- Foundation 3: Artistic Theory, Students will be able to describe the interconnectedness between artistic theory and artistic practice in at least one form of creative expression.
- Foundation 4: Diversity, Equity, and Inclusion, Students will be able to discuss and assess a range of social, cultural, or global perspectives in the arts.
- Foundation 5: Research Skills, Students will be able to conduct research using libraries and credible online resources to critically assess and articulate artistic concepts or practices.
- Foundation 6: Critical Thinking Skills, Students will be able to apply critical thinking skills to describe, interpret, and critique artistic works.
- Foundation 7: Ethical and Social Responsibility, Students will be able to analyze, discuss, and apply ethical and social responsibility within the arts.

The Arts: B.A., B.S., B.P.S.

A Bachelor's degree in The Arts develops and deepens the understanding of particular artistic interest and enhances the ability to express concepts and ideas. Students can focus on many different areas within the arts such as the visual arts, performing arts, creative writing, digital media arts, or art history while they explore historical and cultural contexts, theoretical and philosophical issues, and current developments and perspectives related to art. Courses will help refine research skills, artistic technique and ability to form and communicate ideas, images and critical judgments.

Degree programs in the Arts offer students the opportunity to develop individualized degree plans based on their intellectual, professional, and personal interests. General program guidelines can be found on the "Program Details" tab, and students will work with an academic mentor to choose courses that meet the guidelines and address each student's individual interests. Students can also work with their academic mentors to identify applicable transfer credit, prior college-level learning, and possible course equivalencies. Working with a mentor and using SUNY Empire's educational planning process, students can develop a specialized concentration in the Arts by following the general program guidelines as well as any applicable concentration guidelines. Students may also develop their own concentrations.

For more information about general undergraduate degree requirements, please visit Earning an Undergraduate Degree (p. 185).

For sample degree programs and other degree planning resources, please visit the Department of Arts and Media Degree Planning Resources web page (https://www.sunyempire.edu/arts-media/degree-planning-resources/).

For more information about degrees in the Arts, please visit the Arts and Media web page (https://www.sunyempire.edu/arts-media/).

Program Details

The Arts area of study encompasses a wide range of possible studies and concentrations in the arts including, but not limited to, the visual arts, the performing arts, digital arts and digital media, photography, music, creative writing, film, and museum studies. Students are encouraged to consider including learning about more than one artistic discipline and the cultures/histories of those disciplines in their degree plans.

Knowledge of each outcome can be demonstrated through transcript credit, individual prior learning assessment (iPLA), prior learning evaluation (PLE), or credit by examination, or specific courses at SUNY Empire State University.

Students should explain in their rationale essay how each foundation below is met in their individual degree plan by explaining how the learning in the course, iPLA, PLE, etc. connects to the foundation. Note that to meet a foundation, the learning must be centered on the arts.

Bachelor's degree programs in the Arts must address all seven foundations.

FOUNDATION # 1: HISTORICAL PERSPECTIVES
Courses which meet this foundation include, but are not limited to:

Code	Title	Credits
ARTP 3010	History of Physical Theater	4
ARTP 3030	Performance History: The Twentieth Century	4
ARTS 1025	Body Art: Tattooing: Introduction	4
ARTS 1055	Impressionism: The Birth of Modern Art	4
ARTS 1100	Early Art of the Netherlands: Introductory	4
ARTS 2020	Art History I: Prehistory to Renaissance	4
ARTS 2025	Art History II: Baroque to Modern	4
ARTS 2041	African American Art	4
ARTS 2050	Introduction to the History of Western Architecture	4
ARTS 3010	20th Century Art History I	4
ARTS 3012	20th Century Art History II	4
ARTS 3050	American Architectural History	4
ARTS 3055	American Art History	4
ARTS 3080	Arts of Native North America	4
ARTS 3090	Baroque Art & Architecture	4
ARTS 3095	Body Art: Tattooing: Advanced	4
ARTS 3105	Graffiti: Art or Vandalism?	4

FOUNDATION # 5: RESEARCH SKILLS

Any course with the subject codes of ARTP, ARTS, CRWR, DANC, DIGA, FILM, MUSC, MUSE, PHOT, or THEA that requires research skills will satisfy this foundation. Students must identify in their rationale essay which course or courses they are nominating for this foundation. They must also describe at least one research project from that course(s) (or a research project that they expect to do) that achieves the learning outcome for this foundation. As with the other Arts AOS foundations, students may also demonstrate the knowledge and skills required by this foundation through transcript credit, individual prior learning assessment (iPLA), prior learning evaluation (PLE), or credit by examination.

FOUNDATION # 6: CRITICAL THINKING SKILLS

Any course with the subject codes of ARTP, ARTS, CRWR, DANC, DIGA, FILM, MUSC, MUSE, PHOT, or THEA that requires critical thinking skills to describe, interpret, and critique artistic works will satisfy this foundation. Students must identify in their rationale essay which course or courses they are nominating for this foundation. They must also describe at least one assignment from that course(s) (or a research project that they expect to do) that achieves the learning outcomes for this foundation. As with the other Arts AOS foundations, students may also demonstrate the knowledge and skills required by this foundation through transcript credit, individual prior learning assessment (iPLA), prior learning evaluation (PLE), or credit by examination.

FOUNDATION # 7: ETHICAL AND SOCIAL RESPONSIBILITY

Courses which meet this foundation include, but are not limited to:

Code	Title	Credits
ARTP 3035	Popular Music & Social Justice: Advanced	4
ARTP 4147	Theatre Community & Social Change: Advanced	4
ARTS 1020	Art & Sustainability	4
ARTS 2035	Diversity in the United States Arts	4
ARTS 2041	African American Art	4
ARTS 3105	Graffiti: Art or Vandalism?	4
ARTS 3145	Issues in Contemporary Art	4
CRWR 1045	Stories We Think We Know (Intro)	4
CRWR 3030	Stories We Think We Know (Adv)	4
DIGA 3036	Ethics of Digital Art & Design	4
FILM 1005	Frozen, Encanto, and Beyond: Analyzing Children's Animated Films (Introductory)	4
FILM 2005	America on Film: Race Class & Gender	4
FILM 3010	Frozen, Encanto, and Beyond: Analyzing Children's Animated Films (Advanced)	4
FILM 3025	Gender & Power in American Film	4
FILM 3040	Race & Representation in Cinema	4
MUSC 3035	Popular Music & Social Justice: Advanced	4
MUSC 3045	World Music Across Cultures: Advanced	4
MUSE 3010	Curatorial Practice	4
MUSE 3015	Museum Studies	4
PHOT 1010	Documentary Photography: Introductory	4
PHOT 1045	Street Photography: Composing the Urban Landscape: Introductory	4
PHOT 3050	Street Photography: Composing the Urban Landscape: Advanced	4
PHOT 4010	Photography as Cultural History	4
THEA 3065	Hamilton: An American Musical	4

Learning Outcomes

- Foundation 1: Historical Perspectives, Students will be able to identify the diverse historical perspectives of at least one form of creative expression.
- Foundation 2: Artistic Practice, Students will be able to analyze, create, produce, and/or perform at least one form of artistic practice.
- Foundation 3: Artistic Theory, Students will be able to describe the interconnectedness between artistic theory and artistic practice in at least one form of creative expression.
- Foundation 4: Diversity, Equity, and Inclusion, Students will be able to discuss and assess a range of social, cultural, or global perspectives in the arts.
- Foundation 5: Research Skills, Students will be able to conduct research using libraries and credible online resources to critically assess and articulate artistic concepts or practices.
- Foundation 6: Critical Thinking Skills, Students will be able to apply critical thinking skills to describe, interpret, and critique artistic works.
- Foundation 7: Ethical and Social Responsibility, Students will be able to analyze, discuss, and apply ethical and social responsibility within the arts.

Business and Environmental Sustainability: Certificate

As more and more companies focus on environmental stewardship, it's no longer enough to know about traditional business practices. Many positions now require employees to be knowledgeable about environmentally sustainable, cost-saving measures and socially responsible practices. Developing expertise in this area is essential for advancement.

The undergraduate certificate in Business and Environmental Sustainability is designed to provide historical, economical, legal and ethical knowledge needed to make sound, forward-thinking and environmentally conscious business decisions. The Business and Environmental Sustainability Certificate courses are fully applicable to an undergraduate degree program developed in the business, management and economics (https://www.sunyempire.edu/degrees-programs/undergraduate-aos/business-management-economics/) area of study.

Who Should Earn An Undergraduate Certificate in Business and Environmental Sustainability?

The set of careers available for individuals with expertise in Business and Environmental Sustainability is growing rapidly. Most positions in the area referred to as "Environmental, Social and Corporate Governance" (ESG) are looking for individuals with backgrounds in sustainability. Every institutional investor must have an ESG plan. "The (International Financial Reporting Standards Foundation [IFRS Foundation]) Trustees announced the formation of the International Sustainability Standards Board (ISSB) on 3 November 2021 at COP26 in Glasgow. The ISSB will develop—in the public interest—standards that result in a high-quality, comprehensive global baseline of sustainability disclosures focused on the needs of investors and the financial markets." IFRS - ISSB: Frequently Asked Questions

Enroll in the Certificate Program for Business and Environmental Sustainability

Currently enrolled students: Submit the online Degree Add/Change Request Form (https://banner.esc.edu/BannerExtensibility/customPage/page/ESC_DegreeChange/), select "add", select "CUG" for degree, and choose "Business and Environmental Sustainability" for program. If you are not currently enrolled, apply online (https://www.sunyempire.edu/admissions/associate-bachelors/) and select the certificate option.

Certificate students who are concurrently enrolled in a bachelor's degree program are eligible to apply for federal financial aid, while those students who enroll only in the certificate program are not.

Certificate Program Coordinator

Duncan P. RyanMann (duncan.ryanmann@sunyempire.edu), Ph.D., Professor School of Business
sustainabilitycert@sunyempire.edu

Program Details

The courses must be taken sequentially beginning with an introductory course and culminating with the capstone course. The capstone, Managing Sustainable Organizations, provides an opportunity to synthesize and integrate all that you have learned.

Code	Title	Credits
ENSC 2000	Principles of Environmental Sustainability	4
ECON 3020	Ecological Economics	4
BUSN 3010	Business Ethics	4
MGMT 3040	Managing Sustainable Organizations	4
Total Credits		**16**

Learning Outcomes

The certificate serves individuals interested in expanding their expertise so that they may lead environmental sustainability efforts in their organizations. Students who earn the certificate will be equipped to make reasoned and ethical decisions in complex and conflicting situations in which stakeholder values may compete with green initiatives. The certificate provides career related enhancement for students established in their careers or who already have an associate degree and are ready for upper division courses.

Students will demonstrate the following learning outcomes upon completion of this certificate:

- Demonstrate knowledge in the history of the environmental sustainability movement including what the movement is and why it is important.
- Understand and apply the Triple E Models of Sustainability: Economics, Environment, and Equity.
- Acquire ethical knowledge and a framework in theories that assist in equipping ethical, moral, and legal considerations.
- Synthesize management, marketing, ethical, legal, and qualitative knowledge to enable effective decision-making.
- Interpret the difference between stakeholders and shareholders and consider the differences within the student's place of employment.
- Display familiarity with organizations and key players in the sustainability movement such as the UN Millennium goals.
- Articulate a business case for environmental sustainability within the student's place of employment.
- Make recommendations and/or decisions about products and services with the goal of maintaining and/or incorporating sustainability.
- Understand the role business plays in the environment as opposed to the role environment plays in business and the difference between these two functions.

Crisis Prevention and Intervention: Certificate

The **Certificate in Crisis Prevention and Intervention (CCPI)** is a 20-credit program designed to advance undergraduate students in becoming skilled professionals who have the potential to respond to, manage and intervene with people in crisis. The CCPI is non-licensing and structured around courses that address fundamental aspects of how crises, disasters, and emergencies affect individuals, families, and communities, while examining the assessment, referral systems, and resilience-building interventions. The CCPI incorporates a five-course curriculum that focuses on equipping students with fundamental skills through primarily advanced-level undergraduate courses.

The CCPI includes a set of required courses that all students must take, as well as one of two electives that students should select to address their professional or personal goals.Students must take the required courses and complete all other academic requirements in order to be eligible to receive a the certificate.The required courses for programs in the CCPI can be found on the "Program Details" tab.Academic mentors will be available to guide students when selecting electives, and to help students identify opportunities to pursue possible transfer credits, and course equivalencies.

The program is guided by the competencies model from the US Department of Health and Human Service and features a curriculum focused on equipping students with fundamental skills through core courses. Students will have the option of completing the certificate through various delivery modes such as online, independent study, blended, and/or face-to-face study.

While the CCPI is designed for non-degree seeking students working in human services or related fields and/or degree-seeking students currently working towards an associate or bachelor's degree in Human Services or a related field, students from any profession or academic discipline may enroll in the certificate program. The CCPI will be available to both degree-seeking students in other concentrations as well as non-degree seeking students wishing to acquire the CCPI.

Crisis intervention is a specific training and set of skills that is different than traditional mental health, clinical social work, and counseling assessment and treatment services. Crisis intervention is an evidence-based and evidence-informed specialty that enables practitioners to assess individuals and families during crises and disasters, utilizes specific techniques to triage and stabilize individuals and families, and creates crisis assessment and intervention plans.

Within the field of human services, crisis intervention training has broad applicability for both practitioners and administrators. Health and human service personnel often work in hospital, clinic, and community-based settings with an array of client populations. Work environments are dynamic, fast-paced, and highly interactive and include a diverse client population such as homeless, immigrants and refugees, people with disabilities, mental illness, at-risk youth and aging. In addition to human services, there is strong demand for professionals trained in crises across other disciplines including psychology and social work, community service workers, healthcare, law enforcement and first responders, educators, and risk managers at large corporations.

Program Details

The Certificate in Crisis Prevention and Intervention (CCPI) includes the following required courses.

Since this is a certificate, the sequencing is critical. Students need to take Crisis Intervention: Theory and Practice first, and Crisis Intervention: Skills and Models second. Students can then take the elective followed by Secondary Trauma in Human Service Workers and Bereavement Counseling.

Code	Title	Credits
HUSV 2020	Crisis Intervention: Theory & Practice	4
HUSV 3022	Crisis Intervention II: Counseling Skills and Models	4
HUSV 4045	Secondary Trauma in Human Service Workers	4
HUSV 4005	Bereavement Counseling	4
HUSV 3142	Disaster Mental Health Theory & Practice	4
or HUSV 3122	Conflict Management & Resolution in Human Services	
or CHFS 3065	Supporting Active Military Veterans & their Families	
Total Credits		**20**

Learning Outcomes

Upon completion of the certificate program, students will be able to demonstrate an enhanced understanding of:

- Crisis Behavior Theory: The student will be able to analyze crisis related behavior within the context of various social, developmental, global, economic, political, biological, and/or environmental systems.
- Service Delivery Skills in Crisis: The student will be able to acquire skills in crisis assessment, intervention and evaluation with individuals, families, groups and/or communities.
- Diversity Values: The student will be able to integrate an understanding, respect for and commitment to autonomy, confidentiality, self-determination and the basic rights of individuals and groups from diverse backgrounds in crisis intervention.

Entrepreneurship: Certificate

The need for education for entrepreneurs and small business owners cannot be understated. A vast majority of the small businesses fail during the first couple, often due to a lack of education and appropriate training. Entrepreneurial education can help develop an entrepreneurial attitude, and give aspiring entrepreneurs the requisite skills and know-how to run a business. This dedicated certificate program in Entrepreneurship helps assist small businesses, new and existing, to thrive and succeed across the state of New York and beyond.

Empire State University's Entrepreneurship Certificate is intended for students who strive to acquire the entrepreneurial knowledge and skills to become successful entrepreneurs. The 20-credit program may stand alone or be entirely applied towards the B.S. in Business, Management and Economics program.

Program Design
This certificate program courses are offered in multiple modalities, including online and independent study with Empire State University faculty. The Entrepreneurship Certificate courses are fully applicable to an undergraduate degree program developed in the business, management and economics area of study (p. 28).

Enroll in the Certificate Program for Entrepreneurship
Currently enrolled students can submit the online Degree Add/Change form in Self Service Banner. If you are not currently enrolled, apply online (https://www.sunyempire.edu/admissions/associate-bachelors/) and select the certificate option.

Certificate students who are concurrently enrolled in a bachelor's degree program are eligible to apply for federal financial aid, while those students who enroll only in the certificate program are not.

Certificate Program Coordinator
Anant R. Deshpande (Anant.Deshpande@sunyempire.edu), Ph.D.
Professor and Academic Coordinator, Empire State University
518-587-2100, ext. 2874

Program Details
This 20-credit certificate may stand alone or be entirely applied towards the B.S. in Business, Management and Economics program. Courses must be taken in order:

Code	Title	Credits
MGMT 1005	Principles of Management	4
BUSN 1010	Business Law I	4
ACCT 2005	Introductory Accounting I: Financial Accounting	4
MGMT 1020	Introduction to Entrepreneurship	4
MGMT 3022	New Venture Planning	4

Learning Outcomes
- Students will able to develop a basic understanding of the fundamental skills of entrepreneurship.
- Students will be able to identify the importance of accounting principles and business law as it relates to entrepreneurship.
- Students will be able to examine market entry strategies for developing new ventures in today's marketplace.
- Students will be able to apply knowledge of entrepreneurial concepts and techniques in an organizational setting and the student's field of work.
- Students will be able to design and create a sound business plan, from opportunity to implementation.

Global Indigenous Knowledge: Certificate

If you want to understand Indigenous issues in global context, this certificate is for you.

In the 21st century, understanding diversity, equity, and inclusion (DEI) is crucial for developing globalized competence. This certificate helps students address global responsibilities, responds to the current climate in the US, and expands the offerings to students for more BIPOC (Black, Indigenous and People of Color) programming at the university.

This certificate includes courses that represent tribal and indigenous perspectives from Africa, the Americas, and across the globe. At only 16 credits, the Global Indigenous Knowledge (GIK) certificate addresses many DEI concerns that you can apply to a wide range of interests and draw on in many careers, from the environment to business, human services, politics, and more.

The GIK offers a variety of formats, including online, blended, and residency models; themes include Environmental Sustainability, Spirituality, Oral Histories, Social Justice, Art and Culture as well as native-focused issues and solutions.

Program Details

To meet the needs of multiple communities in national and international contexts, the certificate is adaptable to diverse Indigenous peoples from around the world. Students will take the following courses:

Code	Title	Credits
INDG 2005	Introduction to Global Indigenous Knowledge & Thought	4
INDG 3010	Contextualizing Indigenous Peoples: A Global Perspective (Or Contemporary Issues, Resilience, and Transformation in Indigenous Knowledge)	4
INDG 3025	Writing the Indigenous Knowledge PLA (Or Approved Elective)	2
And		

INDG Capstone in Global Indigenous Knowledge: Applied Learning

Electives Include

Code	Title	Credits
INDG 2010	Introduction to Native American Studies	4
HIST 2015	Native American Histories & Cultures: Introduction	4
INDG 3015	First Peoples of North America	4
INDG 3005	Anishinaabe Studies: History Culture & the Environment	4
INDG 3020	Living History: Little Bighorn from a Cheyenne Perspective	4
LITR 3080	Native American Literature	4
INDG 4010	Native American Plants: Decolonizing Indigenous Knowledge	4
INDG 4025	Roots & Routes of African Diaspora Resistance	4
INMS 4025	Topics in Interdisciplinary & Multidisciplinary Studies	4

Learning Outcomes

The Global Indigenous Knowledge certificate learning outcomes support the Empire State University mission to serve adult learners and provide them with educational skills to advance, re-tool, and expand their educational, personal, and professional futures through ability to:

- Articulate Global Indigenous Knowledge(s) gained from coursework in order to apply this new knowledge to develop indigenous-focused cultural competencies.
- Demonstrate an understanding of Global Indigenous Knowledge(s), philosophies, ad world views.
- Synthesize Global Indigenous Knowledge in order to apply it to Indigenous- related theoretical and methodological foundations affecting the spread of said knowledge.
- Develop cultural awareness for professionals working with communities, organizations, or programs with Indigenous participants.

Healthcare Management: Certificate

Rapid growth in the healthcare industry creates an increased need for highly skilled professionals who can manage within healthcare facilities and organizations. If you currently work or plan to work in the healthcare sector, Empire State University's undergraduate certificate in healthcare management is a valuable credential that will enhance skills and knowledge in critical areas so that students can advance their career and increase earning potential.

Who Should Earn An Undergraduate Healthcare Management Certificate?

Anyone working in healthcare or a healthcare-related field who is interested in moving into a supervisory role, as well as those interested in changing careers to enter this increasingly important and expanding field. This includes professionals and students working in or planning to work in:

- insurance companies
- hospitals
- nursing homes
- doctors' offices and clinics
- allied health professions
- pharmaceutical firms
- medical supply companies
- medical laboratories
- health related non-profits
- public sector health organizations.

At SUNY Empire, you can earn your undergraduate certificate online, giving you the flexibility to complete your courses while you work or earn your undergraduate degree. If you're a current SUNY Empire student, you can embed the healthcare management certificate into your undergraduate degree.

Our undergraduate certificate program is designed to give you specialized knowledge of the healthcare industry, including its management, regulations, policy and economics, that you can immediately apply in real-world settings.

Enroll in the Certificate Program for Healthcare Management

Currently enrolled students can submit the online Degree Add/Change Request Form. If you are not currently enrolled, apply online (https://www.sunyempire.edu/admissions/associate-bachelors/) and select the certificate option.

Certificate students who are concurrently enrolled in a bachelor's degree program are eligible to apply for federal financial aid, while those students who enroll only in the certificate program are not.

Certificate Program Coordinator

Duncan P. RyanMann, Ph.D., Professor
School of Business
duncan.ryanmann@sunyempire.edu

Program Details

The four core courses focus on content areas essential for all healthcare management professionals, including the roles and responsibilities of managers, healthcare policy, and health economics and finance. A

required elective allows you to customize your certificate to meet your specific needs or interests.

Code	Title	Credits
HLAD 2010	The United States Health Systems	4
HLAD 3050	Healthcare Management	4
HLAD 4015	Healthcare Policy	4
ECON 3055	Economic Issues in Health Care	4
HLAD 3005	Community Health	4
or HLAD 3015	Comparative Health Systems	
or MGMT 4020	Managing the Service Sector Operation	
or HSCI 3200	Health Informatics	
or HLAD 3045	Healthcare Ethics	
or EMGT 3035	Managing Biological Terrorism as a Public Health Emergency	
or NURS 3035	Interdisciplinary Perspectives in Global Health	
or HLAD 3055	Managed Care	
or HLAD 3020	Cultural Competency in Health Care	
or HLAD 3040	Health Disparities	
or HLAD 3122	Principles of Public Health	
Total Credits		**20**

Learning Outcomes

Students will demonstrate the following learning outcomes upon completion of this certificate:

- Students will be able to descript the delivery, financing and regulation of healthcare services in the United States.
- Students will be able to explain the impact of major population health issues on the US healthcare system.
- Students will be able to identify essential role and skill requirements for managing in a healthcare environment.
- Students will be able to identify industry and environmental factors which influence the role of the healthcare manager and understand how they affect healthcare organizations.
- Students will be able to explain the process of creating healthcare policy at the federal and state levels.
- Students will be able to apply the tools of economics to the analysis of healthcare markets.
- Student will be able to apply the tools of a healthcare manager in a real world setting.

Manufacturing Management: Certificate

The undergraduate certificate in Manufacturing Management is designed specifically to meet the needs of individuals working in the manufacturing sector, who seek professional growth and advancement in their careers. The certificate program is designed to help students learn to successfully supervise manufacturing operations, while providing expertise in a variety of areas, such as production planning, inventory management, project management and supply-chain management. The 24-credit certificate is aimed at students who want to become managers in the manufacturing environment.

The Manufacturing Management certificate program is comprised of six courses that may be taken online or through independent study. The certificate courses are fully applicable to a bachelor's degree program developed in the Business, Management and Economics (BME) area of study and/or a bachelor of science degree program in management and/ or a bachelor of science degree program in business administration. (Please consult with your Empire State University mentor about how this may be applicable to your specific case). Certificate students who are concurrently enrolled in a bachelor's degree program are eligible to apply for federal financial aid, while those students who enroll only in the certificate program are not.

Enroll in the Certificate Program for Manufacturing Management

Currently enrolled students can submit the online Degree Add/Change Request Form. If you are not currently enrolled, apply online (https://www.sunyempire.edu/admissions/associate-bachelors/) and select the certificate option.

Certificate students who are concurrently enrolled in a bachelor's degree program are eligible to apply for federal financial aid, while those students who enroll only in the certificate program are not.

Certificate Program Coordinator

Anant Deshpande (Anant.Deshpande@sunyempire.edu), Ph.D.
Professor and Academic Coordinator, Empire State University
518-587-2100, ext. 2874

Program Details

The Certificate in Manufacturing Management includes the following required courses. Students take the required courses in the following sequence:

Code	Title	Credits
MGMT 1005	Principles of Management	4
MATH 1065	Statistics	4
MGMT 4025	Manufacturing Management	4
MGMT 3080	Supply Chain Management In The Global Context	4
INFT 3035	Project Management	4
MGMT 3050	Operations Management	4

Learning Outcomes

Upon completion of the certificate program, students will demonstrate the following learning objectives:

- Students will be able to demonstrate an enhanced understanding of the dynamics of a manufacturing organization and how it operates within a global environment.
- Students will be able to demonstrate an enhanced understanding of global supply chains, including the impact of information technology along with supply-chain design.
- Students will be able to demonstrate an enhanced understanding of management and leadership skills in a production-based environment.
- Students will be able to demonstrate an enhanced understanding of lean manufacturing, resource planning, plant layout, inventory controls and production planning and supervision.
- Students will be able to demonstrate an enhanced understanding of the use of analytical tools to improve operations modeling and evaluation of outputs.
- Students will be able to demonstrate an enhanced understanding of manufacturing strategies and principles from a preventative and predictive maintenance standpoint.
- Students will be able to demonstrate an enhanced understanding of methods to translate customer demand into effective production and service delivery models.

Career Self-Management and Self-Marketing: Micro Credential

Empire State University awards a 4-credit micro credential in Career Self-Management and Self-Marketing upon successful completion of the 4-credit online course MRKT 4050 Career Self-Management and Self-Marketing. This micro credential introduces students to advanced topics in career self-management, individual skills management and development, self-marketing, and personal branding. Throughout the course, students will engage in a series of interlinked learning activities aimed at identifying, benchmarking, evaluating, peer-reviewing, documenting, presenting, and improving their job-related skills. They will learn how to use contemporary learning theories and powerful management and marketing tools for effective self-development and self-promotion.

Currently, there is a growing understanding of the necessity to embed career competencies and skill-building activities in the design of undergraduate and graduate degrees, particularly within the business and management environment. In an ever-changing job market landscape, college graduates need to be prepared to professionally manage oneself by proactively scanning the job market, identifying and mastering the required skill sets, and developing effective strategies for individual skills management, self-improvement, and self-marketing. The amount of knowledge and skills that are needed for effective self-development is far beyond introductory career development courses, which is why forward-thinking institutions incorporate advanced career development learning at the senior undergraduate and graduate levels. While career self-management is one of the most important graduate attributes, in many academic programs this life-saving skill is significantly overlooked. This micro credential is designed to help individuals develop, implement, and sustain their personal strategies for success in the competitive marketplace.

Enrollment

- Current Empire State University students may enroll as they would any other SUNY Empire undergraduate course using MySUNYEmpire (https://my.sunyempire.edu).
- Non-SUNY Empire students may enroll in the course by following the undergraduate non-degree study process. (https://www.sunyempire.edu/degrees-programs/nondegree-study/)

Program Coordinator

Valeri Chukhlomin, Ph.D.
Professor, School of Business
Email questions about the Micro Credential to
Valeri.Chukhlomin@sunyempire.edu.

Program Details

This micro credential consists of one required course:

Code	Title	Credits
MRKT 4050	Career Self-Management and Self-Marketing	4

Learning Outcomes

- Students will be able to think strategically on how to develop, implement, monitor, and sustain an effective course of action to succeed in a competitive job market environment.
- Students will be able to use business strategy methods to scan a competitive job market, identify and analyze necessary competencies and skills, and estimate the required level of skill acquisition to succeed in a competitive selection process for the position(s) of your interest.
- Students will be able to apply performance management tools to develop required skills and to objectively evaluate and monitor your level of skill acquisition.
- Students will be able to use strategic marketing techniques for collecting, organizing, peer-reviewing, and demonstrating evidence of your mastery of skills for successful job search/promotion.
- Students will be able to effectively utilize information technology for managing your skills portfolio, maintaining career development workflow, and conducting self-administered, skill-building training interventions.
- Students will be able to apply learning theories, such as self-directed learning, active regulation, goal setting, situated and transformational learning, for effective career self-management, skill-building, and career growth.

Direct Support Professionals: Micro Credentials

Empire State University, in partnership with the New York State Office for People With Developmental Disabilities (OPWDD) and SUNY, offers three micro credentials to support the academic success and career pathway for Direct Support Professionals (DSP). The DSP-1, DSP-2, and DSP-3 micro credentials are designed to meet the standards of the National Alliance of Direct Support Professionals (NADSP) and lead toward DSP certification.

Successful completion of one or more of the DSP micro credentials at Empire State University leads to: national certification at the DSP-1 , 2, or 3 level(s) by NADSP, a SUNY micro credential, college credit towards an associate or bachelor's degree, and a range of career pathways and options.

Enrollment

Current Empire State University students may enroll as they would any other SUNY Empire undergraduate course using MySUNYEmpire (https://login2.esc.edu/cas/login/?service=https%3A%2F%2Flogin2.esc.edu%2Fcas%2Fidp%2Fprofile%2FSAML2%2FCallback%3FentityId%3Dhttp%253A%252F%252Fsignin.esc.edu%252Fadfs%252Fservices%252Ftrust%26SAMLRequest%3DPD94bWwgdmVyc2lvbj0iMS4wIiBlbmNvZGluZz0iVVRGLTgiPz48c2FtbHA6QXV0aG5SZXF1ZXN0IHhtbG5zOnNhbWxwPSJ1cm46b2FzaXM6bmFtZXM6dGM6 %26RelayState%3D9ea99ada-876f-42e5-9c93-4abcf280fc98). Non-SUNY Empire students may enroll in the course by following the steps to apply to the university. (https://sunyempire.edu/admissions/associate-bachelors/)

Program Contact

Desalyn De-Souza, PhD
Dean, School of Human Services
Email questions about the micro credential and/or grant funding opportunities to Desalyn.De-Souza@sunyempire.edu

Program Details

The three DSP micro credentials listed below consist of the following required courses:

Direct Support Professionals – 1

Code	Title	Credits
DISB 1010	Direct Support Professional Course 1	4

DIRECT SUPPORT PROFESSIONALS – 2

Code	Title	Credits
DISB 2030	Direct Support Professional Course 2 – Individual	4
DISB 2035	Direct Support Professional Course 2 - Community	4

DIRECT SUPPORT PROFESSIONALS – 3

Code	Title	Credits
DISB 2040	Direct Support Professional Course 3	4

Learning Outcomes

DIRECT SUPPORT PROFESSIONALS – 1

- The student will be able to explain the Code of Ethics
- The student will be able to describe ways to monitor crisis situations
- The student will be able to identify support programs and interventions appropriate to the individual being served
- The student will be able to identify person centered planning techniques and assists individuals in developing person centered plans.
- The student will be able to employ appropriate actions to promote healthy living
- The student will be able to identify adaptive equipment and therapies utilized by the individual
- The student will be able to identify the individual health and medical treatments of diverse clients
- The student will be able to identify different types of health care decisions and the rights of individuals to make their own health care decision

DIRECT SUPPORT PROFESSIONALS – 2

- The student will be able to apply concepts of person centered supports when working with individuals and their families.
- The student will be able to advocate for individuals and their families for services, resources, and treatments within the home and in the community.
- The student will be able to assess individuals for their social, physical health, mental health, and employment needs.
- The student will be able to explain the current standards of documentation.
- The student will be able to define modes of communication that are appropriate to the communication needs of participants.

DIRECT SUPPORT PROFESSIONALS – 3

- The student will be able to evaluate strategies to support individual empowerment
- The student will be able to distinguish data regarding human, legal, and civil rights.
- The student will be able to apply modes of communication that are appropriate to the communication needs of participants
- The student will be able to conduct assessments reviewing the process for inconsistencies, and updating corrections.
- The student will be able to facilitate the development of an individualized plan.
- The student will be able to assess the participant in the development of interpersonal relationships
- The student will be able to assess the participant's vocational interests and aptitudes.
- The student will be able to educate participants, co-workers and community members.
- The student will be able to assist the individual with identifying community support systems within their neighborhood
- The student will be able to analyze advocacy issues.
- The student will be able to advocate to community members and organizations (e.g., employer, landlord, or civic organization) when relevant to participant's needs or services
- The student will be able to conduct program evaluations.

University Calendar

Each year, the university offers the following three terms: fall, spring and summer.

Term	Term Length
Fall (usually begins in early September)	15 weeks
Spring (usually begins in late January)	15 weeks
Summer (usually begins in early May)	15 weeks

For the 2024-2025 academic year, there are also two overlapping eight-week Express Terms each fall, spring, and summer.

International Education schedules its terms based on the calendars of the host institutions and will provide information to students as it becomes available.

There are three periods in which faculty are unavailable to students, one typically immediately after the fall term, one after the spring term, and the last usually just preceding fall term. Students who require assistance during that time should contact 1Stop Student Services (https://www.sunyempire.edu/1-stop-student-services/).

2024-2025 Academic Calendar

The university's three-term academic year provides time well in advance of the start of the term for students to work with their mentors and plan the upcoming term. During the advising and registration period, students and mentors schedule time to discuss their educational goals and the available learning opportunities, to design individualized studies and to secure the learning resources for each course. For more information, please see Getting Started and Registration (p. 170). Please note that the financial aid calendar starts with the summer term.

Term	Admission Deadline	Registration Period	Add/ Drop Begins[1]	Add/ Drop Ends[2]	Start	End	Grades Due
Fall 2024	Aug. 1	Apr. 9 to Sept. 2	Sept. 3	Sept. 9	Sept. 3	Dec. 13	Dec. 20
Fall 2024, Express Term One	Aug. 1	Apr. 9 to Sept. 2	Sept. 3	Sept. 9	Sept. 3	Oct. 25	Nov. 1
Fall 2024, Express Term Two	Sept. 26	Apr. 9 to Oct. 20	Oct. 21	Oct. 27	Oct. 21	Dec. 13	Dec. 20
Spring 2025	Dec. 6	Oct. 8 to Jan. 12	Jan. 13	Jan. 19	Jan. 13	Apr. 25	May 2
Spring 2025, Express Term One	Dec. 6	Oct. 8 to Jan. 12	Jan. 13	Jan. 19	Jan. 13	Mar. 7	Mar. 14
Spring 2025, Express Term Two	Jan. 31	Oct. 8 to Mar. 2	Mar. 3	Mar. 9	Mar. 3	Apr. 25	May. 2
Summer 2025	Apr. 11	Feb. 4 to May 11	May 12	May 18	May 12	Aug. 22	Aug. 29
Summer 2025, Express Term One	Apr. 11	Feb. 4 to May 11	May 12	May 18	May 12	July 3	July 11
Summer 2025, Express Term Two	May 29	Feb. 4 to June 15	June 16	June 22	June 16	Aug. 8	Aug. 15

[1] There is an additional fee for late registration. Late registration is possible only if space is available.

[2] Any courses added after the add/drop period will be subject to a late add fee in addition to the late registration fee.

Faculty No Appointment Periods and Holidays

The dates below list the days that the university is closed and faculty no appointment periods. During faculty no appointment periods, faculty do not schedule appointments with students.

Date	Description
2024	
July 15 - August 9	Faculty no appointment period
Sept. 2	State holiday (Labor Day)
Oct. 14	State holiday (Indigenous Peoples Day observed)
Nov. 5	State holiday (Election Day)
Nov. 11	State holiday (Veterans Day observed)
Nov. 28	State holiday (Thanksgiving)
Dec. 16 - Dec. 27	Faculty no appointment period
Dec. 25	State holiday (Christmas Day)
2025	
Jan. 1	State holiday (New Year's Day)
Jan. 20	State holiday (Martin Luther King Jr. Day)
Feb. 12	State holiday (Lincoln's Birthday observed)
Feb. 17	State holiday (President's Day)
April 28 - May 2	Faculty no appointment period
May 26	State holiday (Memorial Day observed)

Program Calendars for 2024-2025

International Education

In addition to the university's three-term academic calendar, International Education have their own term schedules. Please contact International@sunyempire.edu for term dates and other information about our programs at these locations.

- Tirana, Albania
- Prague, Czech Republic
- Santo Domingo, Dominican Republic
- Athens, Greece
- Thessaloniki, Greece
- Beirut, Lebanon
- Eskişehir, Turkey

The Harry Van Arsdale, Jr. School of Labor Studies

The HVASLS term start and end dates vary by sponsor. For exact dates, please contact the HVASLS student services coordinator, Nedelka McLean, at 518-587-2100, ext. 1478 or Nedelka.McLean@sunyempire.edu (nedelka.mcLean@sunyempire.edu).

Undergraduate Admissions

Admission shall be without regard to sex, age, race and ethnicity, color, religion, disability, national origin, sexual orientation, military status or marital status. The two principal requirements for admission as an undergraduate are:

- Possession of a regionally accredited high school diploma or its equivalent.
- The ability of Empire State University to meet the applicant's explicit and implicit educational needs and objectives.

Although the majority of applicants to the university are admitted, the university reserves the right to deny admission based on its inability to meet an applicant's needs. An applicant wishing to secure certain professional licensures or certificates may be denied admission because the university does not offer such programs. Empire State University does not use standardized test scores as part of its application for admissions. You can apply online (http://www.sunyempire.edu/Apply/).

Undergraduate Admissions Procedures

Applications are reviewed on a first-come, first-served basis. All application materials including all previous college transcripts must be received before the deadline to guarantee review of your application for your term of choice. Once your application is complete, if space is not available for that term, you will be eligible to enroll in the next available term.

The university has a three-term academic calendar with overlapping eight-week Express Terms each fall, spring and summer. Application deadlines for each of the terms follows.

Term	Application Deadlines
Fall 2024	August 1
Fall 2024 Express Term Two	September 26
Spring 2025	December 6
Spring 2025 Express Term Two	January 31
Summer 2025	April 11
Summer 2025 Express Term Two	May 23

Application deadlines do change from term to term. Please visit the admissions web page (https://www.sunyempire.edu/admissions/associate-bachelors/) for the most current deadlines.

Some programs may not be able to accommodate all students.[1] Potential students are, therefore, urged to apply well in advance of their desired enrollment term date. Applicants who do not complete the application and orientation process in one year will need to reapply.

[1] Admission to the School of Nursing and Allied Health is selective and competitive. Applications are thereafter reviewed and accepted for the appropriate term. In order to expedite a fair review, students are encouraged to submit all necessary application requirements promptly and concisely.

Orientation

After applicants have been admitted, they will be auto enrolled in orientation. Orientation is an important introduction to the university that prepares a newly admitted student for their first term. Orientation includes:

- Various ways to study at SUNY Empire;
- What a mentor is and how mentorship works;
- How to plan and pay for a university degree;
- Rights and responsibilities as a student; and
- Provides supports and resources available to students.

Readmission Procedures

Students in good academic and financial standing who have previously attended the university may re-enroll at their location up to three calendar years from the date on which their last enrollment ended. Students who wish to re-enroll more than three years after their last enrollment must reapply. Reapplication includes paying the nonrefundable $50 orientation fee, submitting proof of regionally accredited high school completion and resubmitting transcripts from previous institutions.

Nonmatriculated Undergraduate Students

Resources and space permitting, the university allows students to enroll in credit bearing studies or courses as nonmatriculated students. Financial aid is not available for nonmatriculated study. Also, students who ultimately wish to earn a degree from SUNY Empire are advised to limit nonmatriculated study, as the studies may not be appropriate to a future degree program.

To take courses as a nondegree or nonmatriculated student, please fill out the application for nondegree study (http://www.sunyempire.edu/nmApply/).

State Authorization for the Provision of Online Education

Federal regulations require that colleges and universities that participate in Title IV funding and offer degree programming through distance or online education to students in other states, must seek approval from those states to offer such programs.

Empire State University is working to comply with each state's regulations and to maintain the necessary authorizations to continue providing our online degree programs. As a member of the National Council for State Authorization Reciprocity Agreements (NC-SARA), SUNY Empire is authorized to offer its online degree programs to residents of all other NC-SARA participating states. A complete list of states that are participants of NC-SARA can be found on their website (http://nc-sara.org/).

If a state or U.S. territory is not participating in NC-SARA, please visit our State Authorization for the Provision of Online Education web page (http://www.sunyempire.edu/academic-affairs/state-authorizations/) to check on the status of Empire State University's authorization in your state of residence. All states are considered "registration approved" unless listed otherwise. If your state is not currently approved, we cannot accept your application for admission to an online degree program at this time.

Complaint Resolution

SUNY Empire, as a provider of distance or online education, is required by the United States Department of Education to provide all prospective and current out-of-state students with contact information for the appropriate agency in their home state that handles complaints against institutions offering distance learning within that state.

Students are encouraged to follow the university's student problem resolution process prior to filing a complaint with a state agency.

For further information, please visit the Non-New York Residents page (http://www.sunyempire.edu/collegewide-student-services/contact-for-support/student-problem-resolution/non-new-york-residents/).

International Student Services

Empire State University is authorized under federal law to issue Department of Homeland Security Form I-20 documents to nonimmigrant students. Empire State University limits its issuance of the I-20 document to Canadian non-immigrant students who wish to study in the U.S. at one of our programs as border commuter students. Students who wish to travel to the U.S. to study should see other State University of New York options on the SUNY Web site (http://www.suny.edu).

Students can earn a degree with Empire State University from wherever they live in the world entirely online through our international distance learning options. To learn more, please visit the SUNY Empire Online web site. (https://www.sunyempire.edu/online/)

Canadian Border Commuter Student Admission

Canadian students who maintain their residence in Canada and travel to the U.S. for required residencies, orientations or meetings with their mentors are considered border commuter students and must apply for admission to the university and meet the following additional admission documentation requirements:

- Students whose first language is not English must demonstrate that they have sufficient English proficiency to study at SUNY Empire. Applicants may be required to take the Test of English as a Foreign Language (TOEFL). Please visit our international students web page (http://www.sunyempire.edu/ISS/) for:
- Test score information;
- Proof of financial ability to pay for tuition;
- Proof of health insurance coverage.

Canadian transcripts must be in English and from institutions approved by the Association of Universities and Colleges of Canada (AUCC) or Canadian Colleges of Applied Arts and Technology (CAAT). These transcripts must be submitted directly from the issuing institution to SUNY Empire. High school documents must show the approval of the ministry of education. All other transcripts from non-U.S. educational documents must be evaluated by a member organization of the National Association of Credential Evaluation Services ((https://www.naces.org/members/)NACES (https://www.naces.org/members/)) (https://www.naces.org/members/). Evaluation reports must be submitted directly from an approved evaluation service to the university. Copies of evaluations sent by the student will not be accepted.

I-20 Information

Canadian border commuter students must obtain an I-20 to study in the U.S. Canadian citizens are not required to apply for or hold an F-1 student visa in order to enter the U.S., however, permanent residents of Canada who are not Canadian citizens will need to apply for a F-1 student visa at a U.S. Embassy or Consulate once they have applied for and received their initial I-20 from the university.

Canadian border commuter students accepted to the university are entered into the federal Student and Exchange Visitor Information System (SEVIS), generating the student's I-20. All international students who are issued an I-20 document are required to pay the federal SEVIS fee. The current fee is $350 and must be paid directly to the U.S. government. More information on the SEVIS fee and how to pay it is available on the U.S. Immigration and Customs Enforcement's I-901 SEVIS Fee web page (http://www.Ice.gov/sevis/i901/). Students are required to present receipt of this payment when they cross into the U.S. Border commuter students are issued a new I-20 each term, but are not required to pay the SEVIS fee for each consecutive term they are in attendance. If a student does not maintain status for each consecutive term, he or she will be required to pay a new SEVIS fee when issued a new I-20.

Canadian border commuter students are not eligible for financial aid, college-sponsored scholarships or employment while studying with Empire State University. Border commuter students are always considered nonresidents for tuition purposes. Border commuter students are not allowed to establish residency in the U.S.

For visa or international student questions, please contact the Center for International Education at international@sunyempire.edu or toll free at 800-847-3000.

For regular admissions requirements visit the Admissions Requirements web page (http://www.sunyempire.edu/Apply/). Please visit the international students web page (http://www.sunyempire.edu/ISS/) for more detailed information on Canadian border commuter student admissions requirements, including demonstration of financial resources and evaluation of non-U.S. credentials. All documents should be mailed to Admissions, Empire State University, 111 West Ave., Saratoga Springs, NY 12866-4390, Attention: International Student Liaison, U.S.A.

To Find Out More

You can obtain information about the university in a number of ways:

- Information about online information sessions and phone information sessions are available by calling 1Stop Student Services at 800-847-3000.
- Visit the university's website (http://www.sunyempire.edu).
- Visit one of the more than 15 locations across New York state.
- Request information by writing to:
  Admissions
  Empire State University
  111 West Ave.
  Saratoga Springs, NY 12866-6069
  or calling:
  800-847-3000
  or email us at:
  Admissions@sunyempire.edu (Admissions@sunyempire.edu)

To Apply Online

To apply, visit the university's admissions web page (http://www.sunyempire.edu/Apply/).

Transfer Credit

Transfer Credits/Advanced Standing at Empire State University

Empire State University recognizes that students acquire college-level learning from many sources. Advanced standing refers to academic credit for college-level learning gained outside of your attendance at SUNY Empire State University. This includes traditional transfer credit (p. 159) as well as any assessed prior learning such as credits earned through standardized exams (p. 161), military credits (p. 160), professional learning that has been pre-evaluated (PLE (p. 166)), or individualized credit for prior learning (iC (p. 166)PL) (p. 166). See the individual sections of the catalog for more information about each type of advanced standing.

Official Documenation and Credit Application

Students are required to provide official documentation in order for their credits to be accepted. To be considered official, a transcript or other academic documents must be sent at the student's request directly from the originating institution or organization to Admissions at Empire State University. Transfer credit and other prior learning (advanced standing) that meets policy for acceptance will be evaluated and applied to a student's record as close to the time of admission as possible.* At SUNY Empire we apply all available transfer credit to a student's record, so the student and their mentor can see what is available. However, not all credits may be usable toward a student's degree. Students will work with their mentor to determine which credits and how many of them, apply toward their particular degree.

Undergraduate students matriculating prior to Fall 2022 have their prior learning applied to their record at the point of degree program concurrence.

Maximum Number of Transfer Credits

In most associate degree programs, students may include up to 40 credits of transfer and/or other prior learning (advanced standing). Students in an AA or AS in General Studies program may transfer in up to 52 credits. In our baccalaureate programs students may include up to 90-93 credits of advanced standing, depending on the overall number of credits required in the degree. Keep in mind, baccalaureate degrees require a minimum of 45 credits at the upper-level, therefore the maximum amount of introductory-level credits (like those earned through a community college), that can be used toward a student's bachelor's degree, is 75-79. Students will work with their mentors to determine which credits are applicable.

Semester Credit Hours

College credit represents the number of hours students have spent studying a particular topic. These hours are converted into credits based on the length of the course (semester, term), the number of hours the course met during the designated time and the number of hours expected for work outside of the course meetings. Typically, credits are measured in semester or quarter credits. SUNY Empire awards credit based on semester hours. If a student attended an institution that awarded quarter credits or another type of unit of measure, the credits will be converted to semester credits upon application to their SUNY Empire record.

Rounding of Credits

Credits are not rounded at SUNY Empire, and may include fractions of credits. For example, 4 quarter credits are equivalent to 2.68 semester credits and will not be rounded to 3 credits.

D Grades

Grades of D generally indicate less than satisfactory performance and are not transferable in most cases. Students who were awarded an Associate in the Arts (AA), Associate in Science (AS), or Associate in Applied Science (AAS) degree can bring in all or part of the credit earned as part of that degree, including courses with D grades. Students without a completed associate degree can bring in credits for which the student received a C- or above. D grades earned as part of an Associate in Occupational Studies (AOS) degree are not transferable, even if the student completed the AOS. Courses with D grades listed on a SUNY general education transfer addendum (GETA) may be used to meet SUNY General Education Requirements.

Age of Credits

Empire State University accepts credits no matter how long ago a student earned them, except when the learning is in an area that has changed significantly over time, such as computer technology. In such cases, credits should be reviewed for currency. Students should talk to their mentor about the appropriateness of their credits.

Credits Not Counting Toward A Degree
Developmental/Remedial

Developmental courses, remedial courses, English language courses that strengthen a student's language skills to college-level, or pre-college courses listed on transcripts are not accepted as transfer credit. Numbers lower than 100 or 10 often designate these courses. Some examples of titles are "Reading", "Arithmetic", "Basic Writing" and "English as a Second Language". Often such courses appear on transcripts with credit amounts or quality points attached although they may not count toward degree requirements at the original institution.

Insufficient grades

Incompletes, withdrawals, failing grades, and D-grades not part of a completed AA, AS, AAS degree, audited courses, and adult education courses which did not earn college credit are not accepted as transcript credit. Continuing Education Units (CEUs) are not equivalent to college credits and are not directly transferable. A student may demonstrate their knowledge in these areas by taking a standardized examination or through individualized prior learning assessment.

Redundancy

Empire State University awards credit for specific learning only once. Similar courses in the same subject at the same level taken at different institutions are considered potentially redundant unless the university has determined that there is no significant overlap.

Transferring CPL Credit From Another Institution

Credit for prior learning or credit for individually evaluated learning that comes to the university on a transcript from a regionally accredited institution or from an institution on the NYSED approved list when you attended may be accepted when it is part of a completed A.A., A.S. or A.A.S. degree. If this is not the case, then the credits may be used if the originating institution's process for awarding the CPL credits has been

reviewed by the Office of the Registrar and has been determined to be consistent with SUNY Empire's conventions for evaluating such credits. CPL programs from all SUNY institutions have already been evaluated and are acceptable for direct transfer.

Transfer Appeals Process

When a student transfers into Empire State University, all courses taken at other SUNY institutions are eligible for transfer credit. The student will work with their faculty mentor to determine which prior courses are appropriate to the degree program plan. If the student does not agree with the university's decision on the granting or placement of credit that was earned at another SUNY institution, the student has the right to submit an appeal.

The university appeals process includes an informal resolution procedure, as well as a procedure for formal appeal of an academic decision. We strongly encourage students to attempt an informal resolution before making a formal appeal.

Consult the Student Academic Appeals Policy and Procedure (http://sunyempire.edu/policies/?search=cid=37972) for more details on the appeals process.

Further Appeals Process For Students Transferring From Another SUNY Campus

If the student has exhausted the appeals process at the university and still does not agree with the university's decision or has not received a response within 15 business days, they may appeal to SUNY System Administration. Students can submit the appeal by filling out a student appeal form (https://system.suny.edu/media/suny/content-assets/documents/academic-affairs/Transfer_Appeal_Form.pdf) and sending it with requested material to:

studentmobility@suny.edu

or send via certified mail to:

Thomas Hanford, Ph.D.
Director of Transfer and Articulation Policy
Office of Student Success
SUNY System Administration
353 Broadway Albany, NY 12207

The SUNY representative will respond to the appeal within five business days from receipt of the completed appeal application. If the decision finds merit to change the course to meet a major requirement, the receiving institution will be notified to take appropriate action.

Credit from Other Institutions
TRANSCRIPT CREDIT FROM REGIONALLY ACCREDITED COLLEGES AND UNIVERSITIES

Empire State University recognizes transfer credit acquired through other regionally accredited colleges and universities. In order for the credit to be directly transferable, the college or university must be regionally accredited or a candidate for accreditation at the time of the student's attendance. A list of the regional accreditation agencies can be found online at the Council for Higher Education Accreditation (CHEA) (https://www.chea.org/regional-accrediting-organizations/)website.

In order to be accepted, the transcript must show the course title, the grade (or equivalent evaluation such as is provided by certain non-traditional institutions), and the credit earned for each course. Courses with a grade of C- or higher (or equivalent) are acceptable. Students with an earned Associate of Arts (A.A.), Associate of Science (A.S.), or Associate of Applied Science (A.A.S.) degree may transfer in coursework with D grades that was part of the awarded degree.

An official transcript will be needed for each institution attended, even if transfer credit from a previous institution is listed on another college transcript. Developmental courses, remedial courses, English language courses that strengthen a student's language skills to college-level, or pre-college courses listed on transcripts are not accepted as transfer credit.

PATHWAYS TRANSFER AGREEMENTS

The College has developed Pathways Transfer Agreements with community colleges across SUNY, CUNY and out-of-state. For details and transfer guides, see the Community College and Academic Partnerships page (https://www.sunyempire.edu/academic-affairs/community-college-and-academic-partnerships/).

NEW YORK STATE EDUCATION DEPARTMENT RECOGNIZED INSTITUTIONS

Empire State University accepts credit from degree-granting institutions within New York state that have been approved by the New York State Education Department (NYSED) to award college-level degrees at the time of attendance. This includes independent and proprietary-sector institutions, such as some New York state business schools. In order to be accepted, the transcript must show the course title, the grade (or equivalent evaluation such as is provided by certain non-traditional institutions), and the credit earned for each course. Courses with a grade of C- or higher (or equivalent) are acceptable. Students with an earned Associate of Arts (A.A.), Associate of Science (A.S.), or Associate of Applied Science (A.A.S.) degree may transfer in coursework with D grades that was part of the awarded degree. An official transcript will be needed for each institution attended, even if transfer credit from a previous institution is listed on another college transcript. Developmental courses, remedial courses, English language courses that strengthen a student's language skills to college-level, or pre-college courses listed on transcripts are not accepted as transfer credit.

INTERNATIONAL TRANSCRIPTS REQUIRING EVALUATION

Empire State University accepts college credit earned at other accredited institutions internationally. Transcripts from most international institutions must be evaluated by a member organization of the National Association of Credential Evaluation Services ((https://www.naces.org/members/)NACES (https://www.naces.org/members/)) (https://www.naces.org/members/). For transfer purposes, institutions evaluated at a college-level require a course-by-course evaluation. The evaluation needs to include title, credits, grades, and level of learning. If level is not included in the evaluation, coursework must be applied as lower-level (introductory) credit. The university will only accept evaluated coursework from one approved organization and will not "mix and match"

evaluations from separate services or replace an evaluation which has already been accepted. Original evaluation reports must be submitted directly to Admissions. Copies of evaluations will not be accepted. Students should review pricing, services, documentation requirements and the time it takes to prepare the evaluation report as each service differs. This information can be found on the NACES website (https://www.naces.org/).

transcripts not requiring international evaluation

SUNY Empire does accept transcripts (in English only) from some international institutions that have undergone an official review determined to be equivalent to a regionally accredited institution. If you have a transcript from one of the following institutions, you do not need to have your transcript reviewed by a foreign credential evaluation service.

Israeli institutions

Israeli Institutions accredited by the Israeli Council on Higher Education and the Israeli Ministry on Education. The Council for Higher Education website has the most current list of institutions at **www.che.org.il/en/institutions/.**

Canadian Institutions

Canadian institutions listed as members of Universities Canada (formerly AUCC: the Association of Universities and Colleges of Canada). The most current list can be found on their website at **http://www.univcan.ca/universities/member- universities/.**

Canadian institutions listed as members of the Canadian Colleges of Applied Arts and Technology (CAAT). The most current list can be found on its website at **www.ontario.ca/page/ontario-colleges**.

Puerto Rican Institutions

Puerto Rico is considered part of the United States and accepted institutions have been accredited by the Middle State Commission on Higher Education (MSCHE). Check the Middle States Commission's website for a current list at **https://**www.msche.org/institution/. (http://www.msche.org/institution/)

International Partner Institutions

Empire State College has developed official partnerships with the following international institutions. Official transcripts from these institutions are sufficient documentation for awarding credit for students enrolled in the partnership program. These credits are listed under the "credit by evaluation" section on the degree program:

- University of New York/Prague, Czech Republic
- University of New York/Tirana, Albania
- American University of Technology, Lebanon
- American University of Science and Technology, Lebanon
- New York College/Athens, Greece
- New York College/Thessaloniki, Greece
- La Universidad APEC (UNAPEC), Dominican Republic
- Anadolu University (AU), Turkey

Other Types of Institutions

Empire State College accepts credits from institutions that have undergone review by the following types of programmatic accreditation:

- Nursing schools accredited by the Accreditation Commission for Education in Nursing, Inc. (ACEN), formerly National League for Nursing Accrediting Commission (NLNAC).
- Art schools with National Association of Schools of Art and Design (NASAD) approval. Courses must have been successfully completed during a period when the institution was accredited by NASAD or a candidate for accreditation,
- Canadian 13th-Year credits.

Military Credit
MILITARY TRAINING

Empire State University awards credit for many types of military training and occupations. In addition to credit from other institutions, SUNY Empire accepts credit recommendations for any military training or occupation that has been evaluated through the American Council on Education (ACE). The guide with credit recommendations for military service is available online at http://www.acenet.edu/news-room/Pages/Military-Guide-Online.aspx

If a student is an active-duty, guard, reserve or veteran service member, the Veteran and Military Resource Center (VMRC) at SUNY Empire will assist them with requesting and reviewing military documentation, as well as provide other information and resources. Students can reach VMRC via email, phone, fax or online at:

Veteran and Military Resource Center (https://sunyempire.edu/veteran-military/)
Military.Programs@sunyempire.edu (Military.Programs@esc.edu)
800-847-3000, ext. 2779 or 518-587-2100, ext. 2779

American Council on Education (ACE) Guide to the Evaluation of Educational Experiences in the Armed Services

Many types of military training and occupations have been evaluated for college-level credit through the American Council of Education (ACE).

ACE recommends credit for:

- Formal military courses.
- Army enlisted and warrant officer occupational specialties.
- Navy general rates and ratings.
- Navy limited duty and warrant officer specialties.
- Selected Navy enlisted classifications (NEC).
- Coast Guard ratings and warrant officer specialties.
- Selected Marine Corps occupational specialties.
- Department of Defense.
- Basic training (since 1957) – 4 credits for military science/physical education (nonliberal, lower level).

The "American Council on Education Guide to the Evaluation of Educational Experiences in the Armed Services" provides a listing of all the training and occupations that have been evaluated for recommended credits. The guide with credit recommendations for military service is available online at **www.acenet.edu/militaryguide**.

The ACE guide also provides credit recommendations for many military service school courses and military occupational specialties (MOS). The college accepts credit recommendations for credit from primary MOS and duty MOS. Additional documentation may be required in order to accept secondary MOS.

Students requesting credit for their military training or occupation must provide proper documentation that matches the following criteria described in the ACE guide course description, including:

- Title
- Contents
- Dates
- Location
- Length of study.

The university accepts ACE credit recommended in the following categories:

- Lower-division associate/bachelor's degree.
- Upper-division bachelor's degree.
- Graduate degree.

Obtaining Official Military Documentation

In order to grant credit for learning you gained in the military, the college needs to have official copies of your military documents.

See the Veteran and Military Resource Center website (https://sunyempire.edu/veteran-military/) for details on obtaining transcripts. Transcripts should be sent to:

>   Admissions, SUNY Empire State College
>
>   111 West Ave.
>
>   Saratoga Springs, NY 12866-6069

The Joint Services Transcript (JST) Review of Available Credit

Due to strict regulations and compliance guidelines set forth by the Department of Defense Memorandum of Understanding and Principles of Excellence, early and accurate evaluation of available credit is essential. Members of the Offices of the Registrar and Veteran and Military Resource Center have developed a transcript review process for the Joint Service Transcript (JST).

Upon receipt of the JST by the college, a review will be conducted jointly through the Office of the Registrar and VMRC. All student military credits will be reviewed for redundancy. Credits from different courses and occupations often reflect the same learning and can only be used once. All available credit will be applied to the student record and viewable in Banner, DP Planner, and Degree Works.

Please note that reviewers will have also taken rank and level into account when conducting the review. Some military transcripts list all possible credits, even if the student has not achieved the necessary rank and/or appropriate level to earn them. A service member's rank is listed on the first page of the JST and reflects the individual's rank at the time the JST was prepared. It is important that service members have up-to-date JST's on file with Admissions so that it accurately reflects their military training and rank. If a student does not hold the necessary rank, then they are not eligible for the credits ACE recommends for that specific training/MOS.

Standardized Exams Appearing on an Official Military Document

College level test scores from examinations (p. 161), such as CLEP examinations, DANTES Subject Standardized Tests (DSST) or Defense Language Proficiency Tests (DLPT), can be accepted directly from a JST, or Coast Guard Institute transcripts if they include exam title, date exam was taken and the score.

Military Training Not Yet Evaluated for College Credit

Not all armed services training has been evaluated for college credit. If a learning experience does not appear in the ACE guide or the JST transcript indicates that it has not been evaluated, the learning claimed from that course/occupation may be individually evaluated though the iCPL process (p. 165) to determine if college level credit is appropriate.

Standardized Exams

Empire State University accepts many types of standardized examinations that have been evaluated for college-level credits. If a student's results meet the guidelines established by the university for earning credit, they can use those credits toward their degree program plan when:

- They completed the examination during the specific time period covered by the evaluation and credit recommendation.
- An official score report is received by Empire State University directly from the testing service.

As with all transfer credit/advanced standing, standardized examination topics should fit into a student's degree program by meeting specific program requirements or electives or adding breadth and depth to their general learning. Click on the tabs to find out more information about credit awards.

Empire State University accepts the following standardized examinations:

- Advanced Placement Examinations (AP) (https://catalog.esc.edu/undergraduate/transfer-credit/standardexams/#advancedplacementexaminationsaptext)
- Association of Language Testers in Europe (ALTE) (p. 164)
- British A-level Examinations (p. 164)
- College Level Examination Program (CLEP) (p. 163)
- DANTES Subject StandardizedTest (DSST) (p. 164)
- UExcel Excelsior College Examination Program (p. 164)
- Graduate Record Examination (GRE) advanced subject tests (p. 164)
- New York University Foreign Language Proficiency Examinations (p. 164)
- Thomas Edison Credit Examination Program (TECEP) (p. 164)

Before a student decide to take an exam, they should talk with their mentor to determine if it is appropriate for them to their degree. For more information on standardized examination opportunities, click on the name of the exam to be brought to the appropriate tab on this page.

For details on offerings, check the organization's website. Many of these sites offer study guides which are sometimes available at bookstores.

ADVANCED PLACEMENT EXAMINATIONS (AP)

College Board (AP) (http://www.collegeboard.com/ap/)

Empire State University accepts Advanced Placement exams with a score of 3 or higher, as documented by an official score report sent to Admissions. Current Advanced Placement exams and credits awarded are listed below. In addition to the current exams listed, SUNY Empire also accepts former examinations:

- Advanced Placement Tests taken before April 1994 with scores of 3 or higher earn 6 credits at the introductory level.
- Advanced Placement tests taken in April 1994 or later with scores of 3 or higher earn the number of credits recommended by the American Council on Education (ACE). Specific credit amounts for older examinations can be found on TES by CollegeSource (https://tes.collegesource.com/publicview/TES_publicview01.aspx?rid=ab2d75d5-a1a8-4086-a557-e284e58c93a2&aid=1d14f2c0-0147-4c03-b76e-5c02f9a9ebdb).

Current AP Exams and Credit Amounts:

Exam Name	Number of Credits	Equivalent Course	Gen Ed (2010)	Gen Ed (2023)
2-D Art and Design	3 cr.	Art Elective	Arts	The Arts
3-D Art and Design	3 cr.	Art Elective	Arts	The Arts
African American Studies	3 cr.	Art Elective	Arts	The Arts
Art History	6 cr.	Art Elective	Arts	The Arts
Biology	4 cr.	Biology Elective	Natural Sciences	Natural Sciences (and Scientific Reasoning)
Calculus AB	4 cr.	MATH 2140	Mathematics	Mathematics (and Quantitative Reasoning)
Calculus BC	8 cr.	MATH 2140 and MATH 2141	Mathematics	Mathematics (and Quantitative Reasoning)
Chemistry	4 cr. (score of 3), or 8 cr. (score of 4 or above)	Chemistry Elective	Natural Sciences	Natural Sciences (and Scientific Reasoning)
Chinese Language and Culture	8 cr. (score of 3), or 12 cr. (score of 4), or 16 cr. (score of 5)	Chinese Elective	Foreign Languages	World Languages
Comparative Government & Politics	3 cr.	Political Science Elective	Social Science	Social Sciences
Computer Science A	4 cr.	Computer Science Elective	None	None
Computer Science Principles	3 cr.	Computer Science Elective	None	None
Drawing	3 cr.	ARTS 1065	Arts	The Arts
English Language & Composition	6 cr.	Writing Elective	Basic Communication	Communication Written
English Literature & Composition	6 cr.	English Elective	Basic Communication (3 credits), Humanities (3 credits)	Communication Written (3 credits), Humanities (3 credits)
Environmental Science	3 cr.	ENSC 1200	Natural Sciences	Natural Sciences (and Scientific Reasoning)
European History	6 cr.	History Elective	Western Civilization	World History and Global Awareness
French Language and Culture	6 cr. (score of 3), or 9 cr. (score of 4), or 12 cr. (score of 5)	French Elective	Foreign Languages	World Languages
German Language and Culture	12 cr. (score of 3), or 16 cr. (score of 4), or 20 cr. (score of 5)	German Elective	Foreign Languages	World Languages
Human Geography	3 cr.	General Elective	Social Science	Social Sciences
Italian Language and Culture	6 cr. (score of 3), or 9 cr. (score of 4), or 12 cr. (score of 5)	Italian Elective	Foreign Languages	World Languages
Japanese Language and Culture	8 cr. (score of 3), or 12 cr. (score of 4), or 16 cr. (score of 5)	General Elective	Foreign Languages	World Languages
Latin	6 cr. (score of 3), or 9 cr. (score of 4), or 12 cr. (score of 5)	General Elective	Foreign Languages	World Languages
Macroeconomics	3 cr.	ECON 2015	Social Science	Social Sciences
Microeconomics	3 cr.	ECON 2020	Social Science	Social Sciences

Exam	Credit	Course Equivalent	Gen Ed (2010)	Gen Ed (2023)
Music Theory	3 cr. (score of 3) or 6 cr. (score of 4 or above)	Music Elective	Arts	The Arts
Physics 1 (Algebra-based)	4 cr.	PHYS 1200	Natural Sciences	Natural Sciences (and Scientific Reasoning)
Physics 2 (Algebra-based)	4 cr.	PHYS 1201	Natural Sciences	Natural Sciences (and Scientific Reasoning)

Physics C: Mechanics	4 cr.	Physics Elective	Natural Sciences	Natural Sciences (and Scientific Reasoning)
Precalculus BC	4 cr.	MATH 1140	Mathematics	Mathematics (and Quantitative Reasoning)
Psychology	3 cr.	PSYC 1005	Social Science	Social Sciences
AP Research	3 cr. (score of 3), or 6 cr. (score of 4 or higher)	General Elective	None	None
AP Seminar	3 cr. (score of 3), or 6 cr. (score of 4 or higher)	General Elective	None	None
Spanish Language and Culture	6 cr. (score of 3), or 9 cr. (score of 4), or 12 cr. (score of 5)	Spanish Elective	Foreign Languages	World Languages
Spanish Literature and Culture	9 cr. (score of 3), or 12 cr. (score of 4), or 15 (score of 5)	Spanish Elective	Foreign Languages	World Languages
Statistics	3 cr.	MATH 1065	Mathematics	Mathematics (and Quantitative Reasoning)
US Government and Politics	3 cr.	POLI 2010	Social Science	Social Sciences
US History	6 cr.	HIST 2025 and HIST 2030	American History	U.S. History and Civic Engagement
World History (Modern)	6 cr.	History Elective	Other World Civilization	World History and Global Awareness

COLLEGE LEVEL EXAMINATION PROGRAM (CLEP)

College Board CLEP (http://www.collegeboard.com/clep/)

Empire State University identification code = 2214

Empire State University follows the ACE/CLEP recommended minimum score (http://www2.acenet.edu/credit/?fuseaction=browse.getOrganizationDetail&FICE=300172.) and credit recommendations for awarding credit for exams taken since July 1, 2001 (except as noted for languages below). If you have taken a CLEP examination before July 1, 2001, or the effective date listed, contact The Office of the Registrar for required scores and available credit.

Current CLEP Exams

History and Social Sciences

- American Government: 3 credits; introductory; liberal
  - Gen Ed (2010): Social Science
  - Gen Ed (2023): *Social Science
- History of the United States I (Early Colonization to 1877): 3 credits; introductory; liberal
  - Gen Ed (2010): American History
  - Gen Ed (2023): *U.S. History and Civic Engagement
- History of the United States II (1865 to the Present): 3 credits; introductory; liberal
  - Gen Ed (2010): American History
  - Gen Ed (2023): *U.S. History and Civic Engagement
- Human Growth and Development: 3 credits; introductory; liberal
  - Gen Ed (2010): Social Science
  - Gen Ed (2023): *Social Science
- Introduction to Educational Psychology: 3 credits; introductory; liberal
- Introductory Psychology: 3 credits; introductory; liberal
  - Gen Ed (2010): Social Science
  - Gen Ed (2023): *Social Science
- Introductory Sociology: 3 credits; introductory; liberal
  - Gen Ed (2010): Social Science
  - Gen Ed (2023): *Social Science
- Principles of Macroeconomics: 3 credits; introductory; liberal
  - Gen Ed (2010): Social Science
  - Gen Ed (2023): *Social Science
- Principles of Microeconomics: 3 credits; introductory; liberal
  - Gen Ed (2010): Social Science
  - Gen Ed (2023): *Social Science
- Social Sciences and History: 6 credits; introductory; liberal
  - Gen Ed (2010): Social Science
  - Gen Ed (2023): *Social Science
- Western Civilization I (Ancient Near East to 1648): 3 credits; introductory; liberal
  - Gen Ed (2010): Western Civilization
  - Gen Ed (2023): *World History and Global Awareness
- Western Civilization II: 1648 to the Present: 3 credits; introductory; liberal

- Gen Ed (2010): Western Civilization
- Gen Ed (2023): *World History and Global Awareness

Composition and Literature

- American Literature: 3 credits; introductory; liberal
  - Gen Ed (2010): Humanities
  - Gen Ed (2023): *Humanities
- Analyzing and Interpreting Literature: 3 credits; introductory; liberal
  - Gen Ed (2010): Humanities
  - Gen Ed (2023): *Humanities
- College Composition: 6 credits; introductory; liberal
  - Gen Ed (2010): Basic Communications
  - Gen Ed (2023): *Communication - Written
- College Composition Modular: 3 credits; introductory; liberal
  - Gen Ed (2010): Basic Communications
  - Gen Ed (2023): *Communication - Written
- English Literature: 6 credits; introductory; liberal
  - Gen Ed (2010): Humanities
  - Gen Ed (2023): *Humanities
  - Humanities: 3 credits; introductory; liberal
    - Gen Ed (2010): Humanities
    - Gen Ed (2023): *Humanities

Science and Mathematics

- Biology: 6 credits; introductory; liberal
  - Gen Ed (2010): Natural Sciences
  - Gen Ed (2023): *Natural Sciences (and Scientific Reasoning)
- Calculus: 4 credits; introductory; liberal
  - Gen Ed (2010): Mathematics
  - Gen Ed (2023): *Mathematics (and Quantitative Reasoning)
- Chemistry: 6 credits; introductory; liberal
  - Gen Ed (2010): Natural Sciences
  - Gen Ed (2023): *Natural Sciences (and Scientific Reasoning)
- College Algebra: 3 credits; introductory; liberal
  - Gen Ed (2010): Mathematics
  - Gen Ed (2023): *Mathematics (and Quantitative Reasoning)
- College Mathematics: 3 credits; introductory; liberal
  - Gen Ed (2010): Mathematics
  - Gen Ed (2023): *Mathematics (and Quantitative Reasoning)
- Natural Sciences: 6 credits; introductory; liberal
  - Gen Ed (2010): Natural Sciences
  - Gen Ed (2023): *Natural Sciences (and Scientific Reasoning)
- Precalculus: 3 credits; introductory; liberal
  - Gen Ed (2010): Mathematics
  - Gen Ed (2023): *Mathematics (and Quantitative Reasoning)

Business

- Financial Accounting: 3 credits; introductory; nonliberal
- Information Systems: 3 credits; introductory; nonliberal
- Introductory Business Law: 3 credits; introductory; nonliberal
- Principles of Management: 3 credits; introductory; nonliberal
- Principles of Marketing: 3 credits; introductory; nonliberal

World Languages*

- French Language (Levels 1 and 2): 8, 12, or 16 credits (score dependent); introductory; liberal
  - Gen Ed (2010): Foreign Language
  - Gen Ed (2023): *World Languages
- German Language (Levels 1 and 2): 8, 12, or 16 credits (score dependent); introductory; liberal
  - Gen Ed (2010): Foreign Language
  - Gen Ed (2023): *World Languages
- Spanish Language (Levels 1 and 2): 8, 12, or 16 credits (score dependent); introductory; liberal
  - Gen Ed (2010): Foreign Language
  - Gen Ed (2023): *World Languages
- Spanish with Writing (Levels 1 and 2): 8, 12, or 16 credits (score dependent); introductory; liberal
  - Gen Ed (2010): Foreign Language
  - Gen Ed (2023): *World Languages

*SUNY Empire has developed our own credit recommendations for CLEP foreign language exams. See the Empire State University page (https://tes.collegesource.com/publicview/TES_publicview01.aspx?rid=ab2d75d5-a1a8-4086-a557-e284e58c93a2&aid=1d14f2c0-0147-4c03-b76e-5c02f9a9ebdb) on the TES by CollegeSource website for details. Enter "CLEP" using the "institution search" field.

ASSOCIATION OF LANGUAGE TESTERS IN EUROPE (ALTE)

ALTE (http://www.alte.org/)

Exams: foreign languages
Credit recommendation criteria:
ALTE Level 1 (A2) - 2 credits liberal, introductory
ALTE Level 2 (B1) - 4 credits liberal, introductory
ALTE Level 3 (B2) - 8 credits liberal, introductory
ALTE Level 4 (C1) - 12 credits liberal, 4 credits advanced
ALTE Level 5 (C2) - 16 credits liberal, 8 credits advanced

BRITISH A-LEVEL EXAMINATIONS

Cambridge International Examinations (http://www.cie.org.uk/)

Exams: A Level examinations for different college subjects
Credit recommendation criteria: 6 credits per A Level pass

DANTES SUBJECT STANDARDIZED TEST (DSST)

Thomson Prometric, DSST Program (http://www.getcollegecredit.com/)

Empire State University identification code = 8732
Note: Exams can be taken at Empire State University. (https://www.esc.edu/veteran-military/testcenter/)

Exams: about 40 exams in diverse disciplines
Credit recommendation criteria: credit awarded as indicated on score report - most exams are 3 credits

EXCELSIOR COLLEGE EXAMINATIONS AND UEXCEL EXAMS

Note: Excelsior and UExcel examinations were discontinued in 2022. Students who took exams prior to discontinuation are still eligible for credit.

Exams: areas of business, education, liberal arts and sciences, nursing
Credit recommendation criteria: indicated on score report

NEW YORK UNIVERSITY FOREIGN LANGUAGE PROFICIENCY EXAMINATIONS

New York University (https://www.sps.nyu.edu/homepage/academics/divisions-and-departments/center-for-applied-liberal-arts/proficiency-testing.html)

Exams: foreign languages

Credit recommendation criteria: New York University provides an official letter or transcript and the results are valid for five years. Credit is awarded on a point scale. Credit applied is equivalent to the score earned. The first eight credits applied are at the lower-level. For example, for a score of 12, students are eligible for 8 credits at the lower-level and 12 credits at the upper-level.

THOMAS EDISON CREDIT EXAMINATION PROGRAM (TECEP)

Thomas Edison State College of NJ (http://www.tesc.edu/tecep/)

Exams: liberal arts and sciences, business and management, professional areas

Credit recommendation criteria: indicated on score report - most exams are 3 credits

Credit for Prior Learning

EARN CREDIT FOR WHAT YOU ALREADY KNOW

You can earn credit for prior college-level learning and apply it toward your associate or bachelor's degree. Your mentor will help you determine what relevant college-level learning you already have.

Transfer credit (p. 158) from other institutions is one source of prior college-level learning. Other sources include:

- Military training (p. 160)
- Standardized exams (p. 161), such as CLEP, DANTES, and DSST
- Other college-level learning, such as:
  - Licenses
  - Noncredit courses
  - Law Enforcement and other types of training
  - Seminars
  - In-service trainings
  - Volunteer work

Credit for College-Level Learning

Empire State University awards credit to degree-seeking students for verifiable college-level learning (knowledge or skills) acquired through life or work experience.

This learning can come from many sources, including:

- Courses at other colleges and universities
- Work experience
- Volunteer work
- Training programs or in-service courses
- Military service
- Community activities
- Independent reading and study

To develop your prior-learning credit requests, you will work with your mentor to determine:

- If the learning is college-level
- If the learning is appropriate for the degree plan you're developing
- The best way to demonstrate your learning

Empire State University uses the following standards to determine whether learning is college-level:

- The learning should be theoretical and practical. If you seek credit for supervising employees at work, you should prove understanding employee motivation, management styles, and job evaluation techniques, as well as day-to-day-operations.
- You should be able to identify the principles involved.
- The learning should be identified as college-level when evaluated by an expert in the field. This means you should be able to convince an expert evaluator through description or demonstration that your knowledge or competence is at the college level.

Not all learning will qualify as college-level. Examples include maintaining the family budget, putting up bookshelves, buying a house, or surviving a serious illness.

Credit derived directly from transcript learning, examinations, and in some cases, from licenses and certifications is easily translatable into Empire State University credits.

Using Prior Learning Toward Your Degree

Although you may have college-level learning from multiple sources, you will only use the credits that best meet your degree requirements. Empire State University accepts credit recommendations for degree-seeking students and awards advanced standing credit when:

- Learning components make sense in the student's degree program
- Learning components do not duplicate other credits in the degree program
- The student completed the learning at the same location and during the exact time period covered by the evaluation and credit recommendation
- SUNY Empire directly receives official documentation from the issuing agency or organization

Evaluation of Prior College-Level Learning

Advanced standing credit is available for prior college-level learning verified by one of the following:

Transcript Evaluation

Credits earned at other regionally accredited colleges and universities (p. 159) that are validated by an official transcript are available for inclusion in students' degree programs.

Standardized Examinations

Credit may be earned through the demonstration of college-level learning on proficiency examinations (p. 161) offered by a number of testing services.

Pre-Evaluated Training, Credentials, Certificates and Licenses

Credit is awarded for the completion of learning that has been evaluated (p. 168) by Empire State University, the American Council on Education (ACE) or the National College Credit Recommendation Services (National CCRS), formerly known as the National Program on Noncollegiate Sponsored Instruction (National PONSI). These organizations have evaluated college-level training programs, credentials and licenses from government agencies, the military and the private sector.

Evaluations of Military Training and Occupations

Many areas of military training (p. 160) and occupations have been evaluated for college-level credit through the American Council on Education (ACE). Empire State University accepts credit recommendation for any military training or occupation that has been evaluated by ACE.

Individualized Credit for Prior learning

Credit is awarded for verifiable college level learning acquired through work, life experience or independent reading and study through the university's individualized credit for prior learning (iCPL) process (p. 166). ICPL is the process by which students explain and document their college-level learning, which is then assessed by an expert evaluator. For each topic for which you are requesting credit, you will write a description of what you know and how you acquired this learning. The university arranges for an expert on the topic who will review and evaluate your learning.

Individualized Credit for Prior Learning (iCPL)

INDIVIDUALIZED Credit for Prior Learning (ICPL)

Empire State University is committed to the idea that students should be awarded credit for verifiable college-level learning regardless of where or how it was acquired. Many students have gained knowledge from sources that are not validated through traditional course work, standardized examinations or evaluated professional learning. This learning can be evaluated through the individualized Credit for Prior Learning process. Individualized Credit for Prior Learning (iCPL) is the process by which students explain and document their college-level learning, which is then assessed by an expert evaluator. Most students who go through the process find it satisfying, affirming and worth the time and effort. The iPLA Guide (https://www.esc.edu/media/academic-affairs/ocar/2013-14/iPLA-2013-2014.pdf)(PDF 1,246kB) found online at www.sunyempire.edu/iPLAguide (https://www.sunyempire.edu/degree-planning-academic-review/prior-learning-assessment/individualized-prior-learning-assessment/), provides students with in-depth information on how to request credits through an assessment of prior learning. For current information on the fees associated with individualized Credit for Prior Learning, please visit Fees at Empire State University (https://www.esc.edu/student-accounts/tuition-fees/esc-fees/).

OVERALL PROCESS

Overall, the iCPL process includes the following steps:

- The student works with their mentor to develop their ICPL request. The request will identify, describe and document the student's knowledge.
- The student submit their request through CPL Planner.
- Staff in the Office of Prior Learning review the ICPL request for assignment to a qualified evaluator with expertise relevant to the subject.
- The evaluator evaluates the student's learning, which includes an interview.
- The evaluator writes and submits a credit recommendation report.
- The evaluator's credit recommendation report is reviewed and approved by a faculty committee.
- The student's evaluated credits are officially awarded and added to their record.

SOURCES OF PRIOR COLLEGE-LEVEL LEARNING

Empire State University recognizes that adults have many opportunities for valuable learning in their personal and professional lives. These include:

- Workplace training and experience
- Licenses, certifications and other credentials not evaluated by ACE, NCCRS or Empire State University
- Continuing professional education, including some training that yields continuing education units (CEUs)
- Learning acquired through open educational resources (e.g., MOOCs (Massive Open Online Courses))
- Volunteer work in the community
- Hobbies and recreational activities that have resulted in considerable learning
- Independent reading and research
- Study at postsecondary/proprietary schools that may be licensed but not accredited

Students seeking assessment of their prior learning should consult the Office of Prior Learning website. This site includes links to other resources and information related to ICPL, including fees and PLA Planner. ICPL is a student's opportunity to:

- Earn credits for their college- level knowledge
- Save money and time by being assessed in areas in which they otherwise might have been required to take courses.

Credit may be granted for verifiable college-level learning acquired through life or work experiences, but not for just the experience itself. Credit is not awarded for what has been done, even if it has been done for a long time and done well. The experience may have provided an opportunity for learning, and the credits are awarded for student knowledge. A student's mentor or the Office of Prior Learning can help them determine whether their learning might be college level and whether it would contribute to their degree program goals.

WORKING WITH A MENTOR

A student's mentor is their resource as they review their learning and develop their request for credit. Their mentor will help guide them as to:

- The form, content and length of the student's learning description.
- The amount of credit the student should request.
- The determination of how it fits into the student's degree program.
- The supporting documentation and evidence the student should include in their request.

Students and their mentors will engage in early and ongoing conversations regarding their background, potential areas for prior learning assessment and potential areas for new learning – in other words, regarding the overall scope of their degree program and plans for their new learning through enrollment in Empire State University studies. Through the Office of Prior Learning, the university provides online, print and in-person resources that support students in this process. Students can contact the Office of Prior Learning through email at plaoffice@sunyempire.edu. (plaoffice@sunyempire.edu)

IDENTIFYING COLLEGE-LEVEL LEARNING

Defining college-level learning involves many factors, a student and their mentor will discuss these. College-level learning represents a student's ability to take their knowledge and relate it within a particular context and to other contexts within and outside their field. College-level learning involves:

- Acquiring new information.
- Engaging in critical inquiry.
- Analyzing, synthesizing and integrating the information.
- Situating the knowledge within a broader context.
- Demonstrating the ability to apply it.

This may sound complex, but there are different ways that college-level learning can be demonstrated. The guide, Individualized Prior Learning Assessment: A Guide for Students (https://www.sunyempire.edu/media/academic-affairs/ocar/2013-14/iPLA-2013-2014.pdf), provides details on identifying a student's college-level learning and how to describe and document their learning. Staff in the Office of Prior Learning also can provide guidance.

WORKING WITH AN EVALUATOR

The Office of Prior Learning will select a qualified evaluator with expertise in the subject area of the learning students have described in their ICPL request. The evaluator reviews:

- The student's learning description.
- Any supporting materials the student has submitted.
- The student's planned degree program plan to determine if there are any overlaps between the learning being evaluated and other knowledge identified on the degree program.

EVALUATOR INTERVIEW

The evaluator will interview students to gain a better understanding of their learning. The evaluator will ask different questions to understand the depth and breadth of their learning. The evaluator also may ask students to provide additional documentation. Once an evaluator is assigned, students will receive an automated email with their evaluator's contact information. Students are responsible for contacting the evaluator to set up a mutually convenient time to conduct the interview. The interview needs to be in real time (e.g., in-person, over the phone, or through video conferencing or other technology-enhanced methods). Face-to-face interviews will take place at the university or an agreed upon public environment. Email interviews are not in real time and should only be used to make initial contact and for follow-up questions.

EVALUATOR RECOMMENDATION REPORT

Once the evaluator has reviewed a student's request and has interviewed them regarding their learning, the evaluator will write and submit a written recommendation report. The evaluator is expected to make an academic credit recommendation that is in keeping with the standards of an accredited and respected collegiate institution. While students and their mentors have done their best to develop appropriate titles and credit amounts, the evaluator can adjust them to best reflect the learning they have demonstrated.

AWARD OF ICPL CREDIT

For all undergraduate students, the award of credit for their prior learning is the responsibility of the faculty committee of academic review. If students are in an individualized program, the Office of Academic Review will include evaluator recommendation reports as part of their degree program proposal. Once the evaluated ICPL credits are approved by the faculty academic review committee, and submitted to the Office of the Registrar, the student's prior learning assessment credits become official and are part of their student record.

PLA PLANNER

The ICPL request review and approval process is managed through the online tool PLA Planner. In PLA Planner:

- The student will create and submit their ICPL request, which includes their learning description and any other documents, to their mentor.
- The student's mentor will review their request and provide them with feedback. Students will work closely with their mentor to make sure that the learning description clearly explains what they know, provides enough detail for Office of Prior Learning to locate an appropriate evaluator and for the evaluator to understand the nature of their learning and prepare for the interview.
- The student's mentor will submit the final draft of the request to the Office of Prior Learning, which will also review their request and may give them feedback.
- The ICPL fee will be posted to the student's account when the Office of Prior Learning accepts their request.
- The Office of Prior Learning will identify an evaluator and assign the student request.
- The student will be notified through email of the assignment. The email will include a link to the contact information for the evaluator. They are expected to contact the evaluator to set up a time for the interview.
- The student will submit any further supporting materials if the evaluator requests them.
- The evaluator will submit a recommendation report for review by the faculty committee of academic review that will review and approve the credit recommendation.
- The credits recommended by the evaluator and accepted by the faculty are sent to the Office of the Registrar.
- The Office of the Registrar adds the student's ICPL credits to their official record.

Throughout the process, a student can monitor the progress of their request through PLA Planner. The Individualized Prior Learning Assessment: A Guide for Students (https://www.esc.edu/media/academic-affairs/ocar/2013-14/iPLA-2013-2014.pdf) provides more information regarding how to use PLA Planner and an introductory quick guide that explains how to use the tool. Within PLA Planner, there is a full guide on how to use all the features in the program.

Professional Learning Evaluation (PLE)

PROFESSIONAL LEARNING EVALUATIONS

Many students have have acquired knowledge and skills from structured learning experiences offered by professional, governmental, and training agencies, or by educational organizations that are not regionally-accredited colleges or universities. Empire State University recognizes that knowledge and skills gained through these types of structured learning activities can be college-level and can apply to a SUNY Empire degree. SUNY Empire has evaluated and recommends credit for a number of licenses, certifications, training programs, and noncollegiate courses. Professional Learning Evaluation (PLE) is the term SUNY Empire uses to describe these evaluations and credit recommendations. In addition to its own PLEs, SUNY Empire accepts credit recommendations from two organizations that evaluate professional learning: The American Council on Education (ACE) and The National College Credit Recommendation Service (National CCRS). To search for available PLE credits, use the SUNY Empire PLE Search page (https://tes.collegesource.com/publicview/TES_publicview01.aspx?rid=ab2d75d5-a1a8-4086-a557-e284e58c93a2&aid=1d14f2c0-0147-4c03-b76e-5c02f9a9ebdb).

Eligibility and Evaluation Details

PLE credit is available to degree-seeking students at the university who meet the eligibility criteria for a specific PLE. Many structured learning experiences have been evaluated, but many more have not been evaluated. For those that have been evaluated, content may change, different versions of any one structured learning experience may be offered, and a PLE evaluation is usually valid for a defined period of time. Credit recommendations apply only to training received during the period of time, at the locations, and for the length of time listed in the evaluation.

Students should consult the evaluator links provided below, their mentors, or contact the Office of Prior Learning at plaoffice@sunyempire.edu for assistance in determining eligibility. In order for PLE credit to be applicable to a student's degree, learning topics must fit into the program by meeting specific degree requirements, or adding breadth and depth to their general learning.

Empire State University Professional Learning Evaluations

A SUNY Empire professional learning evaluation (PLE) is a college-credit recommendation developed by SUNY Empire for college-level learning acquired outside of a college or university. PLE credit is available to matriculated students at the university who meet the eligibility criteria for a specific PLE. Keep in mind that in order to be applicable to their degree, learning topics must fit into a student's program by meeting specific requirements, or adding breadth and depth to their general learning.

A list of current PLE can be found at www.sunyempire.edu/PLE (https://www.sunyempire.edu/PLE/) and details about credit awards and valid dates can be found at the SUNY Empire PLE Search page (https://tesequivalency.esc-atsystems.net/). Enter keywords such as the name of the organization through which the learning or certification was obtained using the "keywords" search field.

Please contact the Office of Prior Learning at plaoffice@sunyempire.edu with questions.

The American Council on Education (ACE)

The ACE National Guide (https://www.acenet.edu/national-guide/Pages/default.aspx)contains ACE credit recommendations and documentation requirements for formal courses or examinations offered by various organizations.

National College Credit Recommendation Service (National CCRS)

The National CCRS (http://www.nationalccrs.org/) has also evaluated structured learning experiences. Details about credit recommendations and documentation requirements can be found utilizing the National CCRS course credit recommendation directory (http://www.nationalccrs.org/course-credit-directory/).

Other Sources for Professional Learning Evaluations

Empire State University can accept Professional Learning Evaluations conducted within the Consortium for the Assessment of College Equivalence (CACE). If a student has a license, certificate or structured training not evaluated by ESU, ACE, or NCCRS, contact the Office of Prior Learning at plaoffice@sunyempire.edu for details of possible credit options.

Documentation

Students must provide official verification supplied from the organization that provided the structured learning experience or credential to SUNY Empire Admissions. Student copies are typically not sufficient. In some cases, certain structured learning experiences can be documented online. If online verification is not available, and a student cannot secure official documentation, they may not be eligible to use the PLE. Students should consult their mentor and the Office of Prior Learning.

Partnerships

With our focus on working adults, many of our students enroll through one of our partnership programs. The university has formal partnerships with military and veteran organizations, labor unions, other colleges, associations and corporations.

MILITARY AND VETERAN EDUCATIONAL PARTNERSHIPS

- **Air Force** – As an approved school in the United States Air Force Academic Institution (AI) portal, Empire State University offers Air University-Associate to Baccalaureate Cooperative (AU-ABC) programs, Air Force Specialty Code (AFSC) and non-AFSC-related associate and bachelor's degree programs designed to meet the educational needs of airmen based on their military training and their educational goals. The university also participates in the Air Force General Education Mobile (GEM) program. For more information, go to the university's Air Force Distance Learning Program web page (https://www.sunyempire.edu/veteran-military/other-groups-served/air-force/).

- **Army** – SUNY Empire is an active member of the United States Army's ArmyIgnitED program offering undergraduate and graduate degrees to active-duty, reserve and National Guard soldiers. Visit the Army Ignited web site (https://www.armyignited.army.mil/student/public/welcome/).

- **Coast Guard** – SUNY Empire offers cutting-edge degree concentrations to meet the needs of Coast Guard members across the globe. For more information, go to the university's United States

Coast Guard web page (https://www.sunyempire.edu/veteran-military/other-groups-served/coast-guard/).

- **Navy** – SUNY Empire offers a wide range of degrees designed to meet the educational needs of sailors based on their military training. For more information, go to the university's Navy College Program web page (http://www.sunyempire.edu/Navy/).
- **U.S. Marine Corp** – Marines can earn a degree with the flexibility they need to meet other family, work and community commitments in their lives. For more information, go to the university's Marine Corps web page (https://www.sunyempire.edu/veteran-military/other-groups-served/marine-academic-explorer/).

In addition, Empire State University is a DOD MOU signatory and affirms and supports the principles and guidelines of the MOU.

For information about military and veteran education partnerships, please contact:

Desiree Drindak
Director of Veteran Military Education
518-587-2100, ext. 2543
Desiree.Drindak@sunyempire.edu

LABOR UNION PARTNERSHIPS

- American Federation of Government Employees
- Building and Construction Trades Council of Nassau and Suffolk Counties
- Communications Workers of America, District 1
- Construction Trades License Training Program
- Independent Drivers Guild - IAMAW
- International Association of Machinist and Aerospace Workers (IAMAW)
- International Brotherhood of Electrical Workers, Local 3
- International Union of Painters and Allied Trades
- Labor Council for Latin American Advancement, NYC Chapter
- Local 338
- NYC District Council of Carpenters
- Plumbing Contractors Association of Long Island
- Restaurant Opportunities Center United (ROC)
- SMART Local 28 Sheet Metal Workers Union of Metropolitan New York and Long Island
- The Laundry Workers Center
- Union Plus
- United Association of Plumbers and Pipefitters
- United Federation of Teachers Paraprofessional Program
- United Steelworkers - Institute for Career Development, Inc.
- Worker's Justice Project

Unions that are interested in developing partnerships, please contact:

Maria Figueroa, MPA, LPD
Dean
Harry Van Arsdale Jr. School for Labor Studies
917-612-9133
maria.figueroa@sunyempire.edu

COMMUNITY COLLEGE PARTNERSHIPS

The Pathways Transfer Program is for community college students who have completed, or will complete, an associate degree (A.A., A.S. or A.A.S.) prior to enrolling at Empire State University. The program is designed to support student success by easing the transition from classroom-based learning at the community college to a flexible mix of independent study and online courses found at SUNY Empire. During the first year at SUNY Empire and with advisement from their faculty mentor, students can take additional courses back at their community college, beyond the associate degree, for a total of 79 transferable lower division credits.

At Empire State University, all new students are assigned a faculty mentor who will advise and work with them through completion of their degree program. With the guidance of a mentor, students develop a degree program that builds upon their associate degree while connecting their educational, career and personal goals.

CURRENT PARTNERS (https://www.esc.edu/academic-affairs/community-college-and-academic-partnerships/)

State University of New York (SUNY):

- Adirondack Community College.
- Broome Community College.
- Cayuga Community College.
- Clinton Community College.
- Columbia-Greene Community College.
- Corning Community College.
- Dutchess Community College.
- Erie Community College.
- Finger Lakes Community College.
- Fulton-Montgomery Community College.
- Genesee Community College.
- Herkimer County Community College.
- Hudson Valley Community College.
- Jamestown Community College.
- Jefferson Community College.
- Mohawk Valley Community College.
- Monroe Community College.
- Nassau Community College.
- Niagara County Community College.
- North Country Community College.
- Onondaga Community College.
- Orange County Community College.
- Rockland Community College.
- Schenectady County Community College.
- Suffolk County Community College.
- Sullivan County Community College.
- Tompkins Cortland Community College.
- Ulster County Community College.
- Westchester Community College.

City University of New York (CUNY):

- Borough of Manhattan Community College.
- Bronx Community College.
- Guttman Community College.
- Hostos Community College.
- Kingsborough Community College.
- LaGuardia Community College.
- Queensborough Community College.

Other College Partners:

- Belanger School of Nursing of Ellis Medicine (NY)
- Bergen Community College (NJ)
- Brookdale Community College (NJ)
- Central Texas College
- City College of San Francisco
- Community College of Vermont
- CUNY School of Professional Studies (NYC)
- Hillsborough Community College (FL)
- Hunter Business School (NY)
- Ivy Tech Community College (IN)
- Long Island Business Institute (NY) - Teach Out
- Maria College (NY)
- Maricopa County Community College District (AZ, all campuses)
  - Rio Salado College and Rio National
- Ozarks Technical Community College (MO)
- Pikes Peak Community College (CO)
- Sinclair College (OH)
- SUNY Alfred (NY)
- SUNY Canton (NY)
- SUNY Cobleskill (NY)
- SUNY College of Optometry (NY)
- SUNY Morrisville (NY)
- Tidewater Community College (VA)

For more information, please contact Dr. Brian Goodale, Director of Academic Partnerships at Brian.Goodale@sunyempire.edu.

CORPORATE AND COMMUNITY PARTNERSHIPS

SUNY Empire has partnered with many corporations, businesses, community organizations and associations to provide high-quality, affordable education to working adults. Please visit our Partnership Programs web page (http://www.sunyempire.edu/partnership-programs/) to learn about corporate and community partner benefits.

As a single-source solution for educational and work force development needs, the university offers its partners:

- High-quality academic programs
- Affordable tuition
- Flexible, convenient online study options
- Faculty mentors with in-depth expertise in key industries

For more information about Empire State University partnerships, please visit the university's Partnership Programs web page (http://www.sunyempire.edu/partnership-programs/) or contact:

Kelly Mollica
Director of Partnerships
518-580-2968
Kelly.Mollica@sunyempire.edu (kelly.mollica@sunyempire.edu)

Getting Started and Registration

You are about to begin an educational adventure, a degree program in which you make important decisions about what you will study and how you will study it. You will take an active part in every aspect of your educational planning, from understanding the requirements to reach your goals to identifying what you have already learned and how that contributes to those goals. In developing your degree program and deciding what you will study, you cultivate a capacity for self-directed study that forms the basis for lifelong learning and growth. For more information on planning your degree, review the chapter titled Earning an Undergraduate Degree (p. 185).

TERMS

The university offers three terms: Fall, Spring and Summer.

- Fall (usually begins in early September), 15 weeks
- Spring (usually begins in mid-January), 15 weeks
- Summer (usually begins in early May), 15 weeks

Each term may contain shorter sessions. Please see the University Calendar (p. 154).

Your Mentor

As you enter the university, you will be assigned a faculty mentor. The university uses the term mentor because its faculty members are more than teachers or professors. Besides providing instruction in their own fields of specialization, mentors advise students about the academic alternatives open to them. Your mentor is your academic guide at Empire State University, assisting you and advising you as you develop your degree program and as you create a body of work through your studies. Your mentor will help you identify the learning resources that you need for each of your studies.

Planning Your Courses

The university defines specific periods for advising, course preparation and registration for each term. The registration periods for the 2024-2025 academic year can be found in the University Calendar section (p. 154). During that time, you contact your mentor and schedule a time to review your goals and your progress toward those goals, and to plan for the upcoming term. The discussions that you have with your mentor are vital to your success at SUNY Empire. You and your mentor carefully consider the courses you select for each enrollment term. Begin this process early, so that you have all of the information and resources you need to begin your courses on time. Your conversations with your mentor may be in person, on the telephone, online or some combination.

During the advising and registration period, the upcoming term guide is available online through MySUNYEmpire. The term guide describes the rich array of topics available to you, and who is available to guide you in each course. You may select from guided independent study, online courses, study groups and residency-based courses. You also may look at the offerings at other colleges and universities near you and consider including them in your course plan for the term. This is known as cross registration. If you consider taking coursework with other institutions, it's important for you to work closely with your mentor to ensure the course is applicable toward your degree requirements, and to also assist you

with the additional steps needed. For more information about course delivery, please see Earning an Undergraduate Degree (p. 185).

MYSUNYEMPIRE

MySUNYEmpire (http://my.sunyempire.edu) is your password-protected online gateway to information and services for students at SUNY Empire. To begin registration, you will need a user ID and login to access MySUNYEmpire. Your login information will be received through email communication.

Registration

Once you and your mentor have agreed upon the course plan for the upcoming term and registration is open, register online through Self Service Banner (http://my.sunyempire.edu). Registering secures your place in courses that may reach capacity early and allows sufficient time to finalize any learning contracts with your instructors and to get your books and materials before the start of the term. Logging into MySUNYEmpire (http://my.sunyempire.edu) and registering signifies that you are enrolling in courses and that you agree to pay the tuition and fees by the payment due date. For more information, please see Tuition and Fees (p. 173).

The university loans a limited number of devices to students in financial need. Please visit https://www.sunyempire.edu/student-affairs/student-life/laptop-loan-program/ to learn more.

Late Registration

Students may register after the regular advising and registration period ends, contingent upon the availability of courses and instructors. Students who register during the late registration period must pay their bills at the time of registration or have sufficient financial aid (or combination of financial aid and payment) to cover their bills including a late registration fee. Please see information on tuition and fees, and billing (p. 173).

Add/Drop

You may modify an existing registration for a particular term through the first week of the term. A student may drop one or more of their courses during this period and receive a 100 percent refund in tuition as per the current withdrawal policy. Please note, the college fee, student activity fee and late registration fee are not refundable if a student withdraws on the start date or after. A student may modify an existing registration, add or replace a course (if available) with no late fee. The student is responsible for any additional tuition and fees that arise from an increase in the number of credits in the enrollment.

Registration Holds

Students who have registration holds, which the university puts in place when students do not meet academic or administrative requirements, will not be permitted to register. Students who are not registered will not receive instructional services. Any holds that a student has will appear on the student's registration screen on MySUNYEmpire (http://my.sunyempire.edu). The following listing identifies the most common holds and which office to contact for assistance in resolving the hold.

- Immunization hold indicates that the student has not provided proof of immunity for mumps, measles and rubella. Contact Admissions at 518-587-2100, ext. 2402.
- Accounts receivable hold indicates that the student has a past due balance that must be paid before the student may register or receive any other services from the university. If you have any questions, contact the 1 Stop Student Services at 800-847-3000.
- Academic dismissal hold indicates that the student has been dismissed for not meeting the university's academic requirements. The student should contact 1 Stop Student Services (https://www.sunyempire.edu/1-stop-student-services/).

Financial Aid

If you must have financial aid to cover your tuition and fees, you must file by April 1, each year. If you do not apply on time, the financial aid that you need may not be in place by the payment due date. If you cannot cover the costs, your registration for the term will be cancelled. Students who plan to enroll for the first time (or after a long absence) must allow at least eight weeks for financial aid processing and should plan accordingly. For more information on financial aid, please see the chapter titled Financial Aid (p. 178).

Registration Cancellation
Nonpayment

The university will cancel a student's registration if he or she does not pay or have sufficient financial aid to cover the bill by the payment due date (p. 173). A student who is not registered receives no instructional services. The university will notify the student by email if their registration has been cancelled.

Academic and Administrative Requirements

The university reviews certain academic and administrative requirements after a student registers. These include accounts receivable holds, immunization holds and academic holds. The university will cancel a student's registration for the term if the student does not meet these requirements on the last day of late registration. A student who is not registered receives no instructional services. The university will notify the student if their registration has been cancelled.

Registration Information for Nondegree-Seeking (Nonmatriculated) Students

You may wish to engage in college-level study with no intention to earn a degree. You can take courses with SUNY Empire even if you are not pursuing a degree. Nondegree, or nonmatriculated, study is a great way to:

- Experience or prepare for college-level study.
- Stay current in your field.
- Earn credit toward a degree at another college or university.
- Improve your skills.
- Train for employment.
- Personal enrichment.

To enroll as a nondegree student at the undergraduate level, please complete the brief online Application for Nondegree Study. First-time nonmatriculated students will receive a welcome email with a user ID and login information. You will register online through MySUNYEmpire (http://my.sunyempire.edu). Logging into **MySUNYEmpire** and registering signifies that you are enrolling in courses and that you agree to pay the tuition and fees by the payment due date. For more information, please see **Tuition and Fees**.

Your course registration is on a space available basis and not guaranteed. Financial Aid is not applicable toward non-degree

coursework. Please contact 1 Stop Student Services (https://www.sunyempire.edu/1-stop-student-services/) for more information.

Immunization Requirements

New York state law requires certain immunizations for college students. New York State Public Health Law 2165 requires that all students who were born on or after Jan. 1, 1957, who plan to register for at least 6 or more credits will be required to provide the university with proof of immunization against measles, mumps and rubella, or obtain an exemption for religious or medical reasons. Students will not be able to register for courses without proof of immunization. According to the New York State Department of Health, students registered for online courses only do not have to comply with these requirements.

New York State Public Health Law 2167 requires colleges and universities to distribute information about meningococcal disease and vaccination to all students meeting enrollment criteria. The university must receive either a record of meningococcal meningitis immunization within the past 10 years or a signed acknowledgement of meningococcal disease risks and refusal of meningococcal meningitis immunization from all students. For more detailed information, visit the Empire State University Immunization Requirement web page (https://www.sunyempire.edu/admissions/immunization/immunization-requirements/).

Tuition and Fees (Undergraduate)
Registration

Empire State University's regional locations and online, you may begin your study at the start dates of our three terms - fall, spring and summer (p. 154) - during the academic year. Each term also contains two overlapping 8-week express terms. Please see the University Calendar section (p. 154) or the Office of the Registrar's web page (https://www.sunyempire.edu/registrar/) for academic calendar details. Although you may enroll in terms that overlap, you may not receive financial aid for any term that begins during your enrollment in a previous term. Please see the section on financial aid (p. 178) for more information.

Students who enroll in The Harry Van Arsdale Jr. Apprentice Program and the School for Graduate Studies enroll in terms that typically begin in September, January and May.

Students who enroll in the School of Nursing and Allied Health may begin in the Fall or Spring terms. They also may take studies or courses during the Summer term.

Students register for studies or courses at the university by meeting with a faculty mentor and completing the online registration process that defines what and with whom they will study.

Registration periods for the 2024-2025 academic year

Term	Advising, Study Preparation and Registration Period	Add/Drop Period[1]	Term Start	Term End
Fall 2024 Term	Apr. 9 to Sept. 2	Sept. 3 - 9	Sept. 3	Dec. 13
Fall 2024 Express Term One	Apr. 9 to Sept. 2	Sept. 3 - 9	Sept. 3	Oct. 25
Fall 2024 Express Term Two	Apr. 9 to Oct. 20	Oct. 21 - 27	Oct. 21	Dec. 13
Spring 2025 Term	Oct. 8 to Jan. 12	Jan. 13 - 19	Jan. 13	Apr. 25
Spring 2025 Express Term One	Oct. 8 to Jan. 12	Jan. 13 - 19	Jan. 13	Mar. 7
Spring 2025 Express Term Two	Oct. 8 to Mar. 2	Mar. 3 - 9	Mar. 3	Apr. 25
Summer 2025 Term	Feb. 4 to May 11	May 12 - 18	May 12	Aug. 22
Summer 2025 Express Term One	Feb. 4 to May 11	May 12 - 18	May 12	July 3
Summer 2025 Express Term Two	Feb. 4 to June 15	June 16 - 22	June 16	Aug. 8

Enrollment Status - Full-time and Part-time

Undergraduate students enrolled in 12 or more credits in an enrollment term are considered full time. Undergraduate students enrolled for 11 or fewer credits in an enrollment term are considered part time.

Graduate students enrolled in 9 or more credits in an enrollment term are considered full time. Graduate students enrolled for 8 or fewer credits in an enrollment term are considered part time.

Billing

The submission of an online registration initiates billing and is a business contract between you and the university. It permits you to begin study at Empire State University and obligates you to pay tuition and all applicable fees. This must be completed and submitted online by the student by the Last Date for Payment for the selected term. The Last Date for Payment for each term can be found on the Payment Due Date web page (https://www.sunyempire.edu/student-accounts/billing-payment/how-you-are-billed/payment-due-dates/). If you register after the payment due date, your payment is due immediately.

Once the online registration information is complete and submitted electronically, a term invoice (bill) will be generated and made available to you online at the Student Accounts page (https://my.sunyempire.edu/StudentAccounts/Pages/default.aspx) on the MySUNYEmpire (https://my.sunyempire.edu/) portal.

Students should review their Student Account Statement on MySUNYEmpire after registering. If you have any questions, please contact 1Stop Student Services.

Students are considered enrolled unless they officially withdraw. Failure to engage in studies does not relieve a student from his or her financial responsibility.

Undergraduate Tuition and Fees [1]

Tuition and fees are subject to change without prior notice by action of the SUNY Board of Trustees.

Resident Type	Credits	Tuition Per Term
NYS Residents[2]		
Students must live in NYS for the full year (12 months) prior to the term starting and have an intent to make NY their permanent home (domicile) in order to receive NYS resident rates.	1-11	$295 per credit
	12+	$3,535 per term
Online Out-of-State Residents		
Rate applies to nonresident students enrolled in an approved distance learning degree program.	1-11	$353 per credit
Out-of-State Residents		

| Nonresident students who attended an approved New York state high school for two or more years, graduated from an approved New York state high school, or received a NYS GED and who applied for admission to the State University of New York within five years of receiving a New York state high-school diploma/GED may be eligible for in-state rates. | 1-11 | $708 per credit, less $355 SUNY Empire Nonresident Grant[3] for a net tuition charge of **$353** |
| | 12+ | $8,490, less $4,250 SUNY Empire Nonresident Grant for a net tuition charge of **$4,240** |

For changes in residency status, see NYS Residency for Tuition Billing Purposes below.

All enrolled students also are subject to the fees listed below:[4]

Fee	Description
Mandatory fees per term	
College fee	$1.70 per credit up to $25.00 maximum for 12+ credits
Student activity fee	$8.75 per credit up to $35 maximum
Technology fee	$185 per term
Health and wellness fee	$15 per term for enrollments less than 12 credits
	$35 per term for enrollments of 12 or more credits
Other related fees	
Orientation fee	$50 per application to the university
Portfolio (assessment) fee	$315 at initial undergraduate matriculated enrollment (one time)

Individualized Credit for Prior Learning (ICPL) fee	The Individualized Credit for Prior Learning (ICPL) fee is a $700 flat fee. The fee is charged at the time a student's individualized credit for prior learning request is accepted at the office of academic review and is nonrefundable once the request is accepted. If a student has been charged any amount for individualized credit for prior learning under the previous fee tiered structure, they will not be charged an additional ICPL fee. For example, if a student has requested 8 credits of individualized credit for prior learning and paid a $350 fee in the past, that student will not be charged again for additional credit for prior learning assessments. Students who were charged the previous Individual Evaluation Fee (IEF) are also exempt from the ICPL fee. We have discontinued other grandfathering of fees based on first matriculation date. Only students who have previously paid any ICPL or IEF fees will not be charged for additional assessments.
Residency fee	Varies. Certain courses require an additional fee for residency activities.
Service related fees	
Time Payment Plan	$25 nonrefundable application fee per term
Time Payment Plan late payment fee	$30 for each late Time Payment Plan payment
Late registration fee	$50 (each term) if initial registration for a term is submitted once the term begins
Returned Check/Charge	$20
Academic Transcript	$10 per transcript

Tuition and fees are subject to change.

[1] For more complete tuition and fee information visit Tuition and Fees web page (https://www.sunyempire.edu/student-accounts/tuition-fees/).

[2] Only students who have resided in New York state for 12 months before the enrollment term and are considered to be a domiciled resident qualify for in-state tuition rates. For more information about this requirement, including exceptions to the domicile rule, see NYS Residency for Tuition Purposes and visit the Policy on New York State Residency web page (https://www.sunyempire.edu/student-accounts/billing-payment/how-charges-calculated/nys-residency/).

[3] **All** nonresident students attending SUNY Empire are automatically eligible for an Empire State University nonresident tuition grant to offset their educational costs.

[4] **All** active-duty military, guard, reservists and veterans are eligible for an Empire State University military grant of $45 per credit to offset their educational costs. The net tuition for military students is $250

per credit. All fees, except service-related fees and residency fees for residency-based courses, are waived.

University Billing Policy

The university requires that tuition and all mandatory fees be paid or that a Time Payment Plan be established no later than the payment due date for the enrollment term. Your payment is due by the term payment due date. You will not receive a paper bill and may instead view your student account statement in MySUNYEmpire. If you fail to pay, make Time Payment Plan arrangements or have approved financial aid by the last date for payment, your registration may be cancelled, and you may lose your place in an online course or study group. If your registration is cancelled and you re-register any time after the payment due date, you will be charged a $50 late registration fee.

Payment Due Dates for the Academic Year 2024-2025

Term	Payment Due Date[1]
Fall Term 2024	Aug. 30, 2024
Fall Express Term One 2024	Aug. 30, 2024
Fall Express Term Two 2024	Oct. 18, 2024
Spring Term 2025	Jan. 10, 2025
Spring Express Term One 2025	Jan. 10, 2025
Spring Express Term Two 2025	Feb. 28, 2025
Summer Term 2025	May 9, 2025
Summer Express Term One 2025	May 9, 2025
Summer Express Term Two 2025	June 13, 2025

[1] Please visit the Payment Due Dates web page (https://www.sunyempire.edu/student-accounts/billing-payment/how-you-are-billed/payment-due-dates/) for up-to-date information.

Late Registration

A Late Registration Fee of $50 will be assessed for registrations made once the term begins.

Term	Late Registration Fee Assessed
Fall 2024 Term	Sept. 3, 2024
Fall 2024 Express Term One	Sept. 3, 2024
Fall 2024 Express Term Two	Oct. 21, 2024
Spring 2025 Term	Jan. 13, 2025
Spring 2025 Express Term One	Jan. 13, 2025
Spring 2025 Express Term Two	Mar. 3, 2025
Summer Term 2025	May 12, 2025
Summer 2025 Express Term One	May 12, 2025
Summer 2025 Express Term Two	June 16, 2025

Payment Procedures

The preferred method of payment is online through MySUNYEmpire (https://my.sunyempire.edu), with a debit or credit card (Discover, MasterCard, VISA or American Express) or by check (credit card checks cannot be processed as e-payments).

You also may pay your bill with a check or money order (do not send cash) made payable to Empire State University. To mail your payment, print your Student Account Statement or include the payment stub from your Student Account Statement and mail it along with your payment to:

Empire State University

Student Accounts
111 West Ave.
Saratoga Springs, NY 12866-6069

Payment must be received by the payment due date to avoid cancellation of your registration.

As a prospective student, you are urged, if you have not done so already, to apply for financial aid at least eight weeks before the payment due date for the term. Students who cannot pay tuition and fees or set up a Time Payment Plan by the payment due date should enroll in a later term.

NYS Residency for Tuition Billing Purposes

A student's initial residency status is determined at the time of entry into the university and monitored thereafter according to SUNY policy. Students must live in and be a domiciled resident of New York state for a period of 12 months prior to the start of a term in order to receive NYS resident tuition rates for that term. You are considered a NYS resident for tuition purposes if you meet the following requirements:

1. If you attest that you are a New York state resident on your admissions (matriculated or nonmatriculated) application
2. You have lived in the state of New York for at least the full prior year and are considered a domiciled resident.

Definition of Domicile: A fixed, permanent home, for legal purposes, to which a person returns after a period of absence.

Please note that living in the state of New York alone does not meet the residency requirements for tuition purposes. If you do not meet the above requirements, you will be considered a nonresident for tuition purposes and charged nonresident tuition rates.

Exceptions to the domicile rule:

1. If you attended an approved New York state high school for two or more years, graduated from an approved New York state high school and applied for admission to the State University of New York within five years of receiving a New York state high school diploma; or
2. If you attended an approved New York state program for a general equivalency diploma exam preparation, received a GED and applied for admission to the State University of New York within five years of receiving the GED.

If you are charged nonresident tuition rates and believe you meet the criteria for NYS residency for tuition purposes, you must apply for a change in residency status using the New York State Residency application form at MySUNYEmpire's Forms and Publications page (https://webforms.sunyempire.edu/students/). You must include at least three documents demonstrating an established domicile in New York state. All documents must be dated one year or prior to the start date of the semester for which you are applying for residency. The burden of proof is upon the applicant to provide documentation that he/she has established a domicile in New York state or meets the eligibility requirements for an exception to the domicile rule. For more information, visit the State University of New York policy titled "Residency, Establishment of for Tuition Purposes (http://www.suny.edu/sunypp/documents.cfm?doc_id=402)."

Completed residency applications must be submitted by the last date of add/drop period for the term which tuition is due. Applications received after the last date for drop/add will be reviewed and will become effective for the next term, if approved.

Time Payment Plan

Empire State University offers an interest-free, low-cost payment plan, through TouchNet, to pay your charges in convenient installments. The time payment plan has a nonrefundable application fee of $25 per term. There is a $30 late payment fee for each Time Payment Plan payment if it is made after the due date. The minimum amount of eligible charges to enroll in the Time Payment Plan is $100.

To enroll in the plan you must agree to the terms and conditions of the payment plan and also make your first payment by the due date specified in your payment plan agreement. You may get detailed information on the Time Payment Plan on the Time Payment Plan Terms and Conditions web page (https://www.sunyempire.edu/student-accounts/billing-payment/how-to-pay/time-payment-plan-terms/) or call 800-847-3000, ext. 2285. You must enroll in the Time Payment Plan each term you wish to use this as your method of payment. The university reserves the right to deny future payment plan privileges when a student's payments have not been made as indicated in their payment plan agreement.

Third-Party Payments

Students may be able to defer payment of tuition and fees if they have sponsorship from a third party such as an employer or union. Students must submit a payment authorization from their sponsor to studentaccounts@sunyempire.edu, fax 518-580-4790 or mail to:

Empire State University
Student Accounts
111 West Ave.
Saratoga Springs, NY 12866-6069

The university will review and if approved, the amount will show as estimated aid on the student's account statement. The university only accepts payment authorizations that are a guarantee of payment to Empire State University. We cannot accept authorizations that are outcome dependent. For more information, visit the third-party sponsorship web page (http://www.sunyempire.edu/thirdparty/) or contact the 1Stop Student Services at 800-847-3000, ext. 2285.

If a third party sponsorship is not paid for any reason, or a voucher is not finalized, the student is responsible for any outstanding balance. A credit balance created as the result of a student's withdrawal from any or all courses will be returned in accordance with the terms and conditions of the sponsorship.

Unpaid Accounts

A balance is any charge remaining or created on an account. Once an account is identified as having a past due balance, an accounts receivable financial hold is placed on the student's account and services from the university, including registration and grades, are restricted until the balance is paid in full. Unpaid accounts are forwarded to a third-party collection agency or the Office of the Attorney General at which time interest and/or fees are retroactively assessed based on the date of your first billing statement. The attorney general's office may certify the debt to the New York State Department of Tax and Finance Offset Program. All costs associated with the collection of overdue accounts are the responsibility of the student. Delinquent accounts may be reported to a credit agency. The State University reserves the right to withhold academic records from any student who has not satisfied all obligations. Any student with an outstanding financial balance due at the end of a term will not be able to register for a subsequent term or receive any other services from the university until the balance is paid.

Withdrawal Liability and Refund Policy

To officially withdraw from one or more studies at any point in the term, a student must withdraw online by logging into their MySUNYEmpire (https://my.sunyempire.edu) account. If a student is withdrawing from one or more studies and they have incurred 100% tuition and fee liability the student is required to complete a Withdrawal Form available on the Withdrawal Form and Instructions web page (https://www.sunyempire.edu/registrar/forms-services/withdrawal/) and mail or fax it to the Office of the Registrar for processing. The effective date of the withdrawal will be the postmark date of the envelope or the date the fax is received. Contact the Office of the Registrar at RegistrarsOffice@sunyempire.edu or by phone regarding any questions or concerns. A student is considered officially enrolled for their courses until they have withdrawn online or have submitted a Withdrawal Form to the Office of the Registrar. Liability will be calculated according to the State University of New York withdrawal/refund policy. If a student withdraws before the enrollment start date, then 100% of all tuition and fees are refundable. If a student withdraws on the start date or after, the college fee, the student activity fee and late registration fee are nonrefundable.

For standard 15 week terms, the technology fee, health and wellness fee, and tuition are subject to the following liability schedule:

Effective date of withdrawal	Liability percent
Prior to Term Start	**0 percent** (100% Tuition refund)
Calendar Day 1-7	**0 percent** (100% Tuition Refund)
Calendar Day 8-14	**30 percent** (70% Tuition Refund)
Calendar Day 15-21	**50 percent** (50% Tuition Refund)
Calendar Day 22-28	**70 percent** (30% Tuition Refund)
Calendar Day 29 and After	**100 percent** (0% Tuition Refund)

The first date of the term is Day 1. A liability table for terms other than 15 weeks in length can be found on the Withdrawal Form and Instructions web page, under Student Account.

Additional information about withdrawals:

- Prorated liability applies only for official student withdrawals and are calculated according to the effective date of the student's withdrawal. The liability chart does not apply to Administrative Withdrawals (ZWs) which incur 100 percent tuition liability.
- If a withdrawal creates a credit on a student's account, a refund will be issued within 28 days. Refunds are issued according to the method of payment.
- Withdrawals and Administrative Withdrawals may impact current and future financial aid eligibility. If you receive financial aid and are withdrawing from one or more courses, federal and state aid eligibility may be affected. Please see the sections on eligibility under Federal and New York State Financial Aid in this catalog.
- If you are forced to withdraw from your studies due to unforeseen and extenuating circumstances, you may request an exception to the university's written withdrawal policy from the Office of Administration through Student Accounts. Contact Student Accounts (http://www.sunyempire.edu/AskSA/) for more information.

For complete information about withdrawals, visit the Withdrawal Form and Instructions web page (https://www.sunyempire.edu/registrar/forms-services/withdrawal/).

Financial Aid

The purpose of financial aid is to provide assistance to matriculated students whose financial resources are inadequate to meet the costs of their education. Financial aid is intended to supplement, not replace, a family's resources. A family's resources include the student's resources; spouse's resources, if married at the time of application; and parents' resources, if the student is a dependent. For that reason, most families should think of themselves as the first – and probably primary – source of funds for college. Annual family taxable and nontaxable income is not the only factor that is considered in evaluating eligibility for financial aid. A family's assets also are considered, since a family with assets (such as a savings account or investments) is considered to be in a stronger financial position than a family with the same income, but no assets.

Financial aid programs vary widely as to their precise qualifications, but awards are generally determined on the basis of the eligibility criteria of the specific aid program, and without regard to sex, age, race and ethnicity, color, religion, disability, national origin, sexual orientation, military status or marital status, although special opportunities for underrepresented student populations do exist. With the exceptions noted, the major financial aid programs are open to part-time as well as to full-time students.

Most programs are open to United States citizens, nationals and permanent residents who have declared their intent to become United States citizens. Persons holding temporary student, exchange visitor or visitor visas are not eligible.

A student's eligibility cannot be determined until he or she provides full information about financial need by filing the Free Application for Federal Student Aid (FAFSA). All financial aid applications, as well as detailed descriptions of financial aid, are available on the Office of Financial Aid web site (https://www.sunyempire.edu/financial-aid/). You are advised to apply for all assistance programs for which you may be eligible at least six weeks before your expected date of enrollment. All financial aid programs must be applied for annually after the first of the year.

There are three types of aid available at Empire State University:

1. Grants/scholarships – money that does not need to be repaid;
2. Loans – money that students borrow which must be repaid with interest;
3. Work study – student employment.

Priority Deadlines

The priority deadline dates for applying for financial aid is six weeks prior to the start date of the term. However, for students applying for Institutional scholarships the FAFSA priority deadline is April 1. Likewise, due to limited funding for Federal SEOG and APTS the priority deadline is April 1. Any applications received after April 1 will be considered until all funds are exhausted.

Financial aid files completed after the financial aid priority deadline date will be reviewed. However, the Office of Financial Aid cannot guarantee that financial aid will be processed in time for the student to register with a financial aid deferral. A federal financial aid file is complete when the university has received valid FAFSA data from the federal processor and all other documentation requested by the Office of Financial Aid. Completed files and APTS applications are reviewed on a first-come, first-served basis.

Summer Aid

Students may be eligible to receive financial aid for the summer term if all eligibility requirements are met. Financial aid packages are initially awarded for the Fall and Spring terms. Students enrolling in a summer term will have their award package updated to include summer within 5-7 business days of completing their summer registration. Accepting financial aid awards for the summer term may affect the amount of aid available for the following Fall and Spring terms.

Eligibility for Federal Financial Aid

(Please see the Eligibility for Federal Financial Aid Policy (http://www.sunyempire.edu/policies/?search=cid%3D36216) on the university's policy web site (https://www.sunyempire.edu/policies/).)

Award programs affected by the federal standards include:

- Federal Pell Grant
- Federal Work-Study
- Federal Supplemental Educational Opportunity Grants (SEOG)
- Federal Direct Loan Program – includes:
    - Subsidized and Unsubsidized loans, the Parent Loan for Undergraduate Students (PLUS)

Good Academic Standing

Good academic standing standards must be met in order to be eligible to receive federal financial aid.

Quantitative Standard

The Quantitative Measure requires that students are successfully completing at least 67 percent of all credits attempted. Credits attempted include standard credits, repeated courses and withdrawn courses with a ZW or WD status.

Qualitative Standard (Grade Point Average)

Students are required to maintain a minimum grade point average (GPA). The grade point average calculation is determined through the Academic Grading Policy. Undergraduate students who opt to receive grades must maintain a minimum GPA of 2.0. Graduate students must maintain a minimum GPA of 3.0.

Maximum Timeframe

Students must progress through their program to ensure that they will graduate within the maximum time frame. The maximum time frame is a period no longer than 150 percent of the published length of the program as determined by federal regulations. Students are eligible for financial aid up to the maximum of 150 percent of their program of study, assuming they also are meeting the required Quantitative and Qualitative standards. For example, the maximum timeframe for a student in a bachelor's degree program consisting of 124 credits would be 186 credits attempted (124 X 150% = 186). For transfer students, the maximum is based on the number of transcript credits accepted by Empire State University plus the number of credits attempted at SUNY Empire.

Federal guidelines do not allow waivers for mitigating circumstances that would extend a student's aid past the 150 percent limit.

Regaining Federal Financial Aid Eligibility

A student who is academically dismissed and is subsequently reinstated by the university must accumulate the number of credits required to meet the federal satisfactory academic standards of a 67 percent completion

rate and earn at least a 2.00 cumulative grade point average in order to regain federal aid eligibility.

Pell Grant Maximum Duration of Eligibility

Students may only qualify for the Federal Pell Grant for a maximum of the equivalent of 12 full-time terms in accordance with the Appropriations Act of 2012.

The Effect of Withdrawal and/or Disengaging From Part of the Studies for the Term

If a student withdraws and/or disengages from any or all of their courses, his or her enrollment status (full or part time) and/or SAP rate may be affected, depending on the effective date of the withdrawal and/or disengagement. Each of these may in turn affect federal aid eligibility.

In calculating enrollment status and rate of academic progress, "credits attempted" is the number of registered credits on day 9 of the term, after add/drop ends.

Withdrawal and/or disengaging at any point in the term may result in a reduction of financial aid. If this occurs, the student will be required to pay back any funds for which he or she no longer qualifies. Financial Aid calculates such award adjustments individually using federal formulas. Further information may be obtained from the Office of Financial Aid at FinancialAid@sunyempire.edu.

The Effect of Withdrawal, Administrative Withdrawal (Disengagement from Course or Study) or Dropping From Studies

Withdrawal and/or disengaging from the university prior to the end of an enrollment term will cause you to use a full financial aid award period's eligibility. A student will be ineligible for additional financial aid of the same type if re-enrolling within the same financial aid award period. All financial aid will be adjusted using federal and state guidelines for the cycle in which you withdraw.

In accordance with rules established by the U.S. Department of Education, schools must adhere to provisions regarding the treatment of Federal Title IV Financial Aid for students that withdraw from school completely for any term. These rules govern all federal loan and grant programs, including Direct Loans, PLUS Loans, Pell and SEOG.

In general, students earn federal financial aid awards directly in proportion to the number of days of the term attended. In other words, a student earns financial assistance as they complete their studies throughout a term. If a student completely withdraws and/or disengages from all studies during a term, the university must calculate the portion of the total scheduled financial assistance earned. **In the event that the student is enrolled in courses that have different start and/or end dates from other courses that also are being taken for the term, and the student withdraws or is administratively withdrawn from any of the courses for the term, the school must calculate the portion of the total scheduled financial assistance earned.** If the student received (or the university received on behalf of the student) more assistance than was earned, the unearned excess funds must be returned to the federal programs.

The portion of federal loans and grants the student earned is calculated on a percentage basis comparing the total number of calendar days in the term to the number of days completed before withdrawal. (Scheduled breaks of five consecutive days or longer are excluded from the calculation.) Whatever percentage of the term the student attends is the percentage of Title IV that is earned. Once the student exceeds the 60 percent point of the enrollment period, the student has earned 100 percent of the Title IV aid.

Unearned federal financial assistance must be returned to program funds up to the amount of assistance that the student has received from the program in the priority order established by regulation: Unsubsidized Direct Loan, Subsidized Direct Loan, PLUS Loan, Federal Pell Grant, Federal SEOG and other Title IV programs. The school takes the responsibility on behalf of the student to return unearned federal financial aid assistance funds that were applied directly to institutional charges. **Institutional charges at the university that are no longer covered by financial assistance immediately become the responsibility of the student. The student also is responsible for return of unearned federal financial funds that were disbursed directly to him or her.**

Federal guidelines establish attendance expectations. An administrative withdrawal (ZW) outcome may reduce the student's award or require the student to pay back some of the federal financial aid already received. The amount depends on the last date of contact or attendance and the federal programs involved. Further information may be obtained from the Financial Aid office at FinancialAid@sunyempire.edu.

Mitigating Circumstances

Occasionally, students do not meet the good academic standards for reasons beyond their control or because of "mitigating circumstances" such as serious family problems or extended illness. Under such circumstances, a student may appeal for continued eligibility for federal financial aid.

Approval of a federal financial aid appeal is not automatic. Usually students may only appeal for his/her most recent enrollment. Approval of an appeal occurs in two parts:

1. The dean or dean's designee verifies the student's academic eligibility.
2. The mitigating circumstance committee determines if the request meets federal requirements for continued eligibility for federal financial aid and if the student can meet all good academic standard requirements within the maximum timeframe for completing the degree.

The mitigating circumstance committee approves the appeal only if both parts of the process are complete and the academic and federal requirements are met. Students must submit the information required for both parts to Student Academic Services, using the required form.

The mitigating circumstance committee has the authority to approve a financial aid appeal request. However, that approval is dependent on the verification of the student's academic eligibility. The dean or dean's designee is responsible for determining the student's academic eligibility. If the dean or dean's designee determines that a student does not meet academic eligibility requirements, the mitigating circumstance committee cannot approve the appeal. If the appeal is approved and you can meet SAP standards by the end of the subsequent term, you will be placed on probation. Probation is only for one payment period. If the appeal is approved and it is determined that you cannot meet SAP standards by the end of the subsequent term you will be placed on probation with an academic plan that you must adhere to in order to maintain financial aid eligibility. Failure to do so will result in loss of federal financial aid.

Students are rarely granted more than one appeal for mitigating circumstances.

Note: The appeal has no direct effect on enrollment eligibility, which is an academic determination upon which the appeal approval is contingent.

Repeat of Studies With Credit Awarded

A student may repeat a passed course once to earn a better grade if required for their academic program and still receive financial aid. The student must complete the Request to Repeat a Study request form. If this is done, both studies count as credit attempted in calculating SAP, but only the latest study grade will count in the calculation of credits earned toward the degree and in the GPA calculation and only one attempt may be counted as successfully earned when determining the Quantitative 67 percent rule.

Courses Not Required to Complete a Student's Degree

Federal regulations do not allow a student to receive financial aid for credits that are not required to complete their degree. Credits for courses not required by your degree will not be counted when determining course load and eligibility for disbursement of federal aid each term. Federal regulations do not allow a student in the final enrollment term to receive federal aid for studies that are not required to complete a degree.

Notification of Ineligibility for Federal Financial Aid

Financial Aid notifies students regarding their ineligibility for further federal financial aid. Students may obtain information on their financial aid status by reviewing their eligibility status online or by contacting the Office of Financial Aid (https://www.sunyempire.edu/financial-aid/).

Eligibility for New York State Financial Aid

(Please see Eligibility for New York State Financial Aid Policy (http://www.sunyempire.edu/policies/?search=cid%3D36217) on the university's policy web site (https://www.sunyempire.edu/policies/).)

Award programs affected by the New York state regulations include:

- Tuition Assistance Program (TAP)
- Regents Award – Child of Veteran (CV)
- Regents Award – Child of Corrections Officer Award
- Persian Gulf Veterans Award and Vietnam Veterans Tuition Assistance (VVTA)
- State University Supplemental Tuition Assistance Program (SUSTA)
- Aid for Part-time Study (APTS)
- Scholarships for Academic Excellence
- New York State Memorial Scholarships
- World Trade Center Memorial Scholarships
- Military Service Recognition Scholarships
- New York Lottery – Leaders of Tomorrow Scholarships

Good Academic Standing

Students who receive any New York state financial awards are required to maintain good academic standing as defined by the regulations of the New York state commissioner of education in order to remain eligible for state financial aid. The regulations define a student in good academic standing as one who:

- Pursues the program of study in which he or she is enrolled (pursuit of program),
- Makes satisfactory academic progress toward the completion of his or her program's requirements, and in addition, New York State Education Law requires

- If in the grading-with-evaluation option, maintains a grade point average (GPA) of 2.00 or better after having received four full-time New York state financial aid payments or the equivalent in part-time funds.

There are three criteria for maintaining good academic standing: "pursuit of program," "satisfactory academic progress" and "grade point average."

Students who do not meet the requirements for pursuit of program, satisfactory academic progress and grade point average (GPA is waived for students in the narrative-only option) lose their eligibility for New York state financial aid. To remain eligible for New York state financial aid, a student must satisfy **all** criteria on the first day of the term.

Pursuit of Program

To be in pursuit of program, a student must receive either a passing or a failing outcome in a certain percentage of studies each term, depending on the number of state aid payments the student has received (which may be different from the number of enrollment terms at the university). The required percentage is illustrated in the pursuit of program table for full-time students who have received funds under the Tuition Assistance Program.

An outcome that indicates that the student substantively engaged in a study or course through the enrollment term is necessary to satisfy the "pursuit of program" requirement. Both passing and failing outcomes are acceptable. An incomplete (IN) is acceptable as long as it changes to either a passing or failing outcome by the end of the next term. However, a withdrawal (WD) or administrative withdrawal (ZW) outcome does not meet the requirement for pursuit of program, because it indicates no substantial engagement in a study or course during the full enrollment term.

SUNY Empire State University Pursuit of Program Table [1]

Number of full-time terms in which New York state financial aid has been through TAP[2]	Must receive a letter grade received (e.g. FC, CR, NC or IN[3]) for:
1, 2	50 percent of minimum full-time requirement (6 credit hours)
3, 4	75 percent of minimum full-time requirement (9 credit hours)
5 or more	100 percent of minimum full-time requirement (12 credit hours)

[1] The table illustrates expectations for full-time (12 or more credits) enrollment. A student who enrolls on a less than full-time basis must make progress proportionate to what is illustrated in the table. For example, two payments for part-time enrollments (e.g., through APTS) equal one payment for a full-time enrollment (e.g., through TAP). Program or location staff can advise individual students regarding these calculations.

[2] The number of terms refers to the number of state aid payments the student has received at all colleges. The number may be different from the number of enrollments or TAP payments at Empire State University.

[3] An incomplete (IN) outcome must become a passing or failing outcome by the end of the next term to satisfy the pursuit of program requirement.

A student must earn a letter grade, FC, NC or IN outcome for the percentage of study designated in the table for each term of enrollment

to be eligible for New York state aid in the next term. For example, a student who has received two TAP payments must have outcomes that meet the pursuit of program standard for at least 6 credits in the second enrollment (i.e., 50 percent of the 12 credit minimum for full-time enrollment status), to be eligible for any New York state aid in the third enrollment.

Grade Point Average

Students must maintain a 2.00 or better after receiving four full-time New York state financial aid payments. All New York state aid payments are counted regardless of when they were made or what institution the student attended. A student who is new to Empire State University is assumed to meet the minimum GPA requirement. The university uses only Empire State University studies to compute the GPA thereafter. The table below provides the minimum GPA required to maintain eligibility for New York state financial eligibility after each payment.

Undergraduate Number of full-time payments	Minimum GPA required in order to receive the next payment
1	1.50
2	1.80
3	1.80
4	2.00

Bear in mind that the university's academic policy requires students to earn a 2.00 after having completed 8 graded credits. A student who does not achieve a 2.00 after completing 8 graded credits is placed on academic warning. The university provides up to 16 additional credits to restore the GPA to a 2.00. A student who does not achieve the minimum GPA after attempting 24 credits at Empire State University is academically dismissed. Thus, a student may meet New York state financial aid requirements and not be eligible to re-enroll for failure to meet the university's minimum GPA requirement. Students who first received a NYS award prior to Summer 2010 are reviewed by a different GPA standard. Likewise, during the 2010-2011 school year, students receiving a NYS award for the first time during the 2010-2011 year were held to a different GPA standard. ADA TAP students also have a different standard. Please contact the TAP Certifying officer for details.

A student who comes to Empire State University after attending another college and receiving four full-time New York state financial aid payments must earn a minimum of a 2.00 at the end of the first term of enrollment at Empire State University to remain eligible for subsequent New York state financial aid payments.

The Effect of Withdrawal

If a student withdraws from a course or study, his or her enrollment status, SAP rate and/or state aid eligibility may be affected. Depending on the effective date of the withdrawal, and the number of state aid payments the student has already received, pursuit of program also may be affected (see pursuit of program table). A withdrawal is not included in the calculation of the GPA Therefore, it does not affect a student's GPA.

In calculating enrollment status and rate of progress, "credit attempted" is the number of registered credits after calendar day 28 of the enrollment term. Thus, the date of withdrawal affects whether the credits are counted in the number of credits attempted. For example, for a student who first enrolls for 12 credits and then withdraws from one 4-credit study on or before calendar day 28, the enrollment status for the term changes to part time and the progress rate is calculated on 8 credits attempted. If the student withdraws after calendar day 28, the enrollment

status for the term is still full time and the progress rate is calculated on 12 credits attempted.

If a full-time student withdraws after calendar day 28 and incurs full tuition liability, he or she will lose TAP for the next term if he or she does not meet the pursuit of program standard for the current term. If the student withdraws before calendar day 28 and tuition falls below the full-time rate, the student's TAP award for the current term is cancelled. Further information may be obtained from the Financial Aid office (https://www.sunyempire.edu/financial-aid/).

***Note: Students who attend a term that is less than 15 weeks long will have a different measure and should consult with the* Financial Aid office (https://www.sunyempire.edu/financial-aid/).**

The Effect of Administrative Withdrawals (Disengagement from a Course or Study)

New York state regulations for financial aid establish course completion expectations. If a student receives an outcome of administrative withdrawal (ZW) for a study or course, his or her SAP and POP rate are affected and state aid eligibility may be affected for the student's next enrollment depending on the number of state aid payments the student has already received (see pursuit of program table). An administrative withdrawal outcome is not included in the calculation of the GPA. Therefore, it does not affect a student's GPA.

Financial Aid Eligibility Assessment

The university assesses student eligibility for New York state financial aid at two points in each enrollment:

1. On the date the enrollment officially starts, the student must meet citizenship, residency, high-school graduation and good academic standing requirements. If the student fails to meet any of these requirements on the first day of the enrollment, he or she is not eligible for New York state financial aid for the enrollment term.
2. By the 28th calendar day of the enrollment term, the student must meet the full-time or part-time study requirements and must be fully matriculated (admitted as a degree-seeking student) at the university. A student who fails to meet enrollment requirements by calendar day 28 is not eligible for New York state financial aid. A student who is not matriculated by calendar day 28 is not eligible for New York state financial aid.

***Note: Students who attend a term that is less than 15 weeks long will have a different measure and should consult with the* Financial Aid office (https://www.sunyempire.edu/financial-aid/).**

Regaining Eligibility for New York State Financial Aid

A student may regain eligibility for New York state financial aid through one of the following four methods:

1. Meeting the standard the student failed to meet previously, during an enrollment term in which no state award is paid.
   - A student who failed to meet the pursuit of program standard may regain eligibility by meeting the pursuit of program standard in a subsequent term in which the student receives no state aid.
   - A student who failed to meet the satisfactory academic progress standard may regain eligibility by accumulating the number of credits required to make satisfactory academic progress, through additional enrollment(s) for which the student receives no state aid.

- A student who failed to meet the grade point average standard may regain eligibility by earning the minimum required grade point average through additional enrollment(s) for which the student receives no state aid.

2. Being readmitted and/or reinstated at Empire State University after an absence of at least one calendar year.
   A student who is readmitted and/or reinstated after failure to make satisfactory progress must meet the credit accrual requirement the student failed to meet prior to losing eligibility within the next 16 credits of enrollment.
3. Transferring to another institution.
4. Applying for and receiving a one-time waiver.

Eligibility Waivers

One-time Waiver of Eligibility Standards for New York State Awards

A student who fails to meet the state standards for pursuit of program may request a one-time waiver of these standards. A waiver is possible only in extraordinary or unusual situations. A waiver enables the student to receive New York state aid for one additional enrollment term.

New York state permits only one waiver at the undergraduate level. This applies across all institutions attended. The Mitigating Circumstance Committee may grant a waiver when the student fails to meet the pursuit of program standard, the GPA standard or more than one standard in the same term.

The one-time waiver is not automatic. The student may request a waiver for his or her most recent enrollment. Approval of a request for a one-time waiver occurs in two parts:

1. The dean or dean's designee verifies the student's academic eligibility.
2. The Mitigating Circumstance Committee determines that the request meets New York state requirements for a waiver of financial aid regulations.

Students must complete the Request for a Federal Title IV and/or New York State Financial Aid Eligibility form and submit it with appropriate documentation to Student Academic Services. If approved academically by the dean or dean's designee, the request is then reviewed by the Mitigating Circumstance Committee to determine eligibility for state aid. In certain instances, a student may regain academic eligibility but continue to be ineligible for state aid.

In the event that the dean or dean's designee reports that a student does not meet academic eligibility requirements, the Mitigating Circumstance Committee cannot approve the waiver.

Repeat of Studies With Credit Awarded

Repeat of any study for which credit has been awarded and that the university does not require the student to repeat may not be considered part of that student's course load for financial aid purposes. The student must complete the Repeat Study Approval Form online (https://www.sunyempire.edu/registrar/forms-services/repeat-study/).

If a student is repeating a study or course in which he or she earned a passing grade initially, the student will not earn credit twice. When a student successfully completes a repeated study, the university uses the most recent study grade in calculating the student's GPA and in the calculation of credits earned toward the degree. However, for state aid

purposes, a repeated course in which a passing grade was previously earned cannot be used to meet the pursuit of program requirement (completing a certain percentage of the minimum full-time or part-time course load in each term an award is received) to maintain good academic standing.

Students can receive state aid to repeat studies for which they earned no credit.

Maximum Number of Payments

An undergraduate student may receive New York state financial aid payments for no more than the equivalent of eight full-time enrollment terms.

New York State "C" Average Requirement

New York state standards require that students achieve a "C" average to maintain state financial aid eligibility.

Pre-college Studies

For payment purposes, pre-college studies may be counted toward full- or part-time enrollment status. However, at least 50 percent of the minimum number of credits required for full- or part-time status must be college-level study. Thus, a full-time student must enroll for at least 6 credits of college-level study, and a part-time student must enroll for at least 3 credits of college-level study. The one exception is that in the first enrollment, a full-time student may take up to 9 pre-college credit equivalents and must take at least 3 credits of college-level study.

Final Enrollment Term

In the final term only, New York state financial aid regulations permit studies to count toward financial aid eligibility standards related to full- or part-time enrollment status, even if some of the credit is not necessary to complete degree requirements. The enrollment must include some credit that is required to complete the student's degree.

SUNY Empire State University permits such credit beyond the degree to count for financial aid eligibility in the final term, only if all of the following criteria are met:

- The student has an approved degree program;
- The enrollment term is identified as the final enrollment for the degree;
- The enrollment includes one or more studies or courses that apply toward the student's degree requirements.

The TAP certifying officer disallows any New York state aid award if any one of these criteria is not met.

Notification of Ineligibility for State Financial Aid Awards

The Office of Financial Aid notifies students regarding their ineligibility for further New York state financial aid. Students may obtain information on their financial aid status by contacting the Office of Financial Aid.

For additional information regarding state financial aid, go to the New York State Higher Education Services (https://www.hesc.ny.gov/) web site.

Federal and State Financial Aid

General financial aid programs available through the university include both federally and state-funded programs.

For undergraduates, federal financial aid includes the Federal Pell Grant, the Federal Supplemental Educational Opportunity Grant, the Federal Direct Loan and the Federal Work-Study Program.

Programs for New York state residents include the Tuition Assistance Program (TAP) for matriculated students and expanded benefits for veterans. Students enrolled for at least 3 and less than 12 credits for each term may be eligible for Aid for Part-time Study (APTS). Part-time TAP and Americans With Disabilities Act (ADA) part-time TAP are available but have special requirements. Please go to the Office of Financial Aid (https://www.sunyempire.edu/financial-aid/) web site for more information.

Other state programs – for full-time students only – are the Excelsior Scholarship; the State University Supplemental Tuition Award; the Award for Children of Deceased or Disabled Veterans; and the Award for Children of Deceased Police Officers, Firefighters and Corrections Officers; and World Trade Center Memorial Scholarships. For a complete list of grants and scholarships go to the New York state Higher Education Services Corporation (https://www.hesc.ny.gov/) web site.

Students enrolled either part time or full time may qualify for Vietnam Veterans Tuition Awards and the SUNY Empire State Honors Scholarships for African-American, Latino and Native American Students Awards.

Veterans may be entitled to full tuition and fees from the Veterans Administration.

Note: Good academic standing is a requirement for payment and continuation of financial aid. If you fall below the minimum achievement level, payment and continuation of financial aid will be in jeopardy. Students are not eligible for financial aid if they are in default on any student loan or owe a repayment of any federal student aid.

Other Sources of Financial Aid

In addition to federal and state financial aid programs, there are several options available for students who qualify.

Office of Adult Career and Continuing Education Services

Persons with disabilities that are an impediment to employment may qualify for assistance through the Office of Adult Career and Continuing Education Services – Vocational Rehabilitation (ACCES-VR). Eligible students may receive tuition assistance or other support services when university study is leading to an employment goal. Interested students should contact the nearest ACCES-VR office. For more information about this service and a complete list of regional locations students should visit the New York State Education Department Adult Career and Continuing Ed Services (http://www.acces.nysed.gov/) web site.

Veterans Affairs Benefits (formerly Veterans Administration)

Veterans who attend SUNY Empire State University may be eligible for educational benefits provided they have entitlement remaining with Veterans Affairs. A nonmatriculated student may receive benefits for a maximum of two terms.

Veterans applying to the university should file their VA paperwork directly with the Office of the Registrar. The appropriate form may be printed from the VA website (http://www.gibill.va.gov). Once the form is completed, it should be returned to

Office of the Registrar
Empire State University
111 West Ave.
Saratoga Springs, NY 12866-6069

SUNY Empire State University Foundation Funds

The SUNY Empire State University Foundation was established in 1974. Its mission is to enhance the quality of the university by augmenting its financial resources. As a separate, not-for-profit, charitable organization, it enables the university to initiate and support programs which would not otherwise be funded. As part of its function, the foundation supports students at the university by providing interest-free loans, grants, fellowships, scholarships and other financial aid programs.

SUNY Empire State University Foundation scholarships are available to students as a result of the generosity of alumni, employees and friends who have chosen to recognize the value of education by establishing and contributing to scholarship funds.

SUNY Empire State University Foundation Scholarships and Grants

Scholarships may be awarded to students who have financial need, have earned at least 8 credits at SUNY Empire State University and who are in good academic standing. To be considered, students must first submit the Free Application for Federal Student Aid (FAFSA) for the upcoming year. Students should complete the FAFSA online (https://studentaid.gov/h/apply-for-aid/fafsa/).

In order to apply for an SUNY Empire State University Foundation scholarship, students must log in to the application portal at ESCFAST (http://www.sunyempire.edu/ESCFAST/) and submit an application. The application portal contains information on more than 100 scholarship opportunities, along with the instructions on how to apply for scholarship funding. Contact Scholarships@sunyempire.edu with any questions on the application process.

Advance of Excess Financial Aid Options

SUNY Empire State university Foundation Loans

Interest-free loans of up to $500 may be available for students receiving financial aid while they are waiting for an award over payment. Loans are offered to students who have financial aid in excess of the cost of tuition and fees and will be disbursed no earlier than one month prior to the start of the term. Loans are granted for expenses directly related to university study. Contact 1Stop Student Services at 800-847-3000, ext. 2285 for further information.

To Find Out More

Our 1Stop Student Services and Financial Aid staff members are available to give more detailed information and advice by phone, by mail or in person.

For further financial aid information contact:
Financial Aid
Empire State University
111 West Ave.
Saratoga Springs, NY 12866-6069
800-847-3000, ext. 2285 or visit the Financial Aid web site (http://www.sunyempire.edu/FinancialAid/) website or email FinancialAid@sunyempire.edu.

For assistance in completing the federal application, call 800-4FED-AID.

There are many private scholarships and grants available to students who meet specific criteria. Check the reference section of your local public library or use a web-based search site linked from the university's Financial Aid web site (http://www.sunyempire.edu/FinancialAid/) for this information.

Earning a Degree
Degree Types
Individualized Areas of Study and Majors/Structured Programs

SUNY Empire offers both structured and individualized degrees. Majors are structured programs with curriculum written by faculty that provides pre-defined choices. Individualized degree programs (p. 190) are intentionally created or personally designed by the student within Areas of Study.

You will work with your mentor to determine which type of degree best fits your personal and educational goals. A complete list of all programs and their guidelines and/or course requirements can be found in the **Undergraduate Programs section** of the catalog.

Associate Degree Programs

An associate degree is the equivalent to two years of full-time study and generally include a variety of foundational and general education studies that help develop and strengthen basic academic skills, such as college-level reading and writing, quantitative reasoning, analysis, and critical thinking.

To earn an associate degree, students need 64 credits, with at least 24 credits earned at Empire State University. Students may include up to 40 credits of transfer and/or other prior learning (advanced standing). Our **A.A./A.S. in General Studies** is an exception, where students can bring in as many as 52 credits of transfer/advanced standing, with 12 credits earned at SUNY Empire.

Students in A.A. and A.S. degrees will be expected to meet **Area of Study guidelines** as well as **SUNY General Education Requirements**.

Planning For Transfer Within SUNY

If a student plans to begin at Empire State University and later transfer to another SUNY campus, SUNY Transfer Paths will help identify core coursework that will prepare them for multiple SUNY campuses. Transfer Paths summarize the common lower division requirements shared by all SUNY campuses for similar majors within most disciplines. Students should work with their mentors to follow the core course sequence designed to ensure a seamless transfer. This is especially important for students pursuing an associate degree who wish to transfer to another SUNY campus to complete a bachelor's degree in one of the Transfer Paths. For full details on the Transfer Paths and guaranteed transfer courses, please go to the SUNY Transfer Paths web page (http://www.suny.edu/attend/get-started/transfer-students/suny-transfer-paths/).

Bachelor's Degree Programs

A bachelor's degree is equivalent to four years of full-time study and requires a minimum of 120-124 credits depending on the program, with at least 30 credits earned at Empire State University. Students may include up to 94 credits of transfer and/or other prior learning (advanced standing).

All bachelor's degrees require a minimum of 45 advanced-level credits. The amount of liberal arts and sciences credits required vary based on degree type. In addition to area of study guidelines or major requirements, students in will be expected to meet SUNY **General Education Requirements**.

Undergraduate Certificates

Undergraduate certificates provide focused study to support a specific career interest and are applicable to at least one undergraduate area of study. Associate and bachelor's degree program plans may include a certificate.

Combined Bachelor's/Master's Degrees

SUNY Empire offers combined bachelor's/master's degree programs for highly qualified undergraduate students who wish to continue to a master's degree. Students accepted into the combined bachelor's/master's degree program will be able to take specified master's-level courses during their bachelor's degree at the undergraduate rate and have them count towards their degree. These programs may accelerate a student's time to degree completion and reduce the cost of completing the master's degree.

SUNY General Education Requirements

As a university of arts and sciences, SUNY Empire expects students to acquire the qualities of a broadly educated person. One way this breadth of knowledge is accomplished is through the SUNY General Education Requirements, which all new and returning degree-seeking undergraduate students are required to fulfill. See the General Education section (p. 188) of the catalog for details about requirements.

G.P.A. Requirements

Students are expected to maintain an overall Grade Point Average (GPA) of a 2.0 on a 4.0 scale. See the Academic Probation for Undergraduate Students policy (p. 216) for more details. A minimum G.P.A. of 2.0 is required to graduate with an undergraduate degree or certificate. Nursing students should visit the **nursing program page** for specific G.P.A. requirements.

Changing a Degree

Undergraduate students may change or add a degree to their record in consultation with their mentor. Students may request changes to the degree type (B.A. to B.S.), or AOS/major (e.g. changing from a B.A. Psychology to a B.A. in Cultural Studies), using the Degree Change/Addition Request form (https://banner.esc.edu/BannerExtensibility/customPage/page/ESC_DegreeChange/) found in Self-Service Banner (SSB). Students may also use this form to add an additional degree or certificate to their record. For example, a student may have originally planned on pursuing only a bachelor's degree, and then decide they would also like to complete an associate's degree along the way. Programs with specialized admissions requirements (like those in the School of Nursing and Allied Health) may require a new application. To change a concentration title in an area of study, students work with their mentor to update their degree program plan through DP Planner, and only need to fill out the degree add/change form if they are also changing their degree or area of study.

Catalog Year Changes

Catalog year determines which set of requirements you will follow to graduate. Generally, this year aligns with the academic year that you were first admitted or re-admitted to the university. You may want to adopt a more recent catalog year if it aligns better with your academic goals or if there have been significant changes in the curriculum. You must first discuss a change in catalog year with your mentor before requesting a change. You may only elect to move forward in catalog year; you may not select a previous catalog year. Changing your catalog year

will not impact your general education requirements. In some cases, students approaching graduation might not be eligible for a catalog year change. The Catalog Year Change Form may be found on the Office of the Registrar forms and services webpage (https://sunyempire.edu/registrar/forms-services/).

Learning Goals

Growing out of Empire State University's unique mission, the learning goals outlined below serve as a vital link between the university's historical mission, the current context of rapid educational change, and the future of our institution in a global society where knowledge and learning remain urgently important.

Graduates of Empire State University will demonstrate competence in the following areas of learning, appropriate to their degree levels.

- Active Learning – assess and build upon previous learning and experiences to pursue new learning, independently and in collaboration with others.
- Breadth and Depth of Knowledge – cultivate a broad, interdisciplinary understanding in the liberal arts and sciences, as well as expertise in a particular field.
- Social Responsibility – engage in ethical reasoning, and reflect on issues such as democratic citizenship, diversity, social justice and environmental sustainability, both locally and globally.
- Communication – express and receive ideas effectively, in multiple contexts and through multiple strategies.
- Critical Thinking and Problem Solving – evaluate, analyze, synthesize and critique key concepts and experiences, and apply diverse perspectives to find creative solutions to problems concerning human behavior, society and the natural world.
- Quantitative Literacy – read, interpret, use and present quantitative information effectively.
- Information and Digital Media Literacy – critically access, evaluate, understand, create and share information using a range of collaborative technologies to advance learning, as well as personal and professional development.

For more details, please see the University Learning Goals Policy (http://www.sunyempire.edu/policies/?search=cid%3D61278).

Study Time

Empire State University students are primarily adults, arriving at our locations and programs with full lives that include commitments to family, work, community and personal fulfillment. When you decide to take on the academic rigors of pursuing a degree, it is imperative that you examine your commitments and make adjustments to accommodate your endeavors and thus achieve your academic goals.

In general, you should plan for 10 to 12 or more hours per week of study time for each 4-credit study or course in which you are enrolled, or in simpler terms, at least three hours a week for each credit hour of course study. Study time includes activities such as reading, writing, reflecting and research. Students taking online courses should factor in time for online communications with other students in their courses.

Course Study Modes

SUNY Empire Course Mode Dictionary

Teaching and learning at SUNY Empire uses a vast array of instructional modes in ways that best suit student needs and course content. Some instructional modes are location-based and require pre-scheduled in-person meetings, whereas others depend on different tools and technologies. The university community uses a common vocabulary to describe its instructional modes as defined below, including the expectations and requirements for faculty-student engagement associated with each mode. Students can find current information about any course section in the term guide.

Undergraduate Study Options

Independent Study: an instructor-led one-to-one course (student and faculty member) with flexible contact/meetings arranged by the student and faculty member.

Internship/practicum: an instructor-led learning experience designed to give a student practical knowledge of their field, e.g. clinical experience.

Laboratory/Lab: an instructor-led course, or components of a course, in which all students are "practicing" an application of a scientific, technical, or creative nature.

Online (https://www.sunyempire.edu/online/): an instructor-led course conducted virtually, using the university's Learning Management System (LMS). Online courses are offered both synchronously and asynchronously. If an online course includes synchronous meetings, information regarding days and times of those meetings is shared in advance of the first day of classes via the term guide (https://banner.sunyempire.edu/StudentRegistrationSsb/ssb/registration/).

Residency (https://www.esc.edu/residencies/)**:** an instructor-led course that combines virtual learning or independent study and professional and academic enrichment opportunities with on-site, in-person meetings that occur on one or over several days. Information regarding days and times of scheduled synchronous meetings is shared in advance of the first day of classes and is included in the term guide.

Study Group (https://www.sunyempire.edu/degrees-programs/ways-to-study/study-groups/)**:** an instructor-led course that includes regular in-person meetings with students. Information regarding days and times of scheduled meetings is shared in advance of the first day of classes and is included in the term guide.

Virtual Exchange: an instructor-led educational practice that brings together students from across geographic boundaries in synchronous and asynchronous interactions. Available through but not limited to students in the International Education program.

Virtual Residency: an instructor-led course that combines virtual learning or independent study with scheduled virtual synchronous meetings that occur on one or over several days. Information regarding days and times of scheduled synchronous virtual meetings is shared in advance of the first day of classes and is included in the term guide.

Virtual Study Group: an instructor-led course consisting of a combination of asynchronous activities and scheduled virtual synchronous meetings. Information regarding days and times of scheduled synchronous meetings is shared in advance of the first day of classes and is included in the term guide.

Other Learning Opportunities

Workshops: Noncredit workshops are offered regularly to students, particularly in the areas of writing and degree program portfolio development. Check the Workshops Calendar (https://my.sunyempire.edu/academics/AcademicSupport/Pages/default.aspx)

(MySUNYEmpire log-in (https://my.sunyempire.edu/)) to find out about workshops available to student.

Working With Your Mentor and Degree Works

Every undergraduate student at SUNY Empire is assigned a mentor who serves as their own academic guide and resource from orientation to graduation. Students should confer with their mentors on a regular basis to discuss degree requirements and plan their progress toward their degree. Students and mentors will utilize Degree Works to aid in this process. Degree Works (https://esc.degreeworks.suny.edu/) is a Web-based tool for students to monitor their academic progress toward degree completion. A Degree Works audit is a review of past, current and planned coursework that provides information on completed and outstanding requirements necessary to complete the degree.

Degree Award/Graduation

Applying to Graduate

Students apply for graduation (https://www.sunyempire.edu/registrar/general-information/graduation/) once they have registered for final courses. When a student applies to graduate, it informs the Office of the Registrar that they are completing their studies. It also provides the student with an opportunity to confirm details about their diploma, such as preferred name, and address to which it should be mailed. Once an application to graduate is submitted, student records are reviewed to determine if all requirements will be met based on current registration. The student and mentor are notified of the outcome of the review.

Degree and Certificate Award Process

The degree award process begins once a student has satisfied all academic requirements, and final grades have been received in the Office of the Registrar. Students will receive an email from the Office of the Registrar to their SUNY Empire email address when the degree and/or certificate has been awarded. At that time, the awarded degree will be noted on the student's official transcript (https://www.sunyempire.edu/registrar/general-information/transcripts/). SUNY Empire is authorized to award degrees 12 dates a year. All award dates are the first day of the month after academic requirements have been met. Students can expect to receive their diploma by mail approximately three weeks from the day the university awarded the degree.

Commencement

To celebrate student success and achievement, SUNY Empire offers commencement ceremonies for eligible students twice a year. For details about Spring and Winter commencement ceremonies, as well as eligibility criteria, consult the commencement website (https://www.sunyempire.edu/commencement/).

General Education

SUNY GENERAL EDUCATION REQUIREMENTS

About General Education

As a university of arts and sciences, SUNY Empire expects students to acquire the qualities of a broadly educated person. The purpose of a university education is to enable students not only to accumulate information, but also to appreciate what is learned in a broad context, relate what is being learned to what is already known, judge what one is told rather than merely accept it, and use what is learned in a practical and intellectual way.

Student learning should extend beyond a single, narrow discipline or field. Students should demonstrate an understanding of several diverse perspectives (such as historical, literary, scientific, technological, esthetic, ethical, international, multicultural and gender-based) and be able to apply such perspectives to situations in which they must analyze, explain or solve problems concerning human behavior, society and the natural world. One way this breadth of knowledge is accomplished is through the SUNY General Education requirements, which all new and returning degree-seeking undergraduate students are required to fulfill. The general education students need to complete varies depending on when they first enrolled at a State University of New York institution.

Determining Which General Education Requirements to Follow

All current students in associate and/or baccalaureate programs must complete general education requirements. Students entering SUNY Empire Fall 2023 and after, with no previous coursework taken at any SUNY institution, follow the 2023 General Education Framework. Returning students and new students with coursework from any SUNY institution taken between Fall of 2010 and Fall 2023 follow the 2010 General Education Requirements. Students with coursework taken at a SUNY institution prior to Fall 2010 follow the 2023 General Education framework.

Ways to Fulfill General Education Requirements

Students may fulfill general education requirements in a variety of ways including coursework taken at SUNY Empire, transferred coursework, prior learning assessment (PLA), and standardized examinations. The term guide and course catalog provide details on which SUNY Empire courses meet a requirement. Any area met through coursework at another SUNY institution and appearing on a General Education Transcript Addendum (GETA) will be accepted by SUNY Empire. Transfer credit from non-SUNY institutions will be evaluated for equivalency and general education at the point of admission. Please consult the Office of the Registrar webpage (https://sunyempire.edu/registrar/) for answers to frequently asked questions about general education requirements.

SUNY GENERAL EDUCATION (SUNY GE) FRAMEWORK FOR STUDENTS MATRICULATING FALL 2023 OR LATER

The SUNY GE framework includes twelve categories of knowledge, skills and competencies—ten knowledge and skills areas expose students to different ways of knowing so that they can make reasoned judgements outside as well as inside their academic field, and enabling them to develop diverse perspectives and global understanding; and two core competencies that extend beyond discipline-specific knowledge and skills. A minimum of 30 credits in 7 of 10 categories of knowledge and skills areas are required for AA-, AS-, and all baccalaureate-degree programs, as well as the two core competencies.

The following four Knowledge and Skills areas are specifically required:

- Communication – Written and Oral
- Diversity: Equity, Inclusion, and Social Justice
- Mathematics (and Quantitative Reasoning)
- Natural Sciences (and Scientific Reasoning)

A minimum of three of the following six Knowledge and Skills areas are required:

- Humanities
- Social Sciences
- The Arts
- US History and Civic Engagement
- World History and Global Awareness
- World Languages

In addition, two Core Competencies are required:

- Critical Thinking and Reasoning
- Information Literacy

SUNY GE KNOWLEDGE AND SKILLS AREAS

1. COMMUNICATION – WRITTEN AND ORAL (REQUIRED)

Students will:

- Research a topic, develop an argument, and organize supporting details;
- Demonstrate coherent college-level communication (written and oral) that informs, persuades, or otherwise engages with an audience;
- Evaluate communication for substance, bias, and intended effect; and
- Demonstrate the ability to revise and improve written and oral communication.

2. DIVERSITY: EQUITY, INCLUSION, AND SOCIAL JUSTICE (REQUIRED)

Students will:

- Describe the historical and contemporary societal factors that shape the development of individual and group identity involving race, class, and gender;
- Analyze the role that complex networks of social structures and systems play in the creation and perpetuation of the dynamics of power, privilege, oppression, and opportunity; and
- Apply the principles of rights, access, equity, and autonomous participation to past, current, or future social justice action.

3. MATHEMATICS (AND QUANTITATIVE REASONING) (REQUIRED)

Students will demonstrate mathematical skills and quantitative reasoning, including the ability to:

- Interpret and draw inferences from appropriate mathematical models such as formulas, graphs, tables, or schematics;
- Represent mathematical information symbolically, visually, numerically, or verbally as appropriate; and
- Employ quantitative methods such as arithmetic, algebra, geometry, or statistics to solve problems.

4. NATURAL SCIENCES (AND SCIENTIFIC REASONING) (REQUIRED)

Students will demonstrate scientific reasoning applied to the natural world, including:

- An understanding of the methods scientists use to explore natural phenomena, including observation, hypothesis development, measurement and data collection, experimentation, evaluation of evidence, and employment of data analysis or mathematical modeling; and
- Application of scientific data, concepts, and models in one of the natural sciences.

5. HUMANITIES

Students will:

- Demonstrate knowledge of the conventions and methods of at least one of the humanities; and
- Recognize and analyze nuance and complexity of meaning through critical reflections on text, visual images, or artifacts.

6. SOCIAL SCIENCES

Students will:

- Describe major concepts and theories of at least one discipline in the social sciences; and
- Demonstrate an understanding of the methods social scientists use to explore social phenomena.

7. THE ARTS

Students will:

- Demonstrate an understanding of at least one principal form of artistic expression and the creative process inherent therein.

8. US HISTORY AND CIVIC ENGAGEMENT

Students will:

- Demonstrate understanding of United States' society and/or history, including the diversity of individuals and communities that make up the nation;
- Understand the role of individual participation in US communities and government; and
- Apply historical and contemporary evidence to draw, support, or verify conclusions.

9. WORLD HISTORY AND GLOBAL AWARENESS

Students will:

- Demonstrate knowledge of a broad outline of world history and/or the development of the distinctive features of at least one civilization or culture in relation to other regions of the world; and
- Demonstrate an understanding of the structures, systems, and interrelationships among civilizations and cultures within historical and/or contemporary contexts, and their impact on wellbeing and sustainability.

10. WORLD LANGUAGES

Students will:

- Exhibit basic proficiency in the understanding and use of a world language; and
- Demonstrate knowledge of the distinctive features of culture(s) associated with the language they are studying.

SUNY GE CORE COMPETENCIES

1. CRITICAL THINKING AND REASONING (REQUIRED)

Students will:

- Clearly articulate an issue or problem;
- Identify, analyze, and evaluate ideas, data, and arguments as they occur in their own or others' work;
- Acknowledge limitations such as perspective and bias; and
- Develop well-reasoned (logical) arguments to form judgments and/or draw conclusions.

2. INFORMATION LITERACY (REQUIRED)

Students will:

- Locate information effectively using tools appropriate to their need and discipline;
- Evaluate information with an awareness of authority, validity, and bias; and
- Demonstrate an understanding of the ethical dimensions of information use, creation, and dissemination.

SUNY GENERAL EDUCATION REQUIREMENT (SUNY GER) FOR STUDENTS MATRICULATING PRIOR TO FALL 2023

The SUNY GER (https://system.suny.edu/media/suny/content-assets/documents/academic-affairs/general-education/GenEdCourseGuidelines_2017.pdf) includes a minimum of 30 credit hours distributed among at least seven of the 10 knowledge and skill areas listed below. Students must include both mathematics and basic communication as two of the seven areas. Students must select an additional five different content areas from the remaining knowledge and skill areas.

The 10 knowledge and skill areas are: mathematics, natural sciences, social sciences, American history, western civilization, other world civilizations, humanities, the arts, foreign language and basic communication.

Students must demonstrate competencies in two areas: critical thinking and information management.

Students may use SUNY Empire studies or approved online courses, transfer credit, approved standardized examinations or individualized credit by evaluation toward the SUNY General Education Requirements. Students should consult with their mentor about available options.

GER KNOWLEDGE AND SKILL AREAS

1. MATHEMATICS

Students will demonstrate the ability to:

- Interpret and draw inferences from mathematical models such as formulas, graphs, tables and schematics;
- Represent mathematical information symbolically, visually, numerically and verbally;
- Employ quantitative methods such as, arithmetic, algebra, geometry or statistics to solve problems;
- Estimate and check mathematical results for reasonableness; and

- Recognize the limits of mathematical and statistical methods.

2. NATURAL SCIENCES

Students will demonstrate:

- Understanding of the methods scientists use to explore natural phenomena, including observation, hypothesis development, measurement and data collection, experimentation, evaluation of evidence, and employment of mathematical analysis; and
- Application of scientific data, concepts and models in one of the natural sciences.

3. SOCIAL SCIENCES
Students will demonstrate:

- Understanding of the methods social scientists use to explore social phenomena, including observation, hypothesis development, measurement and data collection, experimentation, evaluation of evidence, and employment of mathematical and interpretive analysis; and
- Knowledge of major concepts, models and issues of at least one discipline in the social sciences.

4. AMERICAN HISTORY
Students will demonstrate:

- Knowledge of a basic narrative of American history: political, economic, social and cultural, including knowledge of unity and diversity in American society;
- Knowledge of common institutions in American society and how they have affected different groups; and
- Understanding of America's evolving relationship with the rest of the world.

5. WESTERN CIVILIZATION
Students will:

- Demonstrate knowledge of the development of the distinctive features of the history, institutions, economy, society, culture, etc., of Western civilization; and
- Relate the development of Western civilization to that of other regions of the world.

6. OTHER WORLD CIVILIZATIONS
Students will demonstrate:

- Knowledge of either a broad outline of world history; or
- The distinctive features of the history, institutions, economy, society, culture, etc., of one non-Western civilization.

7. HUMANITIES
Students will demonstrate knowledge of the conventions and methods of at least one of the humanities in addition to those encompassed by other knowledge areas required by the general education program.

8. THE ARTS
Students will demonstrate understanding of at least one principal form of artistic expression and the creative process inherent therein.

9. FOREIGN LANGUAGE
Students will demonstrate:

- Basic proficiency in the understanding and use of a foreign language; and
- Knowledge of the distinctive features of culture(s) associated with the language they are studying.

10. BASIC COMMUNICATION
Students will:

- Produce coherent texts within common college-level written forms;
- Demonstrate the ability to revise and improve such texts;
- Research a topic, develop an argument and organize supporting details;
- Develop proficiency in oral discourse; and
- Evaluate an oral presentation according to established criteria.

GER COMPETENCIES
The following two competencies should be infused throughout the general education program:

1. CRITICAL THINKING (REASONING)
Students will:

- Identify, analyze and evaluate arguments as they occur in their own or others' work; and
- Develop well-reasoned arguments.

2. INFORMATION MANAGEMENT
Students will:

- Perform the basic operations of personal computer use;
- Understand and use basic research techniques; and
- Locate, evaluate and synthesize information from a variety of sources.

Individualized Degree Design
Individualized Degree Programs

One of the hallmarks of Empire State University's undergraduate programs is the flexibility students have to design their own degree programs. Individualized degrees are often the best way to maximize transfer credit and prior learning, and to meet specific learning goals.

When pursuing an individualized degree, the student works with their mentor in an educational planning course to create a degree plan proposal that is reviewed and codified as their individualized official curriculum. SUNY Empire is authorized to award individualized degrees in the following areas of study:

- Business, Management, and Economics: A.A., A.S. (p. 25), B.A., B.S., B.P.S. (p. 28)
- Community and Human Services: A.A., A.S. (p. 41), B.A., B.S., B.P.S. (p. 44)
- Cultural Studies: A.A., A.S. (p. 49), B.A., B.S. (p. 56)
- Educational Studies: A.A., A.S. (p. 68), B.A., B.S. (p. 73)
- Historical Studies: A.A., A.S. (p. 80), B.A., B.S. (p. 80)
- Human Development: A.A., A.S. (p. 83), B.A., B.S. (p. 84)
- Interdisciplinary/Multidisciplinary Studies: A.A., A.S. (p. 89), B.A., B.S., B.P.S. (p. 90)
- Labor Studies: A.A., A.S., B.A., B.S., (p. 96)
- Liberal Arts: B.A. (p. 98)
- Public Affairs: B.A., B.S., B.P.S. (p. 105)

- Science, Mathematics, and Technology: A.A., A.S. (p. 109), B.A., B.S. (p. 113)
- Social Science: A.A., A.S. (p. 132), B.A., B.S. (p. 134)
- Technology: B.P.S. (p. 138)
- The Arts: A.A., A.S. (p. 139), B.A., B.S., B.P.S. (p. 142)

Planning a Degree

Each student wishing to pursue an individualized degree program works with their assigned mentor to design their degree. The bulk of this work occurs while taking a required credit bearing educational planning course that teaches how a degree is structured, examines how prior learning fits into the degree, and assists in planning the learning still needed to accomplish their goals and complete the degree.

In planning the degree, the student and mentor explore relevant questions, such as:

- What are the learning goals?
- What has already been learned?
- What still needs to be learned to advance toward the final goal?

The culmination of the degree planning process is a degree program proposal, that includes three main components:

1. A plan for a degree program that shows all the learning accomplished, and the courses planned to complete the degree.
2. A rationale essay explaining the purpose, design, and significance of the individualized degree program being submitted.
3. All related supporting documentation (e.g., transcripts, prior learning assessment recommendations) necessary to verify credits acquired outside of SUNY Empire.

Changing an Area of Study or Concentration While Planning the Degree

During the degree planning process and in consultation with their mentors, students may find that the degree type and/or area of study that they originally planned no longer fits their educational goals or discover they would like to pursue more than one degree. See Changing A Degree (https://catalog.esc.edu/undergraduate/earning-undergraduate-degree/#text) for details on how to initiate a change or addition to your sought degree(s).

Requirements by Type of Degree

Associate Degree Programs

Individualized associate degrees require a minimum of 64 credits, with at least 24 credits earned at SUNY Empire. Students may include up to 40 credits of transfer and/or other prior learning (advanced standing). Associate in Arts (A.A.) degrees require at least 48 liberal arts and sciences credits and an Associate in Science (A.S.) degree requires at least 32 liberal arts and sciences credits. Advanced-level coursework is not required for associate degrees, but students may choose to include them. Students seeking A.A. and A.S. degrees will be expected to meet **Area of Study guidelines** as well as **SUNY General Education Requirements**.

Bachelor's Degree Programs

Individualized bachelor's degrees require a minimum of 124 credits, with at least 30 credits earned at SUNY Empire. Students may include up to 94 credits of transfer and/or other prior learning (advanced standing).

A Bachelor of Arts (B.A.) degree requires at least 94 liberal arts and sciences credits, a Bachelor of Science (B.S.) degree requires at least 62 liberal arts and sciences credits, and a Bachelor of Professional Studies (B.P.S.) requires at least 32 liberal arts and sciences credits. All bachelor's degrees require a minimum of 45 advanced-level credits with a minimum of 24 of them directly supporting the chosen concentration.

Students will be expected to meet Area of Study and Concentration (if applicable) guidelines, as well as **SUNY General Education Requirements**.

The university offers 5 types of degrees that may be individualized. The table below outlines the minimum criteria for each degree. The minimum G.P.A. requirement to graduate with an undergraduate degree is a 2.0 G.P.A.

Degree Requirements Grid for Individualized Programs

Degree	Total Credits Required	Minimum Credits to be Earned at SUNY Empire	Minimum Liberal Arts and Sciences Credits Required	Minimum General Education Credits	Minimum Advanced-level Credit in Concentra	Minimum Advanced-level Credits in Degree Program
A.A.	64	24	48	30	-	-
A.S.	64	24	32	30	-	-
B.A.	124	30	94	30	24	45
B.S.	124	30	62	30	24	45
B.P.S.	124	30	32	30	24	45

Degree Components

General Education

SUNY requires that at least 30 credits of an awarded degree be comprised of learning that meets its established general education framework. This framework varies by matriculation date so it is important to consult the general education section (p. 188) of the catalog for guidance on how this degree component applies to the individual seeking a degree.

Introductory and Advanced Level Learning

Introductory level learning is beginning, or foundational learning also known as lower-level study. Advanced level learning builds on introductory level learning and involves higher levels of abstraction, increasingly extensive knowledge, complex content, and greater methodological sophistication. It is also known as upper-level study. The minimum number of advanced level credits required varies by degree type as indicated in the Degree Requirements Grid (p. 191).

Liberal Arts and Sciences

Liberal Arts and Sciences courses have a strong theoretical content, generally from the disciplines of the humanities, natural sciences, mathematics, and social sciences. The minimum number of liberal arts and sciences credits required varies by degree type as indicated in the Degree Requirements Grid (p. 191).

Transfer Credit

The term transfer credit (p. 158) (also called advanced standing) encompasses several sources of credit accepted by SUNY Empire and available to apply to a degree.

- Transcript credit (p. 159) earned at other regionally accredited colleges or institutions recognized by SUNY Empire and validated by an official transcript.
- Pre-evaluated professional learning (PLE) (p. 168) or military training (p. 160) that has been assessed by SUNY Empire or an approved organization and validated by appropriate documentation.
- Standardized examinations (p. 161).

Individualized Credit for Prior Learning (iCPL)

SUNY Empire provides a process for evaluating student knowledge (p. 166) for possible college-level learning obtained through experiences outside the traditional classroom such as workplace training, personal research, and special interests. Once approved by faculty, the credit award becomes official, is applied to the student record and is available as a credit component of a degree program.

SUNY Empire Credits

There is a minimum number of earned SUNY Empire credits required to be awarded a degree from SUNY Empire, and this number varies by degree type. Bachelor's degrees require students to complete a minimum of 30 credits at SUNY Empire, and associate degrees require students to complete a minimum of 24 credits at SUNY Empire.

Areas of Study and Concentration Guidelines

The areas of study and concentration guidelines, found in the undergraduate programs (p. 15) section of the catalog, identify the knowledge expectations of academic and/or professional fields for the university's individualized degrees.   Students use the guidelines to develop their degree programs to include both expected knowledge and currency in their field. The guidelines are not names of specific courses; instead, they identify knowledge expectations that can be included through multiple courses and in multiple ways.

An awarded degree represents an acquired body of knowledge. To assure that is the case, the mentor helps the student interpret the area of study guidelines, and helps the student develop both a concentration title and put together the learning needed to adequately support the chosen title.

When the degree program proposal is submitted for review and approval it goes through faculty and university-level review processes; the guidelines will be used as the basis for the review of the degree design and concentration. In the degree program rationale, the student explains how learning and courses included on the plan address the area of study and where necessary, concentration guidelines, as well as the university's learning goals and degree requirements.

Area of Study Guidelines Frameworks

Each set of area of study guidelines is written broadly to represent a body of knowledge expected within that field, and are the source provided to structure the individualized degree with each student's specific goals in mind. Individualized degrees fall into one of five frameworks:

1. Disciplinary – a program of study guided by the existing framework of a discipline. Degrees designed within this framework are similar in design to programs of study at other institutions.
2. Interdisciplinary – a program of study that simultaneously interrelates two or more disciplines. Degrees designed within this framework draw upon the methods and bodies of knowledge of multiple disciplines to think across boundaries.

3. Problem Oriented – a program of study designed around a problem. Degrees designed within this framework examine a significant issue in depth from multiple perspectives.
4. Professional/Vocational – a program of study that focuses on acquiring knowledge and skills needed for specific career performance and applications. Degrees designed within this framework explore the conceptual foundations of the profession, the role of the professional in that career, and the relations between the profession and society at large.
5. Thematic – a program of study focusing on a particular theme or set of ideas. Degrees designed within this framework trace the development of a theme or idea, or explore various aspects of a theme to examine its cultural and intellectual influence.

Concentrations and General Learning

Individualized degree programs at SUNY Empire divide learning into two categories: concentration and general learning. The concentration encompasses the learning that is included on the degree based on area of study and concentration guidelines, and as presented in the section above, may be a focused, in-depth study of a discipline (for example, economics, physics, political science); an interrelated study of two or more disciplines; the study of a problem or a theme; or study in preparation for a profession or vocation. Because these frameworks require serious, focused learning, and imply a degree of competence in an area, bachelor's degree concentrations are required to contain at least 24 advanced-level credits. Associate degrees do not require advanced-level credits.

General learning is the term used to describe learning not directly related to the concentration, however it is an equally important part of the individualized degree. It can support he concentration, add breadth to the degree program, meet general education requirements, or simply be elective learning of interest to the student.

For both bachelor's and associate degrees, generally, no more than half of the total number of degree credits sit in the concentration.

Concentration Guidelines and Titles

Concentration designs and titles can be unique to the student's learning goals or they can follow pre-established guidance and titles.

Students often design concentrations for which no specific guidelines exist. This option provides flexibility in the degree program design, which is especially useful when transferring in a significant number of credits. A unique concentration of learning and concentration title is explained and supported within the degree program rationale where students present their interest, research, and reasons the unique concentration is supported by the included learning components on the degree program.

There are also some areas of study with established concentration guidelines. Like area of study guidelines, these concentration guidelines identify knowledge expectations rather than specific courses, and students can choose to address these expectations through various types of learning and in multiple ways.

For example, in the Business, Management and Economics area of study guidelines, there are specific concentration titles for Economics, Finance, Marketing and more (p. 30). In the Science, Mathematics and Technology area of study guidelines, there are specific concentration titles for Biology, Mathematics, Information Systems, Computer Science and others (p. 118).

Restricted Concentration titles

New York state education law regulates certain kinds of professional education that leads to NYS licensure (https://www.op.nysed.gov/professions-index/). SUNY Empire cannot offer individualized concentration titles closely related to certain professional areas of licensure, including:

- Acupuncture
- Applied Behavioral Analysis
- Architecture
- Athletic Training
- Audiology
- Certified Shorthand Reporting
- Chiropractic
- Clinical Laboratory Technology
- Counseling
- Dentistry
- Dietetics and Nutrition
- Engineering
- Geology
- Interior Design
- Land Surveying
- Landscape Architecture
- Massage Therapy
- Medical Physics
- Medicine
- Mental Health Practitioners
- Midwifery
- Occupational Therapy
- Ophthalmic Dispensing
- Optometry
- Pathologists' Assistant
- Perfusion
- Pharmacy
- Physical Therapy
- Podiatry
- Polysomnographic Technology
- Respiratory Therapy
- Social Work
- Speech-Language Pathology
- Veterinary Medicine

Concentrations in Accounting or Education

New York state has additional regulations for a concentration in education or a degree in accounting. Certification/licensure in education and accounting require additional education beyond the bachelor's degree. All students within the Educational Studies area of study or pursuing an accounting degree, or who plan to acquire one of these certifications, must complete a certification disclaimer form indicating that they understand they will need more education to reach their goal. These forms may be completed online (SUNY Empire login required):

- Accounting Certification Disclaimer form (https://banner.esc.edu/BannerExtensibility/customPage/page/ESC_AccountCertification/)

- Education Certification Disclaimer form (https://banner.esc.edu/BannerExtensibility/customPage/page/ESC_TeacherCertification/)

Double Concentrations

Double concentrations are possible in bachelor's degrees, when appropriate, but are not possible in an associate degree. When a degree program has a double concentration, each area must be represented by a set of integrated learning components that demonstrate progression to advanced levels of learning. The university has established guidelines for completing concentrations in each area of study. These guidelines outline general expectations for study in the area, as well as specific expectations for certain concentrations. In addition, students often design concentrations for which no specific guidelines exist. These students research their interests and explain their choices within their degree program rationale. Students should talk to their mentor if they are interested in a double concentration.

Elements of the Degree Program Proposal

All degree program proposals include:

- Degree program plan
- Degree program rationale essay
- General education document
- Individualized credit for prior learning (iCPL) evaluations if applicable
- For planned PLA, a memo outlining the attributes of each request including whether the PLA will address/meet requirements such as general education or an area of study guideline if applicable

Official copies of college transcripts for all completed advanced standing must be received by the Admission Office prior to degree program proposal submission.

Programs may be approved with:

- up to 16 outstanding PLA credits
- other planned or in-progress advanced standing, including directly transferable college credits, credit by examination, and Professional Learning Evaluation (PLE)

Rationale Essay

The rationale essay is written to explain the purpose, design, and significance of individualized degree programs. Through a rationale essay the student discusses:

- their educational background and professional experience
- how the proposed degree plan meets their academic goals and learning needs
- how the learning in the degree plan reflects the SUNY Empire area of study learning outcomes and concentration guidelines for the degree when applicable, or in rare instances how their learning deviates from the learning outcomes to meet a specific educational need.
- awareness of external professional expectations, where applicable.

The rationale essay accompanies the individualized degree plan and is a key outcome of the required study in educational planning. The final draft that accompanies the individualized degree program when it goes for academic review should meet college-level writing expectations in terms of substance, presentation, and academic integrity.

Degree Program Proposal Review and Approval Process

Timing of Submission of Degree Program Proposal

Active students may submit a degree program for approval as early as their first term of matriculation into an undergraduate degree program.

Students must submit their degree program for approval no later than the end of the term in which they will have earned their 24th SUNY Empire credit.

Degree Program Proposal Review

Once the degree program plan and all required forms and documents as outlined in the Elements of the Degree Program Proposal (p. 193) section are ready, the mentor submits the information through the DP Planner system, which triggers the correct office of academic review to start the review and approval process. The office performs a thorough technical review to surface any issues, and then facilitates a faculty committee review. Upon approval at that level, the degree program is sent to the office of the registrar for final review. Both reviews examine the technical correctness and the academic soundness of the proposed degree program.

Concurrence and Final Approval

The office of the registrar is responsible for the university-level policy review and concurrence of the degree program. If the office of the registrar finds issues needing resolution during its review, including incomplete documentation or non-compliance with SUNY Empire policy or criteria, the reviewer informs the appropriate academic review office within 30 days. The academic review office works with the student, mentor, and others as needed, to resolve the problem, or provide additional information.

When the office of the registrar finds no issues with the degree program proposal, it "concurs" (approves) the degree program, and it becomes the official curriculum to be completed to earn the degree. The student and mentor are notified, and the degree program officially moves from DP Planner as the planning tool into Degree Works (http://catalog.sunyempire.edu/undergraduate/earning-undergraduate-degree/indivdegreedesign/www.sunyempire.edu/degreeworks/) as the official record and auditing tool.

Degree Works Audit

After the degree program is concurred, an individualized degree audit is created for the approved degree program. The student and mentor then utilize Degree Works to track their progress toward degree completion.

Changes to a Concurred Degree Program

Course Substitutions

Although changing a course may appear inconsequential, there could be unanticipated consequences. **Any deviation from learning on the concurred degree program requires mentor consultation and office of academic review approval prior to registration.**

If a change is minor, substitutions within your SUNY Empire coursework can be made with mentor approval. If the change being requested is more than a course swap, a formal amendment may be required to re-approve the degree program.

Degree Program Amendments

A formal amendment process is required if there are more substantial changes to the degree program being requested such as a change to the area of study or concentration title. Amendment requests go through the mentor to the office of academic review.

Longevity of Degree Programs

A concurred degree program is valid for as long as the student retains matriculated status. Status is changed to inactive upon three years of non-enrollment, at which point reapplication to the university is required. A returning student may continue to follow the concurred degree program if their return is within five years of the date of concurrence.

Academic Support

Empire State University offers a range of academic support services and resources to help you develop the academic skills and learning strategies critical to your success as a student and a lifelong learner. We support all students at all levels, and all our services and resources are free for SUNY Empire students, including tutoring.

To access academic support, go to the Academic Support Portal (https://my.sunyempire.edu/academics/AcademicSupport/Pages/default.aspx) in MySUNYEmpire, where you may access multiple tutoring options, live academic support workshops, interactive tools and self-paced resources.

Tutoring Options

SUNY Empire Learning Coaches are professional staff (employees of the university) who coach and tutor both undergraduate and graduate students. Coaches are available online and onsite in selected locations and

- assist with all aspects of writing and all types of writing assignments, including the rationale essay and credit for prior learning request essays (individualized prior learning requests)
- tutor math, statistics, science and business
- coach study skills, including time management and reading strategies
- can meet with you regularly throughout the term and provide sessions customized to your needs

To supplement our learning coaches, the university provides free access to an **on-demand, 24/7 tutoring service** in a broad range of subject areas at hours when SUNY Empire learning coaches are not available. The on-demand service offers

- on-demand, live tutoring in 300+ subjects, including writing
- interactive lesson space with audio and video available in all subjects and sessions
- paper review service with feedback provided in less than 24 hours

Peer Tutors are current students or alumni available online who

- tutor specific SUNY Empire courses which they have passed with B+ or above and are recommended by a faculty member who teaches the course
- provide basic tech support, such as navigating Brightspace, Teams, Office 365, etc.

At the Academic Support Portal (https://my.sunyempire.edu/academics/AcademicSupport/Pages/default.aspx) you will also find

- a series of live, online academic support workshops offered throughout each term
- interactive tools including an Assignment Calculator and a Thesis Generator
- self-paced resources on time management, reading strategies, writing with sources and using citation, building an argument, and graphing
- links to external resources, including Linked-in Learning
- writing resources created by SUNY Empire faculty to develop different areas of academic writing, including the writing process, research writing, types of writing assignments, critical reading and writing, grammar and punctuation.

Online Library

Empire State University's Online Library (https://www.sunyempire.edu/library/) is staffed by librarians who provide the following educational services:

- 24/7/365 help via live chat, email, and online form at Ask a Librarian (https://askalibrarian.sunyempire.edu/), or by phone at 800-847-3000, ext. 2222;
- live, online, library skills workshops (https://subjectguides.sunyempire.edu/workshops/); and
- support for accessing materials.

The SUNY Empire librarians have also created and curated the following resources:

- 1.5 million+ digital works of art
- 250,000+ ebooks
- Full-text journals and newspapers to support programs and courses at SUNY Empire
- Tens of Thousands of streaming films
- Many guides focused on course assignments, research help, subjects or majors, and other topics such as citation or how to find academic journals
- 75+ search tools encompassing millions of full-text articles, reports, and other research materials
- hundreds of online tutorials and FAQs to guide students through the research process and the library's many resources

Normal office hours are:

Immediate assistance is available Monday-Friday, typically until 7:00 p.m.

Live chat is always available through our partnership with the AskUs 24/7 consortium of academic librarians.

In Person Access to Academic Libraries

SUNY Empire encourages students who may need access to print books to investigate academic libraries in their local communities as a way to supplement the Online Library's electronic resources. SUNY Empire's online library has hundreds of thousands of e-books, and can purchase ebooks upon request, request book chapters, articles, and other digital materials for students.   Students who wish to locate specific print materials not available in the Online Library can Ask a Librarian (http://www.sunyempire.edu/AskaLibrarian/) for help.

Through the SUNY Open Access Program, Empire State University students and employees have access to the print materials of SUNY's two and four-year college and university center libraries. A similar agreement is in place with the City University of New York (CUNY) library system, covering all library facilities.

To check out circulating books from these libraries, students must present a valid Empire State University ID card. All SUNY Empire borrowers agree to obey all rules, regulations and policies that are established by the lending library. In addition to overdue fines, borrowers who have lost or not returned library materials also will be charged processing and/or replacement fees. Students with outstanding fines to a SUNY or CUNY library may have a hold placed on their student account.

Copyrighted Materials: Their Reproduction and Use

Use of Copyrighted Materials

SUNY Empire State University complies with the U.S. Copyright Act of 1976 and the Digital Millennium Copyright Act of 1998.

SUNY Empire respects the intellectual property rights of those who create and/or publish original works of authorship in any tangible medium of expression, whether physical or digital media, and regardless of format or genre. SUNY Empire, therefore, authorizes use of copyrighted materials only under the following conditions:

- When permission is obtained from the copyright owner, or
- When reproduction, dissemination, creation of derivative works, performance or display of copyrighted materials falls within Fair Use guidelines, which are explained on the library's copyright website (https://www.sunyempire.edu/library/copyright/), or
- When performance or display of copyrighted materials in a face-to-face classroom environment falls within Educational Use guidelines.
- When performance or display of copyrighted materials in an online educational environment falls within TEACH act guidelines.

Using Copyrighted Works Online

Reproduction, dissemination, performance, display and creation of derivative works from copyrighted works **may be** permitted under the Fair Use Exemption of the Copyright Act of 1976.   A helpful guide to determine if a use is allowable is if it passes the Four Factor Test (https://subjectguides.sunyempire.edu/copyright/fairuse/).

Neither the nonprofit status of the University nor the educational nature of the endeavor are sufficient to automatically judge something Fair Use. There is no set guideline for number of words, number of pages or percentage of a total work that can be used.

Posting Multimedia in Online Courses Under the TEACH Act

As of January 2014, SUNY Empire is TEACH (Technology, Education and Copyright Harmonization) Act compliant. The TEACH Act allows educators to use some copyright protected multimedia materials in online courses without gaining prior permission and/or paying royalties. The content can be an image or audiovisual, but it must not be textual (the written word.) It also cannot be intended for the educational market (such as a video on a CD that accompanies a textbook.) The content can only be posted inside a course in the Learning Management System (Brightspace), and only for as long as the students of that course need to have access to it. It must be captioned with the copyright and citation information. If it is nonfictional and nondramatic, there is no limit to the amount that can be posted; however fictional or dramatic content is limited to brief clips. TEACH Act applies only to materials that are posted for learning activities that are analogous to mediated instruction during class time in a face-to-face classroom setting. The TEACH Act must not be used to post materials that are used for research, reading assignments, homework or extra-curricular activities.

For Copyright Information and Help, Consult the Library

Information on copyright can be found on the Copyright Information Resource Center (https://www.sunyempire.edu/library/copyright/) web page. Copyright questions can be directed to Librarian@sunyempire.edu.

Student Services

1Stop Student Services (https://www.sunyempire.edu/1-stop-student-services/)

Empire State University believes students should be only one step away from obtaining easy access to the information they need to move forward with their student business. Whether in person, by phone, by chat, or through virtual self-service support, students can obtain consistent and timely information related to financial aid, student accounts, billing, and registration and records. 1Stop also provides connections to academic support, accessibility resources and services, library services and technical support.

Your 1Stop Options
- Virtual Self-Service Support 24/7/365 online at the 1Stop Student Services web page (https://www.sunyempire.edu/1stop/).
- Blue our AI Chatbot (https://www.sunyempire.edu/1stop/#bot) with Live Agent Support.
- Phone at (800) 847-3000, ext. 2285, weekdays, from 8:30 a.m. to 5:00 p.m.
- Email at 1Stop@sunyempire.edu

Health And Wellness

Good health is critical to academic success. SUNY Empire offers students a wide array of services, funded by the student health and wellness fee, to help promote student physical and emotional health during their enrollment at the institution. For more information on health and wellness services and programs offered by SUNY Empire, visit the university's Student Health and Wellness web site (https://www.sunyempire.edu/student-affairs/student-life/health-wellness/), email at healthandwellness@sunyempire.edu, or phone 518-587-2100, ext. 2201.

Health And Wellness Events through SUNY Empire Connects

Weekly Health and Wellness programs are available to all students, faculty, and staff attending one of our SUNY Empire Connects (https://www.sunyempire.edu/connects/) events. A weekly schedule is available on the SUNY Empire Connects website (https://www.sunyempire.edu/connects/).

Counseling

Counseling resources for students can be found on the Student Health and Wellness web site (https://www.sunyempire.edu/student-affairs/student-life/health-wellness/).

Consulting Services

Resources for free legal and financial advice consultations for students can be found on the Student Health and Wellness web site (https://www.sunyempire.edu/student-affairs/student-life/health-wellness/).

Accessibility Resources And Services

A qualified person with a disability who meets the academic and technical standards required to enroll in and participate in the Empire State University program shall be provided an equal opportunity to obtain a degree in the most integrated setting appropriate to that person's needs. SUNY Empire will make reasonable accommodation to meet the needs of students with disabilities. Each student's needs are considered on an individual basis.

The flexible nature of our degree programs make SUNY Empire an ideal place for a motivated, independent learner with a disability to obtain a degree. Accommodations are implemented to ensure that students are afforded access to the university's programs, courses and services. To request accommodations, please contact Accessibility Resources and Services: 518-587-2100, ext. 2244, Disability.Services@sunyempire.edu.

SUNY Empire complies with Section 504 of the Rehabilitation Act of 1973 and the Americans With Disabilities Act of 1990. No otherwise qualified individual with a disability shall be excluded from participation in, be denied the benefits of, or be subject to discrimination under any activity of the university solely by reason of his or her disability. Please visit the Office of Accessibility Resources and Services website (http://www.sunyempire.edu/accessibility/) or see the Student Affairs Policies (https://www.sunyempire.edu/policies/) website for further information.

Bookstore

The Empire State University Bookstore (http://www.sunyempire.edu/Bookstore/) is available on the university's website for students in all university locations. Books are stocked at the request of programs or individual instructors for study groups and tutorials.

To order books online, students need to know the term, department, course number, and section of their course.

Links are available on the web page to help students find this information. Course materials orders must be placed on the website (http://www.sunyempire.edu/Bookstore/). Phone and fax orders are not accepted. Books are shipped via UPS directly to a home or business address. Domestic shipments take two to seven business days via UPS.

We are here to serve you; please let us know if you have comments, ideas, or problems when using the bookstore's web page (http://www.sunyempire.edu/Bookstore/) by emailing bookstore@sunyempire.edu. The hours of operation are 8:30 a.m. to 4 p.m., Monday through Friday.

Online book orders
Book orders can be placed through the bookstore web page (https://www.sunyempire.edu/bookstore/).

Office Of Veteran And Military Education

The Office of Veteran and Military Education develops programs and services that support the educational needs of active-duty, guard, reserve, and veteran service members and their family members, whether they are in the United States or abroad. Dedicated staff and resources are

available from application through graduation for pre-enrollment advising, preliminary review of military transcripts, military and veteran funding guidance, and assistance with application and registration.

Empire State University is a committed military partner and DOD MOU participant signatory. The university participates in GoArmyEd, Air University-Associate to Baccalaureate Cooperative (AU-ABC), General Education Mobile (GEM), Principles of Excellence, and 8 Keys to Veterans' Success.

For information, please contact:

Office of Veteran and Military Education (https://www.sunyempire.edu/veteran-military/)

Student Computing And Technology Services

SUNY Empire provides various technology resources to meet the educational needs of its students. General information about technology at SUNY Empire is available on the Student Technology web page (https://www.sunyempire.edu/service-desk/student-technology/).

Student Login And Password

Every enrolled student is assigned a username and password that provides access to all secure information on the web. Students receive an email with their username and password when accepted to the university. Students can create a secure permanent password and security questions to manage future password resets at the Self Service Password Management web page (https://www.sunyempire.edu/service-desk/password-management/).

Privacy And Security

To protect students' privacy, many SUNY Empire web services are password-protected and restricted to enrolled or admitted SUNY Empire students. Students should take precautions to protect their login and password information. Our university's privacy policy and security practices outline how we protect your personal information. For more information, please see the university's Web Privacy policy (https://www.sunyempire.edu/policies/?search=cid%3D35655).

Students who believe their password has been compromised should immediately change it at the Self Service Password Management web page (https://www.sunyempire.edu/service-desk/password-management/) or contact the IT Service Desk (https://www.sunyempire.edu/service-desk/).

Web-Based Student Services And Information - MySUNYEmpire

The MySUNYEmpire (http://my.sunyempire.edu/) website provides students with a single point of access to online services, information, and learning resources. With a university login, students can register for studies, view personal academic and account information, complete financial aid requests, update address and email information, change passwords, order books, and build their personal degree programs.

MySUNYEmpire connects students to resources to support academic endeavors, including library services, learning supports, information about study opportunities, and sources of student support. Key announcements and news items are posted on MySUNYEmpire and university offices maintain information and contact numbers through this site.

Student Computers

Most Empire State University locations maintain desktop and laptop computers (PCs) for student use. Students without home access can use these computers to access their personal records through MySUNYEmpire. Computers at our New York state locations also may be equipped with academic software for student use. These computers can be used for a variety of learning activities, including degree planning; access to the university library website; computer literacy; computer programming; business computer applications (spreadsheets, word processors, and database management); computer-mediated instruction; and for studies requiring computation such as statistics, social science research and business quantitative methods. In addition to onsite computers, the university also offers a laptop loan program (https://www.sunyempire.edu/student-affairs/student-life/laptop-loan-program/) for eligible students.

Each location also maintains a kiosk computer for students to connect with MySUNYEmpire (http://my.sunyempire.edu/)services.

Email

Email is a very important communication method in the university. Every university community member has a university email address, and every administrative office uses email to communicate with students. Empire State University students must have a private email account and maintain a valid email address for online registration in our student information system. Students who do not have an email account can find information on how to establish a free service on the IT Service Desk website. Students must report changes in their email addresses to the university. This can be done online at MySUNYEmpire (http://my.sunyempire.edu/) in Self-Service Banner (SSB).

Upon being admitted, students receive a university email address, which is the official communication channel for the university. Students are responsible for any email sent to the university email address. Students who would like to request to forward their university email to a personal email account must accept the risk at SUNY Empire Student Email Forward Settings. Students may also update their personal email addresses on file on this same site.

Online Tools

Many instructors use technology tools to support learning and to promote collaboration. Students may participate in online discussions and submit online assignments through the university's web-based Learning Management System. Web conferencing is used to connect students and faculty at a distance. Students have access to electronic portfolio space to collect and share their work.

Student, Faculty And Staff Web Pages

The university provides resources for Empire State University students, faculty, and staff to explore individual and professional web publishing for sites that are not considered official university content but related to the author's role and affiliation with the university.

Enrolled students can request an FTP account on a university server to host a site for course-related purposes. All users agree

to follow the university's web and (https://www.sunyempire.edu/policies/?search=cid%3D35658)technology user policies (https://www.sunyempire.edu/policies/?search=cid%3D35658).

For more information about individual Web publishing at the university, please refer to the IT Service Desk web site (https://www.sunyempire.edu/service-desk/).

Getting Help

The university's technology website, (https://www.sunyempire.edu/service-desk/) has the most current information about all of the university's technology tools and offers online assistance.

Students needing technical assistance in using SUNY Empire technology applications can contact the IT Service Desk online (https://www.sunyempire.edu/service-desk/) or by phone at 800-847-3000, ext. 2420 or 888-HELP009. Please check the IT Service Desk website (https://www.sunyempire.edu/service-desk/)for the most current hours of operation.

Student Identification Numbers And ID Cards

When you enroll at Empire State University, you will be assigned an ID number that will be used to identify your records at the university. This number is assigned so that you do not have to use your Social Security number. If you don't know your SUNY Empire ID, check with your mentor or the student success coordinator at your program.

The university issues ID cards to students upon request. Most students need ID cards to check out books or use library facilities at SUNY or CUNY colleges and universities.

Request A Student ID Card

The university provides student ID cards at no cost to the student.

Students should send a digital or scanned 2" x 2" photograph as a .jpeg attachment to the email listed below, and an identification card will be mailed to you after the term begins. Please include the address where you would like the ID mailed and the SUNY Empire ID number. Alternatively, you can mail your request for an ID card to:

Student Problem Resolution

While Empire State University strives to ensure a positive educational experience, there are staff to promote student success, connect students to resources and facilitate conflict resolution. We work with students in person and online. The student success professional serves not as an advocate for either party, but rather as a neutral investigator and facilitator.

Students are responsible for understanding and abiding by the policies and procedures of the university. For more information on university policies and procedures, see the Policies (p. 214)section, and Student Affairs Policies (https://www.sunyempire.edu/policies/) website, which include the policies on student conduct, grievances, academic appeals and accommodations for students with disabilities.

Students should contact the student success professional based on their school from the chart below.

UNIVERSITY STUDENT SERVICES

Students should first attempt to resolve a concern with the student success professional, faculty or staff at their program. In the event that a student complaint is unable to be resolved, the student may then contact:

Dan Greer
Executive Director for University Student Services
UniversityStudentServices@sunyempire.edu
680 Westfall Road
Rochester, NY 14620
518-587-2100 x2389

Religious Observance

In compliance with Section 224-a of the Education Law, students unable, because of religious beliefs, to engage in learning activities – classes, examinations, study or work requirements – on a particular day or days will not be penalized and will be provided with means to make up for any study opportunities that may have been missed because of absence for religious reasons. Since most study arrangements at Empire State University are individually made between student and faculty, students

may schedule meetings and other academic activities so they do not conflict with their religious observances. In cases where group meetings are arranged (e.g., classes, seminars, special examinations such as College Level Examination Program or College Proficiency Examination Program), students who wish to avail themselves of these opportunities but are unable to participate at certain times because of religious beliefs should consult with their mentors prior to the established meeting times to make alternate arrangements. No adverse or prejudicial effects shall result to any student because of his or her religious beliefs.

`

Student Activities

Alumni Student Association

There are over 97,000 SUNY Empire alumni worldwide representing all 50 states and 96 countries. Through the Alumni Association, former students can stay connected to the university and fellow graduates. Our alumni attend social, networking, and educational events, share their stories in university publications, join online groups, and volunteer at commencement ceremonies and recruitment events. Many alumni participate in career fairs and mentoring activities and provide philanthropic support to the university and its programs.

The Alumni Student Federation Board of Governors oversees the Alumni Association. The Federation Board serves as a liaison with the university, acts as an advocate for students and alumni, and provides programs to engage alumni and advance the university and its mission. The board is made up of alumni from different locations and programs and includes an international representative. In addition, the student representative from the University Council and the president of the Student Government Association are both standing members of the board.

If you are interested in learning about more ways to stay connected, contact the Office of Alumni Engagement at alumni@sunyempire.edu 518-587-2100, ext. 2344.

Student Activity Fee Committee

The Student Activity Fee Committee is made up of students representing various organizations, schools, and programs of the university. The committee convenes annually to review all student activity fee dollars proposals and decide the allocations. The Office of Student Engagement oversees the committee.

Student Governance Association

The mission of the SUNY Empire Student Governance Association (SGA) is to ensure that the student experience at SUNY Empire is excellent. The Student Senate is the legislative body of the SUNY Empire Student Government, comprised of students elected to represent their school of study and the student body at large. As student leaders and advocates, they are tasked with making decisions about important topics that directly impact students.

The SUNY Empire Student Government Association (SGA) Executive Board consists of the SGA president, vice president, treasurer, and secretary. In addition, the SGA Executive Board has also established office hours to serve students better and answer their questions.

More information about SGA and how students can participate, along with links to the SGA Executive Board office hours, can be found on the SGA website. (https://www.sunyempire.edu/student-affairs/student-government-association/)

Student Representation in University Governance

The SGA President is a member of the University Senate. Additionally, students may be added to Senate standing committees. A student must be enrolled during the term of service.

SUNY Student Assembly

Each SUNY campus has elected student representatives to the SUNY Student Assembly. This governance body represents the interests of SUNY students statewide. Per the current bylaws, the Student Government Association selects the Empire State University student representative to the SUNY Student Assembly.

Student Awards

Each year the Office of Community Standards and Engagement oversees the application and nomination process for the Chancellor's Awards, the Bluebird Award, and others as needed. Information on these awards can be found on the Awards and Fellowship website (https://www.sunyempire.edu/student-affairs/student-life/awards-fellowships/).

Graduation and Commencement

The university holds annual commencement activities across the state where all who have completed their degree requirements during that year are honored. Check the commencement website (https://www.sunyempire.edu/commencement/) for more details. Empire State University takes great pride in its graduates and their accomplishments. Our staff dedicates themselves to ensuring that our ceremonies are memorable occasions for our graduates and their families. The ceremony is a formal event with speakers, regalia, and an academic procession and is a wonderful opportunity for our students to celebrate earning their degrees.

UNIVERSITY Council

The University Council:

1. Provides advice to the president and administration.
2. Represents the State of New York and its taxpayers in affirming that the university is fulfilling its public mission.
3. Receives information about university programs, budgets, enrollments, facilities, and student learning.

One member of the College Council is an Empire State University student recommended by faculty and staff and serves on a rotating basis.

Student Conference

The Student Conference brings together students from all geographic and academic areas of the university to focus on personal and professional development. The conference seeks to provide an arena for developing the professional and leadership skills needed to advance in one's chosen field. The student activity fee funds this event.

Student Clubs and Organizations

Empire State University recognizes that co-curricular activities greatly enhance students' academic experience. To that end, we have a growing group of clubs and organizations at the university open to all students; you can find a listing of these on the Student Clubs website (https://www.sunyempire.edu/student-affairs/student-life/clubs-and-organizations/). Current clubs promote academic, social, and cultural activities for students throughout the university.

Students are encouraged to join existing clubs or explore the creation of a new club. Please contact the Office of Student Engagement with questions at 518-587-2100, ext. 2201. Below are the recognition policies that give you an overview of starting a new club. For more information about student clubs, including a current list of active clubs, please

visit the Student Clubs web page (https://www.sunyempire.edu/
student-affairs/student-life/clubs-and-organizations/) and review the
university's Student Clubs and Organizations Procedures (https://
www.sunyempire.edu/policies/?search=cid=36991).

Safety and Security

The Office of Safety and Security at Empire State University oversees security operations for the college. The office serves as an administrative oversight for security operations at the Coordinating Center in Saratoga Springs and university-wide. The office works closely with law enforcement agencies and first responders throughout New York to ensure a safe, secure, and conducive learning environment for our students and a professional work environment for our faculty and staff.

Safety is everyone's responsibility. The university community is a great place to work; however, it is not immune to the types of problems seen throughout society. Unfortunately, crime is a reality at every location of Empire State University.

The university's goal is to provide a safe and secure environment for students, staff, and visitors. However, it is only possible to maintain safety and security when every student and staff member takes an active part in the effort.

Safety and Security Policies and Procedures

As a nonresidential university, Empire State University's facilities consist of office space where faculty meet with students and administrative work is conducted. Each location has its own procedures for maintaining the security of that particular facility.

This policy complies with Title II of Public Law 101-542, the Crime Awareness and Campus Security Act of 1990. The cooperation and involvement of all members of the university community is essential to a successful safety and security program. All persons must assume responsibility for their own personal safety and the security of their personal belongings by taking common sense precautions. The university is not responsible for lost or stolen personal items. Students, faculty and staff should report suspicious persons, questionable circumstances, activities or unusual incidents they may observe to the Office of Safety & Security.

University Law Enforcement

Empire State University's Office of Safety & Security is located in Saratoga Springs. In conjunction with local law enforcement and individual facility management at our various locations, Safety & Security works to ensure the overall safety of the university community as a whole. The office is staffed during business hours only and does not provide 24/7 coverage. The office works cooperatively with law enforcement agencies having jurisdiction at each SUNY Empire location and has forged partnerships through Memorandums of Understanding (MOUs) for assistance with the investigation of crimes, when applicable. All federal, state and local laws apply at SUNY Empire. Representatives of the Office of Safety & Security serve an administrative function and do not have law enforcement authority.

While we have developed policies and procedures to ensure that students and their possessions are protected as much as possible, it is primarily the responsibility of the student, faculty or staff member to provide for his or her own personal safety.

The Jeanne Clery Act

Compliance Statement: The Crime Awareness and Campus Security Act of 1990 Clery Campus Crime Statistics

The Jeanne Clery Disclosure of Campus Security Policy and Campus Crime Statistics Act is the federal law, originally known as the Campus Security Act, that requires colleges and universities across the United States to disclose information about crime on and around their campuses. The Clery Act also requires reporting crimes on public property not owned or controlled by the college. Empire State University is a nonresidential college.

Colleges and universities are required to publish an annual report every year that contains three years' worth of campus crime statistics and certain security policy statements including sexual assault policies that assure basic victims' rights, the law enforcement authority of campus police, security/public safety and where students should report crimes. The report is to be made available to all current students and employees. Prospective students and employees are to be notified of its existence and given an opportunity to request a copy. It remains the responsibility of the Office of Safety & Security for the collection of crime reports and distribution of the annual crime statistics and report by Oct. 1 of each calendar year.

The Empire State University "Annual Safety and Security Report" is available to all current and perspective students and employees upon request.

The "Annual Safety and Security Report" includes:

- Statistics on the number of on-site murders, rapes, robberies, aggravated assaults, burglaries, motor vehicle thefts, bias-related crimes and arrests for weapons possessions and liquor and drug abuse violations;
- Policies regarding security, access to college and other facilities, and college law enforcement;
- Procedures for reporting crimes and other emergencies;
- Information on college sexual assault and rape awareness programs, procedures to follow when a sex offense occurs, disciplinary action procedures, counseling opportunities and notification to students that Empire State University will make reasonable changes of a victim's academic situation if the victim so chooses;
- Policies on the use, possession and sale of alcoholic beverages and illegal drugs; and
- A description of Empire State University programs informing the college community about alcohol and drug abuse education, crime prevention and college security practices.
- Sex offender registry information, New York State Sex Offender Registry and NYS Sex Offender Registry home page (http://www.criminaljustice.ny.gov/). You also can call 800-262-3257.
- Procedures for emergency response, emergency communications and emergency evacuation procedures.

Geographic Locations Used Under the Clery Act

- *On Campus:* Any building or property owned or controlled by an institution within the same reasonably contiguous geographic area and used by the institution in direct support of, or in a manner related to, the institution's educational purposes, including residence halls; and any building or property that is within or reasonably contiguous to paragraph (1) of this definition, that is owned by the institution

but controlled by another person, is frequently used by students, and supports institutional purposes (such as a food or other retail vendor).

- *Noncampus Building or Property:* Any building or property owned or controlled by a student organization that is officially recognized by the institution; or any building or property owned or controlled by an institution that is used in direct support of, or in relation to, the institution's educational purposes, is frequently used by students, and is not within the same reasonably contiguous geographic area of the institution.
- *On Public Property:* All public property, including thoroughfares, streets, sidewalks and parking facilities, that is within the institution, or immediately adjacent to and accessible from the institution.

Safety and Security – Our Responsibility

The Office of Safety & Security is responsible for compiling and disseminating the Campus Safety Report annually as required by the Federal Student Right-to-Know Law and Campus Security Act, which was signed into law November 1990. The purpose of this report is to provide Empire State University faculty, staff, students and prospective students with university safety information including crime statistics and procedures to follow in order to report a crime. Title II of this act was known as the Crime Awareness and Campus Security Act, which was amended and renamed in 1998 to the Jeanne Clery Disclosure of Campus Security Policy and Campus Crime Statistics Act, known as the Clery Act. The Clery Act mandates that institutions receiving Title IV federal funds disseminate crime statistics for certain serious offenses that occurred on-site and in adjacent areas for the current reporting year and the previous two calendar years.

Definitions

1. On an annual basis, the Office of Safety & Security solicits information from any and all law enforcement agencies with geographical jurisdiction over any and all Empire State University locations about criminal activity reported to those agencies. The information requested outlines crimes reported to the agencies that happened on or near a university location or involved members of the university community.
2. This report of crimes reflects but is not limited to crimes outlined under the Jeanne Clery Disclosure of Campus Security Policy and Campus Crime Statistics Act (Clery Act).
3. The Office of Public Safety compiles data as outlined under the Clery Act and makes them available annually to the college community. Upon request, these data shall be provided to prospective students and employees.
4. Data obtained and reported to the Office of Safety & Security is held for seven years after an individual year report is published.

Empire State University, the New York State Campus Safety Act, Compliance Statement

Empire State University acknowledges the importance of university safety and investigating crime. By means of this statement Empire State University adheres to formal plans that provide for the investigation of missing students and violent felony offenses committed on-site. Memorandums of understanding throughout New York have been executed with various local law enforcement agencies to specifically address this issue.

What is the New York State Campus Safety Act?

This law was enacted in 1999. It was prompted by the unexplained disappearance of Suzanne Lyall from the State University of New York at Albany campus in 1998. The reforms made by this law acknowledge that improving campus safety must begin with swift and efficient investigative action and optimum access to missing person information by student's families and the public. The act:

- Requires all public, private, community colleges and universities in New York to have formal plans that provide for the investigation of missing students and violent felony offenses committed on campus;
- Expands the responsibilities of the NYS Division of Criminal Justice Services (DCJS) Missing and Exploited Children Clearinghouse to provide assistance with the dissemination of information about missing college students.

Investigations of Missing Persons: Empire State University Missing Person's Compliance Statement

A "missing student" or "missing person," means any SUNY Empire student is subject to provisions of section 355 (17) of the New York State Education Law. The university does not operate or employ residence halls. Therefore, any and all persons reported missing to the Office of Safety & Security will be reported to the Saratoga Springs Police Department or law enforcement having immediate jurisdiction. In 2003, President George W. Bush signed into law "Suzanne's Law," requiring police to notify the National Crime Information Center (NCIC) when someone between 18 and 21 is reported missing, as part of the national "Amber Alert" bill.

Memorandums of Understanding

Empire State University, [in accordance with the provisions of Procedure No. 3650, dated July 1, 2004, set forth by the State University of New York, Campus Conduct and Other College Property Used for Educational Purposes, and The Jeanne Clery Disclosure of Campus Security Policy and Campus Crime Statistics Act, codified at 20 USC 1092 (f), Crime Awareness and Campus Security Act of 1990 otherwise known as the Campus Safety Act] developed memorandums of understanding with local law enforcement to address enforcement of laws at the college, to assist in the reporting of missing persons and investigate and respond to violent felony crime under New York Penal Law §70.

Criminal and Incident Reporting
Offense

If a non-emergency offense (violation, misdemeanor, or felony) occurs at any of the university's locations, it shall be immediately reported to the applicable law enforcement agency or the Office of Safety & Security. In the event of an emergency, the first call should be to the 911 center who will make the appropriate law enforcement notifications. Once the emergency has concluded, the Office of Safety & Security shall be notified. Contact information for local police (https://www.sunyempire.edu/safety-security/incident-reporting/) is located on the university safety and security website (https://www.sunyempire.edu/safety-security/).

During normal business hours, the Office of Safety & Security, or other university official should be available to assist victims and witnesses in reporting incidents to police. Criminal offenses occurring outside of normal business hours should be reported directly to local law enforcement as outlined above. The university also has an after-hours emergency incident reporting number for the Office of Safety & Security at 518-587-2100, ext. 2900.

Incident Reporting Procedure

Empire State university Incident Reporting Procedural Statement

Purpose

Establish guidelines to assist SUNY Empire community members in reporting of incidents that may occur to students, faculty and staff. The university is regulated by statute to report specific criminal incidents that have direct correlation to the university. The guidelines that follow will assist individuals in reporting of incidents and streamline the notification process.

Definitions

- *Incidents:* An incident may be defined as, an action or event that is, has or is going to occur that has an effect on someone or something. For the purposes of this procedure an "incident" is an offense (violation, misdemeanor, or felony) immediately dangerous to life, health or to the university as a whole.

- *Incident Report:* Official report taken by SUNY Empire with regards to an incident documenting pertinent information. A police agency report will serve as an official report under this definition.

Incident Reporting, Criminal or Violent Behavior

All university staff, faculty and students are asked to assist in making the university a safe place by being alert to suspicious situations or persons and reporting them as outlined below. If you witness, are the victim of, or are involved in any on-campus violation of the law such as assault, robbery, theft or overt sexual behavior, local emergency police services should be called at 911 as soon as possible and the following information should be given:

- Nature of the incident
- Location of the incident
- Description of the person(s) involved, injured
- Description of the property involved

In addition, the individual should immediately report the incident to the Office of Safety and Security. Crimes or incidents of a lesser nature including, but not limited to: Property crimes, larceny, and vandalism, are to be immediately reported to the executive director/ regional operations coordinator (or designee). If an individual notices a person(s) acting suspiciously at a Coordinating Center location, he or she should contact the Office of Safety and Security at 518-587-2100, ext. 2900. In all other locations, individuals should contact the executive director/regional operations coordinator (or designee) at the location who will determine if the police need to be contacted.

Incidents requiring medical attention should be reported to local emergency 911 officials. In addition, the individual should immediately report the incident to the executive director/regional operations coordinator (or designee).

In all instances, the Office of Safety and Security will conduct an investigation with the police agency taking the initial report if applicable.

All SUNY Empire locations located on a SUNY campus are required to adhere to that respective university's emergency notification system when incidents occur.

In the event of a critical incident or violent criminal act, SUNY Empire in conjunction and communication with local law enforcement will, in accordance with the Jeanne Clery Act (34 CFR 668.46(e), issue a "timely warning" and/or "emergency notification" as directed by the university's Emergency Notification and Timely Warning Policy.

Identification of University Campus Security Authorities

The university has designated certain administrators and staff as "campus security authorities" in recognition that many students, faculty, and staff may be hesitant about reporting crimes to local police or the Office of Safety and Security and may be more inclined to report incidents to non-law enforcement administrators and/or staff instead.

Campus security authorities are employees designated at various university locations that aid in the safety and security of the university community. Campus security authorities may be contacted when someone witnesses or sees an unsafe condition, believes that they are the victim of a crime, or is seeking a referral for drug or alcohol abuse. The university's Title IX coordinator (titleixcoordinator@sunyempire.edu) must be contacted in all cases of sex discrimination or sexual violence.

Campus security authorities are charged with reporting to appropriate law enforcement personnel (either the Office of Public Safety or local police), and university officials who should be made aware of the crime or complaint. A campus security authority is not responsible for determining whether a crime took place, as that is the function of law enforcement and its investigatory process, but rather responsible for making a good faith effort to report the incident and to help prevent further incidences.

A campus security authority is required to report all allegations to law enforcement personnel, even if the campus security authority was told of a crime in the context of providing emotional support or health care support. The allegations will be reported whether or not the victim chooses to file a report with law enforcement or press charges. A campus security authority also may provide a victim or witness with assistance in reporting a crime to the Office of Public Safety or local police, or to any official or office which should be informed of the crime or complaint.

The university has a list of mental health and counseling resources available on its Health and Wellness web site (https://www.sunyempire.edu/student-affairs/student-life/health-wellness/). Students should note, however, that if, for example, a dean with a Ph.D. in psychology provides assistance, he/she is acting in his/her role as a dean and not as a counselor. In this case, the dean would not be exempt from the Clery Act reporting requirements.

In addition, as required under, (34 CFR 668.46a), the has designated certain administrative personnel as "campus security authorities."

- Office of Public Safety, director and assistants/designees.
- Executive vice president and affiliate vice presidents.
- Assistant vice president for human resources or designee.
- Title IX coordinator/deputy Title IX coordinator.
- Provost and vice provosts.
- Director of collegewide student services or designee.
- Executive directors and regional operations coordinators.
- Deans and associate deans.
- Directors and coordinators.
- Director of collegewide disability services.

Clery Offenses (Federal Offense Definitions)

- *Aggravated assault:* An unlawful attack by one person upon another for the purpose of inflicting severe or aggravated bodily injury. This type of assault usually is accompanied by the use of a weapon or by means likely to produce death or great bodily harm.

- *Arson:* Any willful or malicious burning or attempt to burn, with or without intent to defraud, a dwelling house, public building, motor vehicle or aircraft, personal property of another, etc.
- *Burglary:* The unlawful entry into a building or other structure with the intent to commit a felony or a theft.
- *Crime or a public offense:* An act committed or omitted in violation of a law forbidding or commanding it, and to which is annexed, upon conviction, either of the following punishments: death; imprisonment; fine; removal from office or disqualification to hold and enjoy any office of honor, trust or profit in this state.
- *Domestic violence:* Violent misdemeanor and felony offenses committed by the victim's current or former spouse, current or former cohabitant, person similarly situated under domestic or family violence law, or anyone else protected under domestic or family violence law.
- *Dating violence:* Violence committed by a person who has been in a romantic or intimate relationship with the victim. Whether there was such relationship will be gauged by its length, type and frequency of interaction.
- *Drug abuse:* Violations of laws prohibiting the production, distribution and/or use of certain controlled substances and the equipment or devices utilized in their preparation and/or use.
- *Rape:* The penetration, no matter how slight of the vagina or anus with any body part or object, or oral penetration by a sex organ of another person, without the consent of the victim.
- *Fondling:* The touching of the private body parts of another person for the purpose of sexual gratification, without the consent of the victim, including instances where the victim is incapable of giving consent because of his/her age or because of his/her temporary or permanent incapacity.
- *Hate crime:* Any act of intimidation, harassment, physical force or the threat of physical force directed against any person or family, or their property or advocate, motivated either in whole or in part by hostility to their real or perceived race, ethnic background, national origin, religious belief, sex, age, disability or sexual orientation, with the intention of causing fear or intimidation, or to deter the free exercise of enjoyment of any rights or privileges secured by the Constitution or the laws of the United States or the State of New York whether or not performed under the color of law (Source: Definitions Used in Hate Crimes Reporting, P.O.S.T. Hate Crimes Student Workbook, January 1992, p. 2).
- *Incest:* Nonforcible sexual intercourse between persons who are related to each other within the degrees wherein marriage is prohibited by law.
- *Larceny – theft:* The unlawful taking, carrying, leading or riding away of property from the possession or constructive possession of another.
- *Liquor-law violation:* Violations of laws or ordinances prohibiting the manufacture, purchase, transportation, possession or use of alcoholic beverages.
- *Murder and non-negligent manslaughter:* The willful (non-negligent) killing of one human being by another.
- *Negligent manslaughter:* The killing of another person through gross negligence.
- *Robbery:* The taking or attempting to take anything of value from the care, custody or control of a person or persons by force or threat of force or violence and/or by putting the victim in fear.

- *Sex offenses:* Any sexual act directed against another person, without the consent of the victim, including instances where the victim is incapable of giving consent
- *Stalking:* A course of conduct directed at specific person that would cause a reasonable person to fear for her, his or others' safety or to suffer substantial emotional distress.
- *Statutory rape:* Nonforcible sexual intercourse with a person who is under the statutory age of consent
- *Vehicle theft:* The theft or attempted theft of a motor vehicle.
- *Weapons:* Violations of laws or ordinances prohibiting the manufacture, sale, purchase, transportation, possession, concealment or use of firearms, cutting instruments, explosives, incendiary devices or other deadly weapons.

Incidents Requiring Medical Attention

Incidents requiring medical attention should be reported to local emergency 911 officials. In addition, the individual should immediately report the incident to the Office of Safety & Security who will notify additional university officials, as necessary.

Notification to Empire State University Administration

Once the incident has been effectively handled by police, reporting of the incident to university officials is mandatory. Reporting individuals are instructed to contact the executive regional director of a region or a university security authority to further report the incident that has occurred. Persons reporting also shall contact the Office of Public Safety in Saratoga Springs at 518-587-2100, ext. 2900. The Office of Safety & Security will assist the police appropriate agency with their investigation, if applicable.

Protection and Confidentiality

Nothing in this report will be construed to permit the university, or an officer, employee or agent of the university, participating in any program under this title to retaliate, intimidate, threaten, coerce or otherwise discriminate against any individual with respect to the implementation of any provision of this document.

SUNY Empire encourages students, faculty and staff to report all criminal activity that has occurred at a SUNY Empire location. The report of the criminal activity may be anonymous, and the person may request confidentiality.

Disclosure of Policy Statement: Policy for Preparing and Reporting the Annual Disclosure of Crime Statistics

The Office of Safety & Security, in conjunction with the Office of Academic Affairs, Office of Administration and local law enforcement agencies, prepares this report to comply fully with the Jeanne Clery Disclosure of Campus Security Policy and Crime Statistics Act. Statistics are compiled in accordance with the Uniform Crime Reporting System of the Department of Justice and the Federal Bureau of Investigation.

Campus crime, arrest and referral statistics include those reported to the Office of Safety & Security, and designated campus officials (including Office of Administration, Office of Academic Affairs, Office of the President, Office of Human Resource, executive regional directors and academic deans), and local law enforcement entities. Crimes are reported that occur on campus, on locations that are contiguous to the campus, and buildings or properties that are either owned or controlled by a campus affiliated entity.

University policy encourages every member of the university community to report a crime promptly. Information is available and is provided to individuals in reference to, voluntary confidential reporting procedures in the event a person does not want to pursue action either within the federal or state criminal justice system or within the university's discipline system. A procedure is in place to capture crimes statistics which are disclosed anonymously to Office of Safety & Security.

The data for the annual crime statistics is monitored daily. Every SUNY Empire location has a designated campus security authority. The campus security authority, upon receiving notification of a criminal incident on SUNY Empire property, will verify the circumstances and put the information into the appropriate database. These crime statistics will be published as part of the SUNY Empire Annual Security Report. Current data also can be disseminated upon request. The campus security authority will inform the Office of Safety & Security on an annual basis and, upon request, will forward the crime statistics reported to them for the previous calendar year. Data received from local law enforcement is compared to the university's internal database to ensure accurate reporting.

Each year, an email notification is made to all enrolled students, faculty and staff that lists the website to access this report. Copies of the report also may be obtained at:
Office of Safety & Security
2 Union Ave.
Saratoga Springs NY 12866-4390
All prospective students may obtain a copy by calling the Office of Safety & Security, the undergraduate or graduate admissions office, or by visiting the Jeanne Clery Annual Safety and Security Report web page (http://www.sunyempire.edu/SafetyandSecurityAnnualReport/).

All prospective employees may obtain a copy by calling the Office of Safety & Security or by visiting the above website.

Of note, the federal Clery Act may define a particular crime differently than it is defined under the New York State Penal Code. For the purposes of this report, the university uses the Clery Act definitions of crimes. Please see herein for the Clery Act definitions.

Daily Crime Log

In accordance with The Jeanne Clery Disclosure of Campus Security Policy and Campus Crime Statistics Act, SUNY Empire maintains a "daily crime log." The information contained in this log identifies incidents and or crimes reported to the Office of Safety & Security, occurring on or near a university facility. The information contained in this log identifies, but not limited to, the nature of the crime reported to security or law enforcement, dates and times the incident was reported and occurred, the general location of the incident or crime and the disposition of the complaint if known. The crime log is available for public viewing during normal business hours at the Office of Safety & Security in Saratoga Springs. The log also may be viewed at one of our regional locations upon request through the Office of Safety & Security. The most recent 60-day period is open to public inspection, upon request, during normal business hours. Anyone may ask to see the log, whether or not they are associated with the university.

Involuntary Withdrawal Procedure

Whenever possible, the university uses the Student Conduct Policy and Procedures to address violations of university regulations. In rare cases, a student poses a significant risk to self or others and may not be competent to participate in student conduct proceedings. Significant risk constitutes a high probability of substantial harm and not just a slightly increased, speculative or remote risk. In these cases, the vice provost for student success or designee may utilize the involuntarily withdrawal procedure.

Procedure

1. If a student poses an immediate and significant risk of harm to others, the individual confronted with the situation calls local police. The student conduct director or designee, in conjunction with Safety and Security makes a further assessment after the immediate safety issues are addressed.

2. The student conduct director or designee in conjunction with Safety and Security uses available evidence to determine if there is significant risk to others. The assessment may include a review of recommendations by emergency responders (police, EMTs, etc.) and medical professionals. Additionally, or in the absence of such information, student conduct director or designee in conjunction with Safety and Security uses the best available information.

3. The student conduct director or designee in conjunction with Safety and Security makes a request to the provost/executive vice president for academic affairs outlining the risk posed by the student and explaining why the student is not able to participate in conduct proceedings, if applicable.

4. The vice provost for student success reviews the request and determines if the threat is sufficient to warrant the involuntary withdrawal procedure The vice provost for student success may consult with others as needed and provides the student an opportunity to provide his or her own evaluation or other evidence. If an involuntary withdrawal is warranted, the provost/executive vice president for academic affairs notifies the individual in writing, summarizes the basis for the decision, and copies the student conduct director or designee as well as Safety and Security. The provost/executive vice president for academic affairs also may require as a precondition to a student's return, that the student provide documentation that the student has taken steps to reduce the previous threat. The university may require a release to speak with any treatment professional. If an involuntary withdrawal is warranted, the vice provost for student success notifies the individual in writing, summarizes the basis for the decision, and copies the dean or regional executive director. The vice provost for student success also may require as a precondition to a student's return that the student provide documentation that the student has taken steps to reduce the previous threat. The university may require a release to speak with any treatment professional.
   a. If the student poses a risk to safety and order and the vice provost for student success determines that the student is competent to participate in conduct proceedings, the involuntary withdrawal is not appropriate. The conduct policy and procedures provide for an interim suspension pending conduct proceedings.
   b. If the vice provost for student success determines that the student does not pose a significant risk, they refer the matter back to the student conduct director or designee for action in accordance with established policies and procedures.

5. The student may request reconsideration of the involuntary withdrawal in writing to the vice provost for student success. The student provides a rationale and additional evidence that supports his or her request. This may include documentation that he or she has taken steps to reduce the previous threat. The vice provost for student success reviews the request in conjunction with the student conduct director or designee and any documentation, may consult

with others, may require a release to speak with any treatment professionals, and informs the student in writing of the final decision.

Timely Warnings and Emergency Notifications to the University Community, Procedure

What constitutes an "Emergency" at Empire state university?

Below is a list of emergency situations identifying the most common types of emergency notifications. Any emergency where the health and/or human safety at SUNY Empire are in question may constitute an "emergency." The list is not inclusive:

- *Bomb/Violence Threat Against the University*– based on credible intelligence that indicates a threat.
- *Civil disturbance* – disruption of normal university activities by a group of people.
- *Fire* – fire to building(s), wildfires, local community or industry that may endanger university students, faculty, staff or property.
- *Hazardous material* – dangerous material that is chemical, biological or nuclear spreading from a contained area.
- *Major road closing/incident* – unanticipated event that would disrupt safe passage to and from university.
- *Medical emergency* – pandemic or an event with mass casualties.
- *Personal safety* – situations that include use of weapons, violence, perpetrator(s) at large, active shooter and hostage situation or missing persons. Any situation, on or off university that, in the judgment of the local authorities, the university president or designee, constitutes an on-going or continuing threat to person or property.
- *Suspicious package* – reasonable belief that a package may contain chemical, biological, explosive, radiological or nuclear substance that would cause harm to persons or property.
- *Utility failure* – a major disruption or damage to utilities including gas, electrical or water.
- *Weather* – severe weather conditions to include flooding, snow/ice/cold, thunderstorm, wind, tornado or hurricane.
- *Natural disasters* – such as earthquakes.

Ways to Communicate These Issues: For Safety Related Issues

Methods of communication will be chosen based on the nature of the incident. A decision will be made on notification methods by the executive vice president for administration and/or the Office of Safety & Security.

For General Notification
- Email to all students and/or faculty/staff affected.
- Postings in university facilities, and on campus as applicable to the incident. Postings can be emailed as attachments to various offices as indicated below.
- SUNY Empire's Safety & Security Notifications.
- Posting of notification on the Empire State University website.
- Text messaging, if applicable.
- Social media sites.
- Post to My.SUNYEmpire and SUNY Empire News.

For Non-Life Threatening Health Related Issues
- Letters to students faculty and staff.
- Posting of notification on the university website (http://www.sunyempire.edu/).

Procedure to Follow
For information that is believed to be of interest or concern to the entire university population, the executive vice president for administration/or the director of safety & security, in conjunction with the Vice President of Marketing & Communication will notify the Office of the President in advance of sending a university wide notification, when applicable.

What Warrants a "Timely Warning" or "Emergency Notification?"

SUNY Empire will issue Timely Warnings for a specific university location or university wide, depending on the circumstances. Whenever a crime is reported to the Office of Public Safety, or a local police agency, that is considered to represent a serious or continuing threat to students and employees, a timely warning will be sent to the entire affected community.

Emergency Notifications will be issued, when the university is made aware of a significant emergency or dangerous situation involving an immediate threat to the health or safety of students and/or employees at a specific university location. As appropriate, emergency notifications may be targeted at the segment or segments of the university community that are at risk. Emergency notifications will be issued without delay unless doing so would compromise efforts to assist a victim or to contain, respond to, or otherwise mitigate the emergency.

The executive vice president for administration in conjunction with the director of public safety, and/or other university and non-university officials as appropriate, will confirm the existence of a situation that may warrant a timely warning notification and determine the extent of the notification as appropriate. In addition to criminal incidents, emergency notifications may be issued in situations such as, but not limited to:

Safety Related Issues
An incident that occurs on or in close proximity to any of the university locations that may potentially affect the personal safety and security of our student, faculty and staff population.

Health Related Issues
- A member of the university community is diagnosed with a serious or life threatening communicable/infectious disease.
- Evidence of bio terrorism.

Emergency Preparedness, Response and Evacuation Procedures
In the event that a situation arises, either on or off campus, that, in the judgment of the director of public safety, in conjunction with the vice president for administration/designee, constitutes an ongoing or continuing threat to the campus population, a university wide "timely warning" will be issued.

Emergency Management Plan Synopsis
This university wide Emergency Operations Plan is designed to outline a plan of action so that emergencies can be dealt with immediately in a logical and coherent manner. The intention of the Emergency Operations Plan is not to establish policy, but to create a framework that will allow an immediate response to an emergency.

This plan is the result of the recognition by university officials that there is a responsibility to manage emergency and disaster situation

on campus and coordinate with the appropriate public safety and local government officials. The university recognized that a comprehensive plan was needed which was compliant with HSPD-5, including the National Incident Management Systems (NIMS). The plan also must be consistent with, and closely linked to, county and state plans and within the guidelines set forth by SUNY Systems Administration.

The Emergency Operations Plan designates university security, public safety and local police as the initial contact for reporting all emergency situations and as the central point of communication during the response and resolution of all emergencies.

The Emergency Operations Plan (EOP) is designed to maximize human survival and preservation of property, minimize danger, restore normal operations to SUNY Empire and assure responsive communications with the university community, surrounding regions and the cities in which we function within.

This EOP may be initiated when a natural or induced emergency reaches proportions that cannot be handled by established measures.

A crisis may be sudden and unforeseen, or there may be varying periods of warning. This plan is intended to be sufficiently flexible to accommodate contingencies of all types, magnitudes and duration.

The SUNY Empire Emergency Operations Plan may be put into effect whenever a crisis, man-made or natural, disrupts operations, threatens life, creates major damage or occurs within the university community and its environments.

Emergency Response and Evacuation Procedures

Under the university wide Emergency Operations Plan (EOP), the university practices biannual emergency evacuation drills and fire safety drills.

An emergency or crisis situation can arise at Empire State University at any time and from many causes. Emergencies can range from chemical spills and fires to bomb threats and explosions, and natural disasters and civil disturbances such as riots or labor unrest.

The SUNY Empire Emergency Operations Plan is a procedural document, which incorporates the Incident Command System for organizing, coordinating and directing available resources toward the control of an emergency. The plan includes a chain of command establishing the authority and responsibility of various individuals. In emergencies, procedures sometimes must be changed at an instant's notice; therefore, responsible and knowledgeable persons who know the procedures have the authority to make necessary modifications.

Procedure to Follow

For information of interest or concern to the entire university community, the Director of Safety & Security and Emergency Management or in his/her absence, the Director of Operations & Special Assistant to the President, in conjunction with the executive team will notify the Office of the President in advance of sending a university wide notification.

The university will, without delay, and taking into account the safety of the community, determine the content of the notification and initiate the notification system, unless issuing a notification will, in the professional judgment of responsible authorities, compromise efforts to assist a victim or to contain, respond to or otherwise mitigate the emergency.

SUNY Empire's Safety & Security Notifications

In the event of an emergency involving an immediate threat to the health or safety of our students, faculty, and staff, SUNY Empire will notify the campus community without delay. These actions are in accordance with the federal Clery Act. Warnings may be withheld only if they compromise efforts to contain the emergency.

SUNY Empire uses the Everbridge mass notification system to quickly communicate to our university community in the event of an emergency or critical incident. Each student, faculty, and staff member are automatically registered for this emergency mass notification system and will receive alerts on their university email account.

To update your contact options, please visit the Verify your Notification and Alert Contact Information webpage. You'll have the option to have emergency notifications sent to your personal email accounts and additional phone numbers. You can add or update additional contact information at any time using your Banner page.

Empire State University Community Responsibility

SUNY Empire uses the Everbridge mass notification system to quickly communicate to our university community in the event of an emergency or critical incident. Each student, faculty, and staff member are automatically registered for this emergency mass notification system and will receive alerts on their university email account.

To update your contact options, please visit the Verify your Notification and Alert Contact Information (https://banner.sunyempire.edu/BannerExtensibility/customPage/page/ESC_EmergencyNotification/) webpage. You'll have the option to have emergency notifications sent to your personal email accounts and additional phone numbers. You can add or update additional contact information at any time using your Banner page.

SUNY Empire Locations on Other SUNY or Community College Campuses

- All SUNY Empire locations residing on a SUNY college campus are required to adhere to that respective college's emergency notification system when incidents occur.
- When SUNY Empire employees are notified of an incident on a SUNY college campus that requires that they take action, the Office of Safety & Security should be immediately notified by the location's supervisor, regional operations coordinator or executive director of regional operations/designee once safe.

Building Security

Access to Facilities and Security of Building

Most university locations are open to the public during normal business hours. At night and during periods when classes are not in session, university buildings are generally locked. A security access card system is utilized at various locations. Faculty, staff and a limited number of students, with proper identification are issued keys/access cards to gain entry into buildings. Individuals assigned access cards or keys are responsible for immediately reporting them missing, lost and/or stolen. Saratoga Springs locations offer a key card access control system for all employees to utilize in gaining access to secure facilities. Additionally, other monitoring devices have been employed to assist with the overall general safety of the community.

Empire State University utilizes various facilities statewide, security at each of our locations may vary depending on existing infrastructure and in building services provided by individual landlords. Specific questions

on a particular location regarding security should be initially directed through the Office of Safety & Security.

University Facilities

The university's goal is to provide a campus environment that is as safe and secure as possible. Generally, university buildings and facilities are accessible to members of the university community and the public during normal business hours 8 a.m. to 5 p.m. During nonbusiness hours, 5 p.m. to 8 a.m., classrooms and office buildings not in use will remain locked. The university details additional access control and building operations under procedures for Security and Access to Campus facilities.

Note: The university has the discretion to operate locations outside of normal business hours for the purposes of fulfilling the university's mission.

Security and Access to University Facilities Procedure Policy Statement

The university establishes procedures to ensure the safety of its students and employees.

All procedures follow the listed principles:

- *Normal business hours:* 8 a.m. to 5 p.m., Monday through Friday. Main entrances to facilities will be open and auxiliary entrances shall remain secured unless otherwise accommodated for. Facilities that host after-hour events or provide student instructional services may opt to have entrance times vary.
- *Holidays and other university closings:* All facilities will be closed and secured during state recognized holidays. Alarm systems will be armed for 24 hours during these dates. Only university personnel with authorization privileges shall be permitted access to the building.
- Special considerations: SUNY Empire hosts various functions and has liberal leave days. During these times facilities operate on limited staffing. When a facility remains open, the receptionist area of the main entrance will be staffed when possible. In buildings with card access, personnel will utilize this option for access to the facilities.

Other General Information

Visitors and Vendors

All visitors are required to utilize main entrances to facilities. They are then required to sign in at the receptionist desk and obtain a visitor/vendor pass for the day. The receptionist/staff assistant will then contact the individual being sought to notify them of the arrival of their visitor(s).

Employees who organize meetings and events after normal working hours are responsible for the facility while the meeting is in session and for ensuring that the building is secured when they leave. Please also refer to the Facilities Use Policy and Procedures (https://www.sunyempire.edu/policies/?search=cid%3D106810).

The employee identification card should be visibly displayed at all times while in university-controlled facilities or while at functions organized by SUNY Empire.

Access Control and Security System

The purpose of the Access Control and Security System is:

- To improve the security of facilities with an effective policy.
- To comply with university wide crime prevention and control objectives.
- To enable the university to safeguard the work facilities.
- To simplify locking policies.

- To eliminate key duplication.
- To eliminate unauthorized access.
- To eliminate the necessity of emergency re-keying and re-coring.
- To satisfy security concerns of students, faculty and staff.

SUNY Empire Student ID Number

Student social security numbers will not be used as a student identifier. Students will be assigned a registration number which will be used to identify records at the university.

Physical Maintenance of Facilities

The overall maintenance of locations is conducted through the Office of Administration and Facilities. Deficiencies found at locations are to be reported to Facilities at 518-587-2100, ext. 2925. The Office of Safety and Security, in conjunction with Facilities, conducts periodic safety inspections. Overall hazards are identified and corrected. Physical security, lighting, and general safety items are identified and addressed in a timely manner. Deficiencies at leased locations are corrected by the individual maintenance companies or property owners of that respective site. However, any emerging hazard or deficiency that is of a critical nature also should be reported to the Office of Safety and Security in Saratoga Springs at 518-587-2100, ext. 2900.

Off-Site Student Organizations

The university does not have off-site student organizations or housing facilities.

Crime Prevention Programs

The university provides specialized trainings and crime prevention programs primarily for faculty and staff on an ongoing basis. No formal crime prevention programs for students exists at this time, however, security prevention links are listed on the university website (http://www.sunyempire.edu).

Empire State University is a nonresidential university. Students are adults who live and work in their own communities; many of these communities publicize safety measures and crime prevention information. The Office of Safety & Security (http://www.sunyempire.edu/SafetyandSecurity/) website has direct links to local police agencies across New York state; some of these agencies may list information on personal safety and security initiatives.

All employees are advised of building security procedures, personal safety awareness and workplace/domestic violence programs when they begin employment with the university during "new employee orientation" sessions.

Annual notification regarding specific policies and procedures can be found within this document. Specific policy information regarding "Workplace Violence and Domestic Violence" may be located on the university policy web site (https://www.sunyempire.edu/policies/) and on the Office of Safety & Security web site (http://www.sunyempire.edu/SafetyandSecurity/).

Off-Site Criminal Activity

SUNY Empire is a nonresidential university with no dorms or off-site housing. Off-site groups or associations in a living environment associated with the university do not exist. The Office of Public Safety works frequently and collaboratively with local law enforcement to identify offenses or incidents that occur on or near university facilities. All events conducted in conjunction with the university, that take place off

premises, are considered university events and must follow procedures and codes of conduct in adherence with university policy.

Campus Sex Crimes Prevention Act

The act sets requirements for sexual offender registration and community notification. The Campus Sex Crimes Prevention Act of 2000 provides for the tracking of convicted sex offenders enrolled at, or employed by, institutions of higher education. It requires sex offenders, already required to register in a state, to provide notice of each institution of higher education in that state in which that person is employed, carries on a vocation or is a student. The act amends the Family Educational Rights and Privacy Act of 1974 (FERPA) to clarify that nothing in the act can prohibit an educational institution from disclosing information provided to the institution concerning registered sex offenders.

Information is listed at New York Division of Criminal Justice Services' Sex Offender Registry (https://www.criminaljustice.ny.gov/nsor/) or you also may contact the NYS DCJS Sex Offender Registry at 518-457-5837 or 800-262-3257.

Sexual Offender Registry

The Sex Offender Registration Act requires the Division of Criminal Justice Services (DCJS) to maintain a Sex Offender Registry. The registry contains information on classified sex offenders according to their risk of re-offending:

- low risk (level 1)
- moderate risk (level 2)
- high risk (level 3)

The act requires that the division also maintain a subdirectory of level 3 sex offenders. The DCJS Sex Offender Registry (https://www.criminaljustice.ny.gov/nsor/) site may be found on the web and contains their subdirectory of level 3 sex offenders as well as other information regarding the New York State Sex Offender Registry (referred to as "the registry").

Sex offenders registered in New York state are now required to notify the registry of any institution of higher education at which he or she is, or expects to be, whether for compensation or not, enrolled, attending or employed, and whether such sex offender resides or expects to reside in a facility operated by the institution. Changes in status at the institution of higher education also must be reported to the registry no later than 10 days after such change.

SUNY Empire will maintain a website link to the New York State Sex Offender Registry and local law enforcement that maintain listings of registered sex offenders.

Correction Law §168-b requires that Division of Criminal Justice Services (DCJS) include this information regarding an institution of higher education on its registry.

Bias Related Crime and Hate Crime

SUNY Empire takes bias crimes seriously. The university provides the following information to students and employees to assist in the prevention of and response to bias crimes. This statement meets the requirements of the New York State Hate Crimes Act of 2000 (Penal Law Article 485). Copies of the New York state law are available on the university's website (http://www.sunyempire.edu).

Bias Crimes, Definitions

Hate crimes, also called bias crimes or bias-related crimes, are criminal activities motivated by the perpetrator's bias or attitude against an individual victim or group based on perceived or actual personal characteristics, such as race religion, ethnicity, gender, sexual orientation or disability.

Penalties for bias-related crimes are very serious and range from fines to imprisonment for lengthy periods, depending on the nature of the underlying criminal offense, the use of violence or previous convictions of the offender.

If you are the victim of, or witness to, a hate/bias crime at a university location or event, report it to the appropriate local police agency. Since university services are delivered through locations across the state and the university does not have its own police force, we rely on local law enforcement to respond to reported crimes at our locations.

Bias Related Incidents or Crimes

Bias incidents directed at a member of a group within SUNY Empire that does not rise to the level of a crime include bigotry, harassment or intimidation based on national origin, ethnicity, race, age, religion, gender, sexual orientation, disability, veteran status, color, creed or marital status. Such incidents may be addressed through the State University's Discrimination Complaint Procedure or the university's Student Conduct Policy and Procedures. Bias incidents can be reported to the following individual:
Chief Diversity Officer for Institutional Equity and Inclusion
Office of the President
Empire State University
113 West Ave.
Saratoga Springs, NY 12866
518-587-2100, ext. 2416

Victims of bias crimes or incidents may seek counseling services from their own health care providers. The university does not offer on-site counseling services.

Fire Safety
Annual Fire Safety Report

SUNY Empire fully recognizes its responsibility to provide both awareness and safety training for faculty, staff and students and undertakes an ambitious program each year. Fire safety and emergency training for faculty and staff begins with discussions about fire prevention and safety during orientation programs. Annual fire inspections are conducted by the New York State Office of Fire Prevention and Control, in conjunction with the Office of Safety & Security.

Smoking is prohibited inside all university facilities.

Fires, Emergency Building Evacuations, Evacuation for People With Physical Disabilities

In the event of fire, a smoke condition or odor of gas:

- Notify fire departments by accessing an outside line, if applicable, and dialing 911 from any phone or cell phone.
- Activate the nearest alarm pull station as you leave the building.
- Follow evacuation instructions.
- Quickly and calmly evacuate the building from the nearest exit. Do ***not*** use the elevators.

- Do **not** re-enter a building that is in alarm.
- Proceed to the previously designated area of refuge and remain there.

Emergency evacuation plans are identified for each university location and posted.

- It is best to have arrangements pre-planned for evacuation assistance. Arrangements can be made to reasonably assure that assistance is provided to anyone who requires it. Contact the Office of Public Safety at 518-587-2100, ext. 2900 for pre-plan arrangements or questions.
- If you are unable to evacuate call 911.
- Remember to never use the elevators.

Smoking Policy

In accordance with New York state law, no smoking is allowed in any university facility or within 30 feet of any building.

Weapons Possession

University policy prohibits, unauthorized possession or use of firearms, explosive devices, fireworks, dangerous or illegal weapons, or hazardous materials.

Safety Guidelines for Armed Subjects, Active Shooter Situations

An active shooter is a person who appears to be actively engaged in killing or attempting to kill people in a populated area. In most cases active shooters use firearm(s) and there is no pattern or method to their selection of victims. These situations are dynamic and evolve rapidly, demanding immediate deployment of law enforcement resources to stop the shooting and mitigate harm to innocent victims. This section provides guidance to persons who may be caught in an active shooter situation and describes some things to expect from responding police officers.

What Should You Do:

In general, how you respond to an active shooter will be dictated by the specific circumstances of the encounter, bearing in mind there could be more than one shooter involved in the same situation. If you find yourself involved in an active shooter situation, try to remain calm and use these guidelines to help you plan a strategy for survival.

- **If an active shooter is outside your building,** proceed to a room that can be locked, close and lock all the windows and doors, and turn off all the lights; if possible, get everyone down on the floor and ensure that no one is visible from outside the room. One person in the room should call 911, advise the dispatcher of what is taking place, and inform him/her of your location; remain in place until the police or a campus administrator known to you, gives the "all clear." Unfamiliar voices may be the shooter attempting to lure victims from their safe space; do not respond to any voice commands until you can verify with certainty that they are being issued by a police officer.
- **If an active shooter is in the same building you are,** determine if the room you are in can be locked. If so, follow the same procedure described in the previous paragraph. If your room can't be locked, determine if there is a nearby location that can be reached safely and secured, or if you can safely exit the building. If you decide to move from your current location, be sure to follow the instructions outlined below.
- **If an active shooter enters your office or classroom,** try to remain calm; dial 911, if possible; and alert police to the shooter's location. If you can't speak, leave the line open so the dispatcher can listen to what's taking place. Normally the location of a 911 call can be determined without speaking. If there is absolutely no opportunity to escape or hide, it might be possible to negotiate with the shooter; attempting to overpower the shooter with force should be considered a last resort, after all other options have been exhausted. If the shooter leaves the area, proceed immediately to a safer place and do not touch anything that was in the vicinity of the shooter.
- **No matter what the circumstances,** if you decide to flee during an active shooting situation, make sure you have an escape route and plan in mind. Do not carry anything while fleeing; move quickly; keep your hands visible; and follow the instructions of any police officers you may encounter. Do not attempt to remove injured people; instead, leave wounded victims where they are and notify authorities of their location as soon as possible. Do not try to drive off campus until advised it is safe to do so by police or campus administrators.

What to Expect From Responding Police Officers:

Police officers responding to an active shooter are trained to proceed immediately to the area in which shots were last heard; their purpose is to stop the shooting as quickly as possible. The first responding officers may be dressed in regular patrol uniforms, or they may be wearing external bulletproof vests and helmets, as well as other tactical equipment. The officers may be armed with rifles, shotguns or handguns, and might be using Tasers, pepper spray or chemical agents to control the situation. Regardless of how they appear, remain calm, do as the officers tell you, and do not be afraid of them. Put down any bags or packages you may be carrying and keep your hands visible at all times. If you know where the shooter is, tell the officers. The first officers to arrive will not stop to aid injured people; rescue teams composed of other officers and emergency medical personnel will follow the first officers into secured areas to treat and remove injured persons. Keep in mind that even once you have escaped to a safe location, the entire area is still a crime scene; police will usually not let anyone leave until the situation is fully under control and all witnesses have been identified and questioned. Until you are released, remain at whatever assembly point authorities designate.

Drug Prevention Programs
Student Supports

There is a list of state and regional resources for students on the Student Health and Wellness web site (https://www.sunyempire.edu/student-affairs/student-life/health-wellness/).

Standards of Conduct

SUNY Empire policy prohibits the unlawful possession, use or distribution of illicit drugs and the abuse of alcohol by students and employees on university property or as part of the university's activities.

Health Risks

There are significant psychological and physiological health risks associated with the use of illicit drugs and alcohol. Physical addiction, loss of control and withdrawal syndrome as well as serious damage to vital organs of the body can result from drug and alcohol abuse.

Federal, State and Local Legal Sanctions

Conviction for possession and sale of controlled substances carries a number and variety of penalties under New York state law. These range from fines to prison terms of 15 years to life, depending upon the nature of the substance, the criminal act and the character of the crime. Federal

Trafficking Law convictions also carry a variety of penalties which range from five to 30 years in prison and substantial fines.

Disciplinary Sanctions – Students

A student accused of possession/use of or distribution of drugs will be subject to the university's Student Conduct Policy and Procedures (p. 241). Sanctions for those found responsible may include written warning, suspension or expulsion.

General Safety
Faculty and Staff Members' Roles

Everyone at SUNY Empire has a basic responsibility for his or her own personal safety; faculty and staff have an increased level of responsibility.

Personal Safety

- Stairwells and out-of-the way corridors: utilize common stairwells and corridors that are traveled most frequently by others.
- Elevators: if in an elevator with someone who creates an uneasy feeling, get off as soon as possible.
- Restrooms: be extra cautious when using restrooms that are isolated or poorly lit.
- After hours: don't walk alone late at night. Create a buddy system for walking to parking lots or public transportation.
- Parking lots or garages: always lock the car and roll the windows up all the way. Park in a well-lit area. Carry keys in hand while approaching the vehicle.

Prevention of Crime in the Office

- Use your keys, access card/codes properly.
- Never share them with anyone.
- Don't place personal identification on your key rings.
- Keep your personal keys and your office keys on separate rings.
- Report lost key rings and access card immediately.
- Keep purses or wallets on your person or lock them in a drawer or closet.
- Keep track of serial numbers of any personal items and mark them with your name or initial (e.g., radio).
- Keep coat racks away from entrances/exits to minimize temptation.
- Don't leave your office unattended. Lock it.
- Have your phone forwarded to another person's office or to voice mail.
- Report any lighting deficiencies, broken windows or broken door locks to the facilities maintenance.
- Don't allow repairs to security or communication equipment without verifying a written order from the appropriate supervising office.

Computer Security

The Information Technology Services has outlined issues pertaining to computer security – Technology Acceptable Use, Policies and Procedures (https://www.sunyempire.edu/policies/?search=cid %3D35658) – which can be found on the university policy web site (https://www.sunyempire.edu/policies/). Individuals also may contact our help desk for additional questioning.

Crime Prevention Programs

The university provides specialized trainings and crime prevention programs primarily for faculty and staff on an ongoing basis. No formal crime prevention programs for students exists at this time, however, security prevention links are listed on the university website (http://www.sunyempire.edu).

Empire State University is a nonresidential university. Students are adults who live and work in their own communities; many of these communities publicize safety measures and crime prevention information. The Office of Safety & Security (http://www.sunyempire.edu/SafetyandSecurity/) website has direct links to local police agencies across New York state; some of these agencies may list information on personal safety and security initiatives.

All employees are advised of building security procedures, personal safety awareness and workplace/domestic violence programs when they begin employment with the university during "new employee orientation" sessions.

Annual notification regarding specific policies and procedures can be found within this document. Specific policy information regarding "Workplace Violence and Domestic Violence" may be located on the university policy web site (https://www.sunyempire.edu/policies/) and on the Office of Safety & Security web site (http://www.sunyempire.edu/SafetyandSecurity/).

Off-Site Criminal Activity

SUNY Empire is a nonresidential university with no dorms or off-site housing. Off-site groups or associations in a living environment associated with the university do not exist. The Office of Public Safety works frequently and collaboratively with local law enforcement to identify offenses or incidents that occur on or near university facilities. All events conducted in conjunction with the university, that take place off premises, are considered university events and must follow procedures and codes of conduct in adherence with university policy.

Policies

This chapter contains the majority of policies relevant to undergraduate students. Policies and procedures related to developing a degree program and for awarding credit for prior learning (advanced standing) are included in the Student Degree Planning Guide (https://www.sunyempire.edu/degree-planning-academic-review/degree-program/student-degree-planning-guide/). Policies relevant to graduate students are included in the Graduate Catalog (p. 535). Revisions to existing policies, as well as new policies and procedures may be written as needed.

While all policies in this catalog are current at the time of publication, the most current versions can be found on the university policy web site (https://www.sunyempire.edu/policies/).

Students are responsible for understanding and adhering to university policies. If you have questions, please contact your mentor or the coordinator of student services at your location or program.

Academic Honesty Policy and Procedures

Sponsor: Office of Academic Affairs
Contact: Executive Director of University Student Services
Category: Academic
Number: 100.006
Effective Date: May 14, 2004
Implementation History: Approved by the college Senate on May 14, 2004. Effective July 1, 2004. This supersedes the Academic Integrity Policy approved on Feb. 19, 1999, which superseded the academic dishonesty policy approved in 1980, which superseded the probation and dismissal policy approved in 1977.
Keywords: Academic, dishonesty, integrity, plagiarism, cheating, forgery, fabrication, misrepresentation

Purpose

The purpose of the Academic Honesty Policy and Procedure is to set the expectations for honest academic work and provide fair and equitable administrative procedures for addressing breaches of those expectations and include options for handling incidents.

Definitions

Academic Appeals and Honesty Committee (AAHC) – A faculty committee convened to hear cases of serious dishonesty that may warrant academic warning or dismissal. This committee shall consist of no fewer than three faculty members and no more than five. Each school/program establishes procedures for constituting the AAHC and for establishing a chair. If a member of the AAHC is a part of the matter at hand, a substitute is designated if necessary to bring the membership up to the minimum.

Academic Dishonesty – Includes cheating, plagiarism, forgery, fabrication or misrepresentation, such as the following:

- Claiming the work or thoughts of others as your own.
- Copying the writing of others into your written work without appropriate attribution.
- Writing papers for other students or allowing them to submit your work as their own.
- Buying papers and turning them in as your own.
- Having someone else write or create all or part of the content of your assignments.
- Submitting the same paper for more than one study or class without explicit permission from the faculty members.
- Making up or changing data for a research project.
- Fabricating and/or altering documents and/or information in support of the degree program.

Business Days – Monday through Friday excluding university holidays.

Dean – Refers to the dean of the student's school/program or an academic administrator designated by the provost for the School of Undergraduate Studies. Collectively referred to as dean in this document.

Faculty – Mentors, instructors, evaluators and others who make academic decisions. Collectively referred to as faculty in the remainder of the document.

Statements

When facing a breach of academic honesty expectations, a faculty member exercises his or her academic judgment in light of the particular circumstances and the student's academic history. Consultation with the dean, associate dean, chair and/or primary mentor/academic advisor throughout the process is encouraged.

When faced with a potential break of academic honesty, the faculty member:

1. Reviews this policy and procedures statement.

2. Documents the concern to the extent possible.

3. Consults with student academic services, or equivalent, to ascertain if there were previous incidents.

4. Raises the concern quickly and directly with the student in writing, outlining how the student has breached the academic honesty standards, and copying the student's primary mentor/advisor and student academic services, or equivalent. This should typically occur within 20 business days.

5. Determines the appropriate response, which may include responding to the breach while continuing to work with the student in the course, assigning an F grade, or not providing a credit recommendation for a PLA component.

If the faculty member continues to work with the student in the course, s/he may also do one or more of the following:

1. Provide developmental advice to the student on academic expectations.
2. Require that the student consult specific research writing or other academic skills development resources.
3. Require that the student rewrite the assignment(s), meeting standards for academic honesty.
4. Require that the student complete additional assignment(s) that meet standards for academic honesty.
5. Deduct points or fail the student on the assignment.

Having provided guidance to the student, the faculty member remains alert to the possibility of further breaches.

If the faculty member determines that the appropriate response is to assign an F for the course, the student loses access to academic services related to the course including the online learning site for the course. A student who is denied a credit recommendation for dishonesty for a PLA may not resubmit the same or similar component for evaluation. A student who receives a grade of F for a course and does not receive PLA credit may appeal that decision through the university's Student Academic Appeals Policy and Procedures.

Serious Acts of Dishonesty

Serious acts of dishonesty include but are not limited to plagiarism, stealing, selling, or buying of an examination or paper; the presentation of the work of another as one's own, copying examination answers from another source or individual, having someone else do your work either on or off-line, and repeated acts of plagiarism, cheating, misrepresentation and misappropriation.

Possible Penalties

Serious or continued breaches of academic honesty may constitute grounds for academic warning or dismissal from the university. The following penalties may apply:

Academic Warning: An academic warning for academic dishonesty is a formal written notice from the dean to the student providing conditions for continued enrollment in the university. It describes the nature of the breach of academic honesty standards, expectations for future behavior and any specific educational requirements. The academic warning for academic dishonesty is included in the student's official university record. A breach of academic honesty expectations after an academic warning for academic dishonesty normally leads to dismissal.

An academic warning for academic dishonesty remains active on the student's academic record until graduation. While the university retains information internally about the academic warning after graduation, the university clears the official record. If the student pursues additional study with the university, the information is available to university personnel who may consider it if the student breaches academic honesty expectations again.

Academic Dismissal: An academic dismissal for academic dishonesty is an indefinite separation from the university. The formal written notice describes the nature of the breach of academic honesty expectations. The academic dismissal for academic dishonesty is included in the student's official college record.

Review of Serious Cases of Dishonesty

If a breach of academic honesty is reported, and if the faculty member, the primary mentor/advisor, or the dean or designee believes that it is serious enough to warrant an academic warning or dismissal, he or she refers the case to the dean or designee of the student's home school or program. He or she may:

1. Refer the case to the academic appeals and honesty committee (AAHC) for a recommendation on academic warning or academic dismissal.
2. Recommend, in consultation with the student's primary mentor/advisor, additional educational activities and/or provide developmental advice.

Academic Appeals and Honesty Committee Procedures

AAHC procedures are as follows:

1. When the dean or designee refers the case to the AAHC, he or she notifies the student in writing within 10 business days of receiving the copy of the notice to the student from the faculty member. The dean's notice provides the student the opportunity to respond in writing to the AAHC.
2. The student has 10 business days to submit any written response to the AAHC.
3. The AAHC considers the student's response in its review. The AAHC may obtain additional relevant information before or after the committee meets to review the case.
4. The AAHC should schedule a meeting to consider relevant information within 20 business days of receiving an academic dishonesty case. A meeting may take the form of a face-to-face meeting, conference call or video conference, at the discretion of the AAHC.

5. The chair of the AAHC ensures a fair and timely consideration of the information and provides an accurate record of the meeting to the dean.

6. The student may participate in the meeting and present his or her case directly to the AAHC. Likewise, the individual(s) referring the case also may participate in the meeting and present relevant information. The student and the individual referring the case meet separately with the committee.

7. A student may have an advisor at the meeting; however, the advisor may not participate in the meeting.

8. Following the meeting, the AAHC deliberates in closed session. Decisions are made by majority vote. The AAHC may:
   - Decide that a penalty is unwarranted.
   - Recommend that the dean or designee issue a reprimand or academic warning, or
   - Recommend that the dean or designee dismiss the student from the university.

9. Within five days of the hearing, the AAHC transmits its recommendation and brief rationale in writing to the dean or designee.

10. After reviewing the AAHC's recommendation, the dean or designee may decide to issue an academic warning or dismissal as appropriate to the situation, or may issue another decision.

11. The dean or designee provides to the student a written notice of his or her decision in the case within 5 business days of receiving the AAHC recommendation, copying the primary mentor/academic advisor. The written notice specifies the effective date of the action and a copy is retained.

Reinstatement After Dismissal for Academic Dishonesty

For the dean or designee to consider reinstatement, a student must present convincing written evidence that he or she has come to value the standards for academic honesty and a written affirmation that he or she agrees to follow the college's Academic Honesty Policy.

The dean or designee of the student's school or program is responsible for acting on requests for reinstatement after academic dismissal. Students are not eligible for reinstatement for at least 16 weeks or one term, whichever is longer, after an academic dismissal.

Students who are academically dismissed a second time for academic dishonesty are not eligible for reinstatement.

- If the dean or designee reinstates a student, he or she places the student in warning status. The dean or designee also may establish terms and conditions for re-enrollment.

Written Notice. The dean or designee sends a copy of any written notice of reinstatement to the student's primary mentor/advisor and retains a copy.

Student Appeals

Students may appeal any decision made about academic honesty as outlined in the Academic Appeals Policy and Procedures.

Academic Probation for Undergraduate Students

Sponsor: Office of Academic Affairs
Contact: Office of the Registrar
Category: Academic
Number: 100.148
Effective Date: 09/01/2019
Keywords: Satisfactory academic progress, pre-college study
Background Information: This policy was created to simplify the Satisfactory Academic Progress and GPA policies, eliminate dismissals without warning or for insufficient credits, and bring the university's policy into closer alignment with policies at SUNY and other peer institutions.

Purpose

This policy statement describes the academic conditions under which an undergraduate student is eligible to remain enrolled in the university and specifies procedures for warning and dismissing students who do not make satisfactory academic progress.

Statements

Fundamental to Empire State University's mission in providing innovative, flexible and quality academic programs to diverse students, we strive to support students as they achieve their academic goals. The Academic Probation Policy exists to identify students who are at risk for academic dismissal and provide access to the robust resources available to them to help return to good academic standing. The following criteria will be used to identify undergraduate students who are at-risk for academic dismissal.

Students must maintain an overall Grade Point Average (GPA) of a 2.0 on a 4.0 scale

Students who fail to meet the above criteria will be placed on Academic Probation for a period of one term. While on Academic Probation, students should access all available resources to help them to return to good academic standing such as Academic Support Services, Disability Services, support from mentor, or other university services. Students who fail to return to good academic standing within the time period required will be academically dismissed from SUNY Empire.

Removal of Academic Probation Status

Students who achieve a minimum 2.0 overall GPA after being placed on Academic Probation will be returned to good academic standing.

Continuing enrollment while on Academic Probation

A student who is on academic probation is expected to maintain a minimum term GPA of a 2.0. Students who achieve this threshold will be granted an additional term of Academic Probation even if their overall GPA remains below a 2.0.

Academic Dismissal

Students who fail to achieve a minimum 2.0 term GPA while on Academic Probation will be academically dismissed.

Enrollment Conditions while on Academic Probation

While on Academic Probation, students will be restricted to no more than 12 credits of enrollment in a term until such time as they demonstrate an ability to be successful in coursework. Additional conditions or exceptions to this can be made at the discretion of the student's Dean in consultation with the mentor and should be made on the basis of consistent academic achievement.

Reinstatement after Academic Dismissal

Students may appeal to the Dean or designee of their school for reinstatement to SUNY Empire after a period of one academic term of dismissal. Students should include information and documentation related to why they were not successful during the Academic Probation period and what has changed to allow the student to be successful should their request for reinstatement be granted. Appeals should be sent to the Dean or designee of the student's school.

Financial Aid Eligibility

This policy does not direct a student's eligibility for Federal or State Financial Aid. Students should refer to the applicable financial aid policies and direct questions about financial aid to the Office of Financial Aid.

Related References, Policies, Procedures, Forms and Appendices

Eligibility for Federal Financial Aid Policy (https://www.sunyempire.edu/policies/?search=cid%3D36216)

Eligibility for New York State Financial Aid Policy (https://www.sunyempire.edu/policies/?search=cid%3D36217)

Academic Withdrawal

Sponsor: Office of Academic Affairs
Contact: Office of the Registrar
Category: Academic
Number: 100.025 (https://www.sunyempire.edu/policies/?search=cid%3D36978)
Effective Date: Feb. 28, 2002
Implementation History: Feb. 28, 2002 current (and original)
Keywords: Academic withdrawal

Purpose

The purpose of this policy is to define academic withdrawal.

Definitions

Definitions are embedded in this policy statement.

Statements

Students may withdraw from a class until the last day of an enrollment term. However, the actual date of withdrawal may affect enrollment charges, enrollment status, and financial aid eligibility.

The student must submit a withdrawal request in writing to Office of the Registrar or can withdraw from classes online in Self Service Banner. The effective date is the date the student transmits the request.

Effect on Enrollment Status

The effective date of the withdrawal may affect the full- or part-time enrollment status of the student. For the purpose of establishing enrollment status, enrolled credits are the number of registered credits after day 28 of the enrollment term. For example, a student who first enrolls for 12 credits and withdraws from one 4-credit class on or before day 28 remains enrolled for only 8 credits and is no longer considered full time. If the student withdraws after day 28, he or she is considered full time.

A withdrawal that results in a change from full- to part-time enrollment status can jeopardize the student's financial aid eligibility.

For information on the effect on financial aid eligibility, see the statements on Eligibility for New York State Financial Aid (https://www.sunyempire.edu/policies/?search=cid%3D36217) and Eligibility for Federal Financial Aid (https://www.sunyempire.edu/policies/?search=cid%3D36216).

Related References, Policies, Procedures, Forms and Appendices

- Eligibility for New York State Financial Aid Policy (http://www.sunyempire.edu/policies/?search=cid%3D36217)

Acceleration

Sponsor: Office of Academic Affairs
Contact: Office of the Registrar
Category: Academic
Number: 100.031 (https://www.sunyempire.edu/policies/?search=cid%3D37032)
Effective Date: Oct. 18, 1990
Implementation History: July 7, 1977 (original implementation), revised Oct. 18, 1990
Keywords: Learning contract

Purpose

Acceleration is the opportunity to earn more than the maximum 16 credits in one enrollment term, but not more than 20 credits. This is limited to full-time students who have not interrupted the learning contract in question.

Statement

Acceleration may occur in two different ways. First, the learning contract proposal can be drawn up with more than 16 but no more than 20 credits. The dean or program administrator must review and approve this accelerated enrollment. Acceleration may be accomplished by amending a full-time enrollment.

Undergraduate Learning Contract Policy (https://www.sunyempire.edu/policies/?search=cid%3D104471)

Adherence to Family Educational Rights and Privacy Act of 1974

Sponsor: Office of Academic Affairs
Contact: Office of the Registrar
Category: Information Security and Technology
Number: 1000.038
Effective Date: Jan. 1, 2006
Implementation History: April 23, 1977 (original implementation), revised January 2006, January 2019 and July 2020
Keywords: Family, rights, privacy, records, transcript
Background Information: None.

Purpose

The Family Educational Rights and Privacy Act of 1974, as amended, ("FERPA" or "Act") was designed primarily to ensure that educational records would be maintained in confidence and available to eligible students for inspection and correction when appropriate and that any such recorded information would not be made freely available to individuals outside the school without consent or as otherwise allowed by law. Both current and former students have the right to inspect and review all education records related to them that are maintained by the school or a person acting for the school.

Definitions

Directory Information: information contained in an education record of a student that would not generally be considered harmful, an invasion of privacy, and as further defined below.

Education Records: those records that are directly related to a student and are maintained by an education agency or institution or by a party acting for the agency or institution. Education records can exist in any medium, including, without limitation: typed, computer generated, videotape, audiotape, film, microfiche and email, among others.

However, education records do not include such things as:

- Records of instructional, supervisory, and administrative personnel which are in the sole possession of the maker thereof, and which are not accessible to other persons.
- Information obtained through personal knowledge that is not recorded.
- Employment records, unless employment is contingent upon attendance (e.g. work study, graduate assistants).
- Records created or maintained by a physician, psychiatrist, psychologist, or other recognized professional or para-professional that are used only in connection with the provisions of treatment of a student and are not available to persons other than those individuals providing such treatment.
- Records and documents of a law enforcement unit, except those available under the Freedom of Information Act.
- Financial records of a student's parent.
- Alumni records.

- Letters of recommendation or reference received after January 1, 1975 for which the rights of inspection have been waived.
- Thesis or research papers.
- Records that only contain information about an individual after the individual is no longer a student at the institution.

Eligible student: A student who is 18 years of age or older or who attends a postsecondary institution at any age.

School Officials: Members of the University who act in the student's educational interest within the limitations of their "need to know." These may include faculty, administrators, SUNY System Administration staff, clerical and professional employees and other persons who manage student education record information including student employees or agents. It may also include the university's contractors, volunteers, and others performing institutional functions.

Legitimate Educational Interest: A school official has a legitimate educational interest if the official requires the information in order to fulfill his or her professional responsibilities for the university.

Statements

Pursuant to FERPA, Empire State University ("University") undertakes the following:

1. The University will inform current students no less than annually of their rights under the Act and its implementing regulations by such means and at such times as are reasonably likely to inform them of those rights.
2. Students may request to examine their education records by submitting in person or a written request to the Registrar. Proper photo identification is required for in-person requests (e.g., Empire State University identification card). Written requests must be notarized. The University will comply with such requests within a reasonable time not to exceed 45 calendar days from receipt of the request.
3. If the student requests copies of their education records, the following fee schedule will apply: unofficial or official transcript $10, all other education records $.50/page.
   While the University may not generally deny access to the records, under certain circumstances it may have cause to deny a request for a copy of a student's education records.

   Types and locations of education records routinely maintained by the University, and the officials responsible for some or all of them are as follows:

   a. Admissions Records: Admissions Office; Note: FERPA protection does not apply to applicants. However, upon official enrollment of student, admissions records are transferred to the Office of the Registrar.

   b. Academic Records: Office of the Registrar -- the University Registrar

   c. Official Empire State University Transcripts: Office of the Registrar – the University Registrar

   d. Financial Aid Records: Financial Aid -- Director of Financial Aid

   e. Billing Records: Student Accounts – Senior Director of Student Accounts

f. Graduate and Inactive Academic Student Records: Office of the Registrar – the University Registrar

4. The University will not disclose personally identifiable information from a student's education records without prior written consent of the student except as permitted by the Act or as may otherwise be required by law.

When Student Consent is not Required for Disclosure of Education Records:

Under FERPA, prior consent by the student is not required when disclosure is (one or more of the following):

1. To other school officials, including teachers, within the University whom the school has determined to have legitimate educational interests. This includes contractors, consultants, volunteers, or other parties to whom the University has outsourced institutional services or functions, provided that the conditions listed in § 99.31(a)(1)(i)(B)(1) - (a)(1)(i)(B)(3) are met. (§ 99.31(a)(1)).

2. To officials of another school where the student seeks or intends to enroll, or where the student is already enrolled if the disclosure is for purposes related to the student's enrollment or transfer, subject to the requirements of § 99.34. (§ 99.31(a)(2)).

3. To authorized representatives of the U.S. Comptroller General, the U.S. Attorney General, the U.S. Secretary of Education, or State and local educational authorities, such as a State postsecondary authority that is responsible for supervising the university's State-supported education programs. Disclosures under this provision may be made, subject to the requirements of §99.35, in connection with an audit or evaluation of Federal- or State-supported education programs, or for the enforcement of or compliance with Federal legal requirements that relate to those programs. These entities may make further disclosures of PII to outside entities that are designated by them as their authorized representatives to conduct any audit, evaluation, or enforcement or compliance activity on their behalf. (§§ 99.31(a)(3) and 99.35).

4. In connection with financial aid for which the student has applied or which the student has received, if the information is necessary to determine eligibility for the aid, determine the amount of the aid, determine the conditions of the aid, or enforce the terms and conditions of the aid. (§ 99.31(a)(4)).

5. To organizations conducting studies for, or on behalf of, the school, in order to: (a) develop, validate, or administer predictive tests; (b) administer student aid programs; or (c) improve instruction. (§ 99.31(a)(6)).

6. To accrediting organizations to carry out their accrediting functions. (§ 99.31(a)(7)).

7. To parents of an eligible student if the student is a dependent for IRS tax purposes. (§ 99.31(a)(8)).

8. To comply with a judicial order or lawfully issued subpoena. (§ 99.31(a)(9)).

9. To appropriate officials in connection with a health or safety emergency, subject to § 99.36. (§ 99.31(a)(10)).

10. Information the school has designated as "directory information" under § 99.37. (§ 99.31(a)(11)).

11. To a victim of an alleged perpetrator of a crime of violence or a non-forcible sex offense, subject to the requirements of § 99.39. The disclosure may only include the final results of the disciplinary proceeding with respect to that alleged crime or offense, regardless of the finding. (§ 99.31(a)(13)).

12. To the general public, the final results of a disciplinary proceeding, subject to the requirements of § 99.39, if the school determines the student is an alleged perpetrator of a crime of violence or non-forcible sex offense and the student has committed a violation of the school's rules or policies with respect to the allegation made against him or her. (§ 99.31(a)(14)).

13. To parents of a student regarding the student's violation of any Federal, State, or local law, or of any rule or policy of the school, governing the use or possession of alcohol or a controlled substance if the school determines the student committed a disciplinary violation and the student is under the age of 21. (§99.31(a)(15)).

Disclosure of Directory Information

Institutions may disclose "directory information" about a student without violating FERPA. At the University, directory information is defined as:

a. name

b. address

c. phone number

d. dates of attendance

e. most recent previous educational institution attended

f. major area of concentration

g. degree and awards earned

h. participation in officially recognized university activities

i. date and place of birth

j. email address

k. enrollment status

The student may restrict the release of all or part of the directory information by following the procedures specified in the University's annual FERPA notice.

Procedures for Requests for Information

All units of the University will operate under the following procedures with regard to requests for information:

1. Incoming Phone Requests: Only directory information items d, f, and g will be released over the phone to persons outside the University.

2. Written Requests: Directory information will be released by the university registrar in response to requests on official letterhead to persons having legitimate reason(s) for requesting the information. If additional information is requested, the student will be notified and release requested.

3. In-Person Requests: Directory information will be released to those who have proper photo identification and legitimate reason for requesting the information.

4. All other non-directory information will be released only by the Office of the Registrar with the prior consent of the student unless as otherwise may be allowed by the Act.

5. The Office of the Registrar will maintain a record in the student's file of all requests for, and disclosure of, personally identifiable information (other than directory information) from a student's

education records as specified in the Act. This record may be inspected by the student.

6. Students may request to amend their education records if they believe information contained therein is inaccurate, misleading, and/or violates their privacy or other rights. If such a request is refused, the University will so inform the student and advise the student of the right to a hearing to be held within a reasonable time as described in the Act.

7. All units of the University will endeavor to maintain printed student education records in lockable file cabinets, preferably in lockable rooms. Similarly, electronic files will be maintained in such a way as to ensure maximum security and to provide access only to duly authorized personnel. The length of storage and destruction of education records will be in accordance with State University of New York policy and procedures.

8. Copies of this policy and of the Act will be available online and paper copies will be on file in all physical locations of the University and will be made available to eligible students upon request.

Applicable Legislation and Regulations

The Family Educational Rights and Privacy Act (FERPA) (20 U.S.C. § 1232g; 34 CFR Part 99)

Course Catalog/Cross Listing For Undergraduates

Sponsor: Office of Academic Affairs
Contact: Provost, Academic Affairs
Category: Academic
Number: 100.001 (https://www.sunyempire.edu/policies/?search=cid%3D109961)
Effective Date: Feb. 23, 2018
Implementation History: 02/23/2018, revised 12/14/2022.
Keywords: Pre-requisite, Responsible Academic Unit, Course Proposal, Course De-listing, Repetition, Primary subject code, Special Topics course, Totally Individualized Study, Course Review.
Background Information: The faculty of Empire State University are responsible for the development and implementation of the university's academic program, working as a collective to create and review the academic program to ensure the integrity of its content. Proposals for new courses should emanate from thoughtful consideration of student interest, curricular fit, programmatic requirements, faculty expertise, strategic planning, and the university's mission and core values. Empire

State University provides a catalog of the courses it offers, typically available in more than one mode of study and more than one location. In addition, faculty may work with students to create Totally Individualized Studies in response to students' interests, goals, and learning needs.

Purpose

This policy fosters collective responsibility for the academic offerings of the university by providing definitions, principles and procedures that govern the proposal, listing, revision, and delisting of a course/study in the university catalog. It also provides guidance on when to review a Special Topics Course for inclusion in the catalog.

Definitions

The following definition(s) provide a precise understanding of terms that are key components of a course/study listing in the Catalog. Terms not herein defined are assumed to retain their conventional meanings, i.e. prerequisites.

Responsible Academic Units: the relevant departments, divisions, or school designated for a particular program or field of study that assumes responsibility for shepherding the course through the proposal process, maintaining the currency of the course's catalog entry, and initiating the delisting of a course from the catalog.

Special Topics Course: A pre-planned, faculty-driven course that is in the term guide before it has been through the course proposal review process for listing in the catalog. Each subject code will have a placeholder number in the catalog at each learning level to prompt students looking at the catalog to search the term guide for additional offerings at the level they are seeking a course. This policy includes information about how to get a Special Topics course listed in the catalog and when it is appropriate to do so.

Totally Individualized Study: A study created for and with a student, in response to a student's particular interests, goals, and learning needs. A Totally Individualized Study appears in neither the term guide nor the catalog.

Statements

Each catalog course listing (existing, proposed, and revisions) includes the following information:

- Course title.
- Course level/Course number.
  - The proposal will designate the level in accordance with the course numbering taxonomy; the Office of the Registrar assigns a specific number to be published in the catalog.
- Offerings with the same title cannot be submitted with different levels, excepting internships, which may be listed with variable credit.
- Number of credits:
  - Course listings carry only one credit value as opposed to a range of credits; courses with more than one credit value have separate, distinctive listings for each.
- Liberal designation.
- SUNY General Education designation, if applicable.
- Course description.
- At least three common learning outcomes: overarching learning outcomes common to all courses with the same title.
- Prerequisites if necessary or suitable.

- The responsible academic unit with primary responsibility for the course.
- Up to two additional departments or programs with which the course should be cross-listed, if any.

The Office of the Registrar may request additional information to facilitate searching, sorting and filtering of course offerings and generally support ease of use.

The responsible academic unit will recommend to the Office of the Registrar the primary subject code (or prefix) to be assigned to the course for the university catalog. If a particular course is relevant to multiple departments or divisions, cross listing should be considered. Designation of a responsible academic unit facilitates maintenance of an accurate catalog by indicating the provenance of a course. This designation should not be used in any way to determine or prioritize teaching assignments, nor to preclude sharing of studies amongst mentors when such sharing is appropriately acknowledged in accordance with the SUNY Board of Trustees Policy on Intellectual Property.

Course listings are entered in the catalog only once they are complete.

Relationship Between Catalog Listing And Learning Contract

Catalog course listing information is to be stated verbatim in learning contracts designed for respective courses with the same title however, faculty may customize their specific offering as they see fit so long as their course aligns with the learning outcomes of that study's title. See Learning Contract Policy.

Proposing New Courses For Listing In The University Catalog Or Revisions To Courses In The Catalog

The main work of reviewing a new course proposal happens within the responsible academic unit, and schools and departments shall establish procedures for review of proposed courses or substantive course revisions.

Proposals that are not approved by a curriculum committee may be sent back to their originators for additional consideration and revision prior to resubmitting.

Department chairs and associate deans may have specific roles and responsibilities that vary depending on the nature of a proposal. Department chairs or associate deans should distribute proposals to the relevant curriculum committee(s). For proposals whose content may span departmental or divisional boundaries, either department chairs or associate deans should assume some responsibility for facilitation of communication across the involved departments or divisions so that all stakeholders may be informed and may contribute to the proposal development appropriately and conflicts may thus be minimized.

In addition to facilitating cross-divisional communications when appropriate, associate deans are responsible for assessing the resources needed to develop and run a course. Associate deans may overturn faculty approval of a new course proposal, which is final and recorded in the relevant academic unit's minutes, only in the event that adequate resources are unavailable.

New courses included in new program proposals must be approved by these same procedures before the program itself is submitted for review. The requisite course information must be provided before the course can be listed.

Cross Listing

As an institution that values interdisciplinary studies, Empire State University encourages the appropriate cross-listing of courses. Cross-listing allows students to see available courses that might fit their needs, maintains a flexible, student-centered approach to curriculum, and fosters breadth in degree programs. Finally, it allows faculty to reach a wider range of students while integrating their own diverse teaching and research interests.

In consultation with their mentors, students design their degrees as part of their required course, or courses, in Educational Planning. All decisions about what courses will fit any particular degree should be made there, following the historical policies and practices of the university, including review and approval by an Assessment Committee. No catalog or term guide entry can guarantee that a student's degree needs will be met by any particular course, so cross-listing should be used to inform students and ease their navigation of the catalog and term guide, not to take the place of effective degree planning.

The catalog and term guide are not the places to advertise courses. A single course can be listed in no more than three locations in the catalog and term guide.

A course can be cross-listed only when all relevant departments/ programs' curriculum committees agree to do so.

All credits for enrollments in a cross-listed course go to the department/ program funding the instructor. If a course is team-taught, the participating departments must determine how the credits are to be assigned or split.

Repetition Of Special Topics Courses

On a term-by-term basis, faculty may request that a special topics course not listed in the catalog be included in the forthcoming term guide. These may be nonrecurring or experimental offerings. A special topics course, that is taught three or more times within two years with at least nine students cumulatively completing it, must be submitted as a new course through the course proposal process prior to being offered again.

Prerequisites

Faculty design advanced-level courses in the expectation that students will come into the courses with the foundational knowledge that is necessary to progress, and one way to express that expectation is in the form of stated pre-requisite courses and/or knowledge. Such statements allow students to understand what is necessary and to create their educational plans commensurate with that understanding. However, since many SUNY Empire students are adults with expertise in the fields they have come to study, they can and do have knowledge without credentials. Prerequisites are used judiciously, but once stated should be attended to and enforced as necessary.

When prerequisites are used at Empire State University their purposes are:

- To incite a discussion between student and (primary) mentor and/ or instructor about the background knowledge and/or skill needed to succeed in a course.
- To meet the requirements of professional licensing or similar regulatory bodies.

Where specific background knowledge is necessary for student success in a course, students may demonstrate that knowledge in one of two ways:

- Through successful completion of courses or prior learning that have been designated as prerequisites.
- By discussion with the instructor of record, who has the authority to override a pre-requisite. If the instructor of record is not available, the department chair or designee may override a prerequisite.

Delisting of Courses

Courses should be delisted from the catalog when they become outdated or obsolete, therefore courses listed in the catalog that have not generated student enrollments for three academic years will be reviewed for delisting. The Office of the Registrar is responsible for identifying such courses and for notifying the appropriate academic unit.

The academic unit responsible for the course will review it and notify the registrar of their determination within six months.

Cross Registration at Other Institutions

Sponsor: Office of Academic Affairs
Contact: Registrar
Category: Academic
Number: 100.032 (https://www.sunyempire.edu/policies/?search=cid%3D37035)

Effective Date: September 1, 2019
Implementation History: Nov. 15, 1985 (implementation supersedes 1976 policy), revised Sept. 1, 1995, Feb. 28, 2002 and Sep. 1, 2019
Keywords: cross-register, accredited, accreditation

Purpose

Empire State University students may cross-register at other institutions. This option expands the variety of learning resources available. For cross registration, a course must be taken for academic credit at a college or university that is accredited or a candidate for accreditation by a recognized regional accrediting agency.

Statements

An undergraduate student may cross-register for no more than 50 percent of his or her total Empire State University credits. A graduate student may transfer, cross-register, and/or earned evaluated credit for up to a combined total of 12 credits into a master's program in the School for Graduate Studies or 9 credits into a master's program in the School of Nursing and Allied Health, and 3 credits into a certificate program in either school. A student may satisfy no more than a combined total of 50% of the credits toward a graduate certificate or degree program using transfer, cross registration, evaluated credit (e.g. prior learning assessment or direct assessment), and shared credits from a previously awarded graduate credential at the same level combined. Schools and individual programs may set lower limits for transfer, cross registration, and evaluated credit. See the Graduate Catalog (p. 535) for individual program limits.

For courses taken through cross registration at another institution, the registration must document the name of the other institution, the course number and the minimum acceptable grade for the credit award at SUNY Empire (at the undergraduate level: C or better; at the graduate level: B or better).

The amount of credit to be earned for a cross-registered course must be expressed in semester hours on the SUNY Empire enrollment.

The student must request that the other institution send an official (institution-to-institution) transcript to SUNY Empire. The grade should refer to the outcome reported on the official transcript. The official transcript is retained by the Office of the Registrar in the student file.

The start date of a cross-registered course must fall within the same financial aid term (fall, spring or summer) as all other components in the SUNY Empire enrollment.

Undergraduate Learning Contract Policy (p. 262)

Graduate Transfer, Cross-Registration, and Evaluated Credit Policy (p. 710)

Graduate Subsequent Programs at the Same Credential Level Policy (p. 710)

Procedures

To cross-register, the student must enroll for the course through an Empire State University registration created by the mentor.

The student also must follow local cross-registration procedures. These depend on the type of host institution or on specific arrangements between SUNY Empire and the host institution.

SUNY Empire allows tuition adjustments for cross-registrations. Procedures depend on the type of host institution or on specific arrangements between SUNY Empire and the host institution.

The student should contact the SUNY Empire school or program for information on cross-registration and tuition adjustment procedures.

Dean's List

Sponsor: Office of Academic Affairs and Undergraduate Committee for Academic Policy (UCAP)
Contact: Provost/Vice President for Academic Affairs
Category: Academic
Number: 100.146 (https://www.sunyempire.edu/policies/?search=cid %3D111397)
Effective Date: Sept. 1, 2019
Implementation History: Sept. 1, 2019
Keywords: Dean's List, GPA, Undergraduate, Grade Point Average

Purpose

The purpose of this policy is to introduce a dean's list based on a calculation of GPA in order to recognize student merit.

Statements

The Dean's list recognizes the academic achievement of undergraduate students, semester by semester. To qualify for this distinction, undergraduate students at Empire State University must earn a grade point average of 3.75 or higher in a given term. Additionally, to qualify for the Dean's list the student must complete a minimum of 4 graded credits in the designated term and no incomplete (IN) grades or administrative withdrawal grades (ZW). Dean's list designation is noted on the academic transcript for each term in which it applies.

Grading and Evaluation Policy for Undergraduate Programs (p. 225)

External Transcript Review

Policy Sponsor: Academic Affairs
Policy Contact: Provost
Policy Category: Academic
Policy Number: 100.100 (https://www.sunyempire.edu/policies/?search=cid%3D126377)
Effective Date: 08/28/2020
Implementation History: Originally implemented on April 1, 1975, and revised in Aug. 2020, July 2009, February 1996, October 1978.
Keywords: Assessment Process, Advanced Standing Credit, Transfer Credit, Policy and Procedures for Degree Program and Portfolio Review and Approval, Policy on Educational Planning Studies

Purpose

This policy establishes principles that govern university practices on external transcript review.

Definitions

External Transcript Review: the assessment of external transcript credits according to the judgement of professional staff trained to evaluate credit with faculty review and input. Through this process university personnel designate advanced level, liberal, and general education credit. Transfer courses retain their original titles.

Advanced Standing: a term used to describe incoming credits previously earned through acceptable sources, e.g. college transcripts, standardized exams, professional learning evaluations, and military transcripts. Readers should refer to the Individualized Prior Learning Assessment Policy and Procedures for policies regulating the individualized prior learning assessment (iPLA) process. The university awards advanced standing credit after admission. Credits are available, but not necessarily applicable to a particular degree program, which is determined when the program is concurred.

Degree Program: under the guidance of a mentor, a student develops a degree program proposal that identifies advanced standing credits, iPLA opportunities, and courses at SUNY Empire that meet college and SUNY guidelines and are tailored to the student's goals and interests.

Official Documentation: To be considered official, a transcript or other academic document must be sent at the student's request directly from the originating institution or organization to Admissions at Empire State University. Documents must be properly validated by admissions before credits are available for use. Not all documents received by the college may be credit worthy.

Regional Accreditation: a validation achieved when an institution has been reviewed and found acceptable by one of the seven regional accrediting associations (e.g. Middle States Commission on Higher Education).

Statements

Students are required to provide official documentation in order for their credits to be accepted.

External transcript review procedures identify a pool of available credits, from which, with guidance from a mentor, a student can draw to build a degree plan. General principles govern these procedures:

- Advanced standing credit that meets policy for acceptance will be evaluated and applied to the student's record as close to the time of admission as possible.
- Credit cannot be awarded twice for the same learning.
- The currency of learning will be considered as part of the development of the degree program proposal and assessed in the academic review process.

Liberal arts designations follow the New York State Department of Education's (NYSED) Policy statement on Liberal Art and Sciences.

Students with credits from regionally accredited colleges may transfer in all credits that are appropriate to their degree program and that conform to general college policies and procedures. As part of the design of their SUNY Empire degree during their Educational Planning course(s), students with their mentors determine which transcript credits are most suitable for the student's new degree while addressing SUNY and SUNY Empire policies about the integrity of degree programs.

In determining how to use any transferred credit in an Empire State University degree program, students and mentors should be aware that

transferred courses can be incorporated into their degree plan if those courses fit any of these criteria:

- They were part of an awarded associate in arts, associate in science or associate in applied science degree from a regionally accredited institution.
- They were awarded by a degree-granting institution on the NYSED list at the time of the student's attendance.
- They were awarded by an institution with which SUNY Empire has a Memorandum of Understanding (MOU).

Students who were awarded an Associate in the Arts (AA), Associate in Science (AS), or Associate in Applied Science (AAS) degree can bring in all or part of the credit earned, including courses with D grades. Students without a completed associate's degree can bring in credits for which the student received a C- or above.

In the case of an Associate in Occupational Studies (AOS) degree, division assessment committees evaluate a submitted degree on a course-by-course basis. D grades earned as part of an AOS degree are not transferable, even if the student completed the AOS.

Credit will only be included in the degree program if it is appropriate within the context of the degree.

Individual Exceptions

Student/faculty requests for exceptions about how credits are designated in the external transfer process are made through the Office of the Registrar. Academic departments may wish to periodically revisit decisions about course attributes that would affect future courses.

Applicable Legislation and Regulations

State the relevant legislation this policy must comply with or is referenced to. Regulations are rules or orders issued by an executive authority or regulatory agency of government that have the force of law. State any relevant regulations that affect this policy.

Contact: Office of Safety & Security
Category: Safety and Security
Number: 1200.003 (https://www.sunyempire.edu/policies/?search=cid %3D36201)
Effective Date: 07/01/2022
Keywords: Firearms, Gun

Purpose

To set the policy for firearms possession on university properties.

Statements

Empire State University prohibits any person from possessing air guns, firearms, rifles, shotguns or other weapons at any university facility or university sponsored event without the written authorization of the university president or designee. This policy applies to law enforcement officials who may otherwise be authorized to carry firearms while off-duty and to other individuals who may be licensed to carry firearms.

This policy does not apply to law enforcement officials who are performing official duties as authorized by state or federal law.

Procedures

Any employee, student, or vendor that wishes to request special authorization from the president or designee to carry a firearm on SUNY Empire property may request such authorization by emailing the director of safety and security at campus.security@sunyempire.edu . These procedures apply to law enforcement officials entering SUNY Empire property who are not performing official duties.

Grade Change

Sponsor: Office of Academic Affairs and Undergraduate Committee for Academic Policy
Contact: Provost/Vice President for Academic Affairs
Category: Academic
Number: 100.168 (https://www.sunyempire.edu/policies/?search=cid %3D141689)
Effective Date: Sept. 1, 2022
Implementation History: New Policy, extracted from Grading and Evaluation Policy
Keywords: Grade Change Policy

Purpose

The policy provides guidance for faculty and others regarding grade changes, the retroactive assignment of grades and appeal of grades.

Background Information

These elements of policy were previously embedded in the Grading and Evaluation Policy for Undergraduate Programs.

Definitions

Grades are defined in the college's Grading and Evaluation Policy for Undergraduate Programs (p. 225).

Policy Statements
Retroactive Assignment of Grades

Students matriculated at Empire State University before July 1, 2004, may request the assignment of a letter grade to the relevant narrative evaluations. The university will continue to respond to these student requests. For students who matriculated after that date, there will be no later assignment of letter grades to narrative evaluations.

The instructor who wrote the narrative evaluation should assign the grade. If this instructor is not available, another qualified faculty member may be enlisted to assign the grade.

Assignment of Grades by a Faculty Member Other Than the Instructor of Record

In accordance with SUNY faculty guidelines on grading, another qualified and discipline- specific faculty member may assign a grade when the instructor of record is not available to do so in a reasonable timeframe. The faculty member acting in the place of the instructor should base the grade on review of the student's work in the course or study in comparison to the learning objectives for the course or study.

Grade Changes

An award of a grade is normally final. However, if the instructor of record for a course makes an error in computing or entering a student's grade, that instructor may correct the erroneous grade.

Appeal of Grades

If a student feels that a grade was assigned based on impermissible factors, such as bias, discrimination, or retaliation, that student may appeal that grade as provided in the Academic Appeals Policy.

Grading and Evaluation Policy for Undergraduate Programs (https://www.sunyempire.edu/policies/reg-docs/reg-docs-html/grading-and-evaluation-policy-for-undergraduate-programs-effective-sept-2022.php)

Grading and Evaluation Policy for Undergraduate Programs

Sponsor: Office of Academic Affairs and Undergraduate Committee for Academic Policy
Contact: Provost/Vice President for Academic Affairs
Category: Academic
Number: 100.044 (https://www.sunyempire.edu/policies/?search=cid%3D141688)
Effective Date: Sept. 1, 2022
Implementation History: This policy supersedes the Policy and Procedures for Undergraduate Student Evaluation and Grading initially approved July 17, 2003, and revised July 2006, March 2012, September 2015 and September 2019.
Keywords: Grades, Formative Evaluation, Summative Evaluation, Learning Contract Outcomes, Grade Point Average.

Purpose

This policy establishes formative assessment of student work by an instructor of a course as a principle that drives educational activity and achievement at Empire State University and allows for summative evaluation, or grading, of that achievement.

This policy defines the possible letter grades that may be assigned for undergraduate work, as well as their meanings and consequences in terms of an undergraduate student's G.P.A., transcript, and academic progress and standing.

Learning and the assessment of student learning, as shown through the assignment of grades based on the evaluation of required student work, are central to academic integrity. Grades should reflect levels of student achievement on student learning outcomes and standards presented to students at the beginning of a course in a learning contract or syllabus. Because only the instructor of record is placed to judge a student's work

against the outcomes, activities, and evaluative criteria of that contract, in accordance with the SUNY Faculty Senate's 2013 Memo to Presidents on Grading, this policy grants authority and responsibility for assigning grades to only the instructor of record in a course, within the context of institutional policies and procedures and consistent with the academic freedom of institutions of higher education to set standards. In rare cases in which that instructor becomes unavailable, the policy provides for another qualified faculty member to assign a grade.

This policy also provides an option, the administrative withdrawal (ZW), for instructors to use in cases where there was insufficient academic attendance on the part of the student to allow the instructor to generate any other grade and defines the consequences of such grades for an undergraduate student's G.P.A., academic progress, and transcript.

Definitions

Summative evaluation is the assessment of a student's educational development compared to a standard or benchmark at the end of an educational period, such as a semester. A final course grade is one form of summative evaluation.

Formative evaluation is developmental feedback given periodically and/or episodically as part of a course to determine the type and/or direction of further efforts toward the educational goal of the course.

In order to meet federal standards, "For interactions to be considered regular and substantive interactions (https://www.sunyempire.edu/dlis/design-your-course/regular-and-substantive-interaction/), they need to meet the following characteristics:

- They should be mostly instructor-initiated
- They need to be regular, scheduled and predictable, and
- They must be substantive, i.e. focused on the course subject."

Statements

Once an undergraduate student has enrolled in a course with an instructor, both student and instructor have responsibility for the educational results. The instructor must provide learning outcomes and evaluative standards that align with them, while the student must provide substantive original work that demonstrates engagement with the learning outcomes and activities throughout the course, and thereby the status of his or her progress toward those outcomes. The instructor must respond with timely and thoughtful feedback on this work, addressing both the quality of the current work and directions for further effort and development towards the outcomes. The student should then attempt to apply that feedback to ongoing efforts in the course as well as to appropriate subsequent courses.

The instructor is responsible for providing regular and substantive interaction and feedback to the student. A grade for a course is a final, summative evaluation of the student's work in a course. Grading of a student's work is based on the learning objectives/outcomes and the methods and criteria of evaluation stated in the learning contract or course syllabus, which according to the Undergraduate Learning Contract Policy each student should have not later than the 4th week of a term.

A grade awarding credit is assigned by the instructor only if the academic expectations of the learning contract or course syllabus have been completed satisfactorily. A student who works hard and shows progress but does not meet the stated criteria for evaluation does not earn university credit.

Grades

Undergraduate Grades	QP	Description	Meaning
A	4.00	Excellent	Performance significantly exceeds college-level expectations for learning outcomes.
A-	3.67		
B+	3.33		
B	3.00	Good	Performance is above expectations
B-	2.67		
C+	2.33		
C	2.00	Adequate	Performance meets expectations
C-	1.67		
D+	1.33		
D	1.00	Minimally	Performance is below expectations
D-	0.67		
F	0.00	Unacceptable	Performance does not meet minimum requirements

The following outcomes are not included in the grade point average:

- IN (Incomplete)
- WD (Withdrawal- student initiated)
- ZW (Administrative Withdrawal)
- NP (No Pass)
- P (Pass)
- NG (No Grade)

Grade Point Average (G.P.A.) Calculation

The university registrar calculates the grade point average and includes the G.P.A. in the student transcript. The G.P.A. calculation at Empire State University is:

- Based only on SUNY Empire courses for which a letter grade is assigned. This includes courses for which a student cross registers at another institution.
- Not based on prior transfer credit or prior learning assessment components included as part of the student's official transcript.

Minimum Grade Point Average Requirement

SUNY Empire undergraduate students must maintain an overall 2.00 G.P.A. A cumulative 2.00 GPA is a requirement for graduation.

These and other criteria apply to eligibility to receive financial aid. See the Policy on Satisfactory Academic Progress and the statements on Eligibility for NYS and Federal Financial Aid.

Assignment of Grades to Credit by Evaluation/Prior Learning Assessment Components

SUNY Empire does not assign grades to Credit by Evaluation/Prior Learning Assessment components.

Repeated Courses

When a course is repeated, the highest grade and associated credits are included in the student's course attempted, credits completed, and grade point average (G.P.A.).

All courses taken and all grades earned are included in the student's SUNY Empire transcript. Repeated courses appear on the SUNY Empire transcript with a note indicating they have been repeated.

A repeated course grade does not replace the original grade:

- If a student withdraws from the repeated course or
- If a student is administratively withdrawn from the repeated course or
- Until a grade A through F or Pass/No Pass is awarded for the repeated course.

If the student took the first enrollment of the course prior to fall 2018 term, the student must initiate the Request to Repeat a Study request form. Submission of this form should be done at the time of registration. If the student took the first enrollment beginning on or after the fall 2018 term, the system will be automatically updated with the repeated course designated with the end of term processing.

Financial aid may not be available for a repeated course.

Status of C and D Grades

- SUNY Empire learning contracts and courses: a grade of D- or better is required for SUNY Empire to award credit.
- For students engaged in Empire State University combined Bachelor's/Master's programs, grades of D-, D, D+, or C- in a graduate course will count towards the Bachelor's degree, but not toward the Master's degree. See the Grading Policy for Graduate Studies.

F Grade

The course instructor submits an F grade when a student engages in a course throughout the term of enrollment and fails to complete it in a satisfactory and sufficient manner.

Pass/No Pass Option

A student may select a Pass/No Pass (P/NP) option for a course. Students may not exceed 12 credits graded as Pass/No Pass. Under this option, receiving a grade of Pass (P) implies that the student's work is completed at the C- level or better. The student selects the Pass/No Pass option at the time of enrollment. The university does not later award letter grades for such courses, nor are the results of such courses included in the student's G.P.A.

Pass (P): Ordinarily, a course instructor submits a letter grade when the student successfully completes a course. When a student successfully completes (at a C- or better) a course taken on a Pass/No Pass basis, a Pass (P) grade is recorded.

No Pass (NP): The course instructor submits a No Pass (NP) when a student engages in a course throughout the term of enrollment and fails to complete it in a satisfactory and sufficient manner or fails to complete (at a C- or better) a course taken on a Pass/No Pass basis, a No Pass (NP) grade is recorded.

Incomplete (IN)

Students are expected to engage with their course work throughout the term, submitting work for evaluation on a regular basis. However, when extenuating circumstances arise such that a student's work is delayed, a student may request an outcome of incomplete (IN) from the course instructor by submitting the incomplete request form. No course instructor is obligated to grant an incomplete, nor should any instructor submit an outcome of incomplete unless the student has requested one.

The course instructor submits an IN outcome only when the student has consistently engaged in learning activities and has successfully completed at least 50 percent of the assigned work before the end of the term for the course. Individual instructors are free to set higher standards for proportions of work submitted before considering a request for an incomplete on a course-by-course basis. Course-specific policies for consideration of an incomplete should be specified in the learning contract or syllabus, which should also refer students to this policy.

A student who is awarded an IN outcome is allowed no more than 15 weeks after the course end date to complete the course. The course instructor may establish an earlier completion date. Upon agreeing to issue an IN, the instructor is to submit an Incomplete Form prior to the end of the grading period. The instructor has the ability to enter a default grade when an incomplete is requested. The Incomplete outcome will automatically convert to the default grade entered by the instructor at the end of the Incomplete period if another grade is not entered. If no default grade was entered and a grade is not entered by the instructor at the end of the incomplete period, the Incomplete outcome will convert to an F or NP.

After the deadline to submit the final work for the incomplete course, the instructor has seven days to evaluate the work and submit a grade.

If a new grade is not issued by the end of the evaluation period, an IN outcome automatically converts to the default grade entered by the instructor. If the instructor has not issued a default grade, the IN outcome converts to an F or NP depending on the grading type.

Administrative Withdrawal (ZW)

The course instructor submits an outcome of administrative withdrawal (ZW) if a student registers for a course and either does not engage in course work at all or initiates participation in the activities of the course, but then ceases to participate and does not officially withdraw. See definition of substantive engagement for acceptable participation. The ZW outcome must include the last date of substantive contact in an academically related activity by the student. As a guideline, instructors should evaluate at the 20% point of their course if any students have a lack of substantive engagement. If they meet this definition, a ZW should be entered. If at any point a student stops engaging, a ZW should be entered. It is not appropriate to enter a ZW during the grading period if the student never engaged or stopped engaging early in the term.

Faculty have the authority to institute their own course attendance requirements.

Withdrawal (WD): A student may withdraw from a course until the last day of the course. A student must withdraw using the stated procedures from the Office of the Registrar. The effective date is the date the student transmits the request. The actual date of withdrawal may affect enrollment status, satisfactory academic process, and financial aid eligibility. See SUNY Empire policy on Academic Withdrawal.

Implications of Outcomes

Outcomes of IN, ZW, NP, and WD have specific implications for financial aid eligibility. For an explanation, see the Empire State University statements on Eligibility for New York State Financial Aid and Eligibility for Federal Financial Aid.

Grading Deadlines

Student work is due as specified in the learning contract or course syllabus. As soon as possible after receiving it, instructors should strive to return student work with feedback, so that the cycle of regular and substantive effort, feedback, and development continues unabated.

The final grade/outcome for each course should be prepared as soon as possible after the student has completed the course, so that the student has timely evaluative information as well as an official transcript for the course. Grades/outcomes are due within seven calendar days after the last day of each term, or in the case of an incomplete, within seven calendar days after the deadline to submit the final work for the incomplete.

Latin Honors

Sponsor: Academic Affairs
Contact: Office of Academic Affairs
Category: Academic
Number: 100.014 (https://www.sunyempire.edu/policies/?search=cid%3D126472)
Effective Date: Sept. 3, 2020
Keywords: Honors, Policy

Purpose

This policy establishes Latin honors at the university for recognizing distinguished performance by students earning a bachelor's degree at graduation.

Statements

Latin honors is a universally recognized distinction that is based on an Empire State University (SUNY Empire) graduate's cumulative grade point average (GPA).

Latin honors is reserved for students earning a bachelor's degree.

The cumulative GPA needed to achieve Latin honors at the university is based on the 70th/80th/90th percentiles of baccalaureate graduate GPAs over a five-year period: Cum Laude (3.81), Magna Cum Laude (3.88), and Summa Cum Laude (3.96). The cumulative GPA totals used to establish thresholds for this policy are based on a breakdown of baccalaureate graduates from 2014-15 to 2018-19.

Only graded credits at SUNY Empire will be counted. Students at the bachelor's level must earn at least 27 graded credits to qualify.

Ungraded credits (e.g. pass/no pass) do not count toward Latin honors.

Grade changes that take effect before graduation and affect a student's qualifications for Latin honors will be applied to the student's cumulative average at graduation.

Non-Discrimination/Anti-Harassment

Sponsor: Office of Human Resources and Chief Diversity Officer
Contact: Office of Human Resources and Chief Diversity Officer
Category: Human Resources
Number: 900.004 (https://www.sunyempire.edu/policies/?search=cid%3D35752)
Effective Date: 01/01/2012
Implementation History: Revised January 2012, October 2019; Original March 2007
Keywords: Nondiscrimination Policy, Anti-harassment, Sexual Harassment, Harassment, Discrimination
Background Information: Previous policy entitled "Anti-Discrimination Policy"

Purpose

Empire State University (SUNY Empire) is an equal-opportunity employer committed to an educational and employment environment in which all individuals (faculty, staff, students and visitors) are treated with respect and dignity. Each individual has the right to work or study in a professional atmosphere that promotes equal treatment and addresses discriminatory practices, including harassment. The university expects that all relationships among persons at the university are professional and free of bias, prejudice and harassment.

Sexual harassment, specifically, is addressed in the SUNY Empire policy, 900.016 (https://www.sunyempire.edu/policies/?search=cid%3D146100) Sexual Violence Prevention and Response Policy.

Definitions

Harassment: Under this policy, harassment is verbal or physical conduct that denigrates or shows hostility or aversion toward an individual because of his/her race, color, creed, national origin, sex, age, disability, sexual orientation, gender identity, marital status, domestic violence victim status, or any other characteristic protected by law or that of his/her relatives, friends or associates, and that:

1. Has the purpose or effect of creating an intimidating, hostile or offensive work or study environment.
2. Has the purpose or effect of unreasonably interfering with an individual's work or study performance.
3. Otherwise adversely affects an individual's employment or learning opportunities.

Harassing conduct includes, but is not limited to epithets, slurs or negative stereotyping; threatening, intimidating or hostile acts; denigrating jokes and display or circulation on the campus of written or graphic material that denigrates or shows hostility or aversion toward an individual or group (including through email).

Protected Categories of Discrimination: Discrimination can take many forms. For the purpose of this policy, the protected categories under discrimination are race, color, national origin, religion, creed, age, disability, sex, gender identity or expression, sexual orientation, familial status, pregnancy, predisposing genetic characteristics, military status, domestic violence victim status, or criminal conviction.

Statements

It is the policy of Empire State University to provide an educational and employment environment free from all forms of intimidation, hostility, offensive behavior and discrimination and harassment, including sexual harassment. Such behavior or tolerance of such behavior on the part of an administrator, supervisor, faculty or staff member violates this policy and may result in administrative action, civil and/or legal action. The university will not tolerate retaliation against any individual who makes a complaint of discrimination, harassment or who participates in an investigation. Concerns of retaliation will be investigated and are subject to disciplinary action.

Individuals and Conduct Covered

This policy applies to faculty, staff and students, and prohibits harassment, discrimination and retaliation with respect to applicants, employment, programs or activities at the university whether engaged in by fellow employees, faculty, supervisors or administrators, or by

someone not directly connected to the university (e.g., an outside vendor, consultant or customer).

Conduct prohibited by these policies is unacceptable in the workplace/academic class and in any university-related setting, including business trips, meetings and university-related social events.

Retaliation is Prohibited

It is unlawful to retaliate against an individual when it comes to any aspect of employment, including hiring, firing, pay, job assignments, promotions, layoff, training, fringe benefits and any other term or condition of employment. In addition, it is illegal to retaliate against any individual who reports acts of discrimination or harassment or participates in an investigation of such reports. Retaliation against an individual for reporting harassment or discrimination or for participating in an investigation of a claim of harassment or discrimination is a serious violation of this policy and, like harassment or discrimination itself, will be the subject of disciplinary action.

Information and Reporting

Employee questions regarding harassment, sexual harassment or discrimination may be addressed to the Office of Human Resources, 2 Union Avenue, Saratoga Springs, NY 12866-4391 (518) 587-2100, ext. 2240 or (800) 847-3000, ext. 2240 or TitleIX@sunyempire.edu

Student questions can be directed to Lindsay Holcomb, Director of Human Resources and Interim Title IX Director, 518-581-2239 or TitleIX@sunyempire.edu

All allegations of harassment or discrimination are taken very seriously. The university will act positively to investigate alleged harassment and to affect remedy when an allegation is substantiated. Supervisors and other college officials are required to report any known or perceived incidences of harassment or discrimination to the affirmative action officer.

Applicable Legislation and Regulations

Empire State University complies with state and federal laws prohibiting discrimination and sexual harassment including Title VI of the Civil Rights Act of 1964, Title IX of the Education Amendment of 1972, Sections 503 and 504 of the Rehabilitation Act of 1973, Title II of the Americans with Disabilities Act of 1990, New Yor's Human Rights Law, Governor's Executive Order No. 33 prohibiting discrimination on the basis of gender identity, and the Age Discrimination Act.

Related References, Policies, Procedures, Forms and Appendices

Discrimination and Sexual Harassment Compliant Procedure: Policy 900.017.

The university's Affirmative Action Plan describes initiatives undertaken to prevent discrimination and harassment and nurture an inclusive, respectful and collegial environment among employees, students and visitors. The Affirmative Action Plan has been prepared in accordance with State University of New York policy and the regulations promulgated by the Office of Federal Contract Compliance Programs (OFCCP), U.S. Department of Labor, 41 CFR Chapter 60 and Executive Order 11246, Governor's Executive Order No. 28 that prohibits discrimination relating to employment based on sexual orientation, Executive Order 19 pertaining to victims of domestic violence, and the State University of New York's Policies of the Board of Trustees.

Protection of Human Subjects Research

Sponsor: Office of Research, Innovation and Open Education
Contact: Director, Office of Sponsored Programs
Category: Research and Sponsored Programs
Number: 1100.001 (https://www.sunyempire.edu/policies/?search=cid%3D36499)
Effective Date: Jan. 1, 1995
Implementation History: Revised on April 29, 2013
Keywords: Institutional Review Board, Human Subject Research
Background Information: Revised to reflect current legislation

Purpose

To ensure the ethical treatment of human subjects involved with Empire State University research projects, as well as to comply with federal and state regulations, the university has developed this policy as well as procedures with which to carry out the policy. Additionally, the university, in order to maintain its federal-wide assurance with the Office of Human Research Protections, which is necessary for federal grants, must have a policy for the protection of its human research subjects.

Definitions

Research: A systematic investigation including research development, testing and evaluation designed to develop or contribute to generalizable knowledge. Activities which meet this definition constitute "research" for purposes of this policy, whether or not they are conducted or supported under a program that is considered research for other purposes. For example, some demonstration and service programs may include research activities.

Human Subject: A living individual about whom an investigator (faculty, staff or student) conducting research obtains:

1. Data through intervention or interaction with the individual, or
2. Identifiable private information.

Statements

All research involving human subjects conducted by university faculty, staff and students must be reviewed and approved by the Institutional Review Board prior to the start of the research. Those submitting protocols to the Institutional Review Board must have completed the CITI human subjects training within three years of the protocol submission or the protocol will not be approved.

Rights of the Disabled and Procedures for Accommodating Students With Disabilities at Empire State University

Rights of Students With Disabilities Policy

Sponsor: Accessibility Resources and Services
Contact: Director, Accessibility Resources and Services
Category: Student Affairs
Number: 1300.014 (https://www.sunyempire.edu/policies/?search=cid%3D39991)
Effective Date: July 1, 2006
Keywords: Disability, Reasonable accommodations, ADA, Section 504
Background Information: The policy was first implemented to be in compliance with state and federal law related to the rights of persons with disabilities, notably Section 504 of the Rehabilitation Act of 1973, the Americans with Disabilities Act of 1990, as amended in 2008, and the New York State Human Rights Law.

Purpose

The purpose of this policy is to assure university compliance with federal, state and local laws pertaining to the rights of prospective and current students with disabilities

Definitions

Disability: A diagnosed physical or mental impairment that affects the performance of one or more major life activities. Individuals with a history of impairment or regarded as impaired also are protected from discrimination on the basis of that disability.

Qualified individual with a disability: A person with a disability, who with or without reasonable accommodation is able to perform the essential functions of his or her job.

Reasonable accommodation: A modification to a program, task or event that allows an individual with a disability to fully participate. An accommodation does not alter the learning objectives or reduce program or course standards.

Essential functions: Those tasks or functions that, if modified, would fundamentally change the nature of the job or occupation for which the position exists

Statements

Empire State University complies with Section 504 of the Rehabilitation Act of 1973 and the Americans With Disabilities Act (ADA) of 1990. These acts state " … no otherwise qualified handicapped individual … shall, solely by reason of his or her handicap, be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any program or activity receiving federal financial assistance (29 U.S.C Sect. 706)." Regulations implementing Section 504 and ADA establish standards for employment practice, accessibility of facilities, and education programs with which institutions receiving federal funds must comply (34 CFR Part 104).

In accordance with these regulations, a qualified person with a disability who meets the academic and technical standards required to enroll in and participate in the Empire State University program shall be provided an equal opportunity to obtain a degree in the most integrated setting appropriate to that person's needs. SUNY Empire provides reasonable accommodations to meet the needs of students with disabling conditions. Reasonable accommodations do not include academic adjustments that would fundamentally alter the nature, essential requirements or academic standards of the program.

The university considers each student's individual needs through an interactive process with the Office of Accessibility Resources and Services and the student.

The Director of Accessibility Resources and Services coordinates the university's compliance with Section 504, ADA and their implementing regulations with respect to students. Questions concerning the university's policy should be directed to:
Director of Accessibility Resources and Services
Empire State University
AppleTree Business Park
2875 Union Road, Suite 34
Cheektowaga, NY 14227-1461
716-686-7800, ext. 3880,or Disability.Services@sunyempire.edu.

Applicable Legislation and Regulation

- Section 504 of the Rehabilitation Act of 197
- Americans with Disabilities Act of 1990
- Americans with Disabilities Amendments Act of 2008
- New York State Human Rights Law

Procedure for Students Requesting Reasonable Accommodations Due to Disability

Empire State University will provide reasonable accommodations for students with disabilities in all in-person and online course offerings. To request an accommodation, students must contact the Office of Accessibility Resources and Services.

Requesting Accommodation Through Accessibility Resources and Services

1. The student completes the Disability Declaration and Request for Accommodation form (available on the Disability Declaration and Request for Accommodation forms web page (https://www.sunyempire.edu/accessibility/forms/)) to provide information about their disability and request accommodations. In order for Accessibility Resources and Services to evaluate accommodation requests and provide implementation of those approved accommodations the office recommends students provide notice to the office in advance of when the student will need to utilize accommodation services. The student does not need to provide documentation of the disability at this stage although it may expedite the process.
   - If documentation is needed to support the requested accommodations, the student should forward supporting materials and requested documentation to Accessibility Resources and Services as soon as possible.
   - Review of the student's accommodation request is finalized when all documentation has been received. Documentation must be current, include a statement of diagnosis, illustrate the impact of the disability on the student's academic functioning and recommend accommodations.
2. The office makes evaluative judgments in accordance with Section 504 of the Rehabilitation Act of 1973 and the Americans With Disabilities Act of 1990.
   - The office provides a written response to the student within five business days from receipt of complete documentation and

supporting materials. Additional information may be requested if needed in order to make the accommodation recommendation. If the requested accommodation is denied, the office includes the reason for the denial.

- The office provides accommodation notification to relevant faculty and mentors to facilitate the implementation of the approved accommodations as needed. The disability specialist determines appropriate accommodations, consulting with the director, the student's mentor and staff as needed. If an accommodation request cannot be easily accommodated by the faculty or mentor, or if the student is requesting an accommodation that necessitates the provision of documentation, the office may utilize a third party to deliver the accommodation. Third-party accommodations may include:
  - Eligibility for TAP awards as a part-time student
  - Alternate formatted (i.e. electronic) text copies of textbooks from the publisher

Procedures for Requesting Textbooks in Alternative Formats

1. Students who have a documented print disability may request copies of their textbooks in alternative formats. The university uses a variety of sources to supply these materials, including files obtained from the publishers, Access Text Network, or Bookshare, and electronic scanning of books to create electronic text. This process can take up to several weeks depending on publishers, copyright and technical formatting issues. We encourage students to begin the process as soon as they get their textbook requirements for the course. While the university will make a reasonable effort to provide the textbook in the student's preferred file format, it will provide a reasonable and effective alternative when it cannot obtain the preferred format. You must follow the procedures below to request textbooks in alternative formats:
   - Purchase the required textbooks. Whether you purchase your books online through the Empire State University Bookstore or privately, you must submit proof of purchase with your request for electronic texts. New York state law requires that students purchase a copy of the book requested in alternative format.
   - Complete the Application for Alternatively Formatted Textbooks. Submit your application six weeks before you need the books. While Accessibility Resources and Services will accept late requests, late submission reduces the likelihood that you will receive the alternative formats when you need them. You must complete this form each term you need books in alternative formats.
   - Submit your completed application with documentation of your print disability. You need only provide documentation of print disability once.

Textbooks Not Available From External Sources

1. If the textbooks are not available from external sources, the Office of Accessibility Resources and Services will ask you to provide the university with hard copies of the textbooks for scanning.
   - If you must ship the books to Accessibility Resources and Services, the university will reimburse you for shipping costs.
   - The university will obtain permission from the publishers for the university to scan your books and create the electronic text. The files can be provided to you in a digital text format to be used with text-to-speech and/or magnification software. Please note: The binding of your textbooks will be cut off in order to scan the book. The books will be rebound prior to shipping them back to you. In many instances, paperback books can be rebound using

the original binding. Hardcover textbooks may need to be bound using other materials and will not be restored to their original condition.

Processing and Handling of Requests

Upon receipt of a request, the Office of Accessibility Resources and Services will:

1. Confirm that the following has been received:
   - print disability documentation;
   - completed alternative text application;
   - proof of purchase.
2. Search the Access Text Network's online book catalog for the availability of texts.
3. Search Bookshare's inventory of electronic text files for the requested texts.
4. Locate the contact information for each publisher through the American Association of Publisher's look-up service and request the textbook in electronic format directly from the publisher.
5. After 10 business days, the Office of Accessibility Resources and Services will provide an update to the student via email regarding:
   - The availability of textbooks from the lending libraries, i.e., Bookshare, etc.
   - The response from the publishers regarding the availability of text files requested.
6. Once received, share the alternative (i.e. electronic) text with the student.

Americans With Disabilities Act Grievance/Appeal Process

An ADA grievance is a complaint related to accommodation of a disability.

- **Informal resolution.** The student is strongly encouraged to seek informal resolution of a grievance by bringing it to the attention of the Office of Accessibility Resources and Services in a timely fashion. This process must begin within 30 calendar days of the concern arising.
- **Written grievance.** If the student is unsatisfied with the informal resolution, the student may make a formal, written complaint. The student should follow procedures for formal grievance in the Student Grievance Policy and Procedures (https://catalog.sunyempire.edu/undergraduate/academic-policies-procedures/student-grievance-policy-procedures/).

The student may seek further redress by registering a complaint with the Office of Civil Rights or the New York State Division of Human Rights.

Sexual Harassment

Sponsor: Human Resources
Contact: Affirmative Action Officer
Category: Human Resources
Number: 900.014 (https://www.sunyempire.edu/policies/?search=cid%3D41291)
Effective Date: Jan. 1, 2012
Implementation History: Revised on: August 2019, 2011; February 1996; September 1989
Keywords: Sexual harassment, affirmative action, Title IX, Title VII

Background Information: This policy affirms Empire State University adoption of SUNY policy 6507. It replaces the university's previous Sexual Harassment Policy.

Purpose

SUNY Administration created a Uniform Sexual Harassment Policy Statement for all campuses to adopt in October of 2018 pursuant to Labor Law §201-g, which requires every employer in the State of New York to adopt a sexual harassment prevention policy that meets or exceeds enumerated minimum standards in order to prevent and combat sexual harassment in the workplace.

Definitions

Retaliation is an adverse action taken against an individual as a result of complaining about or provides information regarding unlawful discrimination or harassment, exercising a legal right, and/or participating in a complaint investigation as a third-party witness. Adverse action includes being discharged, disciplined, discriminated against, or otherwise subject to adverse action because the individual reports an incident of sexual harassment, provides information, or otherwise assists in any investigation of a sexual harassment complaint.

Hostile Environment is when unwelcome and demeaning behavior or conduct that "substantially interferes" with a person's performance or creates an "intimidating, hostile or offensive" exist. For example, the harasser may continually remark on someone's body or clothing, post sexually explicit photos or make sexually oriented comments. A peer, superior, subordinate or vendor can create a hostile environment.

Statements

Sexual harassment is a form of sex discrimination that is unlawful in the workplace under Title VII of the Civil Rights Act of 1964, as amended, and the New York State Human Rights Law. Under Title IX of the Educational Amendments of 1972, sexual harassment also is prohibited in the provision of educational services and protects students and employees from sexual harassment.

Civility, trust, respect and openness are professional behaviors that are expected from all members of the university community. Harassment, including sexual harassment, breaks the bonds of civility, trust, respect and openness. Sexual harassment is prohibited and will not be tolerated at Empire State University (SUNY Empire). The university has implemented measures to address and prevent sexual harassment and is taking additional affirmative steps to increase awareness of, and sensitivity to, all forms of sexual harassment in order to maintain a workplace and learning environment free of its harmful effects.

Sexual harassment is a form of workplace discrimination and employee misconduct, as well as a form of discrimination in the academic setting, and all employees and students are entitled to work and learn in a campus environment that prevents sexual harassment. All employees and students have a legal right to a workplace and a campus free from sexual harassment, and employees and students can enforce this right by filing a complaint internally with the university, or with a government agency, or in court under federal or state anti-discrimination laws, as detailed in the university's Discrimination and Sexual Harassment Complaint Procedure.

In accordance with applicable law, sexual harassment is generally described as unwelcome sexual advances, requests for sexual favors or other verbal or physical conduct of a sexual nature when:

- Submission to such conduct is made either explicitly or implicitly a term or condition of employment or academic benefit; or
- Submission to or rejection of the conduct is used as the basis for an employment or academic decision affecting the person rejecting or submitting to the conduct; or
- The conduct has the purpose or effect of unreasonably interfering with an affected person's work or academic performance, or creating an intimidating, hostile or offensive work or learning environment.

Sexual harassment can include physical touching, verbal comments, non-verbal conduct such as leering or inappropriate written or electronic communications, or a combination of these things. Examples of sexual harassment may include, but are not limited to:

- Seeking sexual favors or a sexual relationship in return for the promise of a favorable grade or academic opportunity;

- Conditioning an employment-related action (such as hiring, promotion, salary increase, or performance appraisal) on a sexual favor or relationship; or
- Intentional and undesired physical contact, sexually explicit language or writing, lewd pictures or notes, and other forms of sexually offensive conduct by individuals in positions of authority, co-workers or student peers, that unreasonably interferes with the ability of a person to perform their employment or academic responsibilities.
- Physical acts of a sexual nature, such as:
  - Touching, pinching, patting, kissing, hugging, grabbing, brushing against, or poking another person's body;
  - Rape, sexual battery, molestation or attempts to commit these assaults.

- Unwanted sexual advances or propositions, such as:
  - Requests for sexual favors accompanied by implied or overt threats concerning a target's job performance evaluation, a promotion or other job benefits or detriments, or an educational benefit or detriment;
  - Subtle or obvious pressure for unwelcome sexual activities.

- Sexually oriented gestures, noises, remarks, jokes or comments about a person's sexuality or sexual experience, which create a hostile environment.
  - Sex stereotyping occurs when conduct or personality traits are considered inappropriate simply because they may not conform to other people's ideas or perceptions about how individuals of a particular sex should act or look.

- Sexual or discriminatory displays or publications, such as:
  - Displaying pictures, posters, calendars, graffiti, objects, promotional material, reading materials or other materials that are sexually demeaning or pornographic. This includes such sexual displays on computers or cell phones and sharing such displays while in the workplace or classroom.

- Hostile actions taken against an individual because of that individual's sex, sexual orientation, self-identified or perceived sex, gender expression, gender identity, and the status of being transgender, such as:

- Interfering with, destroying or damaging a person's workstation, tools or equipment, or otherwise interfering with the individual's ability to perform his or her employment or academic duties;
- Sabotaging an individual's work;
- Bullying, yelling, name-calling.

Such behavior can constitute sexual harassment regardless of the sex, gender, sexual orientation, self-identified or perceived sex, gender expression, status of being transgender, or gender identity of any of the persons involved. Sexual harassment is considered a form of employee and student misconduct which may lead to disciplinary action. Further, supervisors and managers will be subject to discipline for failing to report suspected sexual harassment or otherwise knowingly allowing sexual harassment to continue. Employees and students who believe they have been subjected to sexual harassment may use the university's Discrimination and Sexual Harassment Complaint Procedure for more details on how to have their allegations reviewed, including a link to a complaint form.

Retaliation against a person who files a complaint, serves as a witness, or assists or participates in any manner in this procedure, is unlawful, is strictly prohibited and may result in disciplinary action. Retaliation is an adverse action taken against an individual as a result of complaining about or provides information regarding unlawful discrimination or harassment, exercising a legal right, and/or participating in a complaint investigation as a third-party witness. Adverse action includes being discharged, disciplined, discriminated against, or otherwise subject to adverse action because the individual reports an incident of sexual harassment, provides information, or otherwise assists in any investigation of a sexual harassment complaint. Participants who experience retaliation should contact the campus AAO, and may file a complaint pursuant to these procedures. The university will act positively to investigate alleged harassment and to affect remedy when an allegation is substantiated.

SUNY campuses and System Administration shall take the necessary steps to ensure that this Sexual Harassment Response and Prevention Policy Statement is distributed, implemented, and enforced in accordance with their respective policies.

Purpose

Empire State University is committed to maintaining a safe environment that is supportive of its primary educational mission and free from all exploitation and intimidation. The university will not tolerate sexual harassment, sexual assault or any other form of nonconsensual sexual activity to include dating violence, domestic violence and/or stalking.

It is essential that students who are sexually assaulted receive support and medical treatment as soon as possible. This document outlines the policies and procedures that will allow members of the university community to be effective at referring victims of assault to medical, psychological and legal resources. The university's Student Code of Conduct provides additional information for students.

This policy reflects SUNY's Policies on Sexual Violence Prevention and Response and is in compliance with NYS law, chapter 75 of the laws of 2015.

Contents

- Definitions of Affirmative Consent
- Policy for Alcohol and/or Drug Use Amnesty on Sexual and Interpersonal Violence Cases
- Students' Bill of Rights
- Sexual Violence Response Policy
- Options for Confidentially Disclosing Sexual Violence

Definitions

Affirmative consent is a knowing, voluntary and mutual decision among all participants to engage in sexual activity. Consent can be given in words or actions, as long as those words or actions create clear permission regarding willingness to engage in the sexual activity. Silence or lack of resistance, in and of itself, does not demonstrate consent. The definition of consent does not vary based upon a participant's sex, sexual orientation, gender identity or gender expression.

- Consent to any sexual act or prior consensual sexual activity with any party does not necessarily constitute consent to any other sexual act.

- Consent is required regardless of whether the person initiating the act is under the influence of drugs and/or alcohol.
- Consent may be withdrawn at any time.
- Consent cannot be given when a person is incapacitated, i.e., when he or she lacks the ability to knowingly choose to participate in sexual activity. Incapacitation may be caused by lack of consciousness or being asleep, being involuntarily restrained, or if an individual otherwise cannot consent. Depending on the degree of intoxication, someone under the influence of alcohol, drugs or other intoxicants may be incapacitated and therefore unable to consent.
- Consent cannot be given under conditions of coercion, intimidation, force or threat of harm.
- When consent is withdrawn, or can no longer be given, sexual activity must stop.

Statements

Policy for Alcohol and/or Drug Use Amnesty in Sexual and Interpersonal Violence Cases

The health and safety of every student at the State University of New York and its state-operated and community colleges is of utmost importance. Empire State University recognizes that students who have been drinking and/or using drugs, whether voluntarily or involuntarily, at the time that violence, including, but not limited to domestic violence, dating violence, stalking or sexual assault, may be hesitant to report such incidents due to fear of potential consequences for their own conduct. Empire State University strongly encourages students to report incidents of domestic violence, dating violence, stalking or sexual assault to university officials. A bystander or reporting individual acting in good faith, who discloses any incident of domestic violence, dating violence, stalking or sexual assault to Empire State University officials or law enforcement, will not be subject to the university's code of conduct for violations of alcohol and/or drug use policies at or near the time of the commission of the domestic violence, dating violence, stalking or sexual assault.

Students' Bill of Rights

The State University of New York and SUNY Empire are committed to providing options, support and assistance to victims/survivors of sexual assault, domestic violence, dating violence and/or stalking to ensure that they can continue to participate in university-wide and campus programs, activities and employment. All victims/survivors of these crimes and violations, regardless of race, color, national origin, religion, creed, age, disability, sex, gender identity or expression, sexual orientation, familial status, pregnancy, predisposing genetic characteristics, military status, domestic violence victim status or criminal conviction, have the following rights, regardless of whether the crime or violation occurs on campus, off campus or while studying abroad:

All Students Have the Right To:

- Make a report to campus security, local law enforcement and/or state police;
- Have disclosures of domestic violence, dating violence, stalking, and sexual assault treated seriously;
- Make a decision about whether or not to disclose a crime or violation and participate in the judicial or conduct process and/or criminal justice process free from pressure from the institution;
- Participate in a process that is fair, impartial, and provides adequate notice and a meaningful opportunity to be heard;

- Be treated with dignity and to receive from the institution courteous, fair counseling services, where available;
- Be free from any suggestion that the reporting individual is at fault when these crimes and violations are committed, or should have acted in a different manner to avoid such crimes or violations;
- Describe the incident to as few institutional representatives as practicable and not to be required to unnecessarily repeat a description of the incident;
- Be free from retaliation by the institution, the accused, and/or the respondent, and/or their family, friends and acquaintances within the jurisdiction of the institution;
- Access to at least one level of appeal of a determination;
- Be accompanied by an advisor of choice who may assist and advise a reporting individual, accused or respondent throughout the judicial or conduct process including during all meetings and hearings related to such process;
- Exercise civil rights and practice of religion without interference by the investigative, criminal justice or judicial or conduct process of the university.

Sexual Violence Response Policy

In accordance with the Students' Bill of Rights, reporting individuals shall have the right to pursue more than one of the options below at the same time, or to choose not to participate in any of the options below:

1. **Reporting**

   - Have emergency access to a Title IX coordinator or other appropriate official trained in interviewing victims of sexual assault who shall be available upon the first instance of disclosure by a reporting individual to provide information regarding options to proceed, and, where applicable, the importance of preserving evidence and obtaining a sexual assault forensic examination as soon as possible, and detailing that the criminal justice process utilizes different standards of proof and evidence and that any questions about whether a specific incident violated the penal law should be addressed to law enforcement or to the district attorney.
   - To disclose the incident and obtain confidential services from New York state, contact New York City or county hotlines (http://www.opdv.ny.gov/help/dvhotlines.html). Additional disclosure and assistance options are catalogued by the Office for the Prevention of Domestic Violence and presented in several languages on their web site (https://opdv.ny.gov/) or 800-942-6906. Assistance also is available through the following organizations:
     - Legal Momentum (http://www.legalmomentum.org).
     - NYSCASA (http://nyscasa.org).
     - NYSCADV (http://www.nyscadv.org).
     - Pandora's Project (https://pandys.org/).
     - RAINN (http://www.rainn.org/get-help/).
     - Safe Horizons (http://www.safehorizon.org).
       (Note: These hotlines are for crisis intervention, resources and referrals, and are not reporting mechanisms; disclosure during a call to a hotline does not provide information to the campus. Reporting individuals are encouraged to additionally contact a confidential campus or private resource, so that the university can take appropriate action.
   - To disclose the incident to a university official, who can offer privacy and provide information about remedies,

accommodations, evidence preservation and how to obtain resources. Those officials also will provide the information contained in the Students' Bill of Rights, including the right to choose when and where to report, to be protected by the university from retaliation and to receive assistance and resources from the university. Note, university officials will disclose that they are private and not confidential resources and may still be required by law and university policy to inform one or more university officials about the incident, including but not limited to Title IX coordinator. They will notify reporting individuals that the criminal justice process uses different standards of proof and evidence than internal procedures and that questions about the penal law or criminal process should be directed to law enforcement or district attorney:

- Office of Safety and Security
  518-587-2100, ext. 2800
  2 Union Ave.
  Saratoga Springs, NY 12866-4390
  8 a.m.-5 p.m., Monday-Friday;
- Title IX Coordinator
  email:

  TitleIX@sunyempire.edu (titleix@sunyempire.edu) or call 800-847-3000, ext. 1009
- Local law enforcement office (https://en.wikipedia.org/wiki/List_of_United_States_state_and_local_law_enforcement_agencies/).
- State police 24-hour hotline to report sexual assault on a N.Y. college campus, 844-845-7269

• To receive assistance from the university Title IX coordinator in initiating legal proceedings in family court or civil court, email: TitleIX@sunyempire.edu, or call: 800-847-3000, ext. 1009.

• To file a report of sexual assault, domestic violence, dating violence and/or stalking, and/or talk to the Title IX coordinator for information and assistance. Reports will be investigated in accordance with university policy and the reporting individual's identity shall remain private at all times, if said reporting individual wishes to maintain privacy. If a reporting individual wishes to keep his/her identity private, he or she may call the Title IX coordinator anonymously to discuss the situation and available options at: 800-847-3000, ext. 1009; TitleIX@sunyempire.edu (titleix@sunyempire.edu)

• When the accused is an employee, a reporting individual also may report the incident to the Office of Human Resources, or may request that one of the above-referenced private employees assist in reporting to: the Office of Human Resources [2 Union Ave., Saratoga Springs, NY 12866; 518-587-2100, ext. 2240]; all incidents will be shared with the Title IX coordinator. Disciplinary proceedings will be conducted in accordance with applicable collective bargaining agreements.

• When the accused is an employee, affiliated entity or vendor to the university, university officials will, at the request of the reporting individual, assist in reporting to the appropriate office of the vendor or affiliated entity and, if the response of the vendor or affiliated entity is not sufficient, assist in obtaining a persona non grata letter, subject to legal requirements and university policy.

• The reporting individual may withdraw a complaint or involvement from the university process at any time.

2. **Resources**
   • To obtain effective intervention services
     • Sexual contact can transmit sexually transmitted infections and may result in pregnancy. Testing for STIs and emergency contraception is available at various external locations. For confidential, private, affordable same-day STI testing clinics in your local area, call 888-380-5571 (6 a.m.-10 p.m., seven days a week).
     • Other applicable services are available from local hospitals and clinics. Please refer to resources identified in Section I – Reporting above.
     • Refer to SUNY's list of off-campus resources at the Sexual Assault & Violence Response (SAVR) Resources (https://www.suny.edu/violence-response/) web page.
     • Within 96 hours of an assault, you can get a sexual assault forensic examination (commonly referred to as a rape kit) at a hospital. While there should be no charge for a rape kit, there may be a charge for medical or counseling services off campus and, in some cases, insurance may be billed for services. You are encouraged to let hospital personnel know if you do not want your insurance policyholder to be notified about your access to these services. The New York State Office of Victim Services may be able to assist in compensating victims/survivors for health care and counseling services, including emergency funds. More information is at the New York State Office of Victim Services (OVS) Forensic Rape Examination (FRE) Direct Reimbursement Program web page (https://ovs.ny.gov/forensic-rape-examination-fre-direct-reimbursement-program/), or 800-247-8035. Options are explained at New York State Office of Victim Services (OVS) Help for Crime Victims web page (https://ovs.ny.gov/help-crime-victims/).
     • To best preserve evidence, victims/survivors should avoid showering, washing, changing clothes, combing hair, drinking, eating or doing anything to alter physical appearance until after a physical exam has been completed.

3. **Protection and Accommodations**
   • When the accused is a student, they may request to have the university issue a "No Contact Order," consistent with university policy and procedure, meaning that continuing to contact the protected individual is a violation of university policy, and subject to additional conduct charges. If the accused and a protected person observe each other in a public place, it is the responsibility of the accused to leave the area immediately and without directly contacting the protected person. Both the accused/respondent and the reporting individual may request a prompt review of the need for and terms of a No Contact Order, consistent with university policy. Parties may submit evidence in support of their request.
   • To be informed that a victim of any criminal sexual offense has legal recourse outside the university and can commence civil or criminal proceedings against the offending person(s), including but not limited to obtaining an Order of Protection or, outside of New York state, an equivalent protective or restraining order. To initiate legal proceedings, please contact the local police department or District Attorney's office in the applicable jurisdiction. For more information from the Title IX coordinator, please contact: Title IX coordinator, 800-847-3000 ext. 1009 or TitleIX@sunyempire.edu or the Office of Campus Safety and Security 518-587-2100, ext. 2800

- To receive a copy of the Order of Protection or equivalent and have an opportunity to meet or speak with a college official who can explain the order and answer questions about it, including information from the order about the accused's responsibility to stay away from the protected person(s); that burden does not rest on the protected person(s).
- To an explanation of the consequences for violating these orders, including but not limited to arrest, additional conduct charges and interim suspension.
- To have assistance from the Office of Safety and Security when an individual violates an Order of Protection or to call on and assist local law enforcement in facilitating an arrest for violating such an order.
- When the accused is a student and presents a continuing threat to the health and safety of the community, to have the accused subjected to interim suspension, pending the outcome of a conduct process. Parties may request a prompt review of the need for and terms of an interim suspension and to submit evidence in support of such request.
- When the accused is not a student but is a member of the university community and presents a continuing threat to the health and safety of the community, to subject the accused to interim measures in accordance with applicable collective bargaining agreements, employee handbooks and SUNY Empire policies and rules.
- When the accused is not a member of the university community, to have assistance from the Office of Safety and Security or other university officials in obtaining a persona-non-grata letter, subject to legal requirements and university policy.
- To obtain reasonable and available interim measures and accommodations that effect a change in academic, employment or other applicable arrangements, in order to ensure safety, prevent retaliation and avoid an ongoing hostile environment. Parties may request a prompt review of the need for and terms of any interim measures and accommodations that directly affect them. While reporting individuals may request accommodations through any of the offices referenced in this policy, the following office can assist with these measures:
    - Title IX coordinator, 800-847-3000, ext. 1009; or email: TitleIX@sunyempire.edu

4. **Student Conduct Process**
    - Refer to the Student Conduct Policies and Procedures to request that student conduct charges be filed against the accused. Conduct proceedings are governed by the procedures set forth in the Empire State College undergraduate and graduate catalogs (http://www.sunyempire.edu/academic-affairs/catalogs-guides/), as well as federal and New York state law, including the due process provisions of the United States and New York state constitutions.
    - Throughout conduct proceedings, the respondent and the reporting individual will have:
        - The same opportunity to be accompanied by an advisor of their choice, who may assist and advise the parties throughout the conduct process and any related hearings or meetings. Participation of the advisor in any proceeding is governed by federal law and the Student Code of Conduct.
        - The right to a prompt response to any complaint and to have the complaint investigated and adjudicated in an impartial, timely and thorough manner by individuals who receive annual training in conducting investigations of sexual

violence, the effects of trauma, impartiality, the rights of the respondent, including the right to a presumption that the respondent is "not responsible" until a finding of responsibility is made, and other issues related to sexual assault, domestic violence, dating violence and stalking.
- The right to an investigation and process conducted in a manner that recognizes the legal and policy requirements of due process (including fairness, impartiality and a meaningful opportunity to be heard) and is not conducted by individuals with a conflict of interest.
- The right to receive advance written or electronic notice of the date, time and location of any meeting or hearing he or she is required or eligible to attend. Accused individuals will be told the date, time, location and the factual allegations concerning the violation, a reference to the specific code of conduct provisions alleged to have been violated and possible sanctions.
- The right to due process concurrent with a criminal justice investigation and proceeding, except for temporary delays, as requested by external municipal entities, while law enforcement gathers evidence. Temporary delays should not last more than 10 days, except when law enforcement specifically requests and justifies a longer delay.
- The right to offer evidence during an investigation and to review available relevant evidence in the case file, or otherwise held by the university.
- The right to present evidence and testimony at a hearing, where appropriate.
- The right to a range of options for providing testimony via alternative arrangements, including phone/video conferencing or testifying with a room partition.
- The right to exclude prior sexual history with persons other than the other party in the conduct process, or their own mental health diagnosis or treatment that may determine responsibility. Past findings of domestic violence, dating violence, stalking or sexual assault may be admissible in the disciplinary stage that determines sanction.
- The right to ask questions of the decision maker and, via the decision maker, indirectly request responses from other parties and any other witnesses present.
- The right to make an impact statement during the point of the proceeding, where the decision maker is deliberating on appropriate sanctions.
- The right to simultaneous (among the parties) written or electronic notification of the outcome of a conduct proceeding, including the decision, any sanctions and the rationale for the decision and sanctions.
- The right to written or electronic notice about the sanction(s) that may be imposed on the accused, based upon the outcome of the conduct proceeding. For students found responsible for sexual assault, the available sanctions are suspension with additional requirements and expulsion/dismissal.
- Access to at least one level of appeal of a determination before a panel, which may include one or more students, that is fair and impartial and does not include individuals with a conflict of interest.

- The right to access to a full and fair record of a student conduct hearing, which shall be preserved and maintained for at least five years.
  - Office of Student Services
    1 Union Ave.
    Saratoga Springs, NY 12866-4309
    CollegewideStudentServices@sunyempire.edu
    518-587-2100, ext. 2463
- The right to choose whether to disclose or discuss the outcome of a conduct hearing.
- The right to have all information obtained during the course of the conduct or judicial process be protected from public release, until the appeals panel makes a final determination, unless otherwise required by law.

Options for Confidentially Disclosing Sexual Violence

The State University of New York and SUNY Empire want students to get the information and support they need, regardless of whether they move forward with a report of sexual violence to university officials, or to police. Students are encouraged to talk with someone about something they have observed or experienced, even if they are unsure that the behavior constitutes sexual violence. A conversation where questions can be answered is far superior to keeping something to yourself. Confidentiality varies, and this document is aimed at helping you understand how confidentiality applies to different resources that may be available to you.

Privileged and Confidential Resources

Individuals who are confidential resources will not report crimes to law enforcement or university officials without the victim's permission, except for extreme circumstances, such as a health and/or safety emergency. At SUNY Empire, a confidential service includes an off-campus professional counseling service:

Off-campus options to disclose sexual violence confidentially include[1]:

- Off-campus counselors and advocates[2]
  Crisis services offices will generally maintain confidentiality unless you request disclosure and sign a consent or waiver form. More information on an agency's policies on confidentiality may be obtained directly from the agency.
  - New York State Coalition against Sexual Assault (https://www.nyscasa.org/).
  - Sexual Assault Nurse Examiner (SANE) at local hospitals and programs.
  - Refer to SUNY's list of off-campus resources (http://www.suny.edu/violence-response/).
  - Off-campus healthcare providers
    - Medical office and insurance billing practices may reveal information to the insurance policyholder, including medication and/or examinations paid for or administered. The New York State Office of Victim Services may be able to assist in compensating victims/survivors for health care and counseling services, including emergency compensation. More information may be found at http://www.ovs.ny.gov/files/ovs_rights_of_cv_booklet.pdf or 800-247-8035. Options are explained at http://www.ovs.ny.gov/helpforcrimevictims.html.

[1] Note: These outside options do not provide any information to the campus.

[2] Note that even individuals who can typically maintain confidentiality are subject to exceptions under the law, including when an individual is a threat to him or herself or others and the mandatory reporting of child abuse.

Privacy Versus Confidentiality

Even SUNY Empire offices and employees who cannot guarantee confidentiality will maintain your privacy to the greatest extent possible. The information you provide to a non-confidential resource will be relayed only as necessary for the Title IX coordinator to investigate and/or seek a resolution. SUNY Empire will limit the disclosure as much as possible, even if the Title IX coordinator determines that the request for confidentiality cannot be honored.

Requesting Confidentiality: How Empire State University Will Weigh the Request and Respond

If a complainant or reporting individual wants to maintain confidentiality or does not consent to the university's interest in initiating an investigation when consulting with an SUNY Empire employee who is responsible for responding to or reporting sexual violence or sexual harassment, then the Title IX coordinator must weigh any request for confidentiality or inaction against the obligation of SUNY Empire administrators to provide a safe, non-discriminatory environment for all members of the university community, including the complainant or reporting individual.

The university will assist in making academic, employment and other reasonable and available accommodations, regardless of the reporting individuals reporting choices. While reporting individuals may request accommodations through various college offices, the following office serves as a primary point of contact to assist with these measures:

Title IX coordinator: 800-847-3000, ext. 1009

Email: TitleIX@sunyempire.edu

The university may take proactive steps, such as training or awareness efforts, to combat sexual violence in a general way that does not identify the reporting individual or the situation they disclosed.

The university may seek consent from reporting individual prior to conducting an investigation. The reporting individual may decline to consent to an investigation, and that determination will be honored unless the university's failure to act does not adequately mitigate the risk of harm to you or other members of the university community. Honoring such request may limit the university's ability to meaningfully investigate and pursue action against an accused individual. If the university determines that an investigation is required, the reporting individual will be notified and immediate action will be taken, as necessary, to provide protection and assistance.

When the reporting individual discloses an incident to someone who is responsible for responding to or reporting sexual violence or sexual harassment, but wish to maintain confidentiality, SUNY Empire will consider many factors to determine whether to proceed despite that request. These factors include, but are not limited to:

- whether the accused has a history of violent behavior or is a repeat offender
- whether the incident represents escalation, such as a situation that previously involved sustained stalking
- the increased risk that the accused will commit additional acts of violence

- whether the accused used a weapon or force
- whether the reporting individual is a minor
- whether we possess other means to obtain evidence such as security footage, and whether the report reveals a pattern of perpetration at a given location, or by a particular group.

If the university determines that it must move forward with an investigation, the reporting individual will be notified and the university will take immediate action, as necessary, to protect and assist him, her or them.

Public Awareness/Advocacy Events
If an individual discloses a situation through a public awareness event, such as "Take Back the Night," candlelight vigils, protests through a student organization or other event or forum, or other public event, the university is not obligated to begin an investigation. SUNY Empire may use the information provided to inform the need for additional education and prevention efforts.

Anonymous Disclosure
- New York State Hotline for Sexual Assault and Domestic Violence: 800-942-6906

Institutional Crime Reporting
Reports of certain crimes occurring in certain geographic locations will be included anonymously in the university Clery Act Annual Security Report that neither identifies the specifics of the crime or the identity of the reporting individual. Contact information:

- Director of Campus Safety and Security, 518-587-2300
- Title IX coordinator, 800-847-3000, ext. 1009 or TitleIX@sunyempire.edu.

SUNY Empire is obligated to issue timely warnings of Clery Act crimes occurring within relevant geography that represent a serious or continuing threat to students and employees (subject to exceptions when potentially compromising law enforcement efforts and when the warning itself could potentially identify the reporting individual or victim/survivor). A reporting individual will never be identified in a timely warning.

The Family Educational Rights and Privacy Act allows institutions to share information with parents when (1) there is a health or safety emergency, or (2) when the student is a dependent on either parent's prior year federal income tax return. Generally, SUNY Empire will not share information about a report of sexual violence with parents without the permission of the reporting individual.

Definitions
- **Bystander**: a person who observes a crime, impending crime, conflict, potentially violent or violent behavior, or conduct that is in violation of rules or policies of the university.
- **Bystander Intervention**: involves developing the awareness, skills, and courage needed to intervene in a situation when another individual needs help. Bystander intervention allows individuals to send powerful messages about what is acceptable and expected behavior in our community.
- **Code of Conduct**: the written policies adopted by the college governing student behavior, rights and responsibilities while at the university.
- **Confidentiality**: may be offered by an individual who is not required by law to report known incidents of sexual assault or other crimes to university officials, in a manner consistent with state and federal law, including, but not limited to, 20 U.S.C. 1092(f) and 20 U.S.C. 1681(a).

Licensed mental health counselors, medical providers and pastoral counselors are examples of individuals who may offer confidentiality. University faculty and staff are mandated to report known incidences of sexual assault or other crimes to appropriate university officials, but are considered private sources. See definition of "Privacy" below.

- **Dating violence**: any act of violence committed by a person who is or has been in a social relationship of a romantic or intimate nature with the victim. The existence of the relationship shall be determined based on victim's statement with consideration of the type and length of the relationship and the frequency of interactions between the persons involved in the relationship. Such violent act may include, but are not limited to sexual or physical abuse or the threat of such abuse. Two people may be in a romantic or intimate relationship, regardless of whether the relationship is sexual in nature; however, neither a casual acquaintance nor ordinary fraternization between two individuals in a business or social context shall constitute a romantic or intimate relationship. This definition does not include acts covered under domestic violence.
- **Domestic violence**: any violent felony or misdemeanor crime committed by a current or former spouse or intimate partner of the victim, a person sharing a child with the victim, or a person cohabitating with the victim as a spouse or intimate partner.
- **Preponderance of the evidence**: the standard of proof in sexual harassment and sexual assault cases, which asks whether it is "more likely than not" that the sexual harassment or sexual violence occurred. If the evidence presented meets this standard, the accused should be found responsible.
- **Privacy**: may be offered by an individual when he or she is unable to offer confidentiality under the law, but shall not disclose information about a crime or incident learned from a reporting individual or bystander more than is necessary to comply with this and other applicable laws, including informing appropriate university officials.
- **Responsible employee**: an employee with the authority to redress sexual violence, who has been given the duty of reporting incidents of sexual violence or any other misconduct by students to the Title IX coordinator or other appropriate university official, or whom a student could reasonably believe has this authority or duty. If a responsible employee is aware of sexual violence, then the university is considered on notice of that sexual violence.
- **Reporting individual**: victim, survivor, complainant, claimant, witness with victim status and any other term used by the university to reference an individual who brings forth a report of a violation.
- **Retaliation**: adverse action against another person for reporting a violation or for participating in any way in the investigation or conduct process. Retaliation includes harassment and intimidation, including but not limited to violence, threats of violence, property destruction, adverse educational or employment consequences and bullying.
- **Sex discrimination**: includes all forms of sexual harassment, sexual assault, and other sexual violence by employees, students, or third parties against employees, students or third parties. Students, employees and third parties are prohibited from harassing others, whether or not the harassment occurs on a SUNY campus or during work hours. All acts of sex discrimination, including sexual harassment and sexual violence, are prohibited by Title IX.
- **Sexual activity**: shall have the same meaning as "sexual act" and/or "sexual contact", per 18 U.S.C. 2246(2) and 19 U.S.C. 2246(3).
- **Sexual assault**: physical sexual act(s) committed against another person without consent. Sexual assault is an extreme form of sexual harassment. Sexual assault includes what is commonly known as

"rape" (including "date rape" and "acquaintance rape"), fondling, statutory rape and incest. For statutory rape, the age of consent in New York State is 17 years old.

- **Sexual harassment**: unwelcome, gender-based verbal, non-verbal, or physical conduct that is sexual in nature and sufficiently severe, persistent, or pervasive that it unreasonably interferes with, denies or limits someone's ability to participate in or benefit from the university's educational program and/or activities, and based on power differentials, the creation of a hostile environment, or retaliation.

- **Sexual violence**: physical sexual acts perpetrated against a person's will or perpetrated where a person is incapable of giving consent. A number of different acts fall into the category of sexual violence, including, dating violence, domestic violence and sexual assault (including rape).

- **Stalking**: intentionally engaging in a course of conduct, directed at a specific person, which is likely to cause a reasonable person to fear for his or her safety, or the safety of others, or causes that person to suffer substantial emotional damage. Examples include: repeatedly following such person(s), repeatedly committing acts that alarm, cause fear, or seriously annoy such person(s), and that serve no legitimate purpose, and repeatedly communicating, by any means, including electronic means, with such person(s) in a manner likely to intimidate, annoy or alarm him or her.

- **Title IX coordinator**: Title IX of the Education Amendments of 1972 (Title IX), 20 U.S.C. Sec., 1681, et seq., states that all students have equal educational opportunity free from sex discrimination, including sexual harassment and sexual assault. The Title IX coordinator is responsible for the university's compliance with this regulation including, but not limited to systematically monitoring and evaluating policy and procedures that effectively and efficiently respond to complaints of sex discrimination. Individuals with questions or concerns related to Title IX may contact the Title IX coordinator at 800-847-3000 ext. 1009. The Title IX coordinator is either the official coordinator and/or his or her designee or designees.

Student Academic Appeals Policy and Procedures

Sponsor: Office of Academic Affairs
Contact: Executive Director of University Student Services
Category: Academic
Number: 100.020 (https://www.sunyempire.edu/policies/?search=cid%3D37972)
Effective Date: April 1, 2002

Purpose

The purpose of the Student Academic Appeals Policy and Procedure is to provide equitable and orderly processes by which to request reconsideration of an academic decision.

Definitions

Appeal – Petition to change a decision rendered about an academic matter. The basis for a student's appeal of an academic decision may be either that the academic judgment was unfair in the view of the student or that the university's academic policies were applied incorrectly in the view of the student.

Academic Appeals and Honesty Committee (AAHC) – A faculty committee convened to hear appeals. This committee shall consist of no fewer than three faculty members and no more than five. Each school establishes procedures for constituting an AAHC and for establishing a chair. If a member of the AAHC is a party to the appeal, a substitute is designated, if necessary, to bring the membership to a minimum.

Business Days – Monday through Friday excluding university holidays.

Dean – Refers to the dean of the student's school/program or an academic administrator designated by the provost for the School of Undergraduate Studies. Collectively referred to as dean in this document.

Faculty – Mentors, instructors, evaluators and others who make academic decisions. Collectively referred to as faculty in this document.

Unfairness – A decision or behavior that is arbitrary or capricious.

Statements

Students are responsible for reviewing and abiding by the university's academic policies and procedures. Students are responsible for their academic choices and for meeting the standards of academic performance established for each study or course in which they enroll.

Faculty are responsible for establishing methods and criteria for evaluation and evaluating a student's performance in learning contracts, courses, final projects, exams, prior learning assessments, etc. Evaluations of students, awards of academic credit and other academic judgments are based upon academic performance and the application of relevant academic policies.

Academic judgments made by faculty and other academic professionals are recorded in university documents, such as:

- Course outcomes, and grades;

- Evaluations of prior learning; and

- Written academic decisions made by assessment committees, Academic Review Committees, or other academic staff.

Students may appeal an academic decision if they believe that an academic judgement was unfair or that the university's academic policies were not followed or were applied incorrectly. Both student and instructor or decision-maker involved in the appeal have a right to a meaningful opportunity to be heard and to respond to information and documentation presented.

Grades on individual assignments may not be appealed.

Procedures for Appeals of Academic Decisions

The dean or designee for the program where an academic decision was made is responsible for administering the appeals process.

If the relevant administrator made the original academic decision while serving in the role of mentor, instructor, or evaluator, an appropriate administrator will be assigned to the administrative role in the appeals process.

The locus of appeal is with the program or academic unit where the original academic decision was made. For example, if a student enrolls in a Nursing course and appeals the course outcome, the appeal is reviewed by the School of Nursing and Allied Health. Questions about the appropriate locus of an appeal are resolved by the provost or designee.

The university appeals process includes an informal resolution procedure as well as a procedure for formal appeal of an academic decision. The university expects the student to attempt an informal resolution before making a formal appeal.

1. **Procedure for Informal Resolution**
   The informal resolution process includes two possible steps:
   a. The student should discuss the matter directly with the party who made or represented the academic decision (instructor, mentor, assessment committee representative, assessment professional, etc.) and make a reasonable effort to resolve the issue. The student must begin such an informal resolution process within 20 business days of receiving the academic decision.
   b. If no resolution is reached through the first step, or if the student is uncomfortable trying to resolve the issue directly with the appropriate party, the student should request informal resolution by the relevant dean or associate dean. This step must occur within 30 business days of the student's receipt of the original academic decision. The dean or associate dean does not play a decision-making role; rather, he or she facilitates a resolution when possible.

2. **Procedure for Formal Appeal**
   a. A student may initiate a formal appeal of an academic decision within 40 business days of receipt of the decision. The student submits a written appeal to the school's dean or designee or program administrator and includes in it:
      i. A full description of the academic decision and the basis for the student's appeal for reconsideration,
      ii. A statement of the remedy the student is seeking,
      iii. Any supporting documents, such as:
         • Learning contract/syllabus, and course outcomes and evaluations;
         • Evaluations of prior learning; and
         • Written academic decisions made by assessment committees, academic review committees, center or program administrators, or other academic staff.
      iv. Information on when and with whom the student may have attempted any informal resolution.
   b. Initial Review
      i. Based on its initial review, the school's dean or designee may return an appeal to the student for further information or clarification. If the appeal is returned for further information or clarification, the student must submit the requested information or revision within 10 business days for the appeal to be heard.
      ii. Upon review of the initial or resubmitted appeal, the dean or designee may determine that there is no claim of unfairness or incorrect application of college policies is made or information to support such a claim is not included and rejects the appeal and/or refers the student to more appropriate policies, copying the primary mentor/academic advisor.
      iii. The dean or designee should convey a decision not to hear an appeal within five business days of receiving the initial or resubmitted appeal.
      iv. If the appeal is accepted, the dean or designee transmits the appeal to the school's AAHC and provides a copy to any other relevant parties. The dean or designee should take these steps within five business days of receiving a complete appeal. He or she ensures that the AAHC review takes place in a timely manner.
   c. AAHC Hearing
      i. Each school will ensure a fair and timely hearing of the information and produce an accurate record of the hearing. AAHC consideration of the appeal focuses only on the student's claim of unfairness or incorrect application of university policies.
      ii. The AAHC may obtain additional relevant information before or after a hearing.
      iii. The AAHC should schedule a hearing within 20 business days of the acceptance of an appeal to consider information relevant to the appeal. A hearing may take the form of a meeting, conference call or videoconference, at the discretion of the AAHC.
      iv. The chair of the AAHC ensures a fair and timely consideration of the information and provides an accurate record of the hearing to the dean or designee.
      v. The student may participate in the hearing and present his or her case directly to the AAHC. Likewise, the faculty or staff member responsible for the original decision may also participate in the meeting and present relevant information. The student and the faculty/staff member meet separately with the committee.
      vi. A student may have an advisor at the meeting; however, the advisor may not participate in the hearing.
   d. Following a hearing, the AAHC deliberates in closed session. Decisions are made by majority vote unless otherwise noted. The AAHC may:
      i. Uphold the original decision,
      ii. Refer the decision back to the individual or committee making the original academic decision for reconsideration based upon AAHC findings regarding fairness and/or application of university policy, or
      iii. Revise or overturn the original decision, which requires a unanimous vote by the AAHC.
      iv. Refer to an appropriate content expert for evaluation, which require a unanimous vote by the AAHC.
         The AAHC should provide a written report to the dean within five business days of the hearing.
         The dean notifies the student of the decision, copying the primary mentor/academic advisor, and includes a brief explanation.

e. Reconsideration by original decision-maker. If this is the outcome of the hearing, the dean refers the decision back for reconsideration, the individual or committee making the original decision reviews the situation and may either affirm the original decision or issue a new decision. The individual or committee should convey the result in writing to the student and other relevant parties within 20 business days of the referral.

f. Appeal of an Academic Appeals and Honesty Committee decision. Decisions made by the AAHC may be appealed to the provost or designee.

   i. The student must submit any further appeal in writing to the provost within 20 business days of transmittal of an AAHC decision or a reconsideration decision, and must include an explanation or justification for the appeal.

   ii. The provost or designee should notify the other relevant parties within seven days of receiving an appeal. Those parties normally provide any written response within 10 business days.

   iii. The provost or designee should provide a written decision and rationale within seven days of receiving responses to the appeal. The written decision is conveyed to the student with copies to the other relevant parties.

   iv. The provost's decision is final.

g. A student's status does not change while an appeal is under consideration. If a student was dismissed, he or she remains dismissed. If he or she is in academic warning, the warning stands.

Category: Student Affairs
Number: 1300.039
Effective Date: 10/20/2022
Implementation History: Revised: September 29, 2022; July 1, 2016; 2006 Approved: May, 2002 Revision Approved by Senate: June 24, 2022; September, 2008 Approved by the College Council: September 29, 2022; December 2008 Revision Changes to this policy are subject to approval by the appropriate governance bodies, the SUNY Empire president and the College Council. The provost/vice president for academic affairs approves procedural changes.
Keywords: Student, conduct, policy, procedure, behavior, interim suspension, judicial, hearing, code

Background Information:

A. STUDENT CONDUCT REGULATION AUTHORITY

Section 356 of the Education Law empowers the College Council of each State-operated campus of State University of New York to make regulations governing the conduct of students, subject to the general management, supervision, control, and approval of the Board of Trustees of the State University of New York. All programs for student welfare and conduct are entrusted to, and administered by, the President of SUNY Empire State (or duly authorized designee), on behalf of the College Council. The President has delegated administration of programs for student welfare and conduct to the Vice Provost of Student Success (Vice Provost). Standards of conduct, recommendations for new policies, or modification of policies or regulations affecting student welfare and conduct are initiated through the Office of the Vice Provost for Student Success. The Vice Provost has jurisdiction over the Student Conduct System and designates the Student Conduct Director (SCD), who manages the SUNY Empire's Student Conduct System and ensures fair and impartial procedures for adjudicating alleged violations.

In addition to the Student Conduct Policy, the rules, regulations, and procedures for The Maintenance of Public Order on campuses of the State University of New York, adopted by the Board of Trustees, are in effect at SUNY Empire. (See Rules for the Maintenance of Public Order.). SUNY Empire has the authority to choose whether the Rules for the Maintenance of Public Order or this Student Conduct Policy will be applied.

B. SEXUAL VIOLENCE AND HARASSMENT
SUNY Empire is committed to maintaining a safe environment that is supportive of its primary educational mission and free from all exploitation and intimidation. SUNY Empire will not tolerate sexual harassment, sexual assault, or any other form of nonconsensual sexual activity to include dating violence, domestic violence, and/or stalking.

Purpose

SUNY Empire State strives to maintain a community that promotes and values the academic experience, institutional and personal integrity, and justice, equality, and diversity. Members of the SUNY Empire community should be able to work and learn in an environment that is orderly, peaceful, and free of disturbances that impede individuals' growth and development, or their ability to perform their responsibilities. Respect for the rights of others and SUNY Empire property are essential expectations for each SUNY Empire student.

To maintain a fair, just, and safe community environment, this Student Conduct Policy defines the minimum expectations for behavior at SUNY Empire. It also provides for the procedures for responding to allegations of student misconduct, and the actions the SUNY Empire may take in dealing with policy violations, which are outlined in the Student Conduct System.

Definitions

A. **"Affirmative Consent"** is a knowing, voluntary, and mutual decision among all participants to engage in sexual activity. Consent can be given by words or actions, as long as those words or actions create clear permission regarding willingness to engage in the sexual activity. Silence or lack of resistance, in and of itself, does not demonstrate consent. The definition of consent does not vary based upon a participant's sex, sexual orientation, gender identity, or gender expression.

B. **"Business Day"** means a weekday or non-holiday when the SUNY Empire is open for regular business.

C. **"Bystander"** shall mean a person who observes a crime, impending crime, conflict, potentially violent or violent behavior, or conduct that is in violation of rules or policies of the SUNY Empire.

D. **"Complainant"** means any person or persons who have made a disciplinary complaint against a student and may or may not be the victim.

E. **"Faculty"** or **"Faculty Member"** means any employee of SUNY Empire engaged in teaching, learning, advising, or evaluation of learning.

F. **"May"** is used in the permissive sense.

G. **"Personal Property"** means anything of value to which a person has legal possession or title.

H. **"Reporting individual"** is the victim/survivor related to cases of rape, sexual assault, domestic violence, dating violence, and stalking. "Reporting Individual" status will also apply to cases where the respondent has been charged with conduct which violates the health and safety of an individual.

I. **"Respondent"** is used to describe an accused student.

J. **"Sanctions"** are educational and/or punitive measures assigned to a student after they have been found responsible for violating SUNY Empire policy.

K. **"Shall"** is used in the imperative sense.

L. **"Staff"** or "Staff Member" means any person employed by SUNY Empire.

M. **"Student"** means all persons enrolled in a program or engaged in credit or noncredit learning and/or assessment activities at SUNY Empire, both full-time and part-time, or those individuals who were students at the time of an alleged violation of the Student Conduct Policy, whether on SUNY Empire premises or remotely. Persons who are not officially enrolled for a particular term but who have a continuing relationship as a student with the SUNY Empire are considered "students." A continuing relationship exists for a student who has begun a first term of enrollment, has not graduated, withdrawn or been expelled, and is within the 3-years of the end date of the last term of enrollment.

N. **"Student Conduct Body"** means any person or persons authorized by the Student Conduct Director to determine whether a student has violated the Student Conduct Policy and to recommend sanctions when necessary.

O. **"Student Conduct Director"** means the individual(s) designated to administer the SUNY Empire Student Conduct System.

P. **"Student Conduct Hearing Officer"** means any individual assigned to advise a Student Conduct Body.

Q. **"Student Conduct System"** means the procedures for responding to allegations of student misconduct and the delineation of actions SUNY Empire may take in dealing with policy violations.

R. **"Student Organization"** means any number of persons who have complied with the formal requirements for recognition by SUNY Empire and has official recognition.

S. **"Student Publication"** means written material including, but not limited to, brochures, newspapers, and special interest magazines published by students and distributed to the SUNY Empire community.

T. **"SUNY Empire"** means the Empire State University.

U. **"SUNY Empire Community Member "** means any person who is a student, faculty member, SUNY Empire official, or any other person employed by or affiliated with SUNY Empire. The Student Conduct Director shall determine a person's status in a situation.

V. **"SUNY Empire Official"** includes any person employed by the university.

W. **"SUNY Empire Premises"** or **"Campus"** includes all land, buildings, facilities, or other property in the possession of or owned, leased, used, or controlled by the university, including adjacent streets and sidewalks.

X. **"SUNY Empire Property"** means all items owned, leased, or on loan to the university.

Y. **"Title IX Coordinator"** shall mean the Title IX Coordinator or his or her designee

Z. **"Weapon"** any weapon or any device capable of use as a weapon by release of explosive material, noxious material, electric discharge, or projectile; any deadly weapon as defined in the NYS Penal Law Section 10.00(12); any weapon listed in NYS Penal Law Section 265; and as listed in the SUNY Board of Trustee Regulations 8 NYCRR Part 590 and SUNY Document #5403.

Statements

SUNY Empire strives to create an atmosphere of student success in direct support of its mission. Students, like all citizens, are afforded the right of free expression and advocacy and the SUNY Empire encourages and seeks to preserve freedom of expression and inquiry within the institution. Students are to conduct themselves civilly, lawfully, and responsibly. Students will not engage in disruptive, threatening, unethical, or abusive conduct toward other members of the SUNY Empire community, including other students, instructors, and staff.

SUNY Empire has a responsibility to maintain standards of student conduct essential to the orderly conduct of its function as an educational institution. Students are expected to be familiar with the Student Conduct Policy and the regulations included in the policy, and to abide by them.

Along with local, state, and federal laws and statutes, each student is accountable for his or her own behavior and for the behavior of their guests and/or those attempting to act on their behalf. Any violation of the Student Conduct Policy is strictly prohibited and may result in sanctions including, without limitation: disciplinary warning, disciplinary suspension, or disciplinary expulsion from SUNY Empire. The Student Conduct System is intended to be educational in nature and every effort is made to develop understanding and compliance with the SUNY Empire standards of conduct. However, occasions arise when disciplinary or punitive sanctions are necessary, and those actions are within the scope of the policy. Because disciplinary actions must be commensurate with the seriousness of the offense and the total conduct record of the student, each case is determined on its own merits.

A. JURISDICTION

SUNY Empire jurisdiction and discipline pertains to conduct which occurs on its premises, in/on properties or buildings it owns/leases/operates,

through online tools and learning management systems provided by SUNY Empire, or off campus and which adversely affects the SUNY Empire community, including any of its members, and/or the pursuit of its objectives and mission. In addition, illegal conduct off campus or on external online platforms may be adjudicated on campus as a violation of the Student Conduct Policy, and students outside of the United States may be held responsible on campus for violations of the laws of the country where they are visiting/residing.

B. DUE PROCESS

The Student Conduct System is designed to support the right to due process, which is a process that is fair, consistent, provides adequate notice, and a meaningful opportunity to be heard. The student conduct proceedings provide the Student Conduct Body or officer a full opportunity to hear both sides of the issue in considerable detail. Except as otherwise provided in Section D below, no student shall be disciplined for a violation of this policy without being first given appropriate advance notice of the charges against him or her and a hearing before an appropriate body or officer. The student may waive in writing the requirement of a hearing when allowed by law or related regulations.

C. VIOLATION OF LAW AND STUDENT CONDUCT POLICY

Students may be charged with violations of both the SUNY Empire's Student Conduct Policy and the laws of the broader society. Proceedings under this Student Conduct Policy may be carried out prior to, simultaneously with, or following external civil or criminal proceedings for the same factual situation without regard to the status of civil litigation in court or criminal arrest and prosecution. Exceptions may be approved by the Student Conduct Director for temporary delays as requested by external legal or law enforcement entities. Temporary delays should not last more than 10 business days except when law enforcement specifically requests and justifies a longer delay.

When a student is charged by federal, state, or local authorities with a violation of law, SUNY Empire will not request or agree to special consideration for that individual because of the individual's status as a student. The alleged offense may also the subject of a proceeding before a Student Conduct Body under the Student Conduct Policy and SUNY Empire may advise off-campus authorities of the existence of the Student Conduct Policy and of how such matters will be handled within SUNY Empire. SUNY Empire will cooperate fully with law enforcement and other agencies in the enforcement of criminal law on campus and in the conditions imposed by criminal courts for the rehabilitation of student violators. Individual students and faculty/staff members, acting in their personal capacities, remain free to interact with governmental representatives, as they deem appropriate.

D. INTERIM SUSPENSION AND DIRECTIVES

The Student Conduct Director, or designee, may impose interim measures prior to and pending a hearing, and determination of said hearing, including interim suspension and loss of privileges, which may include no contact orders, and other reasonable measures, upon learning of a possible Student Conduct Policy violation. Students have the right to challenge the terms of the interim measure(s) or request a modification. Interim suspensions may only be imposed when, in the judgement of the Student Conduct Director, the continued presence of such student would constitute a danger to themselves, to the safety of persons or property, and/or would pose an immediate threat of disruptive interference with the normal conduct of the SUNY Empire's activities and functions. Violation of any condition of the interim suspension shall be grounds for additional charges and sanctions up to and including expulsion from the SUNY Empire.

E. AMNESTY IN SEXUAL MISCONDUCT CASES FOR ALCOHOL AND/OR DRUG USE

The health and safety of every student at the State University of New York and its State-operated and community colleges is of utmost importance. SUNY Empire recognizes that students who have been drinking and/or using drugs (whether such use is voluntary or involuntary) at the time that sexual misconduct occurs may be hesitant to report such incidents due to fear of potential consequences for their own conduct. SUNY Empire strongly encourages students to report incidents of sexual misconduct to SUNY Empire officials. A bystander or Reporting Individual, acting in good faith, who discloses any incident of sexual misconduct to SUNY Empire officials or law enforcement, will not be subject to the Student Conduct Policy for violations of alcohol and/or drug use policies occurring at or near the time that the sexual misconduct occurred.

F. PROHIBITED CONDUCT

The following list of prohibited conduct is not exhaustive and is intended to describe minimum standards for specific and/or general types of behavior that may result in sanctions outlined in the procedures for this policy. These prohibitions apply both to student behavior which occurs on campus, at SUNY Empire-sponsored events off campus, in SUNY Empire-sponsored virtual and online activities, and may apply to off campus behaviors as noted in "Section A: Jurisdiction" of this policy. Prohibited behavior includes not only completed actions, but also attempted violations of the Student Conduct Policy.

1. FIRE SAFETY

   a. Causing or creating a fire, regardless of intent (except as authorized for use in class, in connection with SUNY Empire-sponsored research, or other approved activities).

   b. Tampering with safety measures or devices, including but not limited to, alarm systems, fire extinguishers, exit signs, emergency phone systems, smoke or heat detectors, fire hoses, security systems, locked exterior doors, etc.

   c. Failing to conform to safety regulations, including but not limited to, falsely reporting an incident, failure to evacuate facilities in a timely fashion in emergency situations or in response to fire alarms, inappropriate use of the fire alarm system, and inappropriate, negligent or reckless behavior which results in the activation of a fire alarm.

2. WEAPONS

   • The on-campus possession or use of any weapon or any device capable of use as a weapon whether it is through the release of explosive material, noxious material, electric discharge, or projectile; or cutting, thrusting, stabbing, striking.

   • The on-campus possession or use of a deadly weapon as defined in NYS Penal Law Section 10.00(12) or any weapon listed in NYS Penal Law Section 265.

Note: in addition to SUNY Empire policy restrictions, possession of a weapon on school grounds, including all SUNY Empire locations, is a felony under NYS Penal Law Section 265.01-a.

3. THREATENING OR ABUSIVE BEHAVIOR

Intentionally or recklessly causing physical harm to any person, or reasonable fear of such harm, verbally or in written form. Students cannot justify such behavior as defensive if:

- the behavior is a physical response to verbal provocation
- the student has the ability to leave the situation, but instead chooses to respond physically, and/or
- such actions are punitive or retaliatory.

Additionally, it is prohibited to use a self-defense spray in circumstances that do not justify the use of such device.

4. HARASSMENT

Engaging in behavior that is sufficiently severe, pervasive, and objectively offensive that it unreasonably interferes with, denies, or limits any SUNY Empire Community Member's ability to participate in or benefit from the SUNY Empire's education program and/or activities, threatens or violates the personal safety of any SUNY Empire Community Member, and/or creates an academic environment that a reasonable person would find intimidating or hostile.

Activity protected by the First Amendment will not constitute harassment.

Harassment may include:

- directing unwanted physical, verbal, or electronic conduct at an individual based on one or more of that person's protected characteristics or status, including age, color, race, disability, marital status, national/ethnic origin, religion, military/veteran's status, sex [including pregnancy], gender expression or gender identity, sexual orientation, domestic violence victim status, criminal or arrest record, political activities, or predisposing genetic characteristics; or
- subjecting a person or group of persons to unwanted physical contact or threat of such; or
- repeated contact with an individual or office after being instructed to cease.

5. INTIMATE PARTNER VIOLENCE

Intimate Partner Violence includes Dating Violence and Domestic Violence, both of which are further defined below. Intimate Partner Violence can occur in relationships of the same or different genders.

a. **Dating Violence** - Any act of violence, including physical, sexual, psychological, electronic, and verbal violence, committed by a person who is or has been in a social relationship of a romantic or intimate nature with the Reporting Individual. Dating Violence can occur as a single act, or it can consist of a pattern of violent, abusive, or coercive acts that serve to exercise power and control in the context of a romantic or intimate relationship. The existence of such a relationship shall be determined based on the victim's statement and with consideration of the type and length of the relationship and the frequency of the interaction between the persons involved in the relationship. Two people may be in a romantic or intimate relationship, regardless of whether the relationship is sexual in nature; however, neither a casual acquaintance nor ordinary fraternization between two individuals in a business or social context shall constitute a romantic or intimate relationship.

b. **Domestic Violence** - Any violent felony, non-violent felony, or misdemeanor crime, as those terms are defined by the laws of the State of New York and/or of the federal government, committed by a current or former spouse or intimate partner of the victim, a person sharing a child with the victim, or a person cohabitating with the victim as a spouse or intimate partner.

6. STALKING

Stalking is engaging in a course of conduct (including, but not limited to, acts in which the stalker directly, indirectly, or through third parties, by any action, method, device, online tools, or means, follows, monitors, observes, surveils, threatens, or communicates to or about a person, or interferes with a person's property) directed at a specific person(s) that would cause a reasonable person(s) to:

a. fear for their safety or the safety of others; or

b. suffer substantial emotional distress (defined as significant mental suffering or anguish that may, but does not necessarily, require medical or other professional treatment or counseling).

Stalking does not require direct contact between parties and can be accomplished in many ways, including through third parties or through the use of electronic devices and social media.

7. ENDANGERMENT

Acting to create or contribute to dangerous or unsafe environments anywhere on- or off-campus or electronically. Reckless or intentional acts which endanger, or put at risk, the welfare of oneself or others are prohibited.

8. SEXUAL HARASSMENT

Sexual Harassment is unwelcome sexual advances, requests for sexual favors, or other unwanted conduct of a sexual nature, whether verbal, nonverbal, graphic, physical, electronic, or otherwise, when the conditions outlined in subsections a. and/or b. below, are present:

a. Submission to, or rejection of, such conduct is made, either explicitly or implicitly, a term or condition of a person's employment, academic standing, or participation in any SUNY Empire programs or activities or is used as the basis for SUNY Empire decisions affecting the individual (often referred to as "quid pro quo" harassment); or

b. Such conduct creates a hostile environment. A hostile environment exists when the conduct is sufficiently severe, persistent, or pervasive that it unreasonably interferes with, limits, or deprives an individual's ability to participate in, or benefit from, SUNY Empire's education or employment programs or activities. Conduct must be deemed severe, persistent, or pervasive from both a subjective and an objective perspective.

9. SEXUAL ASSAULT AND SEXUAL EXPLOITATION

a. Sexual Assault I - Intentionally engaging in any form of vaginal, anal, or oral penetration, however slight, with any object (an object includes but is not limited to parts of a person's body) without the person's Affirmative Consent

b. Sexual Assault II - Intentionally engaging in touching a person's intimate parts (defined as mouth, genitals, groin, anus, inner thigh, breast, or buttocks) whether directly or through clothing, without the person's Affirmative Consent. Sexual Assault II also includes forcing an unwilling person to touch another's intimate parts.

c. Sexual Exploitation - Intentionally engaging in, or attempting to engage in, abusive sexual behavior without Affirmative Consent that does not otherwise constitute Sexual Assault I or Sexual Assault II. Examples include, but are not limited to: intentional, nonconsensual tampering with or removal of condoms or other methods of birth control and STI prevention prior to or during sexual contact in a manner that significantly increases the likelihood of STI contraction and/or pregnancy by the nonconsenting party; nonconsensual video or audio recording of sexual activity; sharing and/or allowing others to watch consensual or nonconsensual sexual activity without the consent of a sexual partner; observing others engaged in dressing/undressing or in sexual acts without their knowledge or consent; trafficking people to be sold for sex; inducing incapacitation with the intent to sexually assault another person; creating, possessing, or distributing the sexual performance of a child (as defined in NYS Penal Code 263.00) ; and aiding, abetting, or otherwise facilitating sexual activity between persons without the Affirmative Consent of one or more party.

The following principles outlined in NYS Education Law Article 129-B apply to the SUNY Empire's interpretation of Affirmative Consent

a. Consent to any sexual act or prior consensual sexual activity between or with any party does not necessarily constitute consent to any other sexual act.

b. Consent is required regardless of whether the person initiating the act is under the influence of drugs and/or alcohol.

c. Consent may be initially given but withdrawn at any time.

d. Consent cannot be given when a person is incapacitated, which occurs when an individual lacks the ability to knowingly choose to participate in sexual activity. Incapacitation may be caused by the lack of consciousness or being asleep, being involuntarily restrained, or if an individual otherwise cannot consent. Depending on the degree of intoxication, someone who is under the influence of alcohol, drugs, or other intoxicants may be incapacitated and therefore unable to consent.

e. Consent cannot be given when it is the result of any coercion, intimidation, force, or threat of harm.

f. When consent is withdrawn or can no longer be given, sexual activity must stop.

10. HAZING
Hazing is any reckless or intentional conduct in connection with the initiation into, or affiliation with, any organization or group which degrades, humiliates, or endangers the mental or physical health of any person, regardless of the person's willingness to participate.

11. FORGERY, FRAUD, DISHONESTY
Altering or misusing documents, records, stored data, or instruments of identification, or furnishing false information to any SUNY Empire, local, state or federal official. This includes possessing, creating, or using a fake or forged instrument of identification, or monetary notes, or knowingly making a false complaint to a SUNY Empire office. A good faith complaint which is later not substantiated is not considered to be a false complaint.

12. PROPERTY DAMAGE
a. Removing, destroying or damaging SUNY Empire property, or property under SUNY Empire administration or supervision.

b. Destroying or damaging the property of others, on- or off-campus.

13. THEFT
Stealing property and/or services; possessing stolen property. This includes identity theft (i.e., unauthorized possession or use of a financial instrument, SUNY Empire ID Card, etc.).

14. UNAUTHORIZED ENTRY, PRESENCE, OR USE
Entering, being present in/on, or using facilities or property on- or off-campus, belonging to individuals, SUNY Empire-recognized groups and/or corporate entities without proper authorization.

15. DRUGS
Consistent with the federal Drug-Free Schools and Communities Act Amendments of 1989 (Public Law 101- 226), possessing, using, distributing, or intent to distribute, a controlled substance or dangerous drug, or any drug unlawful to possess, (i.e., marijuana) except as expressly permitted by law. Drug paraphernalia including, but not limited to bongs, water pipes, or hypodermic needles that are not specifically required for the administration of prescribed medications are not allowed on campus. Use of legal medication outside the parameters of the medical authorization is prohibited and prescription drugs must have an authentic medical prescription. Driving under the influence of drugs is prohibited. This applies to both on- and off-campus behavior.

While possession of marijuana by adults (21+) in New York State has been legalized, it remains prohibited on all state campuses as required by federal law. Possession while at a SUNY Empire location or event will result in a Student Conduct Policy violation.

16. ALCOHOL
Consistent with New York State Law, individuals under the age of 21 years are prohibited from using, possessing, or distributing alcoholic beverages. Individuals over the age of 21 may use and possess alcohol as permitted by the law and SUNY Empire policies. Open containers and public intoxication are prohibited. Students who are irresponsible in their use of alcohol or who provide alcohol to minors will be subject to this policy regardless of the student's age. Driving under the influence of alcohol is prohibited. This applies to both on and off-campus behavior.

17. OBSTRUCTION OR DISRUPTION
Impairing, obstructing, or disrupting the orderly conduct, processes, activities, and functions of SUNY Empire, including teaching and learning, or the community where the conduct occurs including, without limitation, teaching, research, administration, disciplinary procedures, or other authorized activities, including public service functions. It can include participation in campus demonstrations which disrupt the normal operations of SUNY Empire and infringe on the rights of other SUNY Empire Community Members by leading or inciting others to disrupt scheduled and/or normal activities within any campus building or area; and intentional obstruction

which unreasonably interferes with freedom of movement, be it pedestrian, vehicular, or electronic on campus. It also includes, without limitation, excessive noise, abusive, or obscene language in a public place, littering, obstructing vehicular or pedestrian traffic, and boisterous, indecent, or threatening conduct that is unreasonable in the area, time, or manner in which it occurs. Behaviors, speech, or actions that interfere with the ability of the instructor(s) to teach or students to learn are considered disruptive.

Conduct protected by the First Amendment is excluded.

18. STUDENT GROUP VIOLATIONS

Students are expected to know and abide by the regulations governing their membership in a Student Organization. Prohibited conduct by officers/members of student groups and organizations may result in a referral to the Student Conduct System for individual students.

It is a violation of SUNY Empire policy for students to affiliate with organizations that have had recognition suspended or permanently revoked by SUNY Empire. The definition of affiliation includes joining or being involved in any activity that would normally be associated with being a member of such organization.

19. MISUSE OF SUNY EMPIRE NAME AND MARK

Use of the SUNY Empire name, symbols, logo, and wordmark inconsistent with the university's Use of University Name and Wordmark Policy, available here: https://www.sunyempire.edu/policies/?search=cid%3D37966

20. AIDING AND ABETTING

Aiding, abetting, or otherwise facilitating an individual to commit or attempt to commit a violation of the Student Conduct Policy.

21. NON-COMPLIANCE

   a. Failure to comply with SUNY Empire policy and/or any local, state, public health directive, federal law, rule, or regulation.
   b. Failure to comply with the directions of an authorized local, state, federal, or SUNY Empire Official acting in the performance of their duties, or any other person responsible for a facility or registered function acting in accordance with those responsibilities. This includes, without limitation: not appearing at meetings when directed to do so; not providing identification; not abiding by any temporary and/or administrative directive; and not leaving areas/events/offices when directed to do so.
   c. Failure to notify SUNY Empire of a felony or misdemeanor crime. It is the obligation of every student to notify the SUNY Empire (via e-mail – Collegewidestudentservices@sunyempire.edu) five (5) calendar days from the date of arrest of any felony or misdemeanor arrests at any time after a student pays their orientation fee through graduation or separation from SUNY Empire, regardless of geographic location of the arrest or specific crime alleged. Failure to do so may result in conduct charges by the SUNY Empire or administrative/registration holds placed on the student's account. SUNY Empire may review the facts underlying the arrest to determine if there is an associated SUNY Empire policy violation.

22. ELECTRONIC USE

Misuse or abuse of the SUNY Empire computer systems, voice mail, or telephone services. This includes, without limitation:

   a. Unauthorized use or abuse of your SUNY Empire computer account, including failure to safeguard or sharing of user IDs and passwords
   b. Sending abusive or threatening messages to students, faculty, or staff.
   c. Accessing a student or staff account without authorization.
   d. Using a SUNY Empire office email account to send messages without authorization.
   e. Failure to comply with any SUNY Empire technology policies.
   f. Illegal use including, but not limited to illegal downloading, uploading, or use of file sharing programs with regard to copyrighted materials.

23. HATE OR BIAS-RELATED CRIME

Intentionally selecting a person against whom a criminal offense is committed or intended to be committed because of a belief or perception regarding the race, color, national origin, ancestry, gender, religion, religious practice, age, disability, or sexual orientation, or other classes protected by state or federal law regardless of whether the belief or perception is correct.

24. ABUSE OF THE STUDENT CONDUCTION SYSTEM

Abusing the Student Conduct System, including but not limited to:

   a. Failure to obey the notice of a Student Conduct Body, Student Conduct Director, or SUNY Empire Official.
   b. Falsification, distortion, or misrepresentation of information before a Student Conduct Body, Student Conduct Director, or SUNY Empire Official.
   c. Disruption or interference with the orderly conduct of a student conduct proceeding.
   d. Knowingly instituting a student conduct complaint without cause.
   e. Attempting to discourage an individual's proper participation in, or use of, the Student Conduct System.
   f. Attempting to influence the impartiality of a member of a Student Conduct Body or any other party/individual that may choose to participate in a student conduct proceeding.
   g. Harassment (verbal or physical) and/or intimidation of a member of a Student Conduct Body or any other party/individual that may choose to participate in a student conduct proceeding.
   h. Failure to comply with the sanction(s) or directives imposed under the Student Conduct Policy.
   i. Influencing or attempting to influence another person to commit an abuse of the Student Conduct System.

25. RETALIATION

Retaliation is adverse action taken against an individual or groups for making a good faith report of prohibited conduct or for participating in any investigation or proceeding regarding prohibited conduct. Retaliation may include intimidation, threats, coercion, or adverse employment or educational actions. Retaliation may be found even when an underlying report, made in good faith, was not

substantiated. Retaliation may be committed by the Respondent, the Reporting Individual, or any other students.

Student Conduct System (Procedure)

Sponsor: Student Success
Contact: Associate Provost for Student Success
Category: Student Affairs
Effective Date: 2022/12/15
Keywords: Student, conduct, policy, procedure, behavior, interim suspension, judicial, hearing, code

Purpose

The Student Conduct System (Procedure) ensures fair and consistent processes and provides procedures for addressing Complaints that allege violation(s) of the Student Conduct Policy (https://www.sunyempire.edu/policies/reg-docs/reg-docs-html/student-conduct-policy.php). It serves to protect the legal rights of Students and applies to all Students of SUNY Empire.

Complaints of Sexual Misconduct will be reported to SUNY Empire's Title IX Coordinator, who shall determine if the Title IX Grievance Procedures apply. For sexual misconduct complaints that do not fall under the Title IX Grievance Procedures, this document provides separate procedures. Section II: Student Conduct Procedures of this document apply to alleged violations of the Student Conduct Policy. In addition to Section II, Section III of this document applies for cases of sexual misconduct including domestic violence, dating violence, stalking, sexual exploitation, and sexual assault, adjudicated through the Student Conduct System.

The SUNY Empire Student Conduct System is completely independent of either civil or criminal proceedings but may act simultaneously with civil and/or criminal proceedings.

Definitions

In addition to the definitions outlined in the Student Conduct Policy, the following Definitions apply to the Student Conduct system:

Appeal Review Panel. A panel of at least two members, one of whom may be a student, that is fair and impartial and does not include individuals with a conflict of interest and bias, and will not serve as investigator, Title IX Coordinator, or hearing decision maker in the same matter.

Confidential/Confidentiality. References made to confidential, or confidentiality mean that the identified confidential resource is not required to report crimes and violations to law enforcement or university officials without permission, except for extreme circumstances, such as a health and/or safety emergency or child abuse. Most employees are required to report sexual misconduct or harassment and will provide privacy but not confidentiality.

Finding. The determination made through the conduct process: There are only findings of 'responsible' and 'not responsible'.

Graduate/Graduation. Refers to the fulfillment of all academic requirements for the program in which a student is enrolled. The official graduation date is based upon the date that all requirements are fulfilled. Participation in a Commencement Ceremony does not necessarily mean a student has graduated.

Referring Party. Any faculty member, staff member, or student who files a Complaint or Student Conduct Referral for an alleged violation of the code of conduct. If a complaint is submitted by a person who is not a faculty member, staff member, or student, then a University Official will serve as the Referring Party.

Sexual Misconduct. Refers to cases that fall into Items 5. Intimate Partner Violence; 6. Stalking; 8. Sexual Harassment; and/or 9. Sexual Assault and Sexual Exploitation listed in Section F. Prohibited Conduct under Policy Statement in the Student Conduct Policy

Title IX Coordinator. Title IX of the Education Amendments of 1972 (Title IX), 20 U.S.C. Sec., 1681, et seq., states that all students have equal educational opportunity free from sex discrimination, including sexual harassment and sexual assault. The Title IX coordinator is responsible for the university's compliance with this regulation including, but not limited to, systematically monitoring and evaluating policy and procedures that effectively and efficiently respond to complaints of sex discrimination.

Title IX Grievance Policy. Defines the way SUNY Empire handles complaints that fall under the federal definition of Title IX. If an alleged act of sexual misconduct occurs, the Title IX Grievance Policy takes precedence in addressing the complaint. If a complaint about a student does not fall in the scope of the Title IX Grievance policy, the Title IX Coordinator will refer it to the Student Conduct Director.

Private/Privacy. References made to privacy mean SUNY Empire offices and employees cannot guarantee confidentiality but will maintain privacy to the greatest extent possible, and information disclosed will be relayed only as necessary to investigate and/or seek a resolution and to notify the Title IX Coordinator or designee.

Prohibited Behavior/Conduct. Any of the actions or behaviors listed in Part F: Prohibited Conduct, under the Policy Statements heading in the Student Conduct Policy.

Student Conduct Referral/Referral. – The SUNY Empire Student Conduct System Standard Case Form that includes a description of alleged misconduct and specific Student Conduct Policy items alleged to be violated

Student Conduct Agreement. A document that records the respondent's acceptance of the findings and sanctions, as well as a waiver of the right to a hearing and any appeal.

Statements

Student Conduct Procedures
A. Introduction
The Student Conduct System provides procedures for the resolution of student conduct matters, attends to due process rights, provides orderly review and consideration of the facts, and considers the impact of any violations on SUNY Empire and the victim(s). The following apply to the resolution of student conduct matters:

1. The Student Conduct Director develops procedures for the administration of the Student Conduct System and procedural rules for the conduct of hearings, consistent with the provisions of the Student Conduct Policy and the procedures herein.
2. SUNY Empire will communicate via mail to the respondent and complainant/reporting individual's mailing addresses along with proof of delivery on all matters pertaining to the Student Conduct System. Students are responsible for the mail sent to their mailing address.
3. The Student Conduct System utilizes a "preponderance of evidence" standard of proof. A preponderance of evidence standard evaluates whether it is more likely than not that a violation occurred (greater than 50% likelihood).
4. All deadlines and time requirements in the Student Conduct System may be extended for good cause, as determined at the sole discretion of the Student Conduct Director or designee(s). Both the Respondent and the Complainant/Reporting Individual will be notified in writing of the extension, and the reason for extension, and will be provided the date of the new deadline or event. Extensions requested by one party will generally not exceed five (5) business days.
5. Multiple incidents may be resolved with one referral at the discretion of the Student Conduct Director or designee(s).
6. The student conduct process may be initiated regardless of a student's current enrollment status so long as the proposed violation occurred while the individual was a student. This includes conduct that occurs before classes begin, after classes end, during the academic year, and/or during periods between terms of actual enrollment. If a student withdraws from SUNY Empire. SUNY Empire can pursue the student conduct process following the withdrawal. Should suspension or dismissal take place as a result of the disciplinary process, these sanctions supersede a withdrawal from SUNY Empire.
7. Instructions on eligibility for an appeal and how to file an appeal are provided in the decision letter.
8. Pursuant to SUNY Policy, a Student who is suspended or expelled for disciplinary reasons prior to the end of an academic term shall be liable for all tuition and fees due for that term. Registration, tuition, and fees for any forthcoming term affected by the suspension or expulsion that has not yet started will be removed.
9. If a student who has completed degree requirements is charged with a violation prior to Graduation, the student will be ineligible to Graduate until student conduct action on the case is completed and eligibility to Graduate is confirmed. If the student conduct action

results in suspension, the student will be ineligible to Graduate until the term of the suspension has been served. If the student is expelled, it means the student will not be admitted to another program at the university and may be ineligible for Graduation at the discretion of the Student Conduct Body.

B. Complaints

1. Any member of the SUNY Empire Community may file a complaint when there are allegations that a student has violated the Student Conduct Policy.

2. A complaint shall be prepared in writing and directed to the Student Conduct Director or designee(s). While there is no limit to the time within which to submit a complaint, any complaint should be submitted as soon as possible after the incident takes place, bearing in mind charges cannot be brought against an individual who is no longer a student, and that evidence may be difficult to gather as time moves forward.

3. The complaint must set forth allegations of misconduct in writing with sufficient detail to support a referral which includes, without limitation, a description of the incident, any relevant evidence, witnesses, and the alleged Student Conduct Policy violation(s). The individual filing the complaint may elect to meet with the Student Conduct Director or designee(s) for a consultation prior to submitting a complaint.

4. Once the complaint is received, the Student Conduct Director or designee(s), will review the complaint, may meet with other individuals involved, and will then make a determination regarding whether or not the complaint is within the scope of the Student Conduct Policy and has grounds and to move forward with a Student Conduct Referral.

C. Initial Review and Referral

1. A Referral to the Student Conduct System is made by the Student Conduct Director based upon the information in the complaint and a subsequent review, which may include gathering additional information.

The Student Conduct Director or designee(s) determines if there are grounds for the allegation and whether the allegation falls within the scope of the Student Conduct Policy or if it should follow other procedures. Grounds for a complaint exist if the complaint and other information generally describe the behaviors of the Respondent that appear to violate the Student Conduct Policy, regardless of whether complaint has been, or can be, proven. The following options are available:

a. If there are grounds for the complaint and the alleged violations are within the scope of the Student Conduct Policy, the Student Conduct Director makes a Student Conduct Referral and provides the course of action.

b. If the Student Conduct Director or designee(s) determines that the allegation is groundless, the Student Conduct Director so notifies the complainant in writing.

c. If the alleged violation does not fall within the scope of this policy, the Student Conduct Director makes the appropriate referral and so notifies the complainant in writing.

D. Referrals

1. All Referrals to the Student Conduct System shall be presented to the Respondent in writing via mail to the mailing address with proof of delivery along with a copy of the Student Conduct Policy and the procedures. Additionally, the Respondent will have the opportunity to meet with a Student Conduct Administrator to:

- Review the Student Conduct Referral which includes the alleged Student Conduct Policy violation(s) (charges);
- Learn about the student conduct process and have questions answered;
- Give their perspective about the incident and provide relevant evidence;
- Provide witness information, if applicable;
- Sign the Student Conduct Referral indicating the referral and possible sanction outcomes have been reviewed; and
- Receive a copy of the Student Conduct Referral.

2. During this meeting, and throughout the student conduct process, the Respondent may have one advisor of their choice. The advisor shall not represent or speak for the Respondent and shall not participate directly in the student conduct process. The advisor may be present and speak privately with the Respondent during any meeting.

3. After the Respondent has received a copy of the Student Conduct Referral and has had the opportunity to meet with the Student Conduct Director, the Respondent may have 3 business days to review the Student Conduct Referral and decide whether to accept responsibility for the charges or not. The Respondent must communicate their decision to the Student Conduct Director in writing.

4. The Student Conduct Director determines whether the incident can be resolved a) with an administrative agreement b) by administrative determination, or c) with a hearing.

E. Administrative Resolutions

1. Administrative Agreement

a. If the substantive facts, finding of responsibility and sanctions can be agreed upon by the Student Conduct Director or designee(s), and the Respondent(s), a Student Conduct Agreement may be prepared and signed by the parties. A signed Student Conduct Agreement shall constitute an acceptance of the finding and sanctions, as well as a waiver of the right to a hearing and any appeal.

b. If the substantive facts and outcomes and redress cannot be agreed upon, the matter shall be referred to a hearing.

c. Sexual Misconduct Referrals will not be resolved by Administrative Agreement.

2. Administrative Determination

a. If the Respondent does not wish to accept responsibility for violation(s) and/or an appropriate sanction from the Student Conduct Director, but the preponderance of evidence standard has been met, a finding of responsibility and sanctions will be imposed.

b. Administrative Determinations may also be imposed if the Respondent fails to meet or communicate with the Student Conduct Administrator, provided that there is a preponderance of evidence to make such a determination. If the Student Conduct Director or designee(s) learns that the Respondent's failure to participate is for good cause, the Student Conduct Director or designee(s) may, in their sole discretion, rescind the decision and review the Respondent's presentation.

c. The Respondent maintains the right to file one appeal of the original decision as outlined in Section VI.A.

d. Administrative Determinations may only be applied in referrals where sanctions will not result in Suspension or Expulsion; in cases where Suspension or Expulsion is a possible Sanction, a hearing before a Student Conduct Body will be scheduled. Sexual Misconduct referrals will not be resolved by Administrative Determination.

F. Hearing
1. Student Conduct Hearing Before a Student Conduct Body
When a referral cannot be resolved by and Administrative Agreement or Determination, a Student Conduct Hearing will be scheduled. A Student Conduct Hearing provides the Student Conduct Body the opportunity to hear both sides of the issue in considerable detail. When a sanction of suspension or expulsion is possible, the Student Conduct Referral must be adjudicated in a hearing unless the Respondent waives a hearing in writing.

For cases of alleged Sexual Misconduct, Section III: Procedures for Sexual Misconduct Cases also applies and supersedes any contradictory information in this section. In cases of Sexual Misconduct adjudicated through the Student Conduct System a hearing cannot be waived.

Hearings are conducted by a Student Conduct Body according to the following guidelines:

a. Hearings are scheduled as soon as practicable, generally within twenty (20) business days from receipt of complaint, to give students as well as SUNY Empire time to prepare.

b. The Student Conduct Body will provide formal written notice of the time, date, place of the hearing no less than four (4) business days in advance of the hearing, which will include a list of the specific Prohibited Conduct outlined in the Student Conduct Policy that the Respondent has allegedly violated. A copy of any written report(s) that will be used at the hearing will be made available to the Respondent, upon request, by contacting the Student Conduct Director.

c. In hearings involving more than one Respondent, at the sole discretion of the Student Conduct Director or designee(s), SUNY Empire may permit the hearings concerning each student to be conducted together or separately.

d. The Complainant(s) and the Respondent(s) must represent themselves.

e. Hearings are confidential and closed to all except the participants in the hearing. Admission of any other person to the hearing shall be at the discretion of the Student Conduct Body and the Student Conduct Hearing Officer.

f. The Complainant(s) and the Respondent(s) each may have one advisor present, at their own expense. The advisor may be an attorney. The Complainant(s) and/or the Respondent(s) are responsible for presenting their own evidence, and, therefore, advisors are not permitted to speak or to participate directly in any hearing before a student conduct body. Students may request a break to consult with their advisor of choice privately.

g. The Student Conduct Director and/or designee(s) appoint the Student Conduct Body for each hearing. A Student Conduct Body for each hearing is composed of one student and two faculty and/or staff, drawn from a pool of trained faculty, staff, and students. The Student Conduct Body is assisted by a Student Conduct Hearing Officer appointed by the Student Conduct Director or designee(s).

h. The Student Conduct Body, with the advice of the Student Conduct Hearing Officer, organizes the hearing, hears both sides of the issue in considerable detail to determine responsibility, and assigns appropriate sanctions.

i. The Student Conduct System relies on full and open discussion of referrals with all parties concerned in order to render a fair judgement. The Student Conduct System is administrative in nature and, as such, is not considered a court of law.

j. The Complainant and the Respondent may: provide opening statements; present witnesses who have direct knowledge of the incident; question witnesses and each other; and make a closing statement.

k. The Student Conduct Body may ask questions of the Complainant, Respondent and Witnesses.

l. If any party repeatedly disrupts a hearing (e.g., by shouting, repeatedly interrupting others, verbally or physically threatening individuals involved in the hearing, or other behavior deemed disruptive by the Student Conduct Hearing Officer), and fails to heed a warning, the Student Conduct Hearing Officer has the right to remove the disruptive individual from the hearing. The hearing shall continue in the absence of any removed, disruptive party.

m. Pertinent records, exhibits, and/or written statements may be accepted as evidence for consideration by a Student Conduct Body. All evidence and witness lists from either party must be submitted to the Student Conduct Director or designee(s) by 9 am two (2) business days before the scheduled hearing. The Student Conduct Hearing Officer, in consultation with the Student Conduct Director and Title IX Officer, as needed, will make the final decision as to the relevancy and admissibility of all evidence. The evidence and witness lists will be shared with the opposing party.

n. In extraordinary circumstances, witness lists and/or evidence not submitted within this timeline may be considered, subject to final approval of the Student Conduct Hearing Officer. Production of substantive evidence submitted after the deadline may lead to a delay of the remainder of the hearing.

o. All procedural questions are subject to the final decision of the Student Conduct Hearing Officer of the Student Conduct Body, in consultation with the Student Conduct Director or designee(s).

2. Deliberation and Determination of Findings
a. After the hearing, the Student Conduct Body shall meet in private to determine, item-by-item (by majority vote), whether the Respondent(s) has violated the Student Conduct Policy as charged.

b. The Student Conduct Body's determination shall be made based on whether there is a preponderance of evidence that supports the finding of a violation.

c. The respondent will be notified in writing via mail to the mailing address, with proof of delivery, of the final decision of the Student Conduct Body within ten (10) business days of the hearing, barring extenuating circumstances.

3. Hearing Record
a. SUNY Empire will create a single, verbatim record, such as a tape recording, of all hearings. The record shall be the exclusive property of SUNY Empire State and will not be duplicated or released. Participants are prohibited from making any recording or images of the hearing. The Student Conduct Director, or designee(s), must establish a procedure for a Respondent (where applicable) and Complainant/Reporting Individual to

have supervised access to this record for the purpose of filing an appeal. Copying, photographing, or transcribing the recording is not permissible.

G. Sanctions

1. Sanctions will be assigned if a Respondent is found to have violated the Student Conduct Policy. Sanctions are intended to have developmental as well as punitive impact on those who engage in Prohibited Conduct. Sanctions are based on the severity of the incident in question and are not necessarily progressive. Any previous interactions a student may have had with the SUNY Empire's Student Conduct System, may be considered in determining any sanction.

Additionally, if during the conduct process, the Student Conduct Body determines that conduct violation or behavior was motivated by bias, they may consider it as an aggravating factor when recommending sanctions.

2. One of the following sanctions shall be imposed on a student found responsible for violating the Student Conduct Policy as outlined under Prohibited Conduct:

- Disciplinary Warning. A notice to the student that their actions are inappropriate, and that the individual must act more responsibly in the future. This does not carry a loss of good standing, but indicates that a student has damaged their relationship with SUNY Empire.
- Disciplinary Suspension. The separation of the student from SUNY Empire State for a definite period of time, after which the student is eligible to return. The Student will be barred from all campus locations and activities, including courses, study groups, residencies, and meetings, for the duration of the Disciplinary Suspension. The Office of Safety and Security may also file a Person Non Grata based upon a Disciplinary Suspension. Conditions for the lifting of disciplinary suspension may be specified, pending appeal.
- Disciplinary Expulsion. The permanent separation of the student from SUNY Empire, pending appeal. The Office of Safety and Security may also file a Person Non Grata based upon a Disciplinary Expulsion.

3. Suspensions and Expulsions take place immediately, pending the determination of any appeal. The student will be withdrawn from all courses and forfeits all tuition and fees. The individual is restricted from all SUNY Empire grounds, facilities, classes, activities, or related functions for the duration of the separation. The student is considered to have lost good standing with SUNY Empire. In cases where transcript annotation is required (see Section VI. Required Transcript Annotation), 'Disciplinary Suspension' or 'Disciplinary Expulsion' shall be noted on the student transcript.

4. In addition to one of the above sanctions, any of the following, singularly or in combination, may be imposed with the approval of the Student conduct Director:

a. Loss of Privileges. Denial of specified privileges for a designated period of time. These include, but are not limited to:

- A restriction from possessing items at SUNY Empire locations and/or events (e.g., radios, bicycles, automobiles, etc.).
- A restriction from being in or entering one or more specified SUNY Empire locations.
- A restriction from utilization of SUNY Empire services and resources (e.g., reserving rooms for student club functions; interacting with certain staff members, use of technology resources, etc.)
- Other restrictions, as approved by the Student Conduct Director or designee(s).

b. Restitution. Monetary or material compensation for loss, damage, and/or injury.

c. Mandated Counseling Assessment. The Student must complete a release, attend an assessment and/or session with a licensed counselor and provide record thereof by a specific date. Unless otherwise stated by the Student Conduct Director or designee(s), the student is required to follow all recommendations made by the counselor as a result of the assessment.

5. Failure to complete sanctions by the assigned deadline will result in a "Hold" on a student's SUNY Empire records prohibiting further course enrollment, Graduation, diploma, and/or transcripts. The "Hold" will remain in effect until all assigned Sanctions are completed.

6. Sanctions will not be imposed that infringe upon the rights of Students in the Student Conduct Policy and Related Policies.

7. Other than required Disciplinary Suspension and Disciplinary Expulsion notations, disciplinary sanctions shall not be made part of the student's permanent academic record but shall become part of the student's confidential disciplinary record maintained by the Student Conduct Director as per SUNY record retention policies.

Procedures for Sexual Misconduct Cases

A. Introduction

In addition to procedures described in other sections of the Student Conduct System, this section outlines the procedures that will be followed for all cases of sexual misconduct involving a student respondent that are not under the jurisdiction of the Title IX Grievance Procedure, including domestic violence, dating violence, stalking, sexual exploitation, sexual assault, or sexual harassment. If there is a conflict between other procedures outlined in this document, the procedures and stipulations in this section will control for cases of sexual misconduct. In this section, and elsewhere in the document, Reporting Individual refers to the victim/survivor related to cases of rape, sexual assault, domestic violence, dating violence, and stalking. The Title IX Coordinator or their designee may be the Referring Party for Referrals of Sexual Misconduct to the Student Conduct System.

Compliance with any of the below listed provisions does not constitute a violation of the Family Educational Rights and Privacy Act (FERPA) (20 U.S.C. § 1232g; 34 CFR Part 99).
The burden of proof in all sexual misconduct cases is a "preponderance of the evidence", meaning that the determination is whether it is more likely than not that the Sexual Misconduct occurred. If the evidence meets this standard, then the Respondent shall be found responsible of a violation of the Student Conduct Policy.

B. Students' Bill of Rights

SUNY Empire is committed to providing options, support, and assistance to members of our community affected by sexual assault, sexual exploitation, sexual harassment, intimate partner violence, and/or stalking, regardless of whether the crime occurred on campus, off campus, or while studying abroad. The rights enumerated in the Student

Bill of Rights (available here: https://www.sunyempire.edu/policies/?search=cid%3D142018) are afforded to all students reporting sexual violence, as well as all student respondents of sexual violence, regardless of race, color, national origin, religion, creed, age, disability, sex, gender identity or expression, sexual orientation, familial status, pregnancy, predisposing genetic characteristics, military status, domestic violence victim status, or criminal conviction.

C. Reporting and Review

1. When a complaint of sexual misconduct is brought to a SUNY Empire State official, that individual will provide the information contained in the Students' Bill of Rights, including the right to choose when and where to report, to be protected by the SUNY Empire from retaliation, and to receive assistance and resources from SUNY Empire. The official will clearly disclose that they are private, and not confidential, resources and may still be required by law and SUNY Empire policy to inform one or more SUNY Empire officials about the incident, including but not limited to the Title IX coordinator.

2. Complaints of Sexual Misconduct brought to the Student Conduct Director or designee(s) will be referred to the SUNY Empire Title IX Coordinator, who conducts intake, may investigate, and determines jurisdiction.

3. The Reporting Individual has the right to a prompt response and timely review for all complaints of Sexual Misconduct. Promptness is determined by SUNY Empire's Title IX Coordinator in view of the circumstances of the case, personnel availability, complexity of the Complaint, and evidence/information submitted.

    a. The preliminary review of all complaints, including any necessary interviews to be conducted and any necessary interim measures to be put in place, will usually be completed within seven (7) business days of receipt of the complaint.

    b. Absent extenuating circumstances, the complete review, investigation, and resolution via a hearing or administrative determination, and appeal determination is expected to take place within 180 calendar days from receipt of the complaint. This provides time for the Title IX investigation and referral back to the Student Conduct System if necessary (see the next section).

    c. The above timeframes may be extended for good cause as determined by the Title IX Coordinator or the Student Conduct Director, or their designee(s).

D. Title IX Referral to the Student Conduct System

1. The Title IX Coordinator must refer any complaint that was investigated but found not to be in the scope of the Title IX Grievance Procedures to the Student Conduct Director or designee(s) to determine if a violation of the Student Conduct Policy has occurred.

2. Reporting Individuals have the right to request that student conduct charges be filed against the accused. Conduct proceedings are governed by the procedures set forth in this document as well as federal and New York State law, including the due process provisions of the United States and New York State Constitutions.

3. In cases where SUNY Empire's Title IX Coordinator determines that SUNY Empire's Title IX Grievance Procedures do not apply, SUNY Empire retains discretion to determine if a violation of the Student Conduct Policy has otherwise occurred.

4. SUNY Empire will promptly send notice that the matter is being referred to the Student Conduct Director. This section outlines procedures that will be followed for all cases of sexual misconduct that are so referred (i.e., not subject to the SUNY Empire's Title IX Grievance Procedures).

E. Rights of the Parties Throughout Sexual Misconduct Proceedings

Throughout the proceedings for the adjudication of sexual misconduct, the Respondent and the Reporting Individual have the right to:

1. Be assisted by any advisor they choose, at their own expense. The advisor may be an attorney. The Reporting Individual and/or the Respondent(s) are responsible for presenting their own evidence and, therefore, advisors are not permitted to speak or to participate directly in any hearing before a student conduct body. Students may request a break to consult with their advisor privately.

2. Have their complaint investigated and adjudicated in an impartial, timely, and thorough manner by individuals who receive annual training in

- conducting investigations of sexual violence,
- the effects of trauma,
- impartiality,
- the rights of the Respondent, including the right to a presumption that the Respondent is, "not responsible" until a finding of responsibility is made, and
- other issues related to sexual assault, sexual exploitation, domestic violence, dating violence, and stalking.

3. An investigation and adjudication process conducted in a manner that recognizes the legal and policy requirements of due process (including fairness, impartiality, and a meaningful opportunity to be heard) and is not conducted by individuals with a conflict of interest.

4. Receive advance written or electronic notice of the date, time, and location/method of any meeting or hearing they are required to, or are eligible to, attend. Respondents will also be told the factual allegations concerning the violation, a reference to the specific Prohibited Behavior alleged to have been violated, and possible sanctions.

5. Have a conduct process run concurrently with a criminal justice investigation and proceeding, except for temporary delays as requested by external municipal entities while law enforcement gathers evidence. Temporary delays should not last more than ten (10) days except when law enforcement specifically requests and justifies a longer delay.

6. Present evidence, witnesses, and statements and to review available relevant evidence in the case file or other information held by SUNY Empire.

7. Request for a range of options for providing testimony via alternative arrangements, including telephone/video conferencing, or testifying with a room partition.

8. Exclude prior sexual history with persons, other than with the other party in the conduct process, their own mental health diagnosis, or treatment, from admittance in SUNY Empire's disciplinary stage that determines responsibility. Past findings of domestic violence, dating violence, stalking, sexual exploitation, or sexual assault may be admissible in the disciplinary stage that determines sanctions.

9. Ask questions of the decision maker and, via the decision maker, indirectly request responses from other parties. In other words, the

Respondent and Reporting Individual cannot directly question each other and will be expected to ask questions in writing through the Student Conduct Body.

10. Make an impact statement during the point of the proceeding where the decision maker is deliberating on appropriate sanctions.

11. Be provided with simultaneous (among the parties) written or electronic notification of the outcome of a conduct proceeding, including the decision, any sanctions, and the rationale for the decision and any sanctions.

12. Be provided with written or electronic notice about the sanction(s) that may be imposed on the Respondent based upon the outcome of the conduct proceeding. For students found responsible for sexual assault, the available sanctions are suspension with additional requirements and expulsion/dismissal.

13. Have access to at least one level of appeal of a determination before a panel that is fair and impartial and does not include individuals with a conflict of interest (see Section 7.4)

14. Have access to a full and fair record of a student conduct hearing.

15. Choose whether to disclose or discuss the outcome of a conduct hearing.

16. Have all information obtained during the course of the conduct or judicial process be protected from public release until the appeals panel makes a final determination, unless otherwise required by law.

F. Sanctions for Sexual Misconduct

The following outlines the available sanctions for cases that fall into prohibited conduct items 5. Intimate Partner Violence; 6. Stalking; 8. Sexual Harassment; and/or 9. Sexual Assault and Sexual Exploitation.

1. When an individual is found responsible for any part of prohibited conduct item 9. Sexual Assault and Sexual Exploitation the following sanction is available:

    a. disciplinary expulsion

2. When an individual is found responsible for any part of prohibited conduct items 5. Intimate Partner Violence; 6. Stalking; and/or 8. Sexual Harassment the following sanctions are available:

    a. disciplinary expulsion
    b. disciplinary suspension for 1 term, 2 terms, 3 terms, 4 terms, 5 terms, 6 terms, 7 terms, 8 terms, 9 terms, or 10 terms.

3. In addition to suspension, any of the following, singularly or in combination, may be imposed as approved by the Student Conduct Director or designee(s):

    a. Loss of Privileges. Denial of specified privileges for a designated period of time, upon return. These include, but are not limited to:
      a. A restriction from possessing particular items at SUNY Empire locations and/or events (e.g., radios, bicycles, automobiles, etc.).
      b. A restriction from being in or entering one or more specified SUNY Empire locations.
      c. A restriction from utilization of SUNY Empire services or resources (e.g., reserving rooms for student club functions;

        interacting with certain staff members, use of technology tools, etc.)
      d. Other restrictions,

    b. Restitution. Compensation for loss, damage, and/or injury.

    c. Mandated Counseling Assessment. The Student must complete a release, attend an assessment and/or session with a licensed counselor and provide record thereof by a specific date. Unless otherwise stated by the Student Conduct Director or designee(s), the student is required to follow all recommendations made by the counselor as a result of the assessment.

    d. Continuation of No Contact Order with the reporting individual in accordance with SUNY Empire policy.

The Office of Safety and Security may file a Persona Non Grata order in relation to a suspension or expulsion or a restriction from entering one or more specified SUNY Empire locations.

Interim Restrictions and Directives

The Student Conduct Director or designee(s), or the Title IX Coordinator, may impose interim measures prior to, and pending, a hearing and outcome thereof. These measures may include interim suspension and loss of privileges, which may include no contact orders and other reasonable measures. Interim restrictions and directives shall be delivered in writing via mail to the mailing address, with proof of delivery.

1. Interim Suspension

    a. Based upon the judgment of the Student Conduct Director or the Title IX Coordinator, Interim suspensions shall be imposed:
      a. To ensure the safety and well-being of members of the community and/or preservation of SUNY Empire property.
      b. To ensure the Student's own physical or emotional safety and well-being; and/or
      c. If the student poses a definite threat of disruption of, or interference with, the normal operations of SUNY Empire.

    b. Violation of any condition of the interim suspension shall be grounds for expulsion from SUNY Empire.

    c. Notice of interim suspension will be made to the Student's mailing Address, with proof of delivery.

    d. Students have the right to challenge the terms of the interim measure(s), or request a modification, by submitting a letter and any supporting documents to the Associate Provost for Student Success or designee(s) within three (3) business days. A decision will be made within five (5) business days of receipt of the request. The decision of the Associate Provost is final.

    e. During this period the interim suspension, the Student shall not, without prior written permission of the Student Conduct Director or designee(s), enter or remain on SUNY Empire property or participate in online or virtual activities, other than to attend the hearing. A Persona Non Grata may also be filed with the local police department.

2. No Contact Order

No contact orders may be issued by the Office of Safety and Security based upon the recommendation of the Student Conduct Director or designee(s) in the appropriate circumstances. For more information.

Please refer to the policy on No Contact Orders available at: https://www.sunyempire.edu/policies/?search=cid%3D104608.

Required Transcript Annotation

For violent behavior including, but not limited to, sexual violence, defined as crimes that meet the reporting requirements pursuant to the federal Clery Act established in 20 U.S.C. 1092(f)(1)(F)(i)(I)-(VIII), SUNY Empire will make a notation on the transcript of students found responsible after a conduct process that they were "Disciplinary Suspension" or "Disciplinary Expulsion." For the respondent who withdraws from the SUNY Empire while such conduct charges are pending, and declines to complete the disciplinary process, SUNY Empire shall make a notation on the transcript of such students that they "withdrew with conduct charges pending."

Notations of expulsion cannot be removed unless a finding of responsibility is vacated through the prescribed appeals process.

Students may make a request to the Associate Provost for Student Success or designee(s) to have the notation of suspension removed under the following conditions:

- It has been at least 12 months since the conclusion of the suspension; and,
- The student supplies a rationale for the removal of the suspension that demonstrates considerable progress in addressing the behavior(s) that resulted in the suspension

Removal of the suspension notation is at the discretion of the Associate Provost for Student Success or designee(s). The decision is final and cannot be appealed.

Appeals

An appeal is the process to request a review of the original student conduct referral outcome, which includes the Findings and Sanctions. An appeal will be considered only on the following grounds:

1. Procedural Error. The respondent may believe a procedural error occurred, where the policies and/or procedures outlined in SUNY Empire's Student Conduct Policy and/or Student Conduct System were not followed and, as a result, the outcome of the case was significantly impacted.
2. Disproportionate Sanction. The respondent may believe that sanction(s) imposed were not appropriate for the violation of the Student Conduct Policy that the student was found to have committed.
3. New Evidence. The respondent may have new evidence that was unavailable during the original hearing, the investigation, or a scheduled meeting with a Student Conduct Director or designee(s), that could significantly impact the original finding or sanction. New evidence does not include information available but not disclosed, by choice, to the Student Conduct Body or Student Conduct Director or designee(s) or forfeiting the option to present evidence.

Accordingly, the appeal does not result in a rehearing of the student conduct case, but rather, the process is limited to review of the verbatim record of the proceedings, supporting documents, and/or new evidence.

A. Appeal Procedure for Non-Sexual Misconduct

The Respondent has the right to submit one appeal of the original decision and may appeal a decision reached or sanction imposed within five (5) business days of initial written receipt of the decision and sanction based upon the appeal grounds delineated above. An appeal may not be submitted by a third party.

1. Appeal Submission

Appeals shall be in writing and delivered to the Student Conduct Director or the designee(s). The appeal shall describe the reason for the appeal.

a. Any procedural error(s), if applicable, must be identified explicitly and the impact of the error(s) on the case outcome must be clearly described.
b. If the appeal includes a request to reconsider a sanction, the reason that the respondent believes the sanction is inappropriate must be explained.
c. If there is new evidence that the respondent believes should be considered, the basis or rationale for asking to have the new evidence considered along with a summary of the new evidence and its potential impact must be included.
d. The written appeal shall not be longer than 10 double spaced typed pages in length with 12-point font and 1-inch margins, or 2500 words. When a student appeals under "New Evidence" any evidence submitted shall not be counted toward the page limitation. Further, video submissions are not considered as part of written page length and may be submitted as supporting information.

2. Appeal Review

a. The imposition of any sanctions will be deferred during the determination of any appeal(s).
b. The appeal, original conduct referral, verbatim record, and the outcome of the administrative determination or the original Student Conduct Body's decision are reviewed by the Associate Provost or designee(s) to ensure they meet the criteria established above for the filing of an appeal.
c. The original decision will be upheld if the appeal is not timely or does not meet the grounds for appeal.
d. If an appeal is timely and meets the grounds, the Associate Provost, or their designees, may take any of the following actions:
   a. Affirm or modify the findings for one or more of the alleged violations
   b. Affirm or modify the sanction originally determined.
   c. Reverse all decisions made by the Student Conduct Body or Student Conduct Director, overturning the entire original decision regarding responsibility and sanctions.
   d. Remand the case to the original Student Conduct Body or the Student Conduct Director who heard the referral for a specific reconsideration, or to be reheard, in part or in entirety.
   e. Remand the case to an alternative Student Conduct Body or Student Conduct Director for the referral to be reheard.
   f. The Associate Provost makes the final decision. A written notification of the appeal decision will be sent via mail to the mailing address, with proof of delivery to the Respondent. This decision is final.

B. Appeal Procedures for Cases of Sexual Misconduct

In cases of sexual misconduct, both the Respondent and the Reporting Individual have the right to one appeal of the original decision and may appeal a decision reached, or sanction imposed, within five (5) business

days of initial written receipt of the decision and sanction, based upon the appeal grounds delineated above. An appeal may not be submitted by a third party.

1. Appeal Submission

Appeals shall be in writing and delivered to the Student Conduct Director or the designee(s). The appeal shall describe the reason for the appeal.

a. Any procedural error(s), if applicable, must be identified explicitly and the impact of the error(s) on the case outcome must be clearly described.

b. If the appeal includes a request to reconsider a sanction, the reason that the Respondent or Reporting Individual believes the sanction is inappropriate must be explained.

c. If there is new evidence that the Respondent or Reporting Individual believes should be considered, the basis or rationale for asking to have the new evidence considered, along with a summary of the new evidence and its potential impact, must be included.

d. The written appeal shall not be longer than 10 double spaced typed pages in length with 12-point font and 1-inch margins, or 2500 words. When appeals are under "New Evidence," any evidence submitted shall not be counted toward the page limitation. Further, video submissions are not considered as part of written page length and may be submitted as supporting information.

e. After the five (5) business-day period, the Respondent and Reporting Individual will be notified regarding if an appeal was submitted or not by the opposing party.

2. Appeal Review

a. The imposition of any sanctions will be deferred during the determination of any appeal(s).

b. The appeal, original conduct referral, verbatim record, and the outcome of the administrative determination or the original Student Conduct Body's decision are reviewed by the Appeal Review Panel to ensure they meet the criteria established above for the filing of an appeal.

c. The original determination and sanction will be upheld if the appeal is not timely or does not meet the grounds for appeal.

d. If the appeal is timely and meets the grounds, the Appeal Review Panel, may take the following actions:

   a. Affirm or modify the findings for one or more of the alleged violations

   b. Affirm or modify the sanction originally determined.

   c. Reverse all decisions made by the Student Conduct Body or Student Conduct Director, overturning the entire original decision regarding responsibility and sanctions.

   d. Remand the case to the original Student Conduct Body or the Student Conduct Director who heard the referral for a specific reconsideration, or to be reheard, in part or in entirety.

   e. Remand the case to an alternative Student Conduct Body or Student Conduct Director for the referral to be reheard.

   f. The Appeal Review Panel makes the final decision. A written notification of the appeal decision will be simultaneously sent via mail to the mailing addresses of the Respondent and the Reporting Individual, with proof of delivery. This decision is final.

Disciplinary Files and Records

The Student Conduct Director maintains disciplinary records and a disciplinary tracking system that shall include, without limitation, the Respondent's name and related information, description of the incident, parties involved, Student Conduct Policy violations, sanctions, and other data deemed relevant by the Student Conduct Director. Such information shall be maintained in accordance with the provisions of the Family Educational Rights and Privacy Act (FERPA). Disciplinary records may be made available to Student Conduct Bodies and SUNY Empire Officials as necessary.

Students may arrange to review their own disciplinary records by contacting the Student Conduct Director.
Except as provided in the Student Conduct Policy, or otherwise allowable by FERPA, SUNY Empire shall not communicate a student's disciplinary record and related information to any person or agency without the prior written consent of the student with the exception of the indicated transcript notation.

Student disciplinary records are retained in accordance with SUNY Records Retention Policy (accessible at https://www.suny.edu/sunypp/documents.cfm?doc_id=650). Student records for major Student Conduct Policy violations and drug and alcohol violations are retained for a minimum of seven (7) years after the end of the academic year of said violation(s) to comply with federal recordkeeping requirements and while the student is enrolled at the SUNY Empire. Records of minor Code of Student Conduct violations will be retained for a minimum of three (3) years after the end of the academic year of said violation(s) and while the student is enrolled at SUNY Empire. Cases involving Disciplinary Suspension will be retained permanently and may only be expunged upon successful application to the Associate Provost for Student Success or designee(s). Case files involving Expulsion will be retained permanently.

A disciplinary records request can be made in writing to:

SUNY Empire State
Attn: Student Conduct Director
111 West Avenue
Saratoga Springs, NY 12866

Interpretation and Revision

Any question of interpretation regarding the Student Code shall be referred to the Student Conduct Director or designee(s) for final determination.

Student Grievance Policy and Procedures

Sponsor: Office of Academic Affairs
Contact: Executive Director of University Student Services
Category: Student Affairs
Number: 1300.030 (https://www.sunyempire.edu/policies/?search=cid%3D37971)
Effective Date: March 1, 2002
Implementation History: March 2002
Keywords: Student, grievance, procedure, services, problem, academic appeal, complaint

Purpose

The purpose of the Student Grievance Policy is to provide equitable and orderly processes to resolve grievances by students.

Definitions

Grievance – Formal difference or dispute between a student and a university employee about the interpretation and/or application of the university's non-academic policies and procedures, or provision of services, by members of the university's faculty or staff, that negatively affects the student. A grievance may be based on one of the following claims: failure to provide services, arbitrary and/or capricious actions by a university employee or administrative office; policy or procedure applied unfairly and/or in a different manner than it was applied to others; administrative error in the application of the policy or procedure.

Days – Monday through Friday excluding university holidays.

Relevant Administrator – Appropriate office director or school associate dean or dean. The locus of grievance is with the unit where the service is delivered. Questions about the appropriate locus are resolved by the provost, vice president or designee.

Relevant Provost, Vice President or Designee – The office responsible for the service area.

Statements

A grievance differs from an appeal of an academic decision, as it deals with service issues and not the actual outcomes of course work. A student may file a grievance in the cases of an unresolved difference or dispute between themselves and the university (office or individual) related to services rendered or non-academic decisions. The policy covers matters outside the scope of other policies of the university.

Complaints about sexual harassment and discrimination based upon protected class are addressed via the Discrimination Complaint Procedure; complaints about services related to disabilities are addressed through Rights of Students With Disabilities Policy, complaints about student behavior are addressed through the Student Conduct Policy and Procedures and student academic appeals including grading are addressed through Student Academic Appeals Policy and Procedures.

In cases where service issues underlie a disagreement about an academic evaluation, the service issue will be investigated and decided first.

Informal Resolution

The student is strongly encouraged to seek informal resolution of a grievance by bringing it to the attention of the relevant individual, administrator or office. An attempt at informal resolution should begin no more than 20 business days after the service or decision is rendered.

Formal Grievance

If the student is unsatisfied with the response, the student may make a formal, written grievance to the relevant administrator.

1. Any formal grievance must be submitted by the student within 40 business days after the service or decision is rendered. The student must state the nature of the grievance, the remedy he or she is seeking and describe any previous attempts to resolve the issue grievance.
2. The administrator reviews the situation and should provide a written response, including appeal information within 15 days of receiving the complaint, copying the primary mentor/academic advisor. Students will be informed if extenuating circumstances require additional time.

Appeal of Formal Grievance Decision

If the student is unsatisfied with the formal grievance decision, the student may appeal in writing to the appropriate vice president, provost or designee.

Any appeal must be submitted within 20 days of the transmission of the formal grievance decision. The student must state the nature of the justification for the appeal. The vice president, provost or designee reviews the grievance and should provide a written response within 15 days of receiving the appeal. The decision is final.

Technology Acceptable Use - Students

Sponsor: Chief Information Officer
Contact: Information Technology Security Analyst
Category: Information Security and Technology
Number: 1000.003
Effective Date: 07/09/2003
Implementation History: Approved: April 14, 2002, Revised: July 9, 2003, February 2023
Keywords: Students, Computers, Computer lab, Account Access, Technology Access
Background Information: This policy replaces the "Computer Use Statement Policy-Students". This policy amends and incorporates all policy statements from the preceding policy. This policy was drafted with the assistance of a third-party cyber security firm. The SUNY Empire "laptop loaner program" is acknowledged in this policy.

Purpose

SUNY Empire promotes student use of its online academic resources, online student support services and computing facilities located at centers and units, and seeks to improve the computer literacy of its students, faculty and staff. Every user is expected to adhere to the statements#that follow to further these goals.

The purpose of this Acceptable Use Policy is to clearly establish each member of the institution's role in protecting its information assets and communicate minimum expectations for meeting these requirements. Fulfilling these objectives will enable SUNY Empire to implement a comprehensive system-wide Information Security Program.

DEFINITIONS

None specific to this policy

STATEMENTS

SCOPE

This policy applies to all students with access to computing resources owned, managed or otherwise provided by SUNY Empire State (Empire). Individuals covered by this policy include, but are not limited to all students, matriculated or non-matriculated, with access to the institution's computing resources and/or facilities. Computing resources include all SUNY Empire owned, licensed or managed hardware and software, email domains, and related services and any use of the institution's network via a physical or wireless connection, regardless of the ownership of the computer or device connected to the network.

PRIVACY

SUNY Empire will make every reasonable effort to respect a user's privacy. However, students do not acquire a right of privacy for communications transmitted or stored on the institution's resources, including laptops loaned to students. In response to a judicial order or any other action required by law or permitted by official SUNY Empire policy, or if the institution has otherwise determined reasonable necessity to protect or promote the legitimate interests of the institution, the President or Chief Information Officer (CIO), may authorize a SUNY Empire official or other authorized agent, to access, review, monitor and/or disclose computer files associated with an individual's account. Additionally, in response to a suspected violation of the Student Conduct Policy and/or violation of New York State Acceptable Use of Technology

Information Technology Resources Policy, the Vice Provost for Student Success or the Executive Director for Student Success may require a student return a loaned laptop to SUNY Empire before the term has ended and may authorize an agent of the university to review the data and information on the laptop. Students are encouraged to review the Adherence to Family Education Rights and Privacy Act of 1974 Policy (https://www.sunyempire.edu/policies/?search=cid%3D37340) as well as the Student Conduct Policy (https://www.sunyempire.edu/policies/?search=cid%3D37969).

POLICY

Any use that disrupts the institution's mission is prohibited. Using any Empire computer, account, computer resources or online resources for personal profit, or other purposes other than academic or university purposes is prohibited.

Following the same university policies on Affirmative Action, Non-Discrimination-Anti-Harassment, Sexual Harassment and Bias Related Crime, that protect the rights of individuals that study and interact with SUNY Empire, acceptable use of information technology resources generally respects all individuals' privacy, but subject to the right of individuals to be free from intimidation, harassment, and unwarranted annoyance. All users of SUNY Empire's computing resources must adhere to the requirements enumerated below.

The university reserves the right to monitor or restrict computing activity on SUNY Empire owned and operated systems, with the exception of laptops loaned to students from the official laptop loan program. The university is not responsible for loss of data or service interference resulting from efforts to maintain the university's computing facilities.

Students creating personal webpages on the university's servers must abide by the university's Web Presence and Publishing Policy. (https://www.sunyempire.edu/policies/?search=cid%3D35655)

4.1 FRAUDULENT AND ILLEGAL USE

SUNY Empire explicitly prohibits the use of any information system for fraudulent and/or illegal purposes. While using any of the institution's information systems or hardware, a user must not engage in any activity that is illegal under local, state, federal, and/or international law. As a part of this policy, users must not:

Violate the rights of any individual or company involving information protected by copyright, trade secret, patent or other intellectual property, or similar laws or regulations, including, but not limited to, the installation or distribution of pirated or other software products that are not appropriately licensed for use by SUNY Empire.

Use in any way copyrighted material including, but not limited to, photographs, books, or other copyrighted sources, copyrighted music, and any copyrighted software for which the institution does not have a legal license or an appropriate license has been purchased by the user of a loaned device.

Export software, technical information, encryption software, or technology in violation of international or regional export control laws.

Issue statements about warranty, expressed or implied, unless it is a part of normal job duties, or make fraudulent offers of products, items, and/or services.

Any user that suspects or is aware of the occurrence of any activity described in this section, or any other activity they believe may

be fraudulent or illegal, must notify the IT Service Desk (https://www.sunyempire.edu/service-desk/).

4.2 CONFIDENTIAL INFORMATION

SUNY Empire has both an ethical and legal responsibility for protecting confidential information in accordance with its Enterprise Data Classification Policy (https://www.sunyempire.edu/policies/?search=cid%3D104470).

4.3 HARASSMENT

SUNY Empire is committed to providing a safe and productive environment, free from harassment, for all employees and students. Harassment is defined and prohibited by the Student Conduct Policy (https://www.sunyempire.edu/policies/?search=cid%3D37969). For this reason, users may not:

Use institution information systems to harass any other person via e-mail, telephone, or any other means, or

Actively procure or transmit material that is in violation of sexual harassment or hostile workplace laws.

If a user feels he/she/they is being harassed through the use of the institution's information systems, the user shall reference the university's Discrimination Compliant Procedures (https://www.sunyempire.edu/policies/?search=cid%3D146277).

4.4 INCIDENT REPORTING

SUNY Empire is committed to responding to security incidents involving personnel, institution-owned information, or institution-owned information assets. As part of this policy:

The loss, theft or inappropriate use of information access credentials (e.g., passwords, or security tokens), assets (e.g., key cards, laptop, cell phones, tablets), or other information will be reported to the SUNY Empire IT Service Desk.

All incidents regarding SUNY Empire owned physical assets shall be reported to the IT Service Desk (https://www.sunyempire.edu/service-desk/).

Any device loaned through the Laptop Loan program should be reported to the program administrator, including damage, loss, and/or theft.

4.5 MALICIOUS ACTIVITY

SUNY Empire strictly prohibits the use of information systems for malicious activity against other users, the organization's information systems themselves, or the information assets of other parties.

4.5.1 DENIAL OF SERVICE

Users must not:

Perpetrate, cause, or in any way enable disruption of SUNY Empire's information systems or network communications by denial-of-service methods;

Knowingly introduce malicious programs, such as viruses, worms, and Trojan horses, to any information system; or

Intentionally develop or use programs to infiltrate a computer, computing system, or network, and/or damage or alter the software components of a computer, computing system, or network.

4.5.2 CONFIDENTIALITY

All encryption keys employed by users must be provided to Information Technology if requested, in order to perform functions required by this policy.

Users must not:

Perpetrate, cause, or in any way enable security breaches, including, but not limited to, accessing data of which the user is not an intended recipient or logging into a server or account that the user is not expressly authorized to access;

Base passwords on something that can be easily guessed or obtained using personal information (e.g., names, favorite sports teams, etc.);

Facilitate use or access by non-authorized users, including sharing their password or other login credentials with anyone, including other users, family members, or friends;

Use the same password for SUNY Empire accounts as for other non-SUNY Empire access (for example, personal ISP account, social media, benefits, email, etc.);

Attempt to gain access to files and resources to which they have not been granted permission, whether or not such access is technically possible, including attempting to obtain, obtaining, and/or using another user's password;

Make copies of another user's files without that user's knowledge and consent.

4.5.3 IMPERSONATION

Users must not:

Circumvent the user authentication or security of any information system;

Add, remove, or modify any identifying network header information ("spoofing") or attempt to impersonate any person by using forged headers or other identifying information;

Create and/or use a proxy server of any kind, other than those provided by SUNY Empire, or otherwise redirect network traffic outside of normal routing with authorization; or

Use any type of technology designed to mask, hide, or modify their identity or activities electronically.

4.5.4 NETWORK DISCOVERY

Users must not:

Use a port scanning tool targeting either SUNY Empire's network or any other external network, unless this activity is a part of the user's normal job functions, such as a member of the Information Technology Services (ITS), conducting a vulnerability scan, and faculty utilizing tools in a controlled environment;

Use a network monitoring tool or perform any kind of network monitoring that will intercept data not intended for the users, unless this activity is a part of the user's normal job functions.

4.6 OBJECTIONABLE CONTENT

SUNY Empire strictly prohibits the use of organizational information systems for accessing or distributing content that other users may find objectionable. Users must not post, upload, download, or display messages, photos, images, sound files, text files, video files, newsletters,

or related materials considered to be in violation of the Student Code of Conduct (https://www.sunyempire.edu/policies/?search=cid %3D37969), unless explicitly assigned by an instructor or mentor to do so as part of an academic exercise.

4.7 HARDWARE AND SOFTWARE

Specific university owned equipment managed by the Health and Wellness Program's Laptop Loan program may be used outside the university's network and have a less restrictive device and security settings. Users of the laptops are expected to adhere to all the above sections with acceptable use.

The laptops loaned are not restricted by the SUNY Empire State University's Information Technology Services, and users may install software they have legally purchased licenses or have access through the university (Office 365, etc.). However, a user should always protect their security and use sound judgment when using unsecured networks or trusted plug & play devices outside of the university or the student's residence.

The university is not responsible for loss of data or service interference resulting from individual use of devices loaned through the laptop loan program.

When using university owned equipment not governed by the Laptop Loan program, such as computer labs or other local devices, SUNY Empire strictly prohibits the use of any hardware or software that is not purchased, installed, configured, tracked, and managed by the institution. Users must not:

attach, connect or remove or disconnect, hardware of any kind, including wireless access points, storage devices, and peripherals, to any institutional information system without the knowledge and permission of ITS;

Download, install, disable, remove or uninstall software of any kind, including patches of existing software, to any institutional information system without the knowledge and permission of ITS;

Use personal flash drives, or other USB-based storage media, or

Take SUNY Empire equipment off-site without prior authorization from ITS.

4.8 MESSAGING

The organization provides a robust communication platform for users to fulfill its mission. Users must not:

Send unsolicited electronic messages, including "junk mail" or other advertising material to individuals who did not specifically request such material (spam);

Solicit electronic messages for any other digital identifier (e.g. e-mail address, social handle, etc.), other than that of the poster's account, with the intent to harass or to collect replies; or

Create or forward chain letters or messages, including those that promote "pyramid" schemes of any type.

4.9 OTHER

In addition to the other parts of this policy, users must not:

Use the institution's information systems for commercial use or personal gain.

ROLES AND RESPONSIBILITIES

SUNY Empire reserves the right to protect, repair, and maintain the institution's computing equipment and network integrity. In accomplishing this goal, SUNY Empire ITS personnel or their agents must do their utmost to maintain user privacy, including the content of personal files and Internet activities. Any information obtained by ITS personnel about a user through routine maintenance of the organization's computing equipment or network should remain confidential, unless the information pertains to activities that are not compliant with acceptable use of SUNY Empire's computing resources including the Student Conduct Policy (https://www.sunyempire.edu/policies/?search=cid %3D37969)

ENFORCEMENT

Enforcement is the responsibility of the institution's *President or Chief Information Officer (CIO).* The President or CIO may authorize a SUNY Empire official or an authorized agent. Users who violate this policy may be subject to the termination of their account. The institution may temporarily suspend or block access to an account when it reasonably appears necessary to do so in order to protect the integrity, security, or functionality of the institution or other computing resources or to protect SUNY Empire from liability.#If a laptop that has been loaned to a student is requested to be returned to SUNY Empire due to a suspected violation and it is not returned, a hold will be placed on the student's record which will prevent registration for future courses.

EXCEPTIONS

Exceptions to the policy may be granted by the Chief Information Officer (CIO), or by his or her designee.#All exceptions must be reviewed annually.

Undergraduate Admissions

Sponsor: Office of Academic Affairs
Contact: Provost/Vice President for Academic Affairs
Category: Academic
Number: 100.018 (https://www.sunyempire.edu/policies/?search=cid%3D39989)
Effective Date: September 1, 2024
Implementation History: August 2023, policy on admissions assessment approved May 2009; prior
policy on undergraduate admissions approved March 2001.
Keywords: Admission, Orientation,
Background Information:

Purpose

Part of the mission of SUNY Empire is to provide access to higher education for individuals who benefit
from alternatives to the traditional time, place and form of higher education. The college's admission
policy advances that aspect of the mission.

Definitions

Applicant: An individual who has initiated SUNY Empire's application process but has not received an
admissions decision.

Dual Admission: Guaranteed admission for a community college student who earns an associate degree
in a program identified in an agreement between the community college and SUNY Empire. Students are
admitted to SUNY Empire upon completion of their associate degree. Such agreements typically require
a minimum grade point average above 2.0 and other academic requirements may be specified in the
agreement.

Joint Admission: The student is admitted simultaneously to a community college and SUNY Empire upon
enrolling at the community college. It provides a guaranteed transfer to SUNY Empire upon completion
of the associate degree program at the community college, so long as specific requirements are met,
such as a minimum grade point average above 2.0, successful completion of specific courses or other
requirements. SUNY Empire often provides academic advisement and counseling during the enrollment
at the community college.

Matriculation: An admitted student's term of matriculation is the first term of enrollment after
admission. A matriculated student is a student who has begun study toward a degree.

Orientation: SUNY Empire provides an introduction to its educational philosophy, academic and
administrative policies and procedures, and strategies for academic success. Each newly admitted
student is enrolled in orientation. While the orientation process may extend over a new student's first
year of study, attendance at a pre-enrollment orientation workshop is required before the student is
permitted to enroll for study.

Undergraduate Admission: If an individual has completed the application process and meets all
admissions requirements, the individual is admitted.

Policy Statements

SUNY Empire reviews each application for admission to determine the match between the applicant's
goals and SUNY Empire's resources. Admission shall be without regard to sex, age, race and ethnicity,
color, religion, disability, national origin, sexual orientation, military status or marital status.

Admission Requirements

Requirements for undergraduate admission are:

- A completed application with official transcripts, all other required documentation, and the required, nonrefundable orientation fee
- Official transcript of a high school diploma or its equivalent

SUNY Empire's admissions office makes the admissions decision, consulting as specified in this policy,
and communicates the admission decision to applicants.

SUNY Empire will make clear to applicants which programs we can offer and those we cannot offer due
to specific requirements for certain professional licenses or certificates.

Applicants for undergraduate certificate programs complete the same application form as applicants for
degree programs.

Undergraduate students who have been admitted to SUNY Empire are required to complete the
university's pre-enrollment orientation process before being permitted to register for credit-bearing
courses.

Admitted applicants may register at any time up to three calendar years from the date of their preenrollment
orientation. After that time, they must reapply.

An applicant has one year from the submission of the application form to complete the admissions
process, which requires that the applicant submit all required documentation and pay the required,
nonrefundable orientation fee. If the application process is not completed within one year, the
application expires. Applicants who are accepted to the university have up to three years from the
acceptance date to complete the pre-enrollment orientation.

Application for a Second Degree at the Same Level

A student seeking to earn a second SUNY Empire associate degree or a second SUNY Empire bachelor's
degree must complete the entire application process for the second degree. A second associate or a
second bachelor's degree plan must meet a significantly different educational objective from the first
degree.

Reapplication to sUNY Empire

Students who have engaged in matriculated enrollment may re-enroll up to three calendar years from
the end date of their last enrollment. Students who wish to re-enroll after this time must reapply and
satisfy all the requirements for admission in effect at that time.

An applicant denied admission to SUNY Empire may reapply no earlier than one year after the most
recent application date.

An individual who submitted an application but did not complete the admissions process within one
year may submit a new application. The applicant must satisfy all the requirements for admission in
effect at the time of submission of the re-application.

Joint/Dual Admissions

SUNY Empire may enter an agreement with another college for joint admission (sometimes called dual
admission), in which a student accepted in the partner college is also admitted to SUNY Empire
contingent upon successful completion of the requirements of the partner college. In such agreements,
SUNY Empire applies the same admissions requirements as for general admissions and may include
additional requirements.

Applicable Legislation and Regulations

State the relevant legislation this policy must comply with or is referenced to. Regulations are rules or
orders issued by an executive authority or regulatory agency of government that have the force of law.
State any relevant regulations that affect this policy.

Second Bachelor's Degree Policy (https://www.sunyempire.edu/policies/?search=cid%3D36990)

Undergraduate Enrollment in Graduate Courses

Sponsor: Office of Academic Affairs
Contact: Dean of the School for Graduate Studies
Category: Graduate Studies
Number: 800.001
Effective Date: May 30, 2019

Implementation History: Nov. 7, 2013
Keywords: Undergraduate Enrollment in Graduate Courses, Graduate Studies

Purpose

Provides for undergraduate enrollment in graduate courses with explicit controls for such enrollment and the uses of the credit.

Statements

An advanced undergraduate student (within the last 32 credits of the bachelor's program) with a concurred degree program may apply to take up to nine credits of selected graduate coursework as determined by the appropriate graduate program chair or coordinator (but only six hours during a single term), related to the student's undergraduate degree program. If the student is permitted to enroll, the graduate-level course(s) must be used in the undergraduate degree program and graduate-level course expectations and grading policies apply.

Students and mentors should consult with the appropriate program chair or coordinator as they develop a degree program plan that includes graduate study.

The appropriate program chair determines eligibility on a course-by-course basis, in consultation with the student's primary mentor and other mentors as appropriate. Decision criteria include:

1. the student's preparedness for graduate study based on the academic record,
2. the student's rationale for enrolling in graduate courses, and
3. the availability of space in the course(s).

The graduate course(s) will be used toward the undergraduate degree (subject to undergraduate degree program review). Additionally, if the student is accepted within two years to the graduate program to which the courses apply, those course(s) will apply toward that graduate degree.

Applicable Legislation and Regulations

Title 8 Chapter II Regulations of the Commissioner part 52.2 (c)(3) "Credit toward an undergraduate degree shall be earned only for college-level work. Credit toward a graduate degree shall be earned only through work designed expressly for graduate students. Enrollment of secondary school students in undergraduate courses, of undergraduates in graduate courses, and of graduate students in undergraduate courses shall be strictly controlled by the institution."

Procedures for Undergraduate Students to Request Enrollment in Graduate Courses

Undergraduate Consultation With Primary Mentor

The undergraduate student consults with his/her primary mentor and SGS to determine if she/he is ready for graduate-level study, if graduate study is appropriate to his/her goals, and if so, what courses would be relevant to his/her degree program. Some indicators of readiness to engage in graduate study are that students will have been highly successful in upper-level courses/studies demonstrating strong writing and critical thinking skills, and have completed any prerequisites required for a particular course.

The student completes and signs the application for enrollment in graduate courses, acknowledging the expectations of graduate-level study and grading.

Appeals

Appeals of decisions would follow the college's academic appeals process and formal appeals would be referred to the appropriate location. For example, appeals of decisions not to allow a student to participate in a graduate course would be directed to SGS, and appeals of decisions about the appropriateness of such a course to the undergraduate program would be directed to the student's undergraduate division.

Undergraduate Learning Contract

Sponsor: Office of Academic Affairs and Undergraduate Committee for Academic Policy (UCAP)
Contact: Provost/Executive Vice President for Academic Affairs
Category: Academic
Number: 100.137
Effective Date: June 27, 2017
Implementation History: This policy was approved by the president in June of 2017 upon the recommendation of the college Senate and the Committee on Undergraduate Studies and Policies (CUSP) and supersedes the Learning Contract Study and Undergraduate Students Policy of March 2012 (originally approved September 1972). Previously revised: October 1980; April 1990; February 1996; February 2002. Previously Revised: October 1980; April 1990; February 1996; February 2002.
Keywords: Learning Contract, Learning Outcomes, Formative Assessment, Learning Activities, Methods and Criteria for Evaluation
Background Information: This policy was revised to align with the new course catalog initiative and current academic restructuring. It was initially rewritten as part of the Catalog Policy Retreat held in May 2016. CUSP revised it further beginning in September 2016. The revisions to the version of the 2011 policy were made concurrently with revisions to the policy on undergraduate student evaluation and grading. Both sets of revisions were prompted by the president in May 2011, upon advice from the college Senate and CUSP, to eliminate narrative contract evaluations.   The current version of this policy delineates more explicit expectations about statements of learning outcomes and formative assessment than earlier versions.

Purpose

This policy establishes principles that guide the design of effective learning contracts. specifies the content of learning contracts, details the relationship of learning contracts to other documents such as the course information document in the university catalog, and explains the process for faculty and university review of learning contracts.

Empire State University is committed to the following principles:

- The purpose and needs of students are at the center of effective learning contracts.
- Learning occurs in varied ways, places and modes.
- Learning preferences may differ by individual students.

Undergraduate students at SUNY Empire pursue their educations through a series of learning contracts. Well-designed learning contracts lay the foundation for student success by aligning learning outcomes and activities, allowing for timely and meaningful formative assessment, and identifying specific methods and criteria for evaluation. Faculty guide and encourage students to develop self-assessment skills by engaging with them throughout the length of the learning contract.

Definitions

Learning Contract: Refers to the document that outlines the responsibilities of students and faculty in the learning process. The learning contract provides specific information about what will be studied, how it will be studied and how the student will be evaluated. Learning contracts are required for all modes of study, e.g., one-to-one, online and blended, and are written either after consultation with the student or as a pre-structured plan for study.

Course: Refers to a study, regardless of modality, created by a mentor with or without the assistance of an instructional designer. Although the learning contract for a course might allow for flexibility within specific assignments, the course itself contains learning outcomes, learning activities and the academic criteria for evaluating completed assignments that are predetermined by faculty.

Totally Individualized Study (TIS): Refers to a study created for and with a student in response to a student's particular interests, goals and learning needs. A TIS may afford the student the opportunity to help devise the study's learning objectives/outcomes and/or learning activities in dialog with a faculty member.

A further note on these definitions: Good pedagogy typically includes flexibility and responsiveness to individual student needs; thus, the distinction between courses and Totally Individualized Studies is often a question of degree. None of what follows is meant to construct a hierarchy of value or a rigid, unworkable distinction among the university's academic offerings.

Elements of the Learning Contract

- **Dates of the study** – the beginning and end dates of the enrollment term.
- **Applied learning** – an indication whether or not the study meets the SUNY criteria for applied learning.
- **Definition of the study** – title, amount of credit, level of credit, liberal arts/nonliberal arts designation, role in meeting SUNY general education requirements, mentor/instructor.
- **Course description** – the description of a course listed in the university catalog. This element is not required in a TIS learning contract.
- **Purpose** – if the course is not listed in the catalog, and therefore does not have a course description, the purpose describes the scope and objectives of the study.
- **Learning outcome** – a learning outcome is a statement that defines the expected result of a curriculum, course, lesson or activity in terms of how students will be able to demonstrate their new knowledge and skills.
- **Learning activities** – a description of the activities and modes of learning to be pursued during the study. This description normally includes an outline of specific learning activities such as readings, writing assignments, creative work, research, laboratory study, etc., as well as a bibliography of required and optional readings, films, etc.
- **Methods and criteria for evaluation** – an explicit statement of the methods and criteria for evaluation to be employed by the mentor that informs the student about how he or she will be evaluated in relation to the expected learning outcomes. The criteria for evaluation are the standards by which the student's performance will be judged. Criteria should be consistent with the level of the study. The criteria

should establish the minimum standard for the award of credit. The student must satisfy the requirements and evaluative criteria in order to receive credit for the course.

- **Plan for formative assessment** – a description of the expected time frame for completion of learning activities throughout the term of enrollment and for developmental feedback on learning activities from the instructor. The plan outlines the mutual commitments of student and instructor with regard to communication and course engagement.

Statements

The learning contract communicates an individual faculty member's academic judgment regarding the particular texts, assignments, methods of evaluation, and content that are appropriate in order to address the course's learning outcomes and description as listed in the university catalog, as well as any additional outcomes determined by student interests and/or faculty expertise.

The university catalog includes Course Information Documents which represent agreement among faculty members who have exercised their collective academic judgment regarding a course's description, learning outcomes, credits, level, general education status and other related information.

Ideally, learning contracts should be submitted no later than two weeks before the term begins. Exceptions may occur according to the timing of registration and in the case of a TIS. The learning contract for a TIS should be submitted no more than four weeks after the start date of the enrollment term. Deans are responsible for ensuring their timely submission.

Learning contracts can be amended to reflect changing student goals and learning needs throughout the study. Changes to the learning contract are documented and entered into the university records through the learning contract amendment process.

Cross Registration

For study taken through cross registration at another institution, the learning contract documents the name of the other institution, the course title and number, and the minimum acceptable grade for the credit award by Empire State University. (See the Empire State University policy on cross registration at other institutions (http://www.sunyempire.edu/policies/?search=cid%3D37035) for additional information.)

Developing Learning Contracts

The faculty member who teaches a course in the catalog or collaborates with a student to create a TIS is responsible for developing the learning contract. This responsibility includes identifying readings, planning learning activities and assignments, and providing a method and criteria for formative assessment and summative evaluation. Faculty determine the appropriate learning sequence to achieve common outcomes in the course catalog. Further, faculty may design additional learning outcomes based on student needs and their scholarly expertise. Faculty guiding a student in a TIS customize sections of the learning contract according to student expectations and their knowledge of the subject area.

Review of learning contracts takes a variety of forms:

Department chairs review learning contracts for completeness and compliance with the university's Learning Contract Policy and to ensure clarity, ADA compliance and academic quality.

It is the responsibility of the faculty member who generated the learning contract to periodically review and as necessary update it. During development and revision, learning contracts will commonly benefit from peer review for alignment, as well as clarity.

Curriculum review of catalog courses: For revision of learning outcomes in the catalog, refer to Course Catalog/Cross Listing Policy for Undergraduates (http://www.sunyempire.edu/policies/?search=cid%3D109961).

Applicable Legislation and Regulations

The Middle States Commission on Higher Education evaluates institutions in relation to seven standards for accreditation. Standard five requires that an institution provide students with a set of clearly stated educational goals that are related to student experiences and its institutional mission. Standard five also requires that an institution provide for organized and systematic assessments.

University Learning Goals

Sponsor: Office of Academic Affairs
Contact: Vice Provost
Category: Academic
Number: 100.043
Effective Date: 01/01/2012
Keywords: University learning goals
Background Information: The college Senate approved the College Level Learning Goals Policy on 12/2/2011.

Purpose
Philosophy and Rationale

Growing out of SUNY Empire's unique mission, the learning goals outlined below serve as a vital link between the university's historical mission, the current context of rapid educational change, and the future of our institution in a global society where knowledge and learning remain urgently important. These statements encapsulate the values that we bring to our work with students, and they articulate our hopes for our graduates. We also believe it is our responsibility as educators to enter into collaborative relationships with future students, which requires transparency about our goals and values. Finally, by clearly stating these goals, we will be able to both reflect upon our students' and our own success through a creative, collaborative and iterative assessment process that extends across multiple institutional levels.

Statements

Graduates of Empire State University will demonstrate competence in the following areas of learning, appropriate to their degree levels. At the graduate level, these goals will be incorporated as appropriate to the program of study.

- **Active Learning:** Assess and build upon previous learning and experiences to pursue new learning, independently and in collaboration with others.

- **Breadth and Depth of Knowledge:** Cultivate a broad, interdisciplinary understanding in the liberal arts and sciences, as well as expertise in a particular field.
- **Social Responsibility:** Engage in ethical reasoning, and reflect on issues such as democratic citizenship, diversity, social justice and environmental sustainability, both locally and globally.
- **Communication:** Express and receive ideas effectively, in multiple contexts and through multiple strategies.
- **Critical Thinking and Problem Solving:** Evaluate, analyze, synthesize and critique key concepts and experiences, and apply diverse perspectives to find creative solutions to problems concerning human behavior, society and the natural world.
- **Quantitative Literacy:** Read, interpret, use and present quantitative information effectively.
- **Information and Digital Media Literacy:** Critically access, evaluate, understand, create and share information using a range of collaborative technologies to advance learning, as well as personal and professional development.

2011-2015 Academic Plan

Web Presence and Publishing

Sponsor: Office of Communications and Government Relations
Contact: Chief Information Officer and Vice President for Information Technology Services
Category: Information Security and Technology
Number: 1000.007 (http://www.sunyempire.edu/policies/?search=cid=35655)
Effective Date: 08/08/2011
Keywords: World Wide Web, Web presence, Web pages, Web publishing, homepage, university website
Background Information: Replaces University World Wide Web Server Policy dated April 26, 1996 last revised June 1999

Purpose

The purpose of this policy is to establish authority, responsibilities, and actions that assure that the Empire State University (the university) presence on the World Wide Web supports and promotes the university mission by:

A. Providing appropriate access to accurate, timely, relevant and authoritative information.
B. Publishing materials consistent with the university's graphic identity program and which best reflect the official image and message of the university.
C. Identifying authority and responsibility for the university's presence on the Web.
D. Establishing resources available and direction to all who would publish materials on university or university-affiliated Web pages.

E. Ensuring regular review of university and university-affiliated Web pages for compliance with established policy, standards, guidelines and best practices.
F. Ensuring that the university's Web presence forms a coherent whole.

Definitions

A. **University Web Pages:** Web pages under the direct control of Empire State University that represent the official voice of the university to all internal and external audiences including prospective students, current students, alumni, faculty, staff, friends of the university and the general public. Examples include the main university Web pages; learning resource sites such as the online Library; Web based applications such as Web Advisor and DP Planner; and, other online sites and tools used to conduct official university business or convey official university information.

B. **University-affiliated Web Pages**: Web pages developed, maintained or hosted by entities other than SUNY Empire but referenced or used by the university to conduct official business or represent the official voice of the university in accordance with the university's mission.

C. **Individual Web Pages:** Web pages developed and maintained by SUNY Empire State students, faculty and staff for the purpose of self-expression, communication or other individual uses related to the individual's affiliation with the university and the university's mission.

D. **Personal Web Pages:** Web pages developed and maintained by individuals for the purpose of personal self-expression, communication or other personal uses. SUNY Empire does not host, maintain or provide support for personal Web pages.

E. **University Name Space:** domain names recognized as associated with SUNY Empire, e.g. www.sunyempire.edu (http://www.sunyempire.edu), etc.

F. **Electronic Publications:** content posted and available online or shared via network resources. Examples include, but are not limited to, text files, HTML and PDF documents, audio and video flash files or other materials and documents available online.

G. **Site Steward**: individual SUNY Empire employee responsible for the accuracy and appropriateness of a Web page's content. The steward may or may not also be the site administrator and /or subject matter expert. The site steward is typically, but not exclusively, a dean or director.

H. **Site Administrator:** individual SUNY Empire employee responsible for the development and maintenance of content on Web pages assigned by a site steward. Site administrators are normally those with technical skills assigned to develop and maintain Web pages, or who have direct supervisory responsibility over those who develop and maintain Web pages.

I. **Subject Matter Expert:** individual SUNY Empire employee who creates or provides basic content source materials and reviews Web page content for accuracy, timeliness and relevance.

J. **Branding:** any feature of a Web page that conveys the identity of SUNY Empire through name, text, symbols, emblems, logos, colors, seal or other audio or visual effects.

K. **Archive:** to save content that is no longer current but may be required for historical purposes or reference.

L. **Delete:** to erase content, entire Web pages and/or files from the server.

M. **Remove:** to eliminate all links to content, entire Web pages and/or files from a published website, and to change the access permissions to prevent access by users who may have bookmarked the content.

N. **Publications Style Guide:** SUNY Empire official guide for the appearance, writing style and branding of all SUNY Empire publications including print and digital media.

O. **Web-based Instructional Materials:** Instructional material provided via the Web specifically for courses or studies. Such materials are governed by the university's policy on academic freedom as outlined in the Faculty Handbook. More general-purpose, publicly available learning resources such as Writing Resources or the Information Skills Tutorials are not considered SUNY Empire Web-based Instructional Material and should be treated as university or university-affiliated Web Pages.

P. **Web Presence:** message, image or other representation of an organization or individual as presented on the Web. Encompasses any form of content that may be presented via the Web on university, university-affiliated, Individual or Personal Web Pages.

Q. **Web Presence Advisory Committee:** SUNY Empire working committee tasked with advising the Vice President for Communications and Government Relations and the Vice President for Information Technology Services regarding the university's presence on the Web.

R. Web Standards and Practices (https://www.sunyempire.edu/its/web-standards/)**:** SUNY Empire technical and practical guide to Web development and maintenance of the university's Web sites.

Statements

A. Empire State University webpages, affiliated webpages and electronic publications are official SUNY Empire publications. Their content is the property of SUNY Empire and may not be copied, modified, used on other sites or re-purposed without express, written permission from the vice president for communications and government relations. As official SUNY Empire publications, they are subject to the policies and standards for the university's publications as found in the Empire State University's Publications Style Guide. The use of the university name, symbols, emblems, logos, seal, and colors shall comply with this guide.

   In addition, these pages and publications are subject to the guidelines and best practices found in the Empire State University's Web Presence Standards and Practices and the university's Information Technology Services Acceptable Use policy. More specifically:

   a. University Webpages
      a. Will use current official university templates and designs.
      b. Will be in accordance with the university's Publications Style Guide and Web Presence Standards and Practices.
      c. May contain public and/or password-protected content.
      d. Will reside on a university server or under a university name space.
      e. Will be reviewed and approved to ensure compliance with the university's Publications Style Guide, Web Presence Standards and Practices and Information Technology Services Acceptable Use policy.
      f. Will be included in the university's site search in accordance with the Web Presence Standards and Practices.
      g. Will be overseen and maintained by the author or designated site steward(s), site administrator(s) and subject matter expert(s).
   b. University-Affiliated Webpages

      a. May use university name space, templates or designs.
      b. May contain public and/or password-protected content.
      c. May reside on a university server, under a university name space or in a social media site like Facebook, Blogspot or YouTube.
      d. May be reviewed for compliance with the university's Publications Style Guide and Information Technology Services Acceptable Use policy.
      e. Will be in accordance with the university's Publications Style Guide and Information Technology Services Acceptable Use policy.
      f. Will be included in the university's site search in accordance with the Web Presence Standards and Practices.
      g. Will be overseen and maintained by the author or designated site steward(s), site administrator(s) and subject matter expert(s).
      h. Will be linked from official university webpages; the placement and phrasing of such links will be guided by the university Web manager, director of university-wide Web marketing and the vice president for communications and government relations.

B. All university and university-affiliated webpage content will have an assigned site steward and site administrator. Any university website content for which a steward and administrator has not been assigned will be removed from the university website by the university Web manager. Once a steward and administrator have been assigned the university Web manager will republish the content to the university website.

C. University and university-affiliated webpage content shall be reviewed and updated as necessary at least once per calendar year to assure accuracy, currency and compliance with university policy, standards and guidelines. After appropriate notice has been given to a site steward, content not reviewed may be removed from the university website by the university Web manager. Such content may be republished once the required review and any necessary updates are completed.

D. Temporary or ad hoc websites and pages connected to specific events are to be taken down no later than 60 days after the event. Such pages may be moved to a generally available and searchable archive by request. Forward requests for accessible archiving to the university Web master.

E. Individual webpages shall comply with Empire State University policy, Use of the Commons and Individual Web Spaces.

F. Webpages and electronic publications not officially affiliated with SUNY Empire, shall not exhibit SUNY Empire branded templates, name, symbols, emblems, logos, colors, seal, or, recreate content or functionality provided by SUNY Empire and university-affiliated publications and web pages.

G. Empire State University reserves the right to remove from any SUNY Empire server or communications system utilizing university network or name space, any webpage or publication it believes to be in violation of SUNY Empire policy. The university Web manager, with final authority resting with the vice president for communications and government relations, may remove webpages and publications believed to be in violation of this policy.

Responsibility and Authority

A. The vice president for communications and government relations is responsible for:

a. Coordinating all university information and publications and for assuring accuracy and consistency of university message and image. The vice president has responsibility for and authority over the content and appearance of all university webpages, university-affiliated webpages and publications.

b. Creating, approving and maintaining Empire State University's Publications Style Guide. The university Web manager, director of university-wide Web marketing and Web Presence Advisory Committee shall provide assistance to the vice president for the web-related portions of this guide.

c. Approving the portions of SUNY Empire's Web Presence Standards and Practices that pertain to the university's message and image.

d. Ensuring due process with regard to reviewing alleged violations and enforcing noncompliance to this policy and related procedures.

e. Chartering the Web Presence Advisory Committee and recruiting and appointing members which shall include the university Web manager as an ex officio non-voting member.

B. The university Web manager is responsible for:

a. Working with the vice president for communications and government relations, the vice president for information technology services, the director of university-wide Web marketing, the Web Presence Advisory Committee, Information Technology Services staff, and others as needed to ensure that the university Web presence supports and promotes the university mission.

b. Stewardship of SUNY Empire's Web Presence Standards and Practices. The university Web manager will consult with the vice president for communications and government relations, the vice president for information technology services, the director of university-wide Web marketing, the Web Advisory Committee and ITS staff regarding the development and maintenance of the Web Presence Standards and Practices.

c. Monitoring university and university-affiliated webpages for compliance with the university's Publications Style Guide, Web Presence Standards and Practices, Information Technology Services Acceptable Use policy and other relevant university policies, taking appropriate steps necessary to ensure compliance.

d. Overseeing the content review cycle – communicating with site stewards about upcoming review deadlines, removing content that has not been reviewed on time and restoring content once reviews are completed.

e. Coordinating with the director of university-wide Web marketing and ITS staff to monitor website content, quality and performance and assisting site stewards and administrators to improve the site content, quality, and performance.

f. Ensuring that stewards have regular access to site and content analytics.

g. Providing assistance to site stewards and administrators on Web development and support issues, including account access.

h. Maintaining records of all assigned site stewards and administrators in a form that is available to university employees.

i. Stewardship of the internal search function of the university's Web presence; providing guidance and help to site stewards and administrators related to the searchability of their content.

C. The director of university-wide Web Marketing is responsible for:

a. Working with the director of communications, the university Web manager, the Web Presence Advisory Committee, ITS staff and others as needed to ensure that the Web presence supports and promotes the university mission.

b. Search engine optimization (SEO) of the university's public Web presence for external search engines; the director of university-wide Web marketing shall have authority over the SEO of the university's public Web presence.

c. Stewardship of the university's Web-based marketing activities.

d. Analyzing and reporting the university's Web-based marketing activities.

e. Providing assistance to the director of communications and the university Web manager for pertinent sections of Empire State University's Publications Style Guide and the Web Presence Standards and Practices.

D. The Web Presence Advisory Committee is responsible for:

a. Representing the concerns of key stakeholders in all matters related to the university's Web presence.

b. Proposing and reviewing appropriate policies, standards, guidelines and practices related to the university Web presence.

c. Advising the vice president for communications and government relations, the vice president for information technology services, the director of university-wide Web marketing and the Web manager regarding issues related to the university's Web presence.

E. Site stewards are responsible for:

a. Overseeing and approving the content of their designated Web pages.

b. Ensuring the accuracy, timeliness and relevance of their designated Web pages.

c. Appointing site administrator(s) and subject matter expert(s).

d. Ensuring that their designated Web pages are in accordance with policy, standards, guidelines and best practices.

e. Consulting as necessary with the college Web manager, director of university-wide Web marketing and/or director of communications regarding assigned Web content.

F. Site administrators are responsible for:

a. Developing and maintaining the content of their assigned pages in accordance with policy, standards, guidelines and best practices.

b. Consulting as needed with subject matter experts and the site steward.

c. Consulting as needed with the university Web manager, director of university-wide Web marketing and/or director of communications regarding assigned web content.

G. Subject matter experts are responsible for ensuring the accuracy and currency of content in their assigned pages.

Applicability

A. This policy applies to:

a. All members of the Empire State University community and governs all Web storage and communications systems utilizing the university network or university name space.

b. All university and university-affiliated webpages and electronic publications that meet this document's definitions.

B. This policy does not apply to:

a. Pages that meet this document's definition of Web-based instructional materials or individual webpages. However, such

pages may, at the discretion of the creator or author, exhibit university-branded templates, the university name, symbols, emblems, logos, colors or seal. In so doing, these pages will be deemed as expressing the official voice of SUNY Empire and will be governed by this policy.

b. Pages that meet this document's definition of personal Web pages. Personal Web pages shall not exhibit the university-branded templates, the university name, symbols, emblems, logos, colors or seal, or recreate content or functionality provided by university or university-affiliated webpages or publications.

Violations/Non-compliance

A. Reports of Web content that is in alleged violation of this policy will be investigated and handled in accordance with the university's Web Presence Standards and Practices.

B. If Web content is found to be in violation of SUNY Empire policies, or if traffic to a page has a negative impact on the operation of the SUNY Empire system, the university has the authority to remove the page without prior notice and/or refer the complaint for appropriate action. Site stewards who have their pages removed may appeal the decision to the vice president for communications and government relations in accordance with the university's Web Presence Standards and Practices.

C. Empire State University complies with all New York state and federal disability regulations (including the Americans with Disabilities Act, as amended in 2008, and the Rehabilitation Act of 1973) and follows industry-standard Web accessibility guidelines (such as Section 508 of the Rehabilitation Act of 1973 and World Wide Web Consortium guidelines). Additional information can be found online at: http://www.sunyempire.edu/disabilityservices. Interpretation of accessibility requirements, policies or related questions and concerns may be directed to the SUNY Empire director of Accessibility Resources and Services at Disability.Services@sunyempire.edu, or 800-847-3000, ext. 2201, or the New York State Relay Service at 800-421-1220.

Exceptions/Exemptions

Requests for exceptions or exemptions to this policy shall be processed in accordance with the university's Web Presence Standards and Practices. Requests must be in writing and routed to the vice president for communications and government relations with copies to the university Web manager and director of university-wide Web marketing. The requestor must provide supporting evidence for the exception or exemption. The vice president for communications and government relations will consult with the Web manager, director of university-wide Web marketing and Web Presence Advisory Committee about whether or not to grant the exception or exemption. Final authority for the decision about the exception or exemption rests with the vice president for communications and government relations.

Purpose

This policy is consistent with the provisions of the Internet Security and Privacy Act (http://www.oft.state.ny.us/Policy/PolGenPrivacy.htm), the Freedom of Information Law (http://www.oft.state.ny.us/Policy/FOILRegs.htm), and the Personal Privacy Protection Law (http://www.oft.state.ny.us/Policy/PersPrivacyRegs.htm).

Background Information

This policy was last revised September 2023.

Definitions

The following definitions apply this policy:

Personal Information: Personal information collected by Empire State University typically includes an individual's name, email address, phone number, transcript, academic record, student organization membership, work history, work performance, letters of recommendation, demographic information, financial information, documentation provided to support financial aid applications (e.g., home address, social security number), donor information, IP addresses, browser and computer information, how users interact with the SUNY Empire website and electronic

communications, and in some cases medical and health information and information observed as part of a research study.

SUNY Empire: Shall mean Empire State University.

User: Shall have the meaning set forth in subdivision 8 of section 202 of the State Technology Law, which is, any natural person who uses the internet to access a state agency website.

Policy Statements

SUNY Empire is committed to protecting users' privacy while making it easier and more efficient to interact with SUNY Empire. Users can access much of SUNY Empire's website without providing personal information. On occasion, SUNY Empire requires information to provide services users request (e.g., an application to attend SUNY Empire or technical assistance). Our commitment to privacy is the core principle of SUNY Empire's online information practices.

On SUNY Empire's website, users are prompted to enable cookies and similar tools (e.g., trackers) to allow SUNY Empire to understand our users' experience.

SUNY Empire does not collect personal information unless users provide that information voluntarily by sending an email, completing an online form, or completing an online application.

This policy is consistent with the provisions of the Internet Security and Privacy Act, the Freedom of Information Law and the Personal Privacy Protection Law.

What We Collect and Why

When a user visits the SUNY Empire website, SUNY Empire may automatically collect the following information about the visit:

- The internet protocol address of the computer that accessed the website.
- The web page/URL from which the user accessed the current webpage.
- The type of browser, browser version, and browser operating system.
- The date and time of the user's request.
- The pages visited and the amount of time spent on each page.
- Links and buttons clicked by the user.

In addition, when users access a password-protected part of the website (e.g., MySUNYEmpire, Service Management Ticketing System), their username is collected automatically.

None of the above-mentioned information constitutes personal information under the Internet Security and Privacy Act (http://www.its.ny.gov/tables/privacy_policy/).

Information collected automatically is used to improve website content and to help SUNY Empire understand how users interact with it. This information is collected for statistical analysis and to determine what information is most important to our users. The information is not collected for commercial marketing purposes, and SUNY Empire is not authorized to sell or disclose this information.

Information collected is automatically deleted within 30 days of initial collection. Anonymized data is retained through a web analytics tool. This data is not associated with specific users but is presented in aggregate.

Information Collected When Users Complete an Online Form or Transaction

If a user voluntarily completes an online form, the personal information they provide will be retained in a manner appropriate to complete their transaction.

Caution: If a user submits personal information in an email, the information will be treated as if submitted by an adult and may, unless exempted from access by federal or state law, be subject to public access.

Cookies

Cookies are text files stored on a user's web browser to distinguish SUNY Empire's website users. This is standard practice. SUNY Empire may use cookies to enhance or customize a user's visit to SUNY Empire's website. Some web browsers retain cookies by default; users can adjust their browser settings to refuse or delete cookies, although this may limit the user's ability to use some website features.

Information and Choice

SUNY Empire does not collect personal information unless a user provides that information voluntarily by sending an email, responding to a survey, or completing an online form. A user's choice not to participate in these activities may limit ability to receive specific services or products through SUNY Empire's website, although it should not impact ability to browse or download information.

Disclosure of Information Collected Through SUNY Empire Website

Information collected through SUNY Empire's website and disclosure of that information are subject to provisions of the Internet Security and Privacy Act. SUNY Empire will only collect or disclose personal information collected through SUNY Empire's website if the user has consented to collection or disclosure of such personal information (e.g., logging into a password-protected page or disclosing information in a web form).

Voluntary disclosure of personal information to SUNY Empire by the user, whether solicited or unsolicited, constitutes consent for SUNY Empire to collect and disclose the information for the stated purposes, as was reasonably ascertainable from the nature and terms of the disclosure. SUNY Empire may collect or disclose personal information without consent if the collection or disclosure is:

1. Necessary to perform the statutory duties of SUNY Empire, or necessary for SUNY Empire to operate a program authorized by law, or authorized by state or federal statute or regulation.
2. Made pursuant to a court order or by law.
3. For the purpose of validating the identity of the user.
4. Information to be used solely for statistical purposes in a manner that does not identify any particular person.

Disclosure of information collected through SUNY Empire's website is subject to provisions of the Freedom of Information Law and the Personal Privacy Protection Law. For additional information about SUNY Empire's legal basis for collecting information, please see SUNY Empire's General Data Protection Regulations Privacy Polic (https://www.sunyempire.edu/policies/?search=cid%3D121764)y. www.sunyempire.edu/policies/?search=cid=121764 (http://www.sunyempire.edu/policies/?search=cid=121764)

SUNY Empire may disclose personal information to federal or state law enforcement authorities to enforce its rights against unauthorized access or attempted unauthorized access to SUNY Empire's information

technology assets and in accordance with SUNY Empire's Acceptable Use policies for employees (https://www.sunyempire.edu/policies/?search=cid%3D35729) and students (https://www.sunyempire.edu/policies/?search=cid%3D35658). https://www.sunyempire.edu/policies/?search=cid=35729 (https://www.sunyempire.edu/policies/?search=cid%3D35729)

Retention and Destruction of Personal Information

Information collected through SUNY Empire's website is retained by SUNY Empire in accordance with the records retention and disposition requirements of the New York State Arts and Cultural Affairs Law. SUNY Empire's internet service logs are retained for 30 days and then destroyed. Information about record retention and disposition schedules can be obtained through the internet privacy policy contact listed in this policy.

SUNY Empire will retain personal information for as long as there is a legitimate need to do so and in accordance with the SUNY Empire Records Retention and Disposition Policy and applicable federal and state law. Retention periods vary and are established considering our legitimate interests and all applicable legal requirements.

Access to and Correction of *Personal Information* Collected Through this Website

SUNY Empire is committed to facilitating the exercise of the rights granted to users by the General Data Protection Regulation (GDPR) in a timely manner. In the context of our processing activities subject to GDPR, users have the following rights regarding personal information:

- Access, correction and other requests. Users have the right to obtain confirmation of whether we processed their personal data, as well as the right to obtain information about the personal data we process about them. Users also have a right to obtain a copy of this data. Under certain circumstances, users may have the right to obtain erasure, correction, restriction, and portability of personal data.
- Right to object. Users have the right to object to receiving marketing materials from us by following the opt-out instructions in our marketing emails and text messages, as well as the right to object to processing personal data. In the latter case, we will assess the user's request and reply in a timely manner, according to our legal obligations.
- Right to withdrawal consent. For all processing operations based on user consent, users have the right to withdraw consent at any time, and we will stop those processing operations as allowable by law.

In addition to the rights provided by the GDPR, users may also have rights with respect to personal information pursuant to U.S. federal law, state law, and/or SUNY Empire policy. These include policies pertaining to student education records and policies pertaining to certain health records that SUNY Empire maintains.

To exercise these rights, except the right to file a complaint with an EU supervisory authority, users must submit a request to the GDPR SUNY Empire contact listed at the bottom of this notice. If we are not certain of the requestor's identity, we may ask for further personal information to be used for the purposes of replying to the request.

Confidentiality and Integrity of Personal Information Collected Through SUNY Empire Website

SUNY Empire is committed to protecting personal information collected through this website against unauthorized access, use, or disclosure. SUNY Empire limits employee access to personal information collected through SUNY Empire's website to employees who require access to the information to perform their official duties. Employees who have access to this information must follow appropriate procedures in connection with personal information disclosures.

SUNY Empire does not sell users' personal information and only shares personal information with third parties if there is a legitimate institutional need to do so. SUNY Empire may share users' personal information with the following recipients:

- SUNY System Administration and other campuses within SUNY to govern, administer, and improve the SUNY system.
- SUNY Empire's affiliated entities, including the SUNY Research Foundation, individual campus foundations, campus faculty/student associations, and other affiliated entities to provide ancillary services.
- SUNY Empire service providers that need access to a user's personal information to provide services necessary to fulfill SUNY Empire's mission or improve the student or employee experience.
- Accrediting agencies to obtain or maintain accreditations for SUNY Empire's (and its affiliates') programs.
- Federal, state, and local governments or regulatory authorities as required by law or as necessary to fulfill SUNY Empire's mission.

SUNY Empire may provide anonymized data developed from personal information to third parties, such as government entities and research collaborators. Such anonymized data is outside the scope of this policy. Users have the ability to opt out of Google Analytics data collection through the Google Analytics Opt-out Browser Add-on (https://tools.google.com/dlpage/gaoptout/?hl=en-GB).

Security of Users' Personal Information

SUNY Empire has implemented procedures to safeguard the integrity of its information technology assets, including multi-factor authentication, monitoring, auditing, and encryption. Security procedures have been integrated into the design, implementation, and day-to-day operations of SUNY Empire's website as part of SUNY Empire's continuing commitment to the security of electronic content and electronic transmission of information.

For website security purposes and to maintain website availability, SUNY Empire uses software to monitor traffic to identify unauthorized attempts to upload, change information, or damage SUNY Empire's website.

Disclaimer

Information provided in this privacy policy should not be construed as giving business, legal, or other advice, or warranting as failproof the security of information provided through this website.

ACCT: Accounting (Undergraduate)

ACCT 1005 Accounting for Decision Makers (6 Credits)
This course covers the fundamentals of financial and managerial accounting from the perspective of users of accounting data. It emphasizes the relevance of accounting information in all areas of business and aims at forming students' skills in preparing, interpreting, analyzing, presenting and using financial and managerial data. Topics include the accounting process; analysis of financial statements and its components such as assets, liabilities and owner's equity; cost analysis, planning, control; and capital budgeting decisions. These components are connected to practical implications of the business decision-making process. This course is appropriate for those pursuing a non-accounting major/concentration degree in the area of Business, Management and Economics as well as for students studying in other areas who need to understand the accounting process. It does not meet the prerequisites for further accounting study. Students cannot count the credit for Accounting for Decision Makers in their degree plan if they also take Introductory Accounting I "FInancial" and/or Introductory Accounting 2 "Managerial", since the course contents are similar, yet in less technical depth. The course satisfies quantitative aspects of business. This course was previously BME-211956 Accounting for Decision Makers.

ACCT 1998 Individualized Studies in Accounting (ACCT) (1-8 Credits)
Students have the opportunity to develop individualized studies with their mentor in Accounting (ACCT). Registration for this class must be approved by the student's mentor or advisor.

ACCT 2005 Introductory Accounting I: Financial Accounting (4 Credits)
The objective of this study is to introduce students to the fundamental concepts of financial accounting systems and principles, including financial statements preparation, interpretation and communication to external parties and managers. Among topics covered are: the accounting cycle for gathering, recording, summarizing, reporting and analyzing of accounting data. The course includes an overview of accounting for assets, liabilities, stockholders' equity, revenues and expenses including cash, investments, accounts receivable, inventories, plant assets and equipment, intangible assets and natural resources, short and long term liabilities, in addition to basic principles of internal control and the role of ethics in accounting profession. This course covers professional ethics and social responsibility in business. Notes: Students cannot count the credit for Accounting for Decision Makers (ACCT 1005) in their degree plan if they also take Introductory Accounting I (ACCT 2005) 'Financial' and/or Introductory Accounting II (ACCT 2010) 'Managerial', since the course contents are similar. The course satisfies quantitative aspects of business. This course was previously BME-212054 Introductory Accounting 1.

ACCT 2010 Introductory Accounting II: Managerial Accounting (4 Credits)
The course is designed to expand on the knowledge gained of financial accounting theory, accounting information systems cycles and concepts by focusing more in depth on the manufacturing environment and the use of accounting information for planning, controlling, and decision-making internally by the management and externally by other interested parties. It covers specialized financial reporting issues such as preparing, interpreting and using the statement of cash flows, financial statements analysis and budgeting, long and short-term financial investment and production decisions and other cost analysis concepts including incremental cost analysis, cost-volume-profit analysis techniques and incorporating the time value impact on financial and managerial decisions. This course covers professional ethics and social responsibility in accounting. Notes: The course content is similar to, and more comprehensive than, Accounting for Decision Makers (ACCT 1005). Therefore, students cannot count the credit for both of these courses in their degree plan. The course satisfies quantitative aspects of business. This course was previously BME-212064 Introductory Accounting 2. Prerequisites: ACCT 2005, or equivalent.

ACCT 2998 Individualized Studies in Accounting (ACCT) (1-8 Credits)
Students have the opportunity to develop individualized studies with their mentor in Accounting (ACCT). Please contact your mentor/advisor for more details.

ACCT 3005 Accounting For Governmental & Not-For-Profit Organizations (4 Credits)
This course is designed to enhance students' comprehension of governmental and nonprofit entities, the unique regulatory standards that guide their accounting and reporting as well as operational considerations that impact tax-exempt status and the integrity of the organization's mission. Topics include: fund accounting, principles of accounting and financial reporting for federal, state and local governments, audits for governmental entities, budgets for resource management, planning and controlling cash and temporary investments, and cost determination for governmental and nonprofit entities. Also covered in the course are accounting and financial reporting for specific entities such as college and universities, health care entities, voluntary health and welfare agencies, and charitable organizations. Note: The course satisfies quantitative aspects of business. This course was previously BME-213204 Accounting for Governmental and Not-for-Profit Organizations. Prerequisites: ACCT 3025 and ACCT 3030, or equivalent.

ACCT 3010 Cost Accounting (4 Credits)
This course introduces students to cost accounting methods and theories used in manufacturing, merchandising and service businesses. Topics include cost behavior, cost accumulation systems and techniques, management planning and control systems, relevant cost information for short-term decision-making and long-term and capital budgeting decisions. It also includes detailed coverage of cost-volume-profit analysis; job order, process costing and standard costing systems. Additional topics include activity based and just-in-time costing, building operational and capital budgets, absorption and variable costing, and strategic cost analysis. Highly Recommended (not required): Introductory Accounting II (ACCT 2010) within the past three years. Students who have completed only Accounting for Decision Makers (ACCT 1005) may not take this course. The course satisfies quantitative aspects of business. This course was previously BME-213104 Cost Accounting. Prerequisites: ACCT 2005 and ACCT 2010, or equivalents and proficiency in using spreadsheet software.

ACCT 3015 Federal Income Tax I: Individual Income Tax (4 Credits)
The course provides an overview of the Federal personal income tax law, its history, related ethical concepts and application of tax code. Among topics covered are the bases for income tax computations including the concepts of filing status and allowances, exemptions, taxable income sources including self-employment, gross income, adjusted gross income, deductions, credits, alternative minimum taxes, and preparation of a simple-moderate personal Federal income tax returns and basic cases of tax planning reinforcing tax research and communication skills. This course covers in its components professional ethics and social responsibility, research and communication skills in business. Highly Recommended (not required): Intermediate Accounting I (ACCT 3025) and Intermediate Accounting II (ACCT 3030) and Cost Accounting (ACCT 3010). Note: The course satisfies quantitative aspects of business, research, professional ethics, and communication skills. This course was previously BME-213604 Income Tax 1. Prerequisites: ACCT 2005 and ACCT 2010, or equivalents.

ACCT 3020 Federal Income Tax II: Business Income Tax (4 Credits)
The course provides an overview - code and applications - of the Federal income tax law and provisions relevant to businesses enterprises in form of: partnerships, corporations, and gift, estates and trusts taxes [from family tax planning perspectives]. Among topics covered are business income tax implications of various transactions pertinent to legal status of business and its operations, formation, equity distribution, liquidations, reorganization, consolidations, redemption, and corporation accumulated earnings tax. It incorporates tax audit, penalty, assessment, appeal process, regulatory compliance procedure and offers practical experience with preparing simple-moderate Federal income tax returns for C-corporations, S-corporations, partnerships, and estates/gift, and/or Trusts. The course employs research in locating applicable sections of tax code, court decisions and IRS rulings in solving tax planning cases and reinforcing appropriate professional communications. This course covers in its components professional ethics and social responsibility, research and communication skills in business. Highly Recommended (not required): Knowledge of topics covered in the following courses might be helpful to students before enrolling in this course: Intermediate Accounting I (ACCT 3025) and Intermediate Accounting II (ACCT 3030) and Cost Accounting (ACCT 3010). The course satisfies quantitative aspects of business, research, professional ethics, and communication skills. This course was previously BME-213624 Income Tax 2. Prerequisites: ACCT 3015, or equivalent.

ACCT 3025 Intermediate Accounting I (4 Credits)
The course examines accounting theory and generally accepted accounting principles, concepts and measurement of financial accounting principles in various types of businesses including corporate settings. Among topics covered are revenue and expense recognition, income statement and balance sheet analyses, stockholders' equity and time value analysis of cash inflows and outflows. The course also covers cash management; receivables; inventories; investment measurement, long-term assets management including depreciation methods, intangible assets, and current and long-term liabilities. Notes: Students should have completed the Financial and Managerial courses within the past three years. Students who have completed only Accounting for Decision Makers (ACCT 1005) may not take this course. The course satisfies quantitative aspects of business and covers in its components professional ethics and social responsibility skills in business. This course was previously BME-213014 Intermediate Accounting 1. Prerequisites: ACCT 2005 and ACCT 2010, or equivalents and knowledge of spreadsheet software.

ACCT 3030 Intermediate Accounting II (4 Credits)
This course is a continuation of the study of Intermediate Accounting 1 with main emphasis on more technically complex transactions. Topics include valuation and measurement of long-term liabilities, capital stock transactions, earnings measurement, securities and investment valuations, revenue recognition, capital and operating leases, pension funds accountability, income tax assessment and financial statement analysis. Emphasis is placed on special situations, error correction, business problems and communication with stakeholders and statement users and professional ethics. Highly Recommended (not required): Intermediate Accounting I (ACCT 3025) course within the past three years. Use of spreadsheet software. Notes: Students who have completed only Accounting for Decision Makers (ACCT 1005) may not take this course. The course satisfies quantitative aspects of business and covers in its components professional ethics and social responsibility skills in business. This course was previously BME-213024 Intermediate Accounting 2. Prerequisites: ACCT 3025, or equivalent.

ACCT 3035 Principles of Fraud Examination & Financial Forensics (4 Credits)

This course introduces the principles of fraud examination and financial forensics as an oversight process for the private and public sector as well as not-for-profit-organizations. Students learn the fundamental tools and knowledge of fraud examination and fraud taxonomy using actual real-world fraud cases, research studies and educational materials provided by the Association of Certified Fraud Examiners. Emphasis is placed on understanding the causes of fraud, criminology theories, the investigation process including interviewing techniques and preparation for fraud trial, prevention of fraud, and resolution techniques. Students consider the financial impact of fraud, organizational culpability of fraud, disciplinary mechanisms and ethical standards. This course covers in its components professional ethics and social responsibility, research and communication skills in business. This course might be of particular interest to students pursuing concentrations in Criminal Justice as well as Accounting or any business or related discipline. The course satisfies business and professional ethics and social responsibility, and communication guidelines. This course is cross listed with ACCT-3035. This course was previously BME-213404 Principles of Fraud Examination and Financial Forensics. Prerequisites: Knowledge gained through experience or courses in the following subjects: Financial Accounting (through a course such as Introductory Accounting; The U.S. legal system (through a course such as Legal Environment of Business 1 or Introduction to Criminal Justice or Introduction to Law and the Legal System); human behavior (through a course such as Introduction to Psychology, Criminology or Deviance and Social Control). Cross-listed with CRJS 3036.

ACCT 3998 Individualized Studies in Accounting (ACCT) (1-8 Credits)

Students have the opportunity to develop individualized studies with their mentor in Accounting (ACCT). Registration for this class must be approved by the student's mentor.

ACCT 4005 Accounting Information Systems (4 Credits)

Students learn about trends and issues related to the design of Accounting Information Systems (AIS) that provide timely information to decision makers to add value, protect information, assess security risks and comply with mandates. Topics include the connections between the information system and the need for financial control, documentation, record keeping and reporting. Student projects may include hands-on experience in using accounting software to design an accounting information system for a small-to-medium size business. This course covers in its components' technology implementation, information management skills, and data analysis in business and accounting. Basic computer skills are required as well as access to a personal computer onto which accounting software can be downloaded and used. The course satisfies information management guidelines and professional technical skills. This course was previously BME-213214 Accounting Information Systems. Prerequisites: ACCT 3025 and ACCT 3030 or equivalent.

ACCT 4010 Advanced Accounting (4 Credits)

The course applies financial accounting theory and practices with in-depth analysis to more complex technical business transactions and problems dealing with financial reporting and operations of partnerships, corporations, governmental and not-for-profit organizations. This includes the formation, distribution, termination, reorganization and liquidation of organizations, mergers and acquisition, preparation of consolidated financial statements and reporting, multinational enterprises and foreign currency transactions and translations, basic coverage of fund accounting for government, not-for-profit organizations, and accounting for estates and trusts. This course covers in its components global and international aspects of business accounting. Note: The course satisfies understanding organization in a global context and quantitative skills guidelines. This course was previously BME-214014 Advanced Accounting. Prerequisites: ACCT 3025 and ACCT 3030, or equivalent.

ACCT 4015 Auditing (4 Credits)

The course covers an in-depth analysis of auditing standards and procedures for the purpose of providing an independent professional opinion on financial statements and reports with understanding of the differences between internal, operational, compliance, and external audits. Among topics covered are: audit planning and design, procedures and standards, evidence gathering and documentation, audit report and assurance services, internal controls and risk assessment, professional ethics and code of conduct, legal and professional responsibilities of auditors and relationship with clients during planning, designing, performing the audit, and preparation of the auditor's report. This course covers in its components professional code of ethics and social responsibility, and communication skills in business. Highly Recommended (not required): Knowledge of topics covered in Advanced Accounting (ACCT 4010) and Accounting Information Systems (ACCT 4005), access to a personal computer to download and use auditing software or deal with analytical spreadsheet analysis to perform among others substantive tests and tests of control. Note: The course satisfies the business and professional ethics and social responsibility, and communication guidelines. This course was previously BME-214024 Auditing. Prerequisites: ACCT 3025 and ACCT 3030, or equivalents.

ACCT 4020 Financial Statements Analysis (4 Credits)

This course exposes students to the analytical tools used in evaluating a company's performance and its competitive and sustainable financial health. Among other topics, it covers risk, liquidity, operational and profitability analysis using various financial ratios, cash flows and earnings quality, and forecast business value using accounting and others valuation methods. Students will learn how to read and interpret financial statements of corporations, create common valuation ratios and then use this information to determine the corporation's value and investment potential. The course focuses on statements of publicly traded corporations. Prerequisites (must complete before registering): Intermediate Accounting I (ACCT 3025) and Intermediate Accounting II (ACCT 3030) or equivalents, (Advanced Accounting 1, 2 and 3 in Tirana IP)

ACCT 4998 Individualized Studies in Accounting (ACCT) (1-8 Credits)

Students have the opportunity to develop individualized studies with their mentor in Accounting (ACCT). Registration for this class must be approved by the student's mentor.

ADDS: Addiction Studies (Undergraduate)

ADDS 1998 Individualized Studies in Addiction Studies (ADDS) (1-8 Credits)
Students have the opportunity to develop individualized studies with their mentor in Addiction Studies (ADDS). Please contact your mentor/advisor for more details.

ADDS 2005 Addiction & Dependency: Introduction (4 Credits)
This course will focus on understanding of addictive disorders and the impact of addiction on the individual and the various social systems with which the person interacts. Topics will include categories of psychoactive substances and how these affect behavior, mood, and cognition. How addiction affects the individual, family, and community. The study will also examine the various models of addiction and the impact of addiction on specific populations. Substance use related addictions, gambling disorder, and process addictions will be examined. This course is aligned with the Community and Human Services Area of Study guidelines for Knowledge of Human Behavior. This course is aligned with the BS in Addiction Studies program guidelines for Knowledge, Skills and Application. This course was previously CHS-252184 Addiction and Dependency: Introduction. Prerequisites: Introduction to Psychology, Human Development, Introduction to Human Services, or equivalent.

ADDS 2040 Introduction to Pharmacology of Psychoactive Drugs (4 Credits)
This course examines how legal and illegal substances, including alcohol, tobacco and other psychoactive drugs, affect the body, the brain, mood, cognition, and behavior. The varying actions of drug categories, including absorption, metabolism, elimination, and effects of psychoactive drug categories will be explored, including differences due to health, age, and gender. The rationale for medications in the treatment of substance use and related mental disorders will be examined. Current trends in the use of psychotropic medications, advantages, and limitations of medication use. This course meets the guideline of Knowledge in the Addiction Studies program. Prerequisites: None. Corequisites: None.
Attributes: Liberal

ADDS 2998 Individualized Studies in Addiction Studies (ADDS) (1-8 Credits)
Students have the opportunity to develop individualized studies with their mentor in Addiction Studies (ADDS). Registration for this class must be approved by the student's mentor.

ADDS 3005 Interventions for Substance Use Disorders (4 Credits)
This study will provide a deeper understanding of several models of practice in the substance use field. Students will integrate various interventions, skills, and treatment modalities needed to design effective treatment interventions for working with these populations. This course is aligned with the Community and Human Services Area of Study guidelines for Skills & Application. This course is aligned with the BS in Addiction Studies program guidelines for Skills and Application & Integration. This course was previously CHS-253484 Interventions for Addiction Disorders.

ADDS 3010 Substance Use Interventions in the Workplace (4 Credits)
This course identifies the issues, factors, and realities of substance use in the workplace. The role of human services worker in addressing substance abuse in the workplace will be explored. Strategies for assessing substance use in the workplace, as well as an examination of policy, programs, and interventions will be examined. This course is aligned with the Community and Human Services Area of Study guidelines for Skills & Application. This course is aligned with the BS in Addiction Studies program guidelines for Skills and Application & Integration.

ADDS 3020 Substance Use with Special Populations (4 Credits)
This course provides an overview of the unique problems and needs of diverse populations with substance use and abuse issues. The study focuses on the application of culturally sensitive social intervention strategies. Populations to be studied include but are not limited to, women, dually diagnosed clients, the LGBTQ community, and trauma survivors. This course is aligned with the Community and Human Services Area of Study guidelines for Skills & Application and Diversity. This course is aligned with the BS in Addiction Studies program guidelines for Diversity.

ADDS 3122 Virtual Addictions in the 21st Century (4 Credits)
This course will examine addictions related to digital cultures, the populations most at risk, and warning signs that loved ones, teachers, and other professionals would want to take note of. This course will also explore possible risk and protective factors. Students will also develop possible prevention and/or intervention strategies to combat these types of behavioral addictions. This course is aligned with the Community and Human Services Area of Study guidelines for Skills & Application.
Attributes: Liberal

ADDS 3998 Individualized Studies in Addiction Studies (ADDS) (1-8 Credits)
Students have the opportunity to develop individualized studies with their mentor in Addiction Studies (ADDS). Registration for this class must be approved by the student's mentor.

ADDS 4005 Adolescence & Addictions (4 Credits)
This course explores the various substance use and addiction disorders affecting adolescents. Topics may include: developmental processes affected by substance use and addiction disorders; research about risk factors, influences, and trajectories of addiction disorders in adolescence; application of DSM-5 substance use and addiction disorder criteria to adolescents; gambling and gaming addiction, assessing addiction and substance use disorders in adolescents; and engagement and treatment of adolescents with addiction and substance use disorders. The interaction between substance use, addiction and mental health disorders will be explored. This course is aligned with the Community and Human Services Area of Study guidelines for Knowledge of Human Behavior and Skills & Application. This course is aligned with the BS in Addiction Studies program guidelines for Diversity. Prerequisites: Introduction to Psychology, Abnormal Psychology, Human Development, Introduction to Human Services, or equivalent.
Attributes: Liberal

ADDS 4006 Women and Addiction (4 Credits)
This study will explore the intersection of women and addiction by providing an overview of issues related to women with substance use disorders and appropriate and effective gender-responsive treatment. Additionally, this course will explore addiction issues related to trauma and differences in the physiological and neurobiology impact in women with substance use disorders. This course is aligned with the Community and Human Services Area of Study guidelines for Skills & Application.

ADDS 4010 Advanced Substance Use Counseling (4 Credits)
This advanced examination of substance use treatment focuses on substance-abusing clients and their families, encouraging them to form a heterogeneous group that is treated from an individualized perspective. Practical skills and treatment strategies that address substance abuse as a disease and as a complex problem will be explored. The concept of recovery will be addressed as a process that is holistic, individualized and functionally based. Using an integrated approach, personalized assessment, behavior change strategies, and effective treatment will be examined. This course is aligned with the Community and Human Services Area of Study guidelines for Skills & Application. This course is aligned with the BS in Addiction Studies program guidelines Skills and Application & Integration.

ADDS 4015 Evidence-Based Substance Use Counseling (4 Credits)
The purpose of this study is to compare evidence-based counseling strategies. The study will review and examine the work of the most prominent psychosocial treatment approaches. The basic assumptions, theories, and specific actions and strategies that can be utilized by the helper from start-to-finish will be reviewed. This course is aligned with the Community and Human Services Area of Study guidelines for Skills & Application. This course is aligned with the BS in Addiction Studies program guidelines for Skills and Application & Integration.

ADDS 4998 Individualized Studies in Addiction Studies (ADDS) (1-8 Credits)
Students have the opportunity to develop individualized studies with their mentor in Addiction Studies (ADDS). Registration for this class must be approved by the student's mentor.

ALLH: Allied Health

ALLH 3010 Spanish for Health Care Professionals: Advanced (4 Credits)
This course has the major purpose of teaching Spanish to health care professionals who need to assess, treat, reassure or educate patients who do not speak English and come from countries where Spanish is their native tongue. This course provides a task-based approach to using the Spanish language in a health care environment. Through intensive practice, advanced students will hone their Spanish communication skills and develop strategies for ensuring understanding and accuracy while relaying critical information. They will also learn to identify cultural differences in attitudes towards health care and medicine and how to address these cultural differences in the health care job place. Language learning in this course will focus on advanced communication skills, advanced vocabulary and intermediate-to-advanced grammatical structures. All language skills will be practiced: listening, speaking, reading and writing. Students will be required to practice weekly speaking and listening skills. for oral practices at least twice a week. Special accommodations will be made for army students. Prerequisites: 75% on the placement test (http://s.esc.edu/spanishplacement) or equivalent. Cross-listed with SPAN 3010.
Attributes: Foreign Language Gen Ed, *World Languages Gen Ed, Liberal

ALLH 3020 Quality Systems and Improving Health Care Outcomes (4 Credits)
This course provides an overview of quality improvement (QI) and quality assurance (QA) in health care and public health settings. The focus of this course will be on the methods implemented to ensure patient safety and healthcare quality that is critical to all healthcare practices. The course focus will provide direct care practitioners and support team members involved with patient care an introduction to the knowledge and the skills to develop a patient safety plan and monitor an ongoing quality improvement plan. Students will build a foundational knowledge of healthcare quality to provide patient safety and improve patient outcomes by understanding how to use, develop, and track key metrics that are indicative of successful outcomes. The course will review those metrics tracked by regulatory agencies and students will evaluate how to develop self-imposed facility specific measurements that are aimed to improve patient outcomes. Throughout the course, students will learn information and systems that will aid them in the evaluation of identifying the need, designing, and implementation of quality improvement plans as they will learn to assess situations from a quality improvement perspective. A course in statistics is recommended prior to taking this course.

ALLH 3025 Health Research Methods (4 Credits)
This course is intended to provide an understanding of research methods used within the health professions. The course prepares students at the baccalaureate level to critique, interpret and apply evidence-based research within their healthcare field. This course provides the foundational steps to complete a research project. This course satisfies the university's liberal arts and science requirements.
Attributes: Liberal

ALLH 3030 Contemporary Applications of Diversity, Equity, Inclusion, and Social Justice in Healthcare (4 Credits)
This course will apply diversity, equity, inclusion, and social justice (DEISJ) principles to health care practice in new or complex environments. Students will synthesize concepts of DEISJ in addressing health disparities and the care of various racial/ethnic and other marginalized populations. Learners will reliably demonstrate the fundamentals of cross-cultural communication, and the planning and delivery of culturally competent health interventions and programs.
Attributes: *Diversity Gen Ed, Liberal

ALLH 3080 Prior Learning Workshop for Health Professionals - Advanced (4 Credits)
This course focuses on individualized Prior Learning Assessment (iPLA) for healthcare professionals. This course is taught by a health professions educator for students requesting advanced level credit. The purpose of the course is to help you think through what you've learned and how you've gained that knowledge, and to translate that thinking into appropriate requests for advanced level college credit appropriate to your degree plan. The course alternates and interweaves very concrete information (e.g., how SUNY Empire's prior learning assessment process works) and more abstract investigation (e.g., the nature of college-level learning). Each type of investigation informs the other. The course will help students through the process of describing and documenting their knowledge through application conceptual framework/theory and different approaches to prior learning assessment. In this way, the course will add to the student's knowledge about learning and assessing learning. Students are required to include evidence-based research to support their statements about their knowledge in each topic area. Advanced level writing incorporating research, analysis, evaluation, and synthesis is required for all PLA advanced level credit requests throughout the course to demonstrate quality of thought and depth and breadth of knowledge. Note: Students need to have at least 2 potential topic areas for prior learning assessment; please consult: Should I Pursue Credit through PLA? (https://courses.lumenlearning.com/suny-esc-educationalplanning/chapter/should-i-pursue-credit-through-pla/) for a brief self-assessment to determine if this course is appropriate. Students should also consult with their mentor before requesting to enroll in this course to determine appropriate topics to pursue for PLA. Important Note – grades in this course are not linked to receipt of PLA credit. Students still must go through the PLA evaluation process. The course instructor and student's mentor work with the student on the PLA submission process.
Attributes: Liberal

ALLH 3996 Special Topics: Prior Learning Workshop for Health Professionals (3-4 Credits)
The content of this course will vary by term and section. Students may repeat this course for credit as long as the topic differs. Please refer to the Term Guide for course topic offerings.
Attributes: Liberal

ALLH 3997 Special Topics in Allied Health (3,4 Credits)
The content of this course will vary by term and section. Students may repeat this course for credit as long as the topic differs. Please refer to the Term Guide for course topic offerings.

ALLH 4005 Transition to Baccalaureate Health Professions (4 Credits)
In this course, students will plan a program of study leading to the baccalaureate degree, focused around students' understanding of the health professions, as well as their analysis of their own academic and professional skills, experiences and goals. During this process, students identify concepts and skills needed to perform effectively in the baccalaureate health professions. Students will be introduced to the core competencies for health care professionals and the role of interprofessional education in the health professions. This course was previously EDU-234344 Educational Planning: Transition to Baccalaureate Health Professions.

ALLH 4998 Individualized Studies in Allied Health (ALLH) (1-8 Credits)
Students have the opportunity to develop individualized studies with their mentor in Accounting (ALLH). Registration for this class must be approved by the student's mentor.

AMST: American Studies (Undergraduate)

AMST 1005 Introduction to American Studies (4 Credits)
This course introduces students to the interdisciplinary field of American Studies. Students will analyze various primary and secondary sources relate to the understanding and evolution of 'American identity,' different worldviews that make up 'American culture,' and the image of America in the world. Concepts to be explored may include identity, law, policy, gender, history, culture, nation, class, race, sexuality, society.
Attributes: American History Gen Ed, Liberal

AMST 1998 Individualized Studies in American Studies (AMST) (1-8 Credits)
Students have the opportunity to develop individualized studies with their mentor in American Studies (AMST). Please contact your mentor/advisor for more details.

AMST 2998 Individualized Studies in American Studies (AMST) (1-8 Credits)
Students have the opportunity to develop individualized studies with their mentor in American Studies (AMST). Please contact your mentor/advisor for more details.

AMST 3005 American Cultural History (4 Credits)
This study exposes students to the history of the United States through the anthropological lens of ethnology (i.e., the study of the characteristics of various peoples and the relationships between them). Students will compare the experiences of various ethnic, religious, gender, and racial groups, and the results of their social interactions in order to better understand the development of the US from the people themselves. The intent of this study is to utilize the concepts, materials, and tools employed by the disciplines of history and ethnology to uncover the various perspectives that make up US identity. Prerequisite (must complete before registering): US History to 1865: What Does it Mean to be a Free Nation? (HIST 2025), or equivalent Note: Pairs well with HIS 4000 American Ethnic History.
Attributes: American History Gen Ed, Social Science Gen Ed, Liberal

AMST 3020 History of American Medicine & Public Health (4 Credits)
This advanced study explores the history of American medicine and public health from colonial times to the present. Topics include early American epidemics such as smallpox, colonial medicine, midwifery, the professionalization of medicine in America, 19th century health reform, the Civil War, modern medicine and the welfare state, biomedical research, vaccines, 20th century epidemics such as AIDS, and many other topics. Students read primary documents and scholarly articles, and write scholarly essays. Students must possess advanced college level research and writing skills to succeed in this course.
Attributes: American History Gen Ed, Liberal

AMST 3025 Reel America (4 Credits)
This advanced study explores the history of the United States through its films. Students will learn how films both reflect and shape American history, culture and society. Students will view and analyze films in terms of their historical placement and content as well as utilize interdisciplinary methods to explore themes.
Attributes: American History Gen Ed, Liberal

AMST 3030 Slavery, its Legacies, and Contemporary Racial Issues in the United States (4 Credits)
This course focuses on the systematic enslavement of Africans in colonial North America from the seventeenth century to emancipation. The course will explore ideas of race, racism, identity, and oppression in the United States as enduring effects of the institution of slavery. Students will examine ways in which nationalism, economics, and politics have been racialized to justify discrimination and exploitation of various groups across the U.S. In addition, the course will demonstrate how legacies of slavery persist in contemporary societies as forms of forced labor, abuses of power, coercion, or various ways of silencing, and human trafficking. Prerequisites: None. Corequisites: none.
Attributes: *Diversity Gen Ed, Liberal

AMST 3998 Individualized Studies in American Studies (AMST) (1-8 Credits)
Students have the opportunity to develop individualized studies with their mentor in American Studies (AMST). Please contact your mentor/advisor for more details.

AMST 4005 Film & American History (4 Credits)
This advanced study is designed for students who have taken the course, Reel America, or who have a background in film history from another source. Students must know how to view and evaluate films from a historical (rather than technical, literary or other mode of analysis) perspective before they begin this study. Students will select an era of American film history (e.g., Early 20th Century, The Great Depression, World War II, The film noir era, The Cold War, etc.) and do a focused historical study of the films pertinent to that era. Prerequisite (must complete before registering): Reel America (AMST 3025)
Attributes: American History Gen Ed, Liberal

AMST 4010 History of Mental Illness in America (4 Credits)
This advanced study explores perceptions of and treatments for mental illness in America from colonial times, when mentally ill persons were sold with their cages to the highest bidder, to today's explosion of mental illness diagnoses, and the drugs used to treat them. Prerequisites: US History Survey or equivalent Students should possess advanced college level reading and writing skills.
Attributes: American History Gen Ed, Liberal

AMST 4998 Individualized Studies in American Studies (AMST) (1-8 Credits)
Students have the opportunity to develop individualized studies with their mentor in American Studies (AMST). Please contact your mentor/advisor for more details.

ANTH: Anthropology (Undergraduate)

ANTH 1010 Introduction to Cultural Anthropology (4 Credits)
This course introduces students to the concepts, contributions, and methods of cultural anthropology, stressing the insights they offer into contemporary social issues, both in the US and abroad. The study examines the holistic perspective that anthropologists use in their discipline which is based primarily on the participant observation research method. The student will explore a variety of human societies and cultures around the world. Topics may include: kinship and social organization; beliefs, ritual, and religious systems; family and marriage; political and economic systems; science, technology, and digital ethnography; and systems of social stratification (race, ethnicity, gender, etc.).
Attributes: Other World Civilization Gn Ed, Social Science Gen Ed, *Social Sciences Gen Ed, *World Hist & Glb Awnss Gen Ed, Liberal

ANTH 1402 Introduction to Biological Anthropology (4 Credits)
This course examines biological (or physical) anthropology, or the evolution of the human species and the nature of contemporary human variation. To establish a framework for the study of human evolutionary biology, principles of evolutionary theory, inheritance, population biology and genetics will be examined. As humans are classified within the Order Primates, we will also study the evolution, ecology, and behavior of our closest living relatives: prosimians, monkeys and apes. Fossil evidence for human evolution will then be considered through comparisons with non-human primate ecology and evolution to reconstruct prehistoric hominid evolution.
Cross-listed with BIOL 1402.
Attributes: Natural Science Gen Ed, *Natural Science Gen Ed, Liberal

ANTH 1998 Individualized Studies in Anthropology (ANTH) (1-8 Credits)
Students have the opportunity to develop individualized studies with their mentor in Anthropology (ANTH). Please contact your mentor/advisor for more details.

ANTH 2998 Individualized Studies in Anthropology (ANTH) (1-8 Credits)
Students have the opportunity to develop individualized studies with their mentor in Anthropology (ANTH). Please contact your mentor/advisor for more details.

ANTH 3015 Environmental Anthropology (4 Credits)
How do we define nature, ecology and environment? How do we understand the relationship between humans and the environment and how does this impact local and global communities? How do social structures such as race, ethnicity, gender and class influence who gets access to what? What is the role of state and governmental 'Scientific' agencies in deciding how the 'environment' is defined and responded to?
Attributes: Liberal

ANTH 3020 Families in Global Perspective (4 Credits)
This course engages students in a cross cultural study of the family. If we understand kinship and family to be among the central structuring and organizing features in any society, it is clear that to understand families in any society we must also understand the society's distinctive history, culture, economy and institutions. Looking at family and kinship holistically, within the broader context of culture, this course examines the cultural construction of families and the roles of males, females, old and young within families across the globe.
Attributes: Other World Civilization Gn Ed, *World Hist & Glb Awnss Gen Ed, Liberal

ANTH 3022 Language & Culture (4 Credits)
This course explores an intertwined relationship between language and culture. It is designed to help students become familiar with the theory and research related to issues such as the ways in which language behavior reflects diverse cultural patterns; the role of language in the processes through which children and adolescents become members of particular groups in society; and the relationship between class, race, gender. This course was previously CUL-224364 Language and Culture. Prerequisites: Advanced writing skills.
Cross-listed with LING 3020.
Attributes: Humanities Gen Ed, Liberal

ANTH 3025 Health & Illness in Global Perspective (4 Credits)
This course explores human health, illness, and medicine through an interdisciplinary and cross-cultural perspective. Examining a range of societies and cultures, the course focuses on issues such as: the health effects of modernization, development and globalization; the social determinants of health; the social construction of disease and suffering; and biomedical approaches to reproduction and aging. Health, illness, and healing can only be understood in the context of a society's distinct culture and features. A holistic anthropological approach is used to explore healing practices and well-being in several cultural contexts. Medical practices are viewed as cultural systems and their relationships with other social structures and institutions are examined in comparative perspective. This course was previously SOC-283164 Health, Illness and Society.
Attributes: Other World Civilization Gn Ed, *World Hist & Glb Awnss Gen Ed, Liberal

ANTH 3030 Immigration Today: Gender & Family (4 Credits)
Millions of people move to make their livelihood in a country that is not their birthplace; transnational migration is the movement of such people across national boundaries. This course examines how contemporary migration affects family life both for those who migrate and for those left behind. We will explore how gender, race and class shape who migrates, how they migrate, and where they migrate. The course addresses topics such as: race and immigration policy; changes in gender relations, expectations, and intimacy among migrants; and the role of global economics in fostering and shaping contemporary mobilities. This course was previously SOC-283214 Immigration Today: Gender & Family.
Attributes: Other World Civilization Gn Ed, *Diversity Gen Ed, Liberal

ANTH 3035 Latin American & Caribbean Societies (4 Credits)
This course explores the cultural and historical diversity of the Caribbean and Latin American region from pre-colonial civilizations to the present. Throughout the course we will explore race/ethnic, class and gender dynamics in a region shaped by colonial and imperial powers which brought together Indigenous, African, and European cultures. Students will analyze some of the characteristics and forces (geographic, demographic, cultural, historical, etc.) that both tie these nations together, and at the same time mark them as distinct.
Attributes: Other World Civilization Gn Ed, *Diversity Gen Ed, *World Hist & Glb Awnss Gen Ed, Liberal

ANTH 3045 Travel & Tourism: Critical Perspectives (4 Credits)
This course explores tourism, one of the world's largest and fastest growing industries, from an anthropological perspective. We will examine consequences of international tourism from the perspectives of the tourist and the host. The course examines the impact and sustainability of different types of tourism and tourist sites. Focusing on a variety of global cultures, we will analyze the processes of shaping and marketing distinctive features of culture, identity, history and nature for tourist consumption and the implications of this growing type of global encounter. This course was previously SOC-283244 Travel and Tourism: A Critical Perspective.
Attributes: Other World Civilization Gn Ed, *World Hist & Glb Awnss Gen Ed, Liberal

ANTH 3122 Sex & Gender in Global Perspective (4 Credits)
This course is a comparative exploration of gender and gender relations in different regions of the world. Using the concepts of intersectionality (of race, class, gender, etc.) and globalization we will examine how inequalities across sexes and genders are created and perpetuated in different cultural contexts. The course will examine topics such as: non-binary gender systems, variations in the sexual division of labor and economic organization, gender-based violence, and the impact of forces such as colonialism and globalization on gender issues. This course was previously SOC-283324 Sex and Gender in Cross-Cultural Perspective: Advanced.
Cross-listed with GSST 3030.
Attributes: Social Science Gen Ed, *Diversity Gen Ed, Liberal

ANTH 3408 Advanced Biological Anthropology (4 Credits)
Biological anthropology is a subfield of the larger discipline that studies humankind as a zoological species. As biological anthropology is firmly rooted in evolutionary theory, the evolutionary biology of humans is the central focus of the course. This is an advanced study of concepts in biological anthropology including genetics, evolutionary theory, paleontology, comparative anatomy & morphology, primate biology/behavioral ecology and hominid variability provide the foundation for understanding humanity's place in nature. Prerequisites: BIOL 1201, BIOL 1400, or BIOL 1402, or equivalent..
Cross-listed with BIOL 3408.
Attributes: Liberal

ANTH 3996 Special Topics in ANTH (2-6 Credits)

ANTH 3997 Special Topics in ANTH (2-8 Credits)

ANTH 3998 Individualized Studies in Anthropology (ANTH) (1-8 Credits)
Students have the opportunity to develop individualized studies with their mentor in Anthropology (ANTH). Please contact your mentor/advisor for more details.

ANTH 4998 Individualized Studies in Anthropology (ANTH) (1-8 Credits)
Students have the opportunity to develop individualized studies with their mentor in Anthropology (ANTH). Please contact your mentor/advisor for more details.

ARTP: Performing Arts (Undergraduate)

ARTP 1005 Creative Dramatics for Children (4 Credits)
Creative Dramatics is an integrative process that develops imaginative thought and creative expression in children. Through the use of movement, pantomime, improvisation, story dramatization and group discussion, children acquire language and communication skills, social awareness, problem-solving abilities, self-concept enhancement, and an understanding of theatre. Rather than an attempt to create professional child actors, the goal of Creative Drama is to guide a child to self-fulfillment through the process of theatre techniques. After analyzing the work of theorists in the field, students will learn to create and implement drama exercises for the classroom and foster an environment where youngsters can feel comfortable to work creatively and think critically.
Attributes: Arts Gen Ed, *The Arts Gen Ed, Liberal

ARTP 1007 Acting Songs: Introductory (4 Credits)
This studio-based class is taught at the David Brunetti Studio and is part of a partnership with the Yip Harburg Foundation. The goal for the student is to learn a step-by-step process for bringing emotionally alive, theatrical acting to the singing of songs. Student will learn, by doing and observing, about the relationship of acting to singing. They will develop a technique that will allow them to be engaged emotionally while singing; this technique can also be applied to non-musical theater work. Students will begin the development of a repertoire of songs which can later be used for auditioning and performance purposes. Students MUST request permission to take this course by emailing Cindy Bates at Cynthia.Bates@sunyempire.edu.
Attributes: Liberal

ARTP 1122 Playwriting Lab: Introductory (4 Credits)
This course supports students in creating a dramatic work for the stage. We will spur the playwriting process by reading plays and theoretical texts, participating in weekly work-in-progress readings by their peers, and analyzing and critiquing these works as well as those of established playwrights.
Attributes: *The Arts Gen Ed, Liberal

ARTP 1127 Writing the Solo Play: Introductory (4 Credits)
This introductory independent study will support the student in the construction a dramatic solo work for the stage, culminating in a work-in-progress reading that the student will perform or direct.
Attributes: Liberal

ARTP 1132 Writing the Solo Musical: Introductory (4 Credits)
This advanced independent study will support the student in the construction a dramatic solo work for the stage at the advanced level, culminating in a work-in-progress reading that the student will perform or direct.
Attributes: Liberal

ARTP 1137 Playwriting: Introductory (4 Credits)
This course will support the student in writing a dramatic work for the stage at the introductory level, spurring the playwriting process by reading plays and theoretical texts, and culminating in a final work-in-progress reading.
Attributes: *The Arts Gen Ed, Liberal

ARTP 1996 Special Topics in Perf Arts (1-8 Credits)

ARTP 1998 Individualized Studies in Performing Arts (ARTP) (1-8 Credits)
Students have the opportunity to develop individualized studies with their mentor in Performing Arts (ARTP). Please contact your mentor/advisor for more details.

ARTP 2005 Introduction to Performance Studies (4 Credits)
This course is an exploration of the history and major theories in the field of performance studies. Students will attend and analyze diverse cultural and social performances in a range of urban spaces. We will investigate topics including performing arts, popular entertainments, rituals, play, games, and performance in everyday life. Social, political, and ethical concerns of practitioners and scholars in this field will be considered.
Attributes: Arts Gen Ed, *The Arts Gen Ed, Liberal

ARTP 2998 Individualized Studies in Performing Arts (ARTP) (1-8 Credits)
Students have the opportunity to develop individualized studies with their mentor in Performing Arts (ARTP). Please contact your mentor/advisor for more details.

ARTP 3005 Creating Solo Performance (4 Credits)
In this course, the student will develop, design, and present a solo performance work. Starting with a preferred medium such as memoir writing, choreography, photography, music, sound, etc., the student will develop a solo piece while incorporating additional elements. Materials, processes, and practices will be explored that are relevant to student's project. The history of performance will be investigated to provide a frame of reference for the student's own work. We will consider how solo performance may be used to explore social, political, and cultural issues. The course will culminate in an informal presentation of the student's solo work-in-progress. Prior to taking this course, students should have a background in one or more art disciplines.
Attributes: Arts Gen Ed, *The Arts Gen Ed, Liberal

ARTP 3010 History of Physical Theater (4 Credits)
This course will investigate the history, theory, and development of physical theatre in Europe and the U.S. The influence of Eastern theatre traditions and contemporary dance on physical theatre training and practice in the United States and Europe will be addressed. We will consider how physical theatre may be used to explore social, political, and cultural issues. Prior to taking this course, students should have some practical and/or critical understanding of theatre and/or dance.
Attributes: Arts Gen Ed, *The Arts Gen Ed, Liberal

ARTP 3012 Acting Songs: Advanced (4 Credits)
This studio-based class is taught at the David Brunetti Studio and is part of a partnership with the Yip Harburg Foundation. The goal for the student is to work at the advanced level to deepen the process of bringing emotionally alive, theatrical acting to the singing of songs, begin to work on character, to act and sing duets, and develop an advanced level repertoire for audition and performance. Students MUST request permission to take this course by emailing Cindy Bates at Cynthia.Bates@sunyempire.edu.
Attributes: Liberal

ARTP 3015 Performing Literature: Advanced (4 Credits)
In this course, students will learn how to analyze, adapt, and perform literature in a range of genres and styles. The student will choose selected poetry, short story excerpts, and nonfiction materials as source material for developing a series of short solo performances. Students will be encouraged to incorporate an experimental use of movement, sound, music and visual elements in the staging process. The course will examine relevant concepts, practices, and processes of interpretation and performance. The performer's position as cultural critic and/or ethnographer will be addressed. Students should have advanced-level critical thinking and writing skills.
Attributes: Arts Gen Ed, *The Arts Gen Ed, Liberal

ARTP 3030 Performance History: The Twentieth Century (4 Credits)
This course surveys the development of avant-garde performance, aesthetics, and culture from the late nineteenth century to beginning of the twenty-first century. Students will learn about seminal figures and innovative practices in modernist movements including Symbolism, Expressionism, Futurism, Constructivism, and Surrealism. We will explore the exciting world of early twentieth-century cabaret and follow its progression in major cities throughout Europe. Our investigation of postmodernist art and performance in the late twentieth-century will address the evolution of avant-garde theatre, Happenings, Fluxus, body art, and performance art. Throughout, students will consider contested definitions and theories of performance while reflecting on the social responsibility of performance history scholars. Prior to taking this course, students should have some practical and/or critical understanding of the arts.
Attributes: Arts Gen Ed, *The Arts Gen Ed, Liberal

ARTP 3035 Popular Music & Social Justice: Advanced (4 Credits)
This course is an exploration of popular music in relation to social movements and cultural change, primarily in the United States, from the early decades of the twentieth century to the present. We will consider the importance of music and song in modern American culture, focusing on songs that have contributed to the development of labor, civil rights, peace, and feminist movements. Students will learn about musical artists who have emerged as voices of opposition, articulating issues of race, class, and gender. Throughout, we will examine the tensions between the music of activism and its production and consumption. (Students should take either the introductory or advanced version of this course but not both.)
Cross-listed with MUSC 3035.
Attributes: American History Gen Ed, Arts Gen Ed, *The Arts Gen Ed, *US History & Civ Engmt Gen Ed, Liberal

ARTP 3122 Playwriting Lab Advanced (4 Credits)
This course supports students in creating a dramatic work for the stage at the advanced level. We will spur the playwriting process by reading plays and theoretical texts, participating in weekly work-in-progress readings by their peers, and analyzing and critiquing these works as well as those of established playwrights.
Attributes: *The Arts Gen Ed, Liberal

ARTP 3996 Special Topics in Perf Arts (1-8 Credits)

ARTP 3998 Individualized Studies in Performing Arts (ARTP) (1-8 Credits)
Students have the opportunity to develop individualized studies with their mentor in Performing Arts (ARTP). Please contact your mentor/advisor for more details.

ARTP 4005 Performance Art & Installation (4 Credits)
This course will investigate the materials, methods, and processes used in developing performance art and installation projects. The student will create a performance art or installation work, drawing on prior experience in one or more aesthetic practices, while exploring new forms and approaches. The student will learn about the history of Live Art practices and original works that integrate performance with installation, media arts, and socially engaged art practices. Prior to taking this course, students should have some practical understanding of the arts.
Attributes: Arts Gen Ed, *The Arts Gen Ed, Liberal

ARTP 4010 Performance Theory (4 Credits)
This course will investigate some of the exciting theoretical and practical work that theater and performance artists have written about over the past 100+ years. It is important to remember that "theories" are always based in "practice" and that "practice" is also grounded in "theory." This interesting cyclical relationship between theory and practice will inform the work completed. We will consider the social, political, and ethical concerns of practitioners and scholars in this field. Prior to taking this course, students should have some practical and/or critical understanding of the arts.
Attributes: Arts Gen Ed, *The Arts Gen Ed, Liberal

ARTP 4122 Writing the Solo Play: Advanced (4 Credits)
This advanced independent study will support the student in the construction a dramatic solo work for the stage at the advanced level, culminating in a work-in-progress reading that the student will perform or direct.
Attributes: Liberal

ARTP 4127 Playwriting: Advanced (4 Credits)
This course will support the student in writing a dramatic work for the stage at the advanced level, spurring the playwriting process by reading plays and theoretical texts, and culminating in a final work-in-progress reading.
Attributes: *The Arts Gen Ed, Liberal

ARTP 4132 Writing the Solo Musical: Advanced (4 Credits)
This advanced independent study will support the student in the revising and further developing a solo musical, telling the story in a one-person show through song and text, culminating in a work-in-progress reading with music that the student will perform or direct. Prerequisite (must complete before registering): experience in music composition or songwriting
Attributes: Liberal

ARTP 4147 Theatre Community & Social Change: Advanced (4 Credits)
How can the tools of theatre be used to engage communities in dialogue and to move toward a more just world? Students will gain experience in applied theatre – theatre that engages issues ranging from social justice to heath education to conflict resolution. We will look at the work of Augusto Boal, Paolo Freire, the Federal Theatre Project and others who have developed relevant theories and practices. Students will learn to develop strategies to respond to particular settings, issues, and concerns, to critically examine the underlying assumptions of this work, and to think about the historical and theoretical contexts of the applied theatre field. We will examine how these and other concepts and strategies inform performative responses to and interventions in times of crisis, and how such work combines affect (aesthetics and emotional impact) with effect (social impact).
Attributes: Arts Gen Ed, *The Arts Gen Ed, Liberal

ARTP 4998 Individualized Studies in Performing Arts (ARTP) (1-8 Credits)
Students have the opportunity to develop individualized studies with their mentor in Performing Arts (ARTP). Please contact your mentor/advisor for more details.

ARTS: Art (Undergraduate)

ARTS 1000 Arts & the Environment: Introductory (4 Credits)
Students will explore, create, and perform work inspired by the natural and built world. We will investigate how diverse artists working in different media interpret and respond to nature, urban environments, and environmental concerns. The goal is to experience a range of conceptual approaches and aesthetic strategies in context with developing individual and/or collaborative projects that are informed by environmental themes.
Attributes: Liberal

ARTS 1010 Art Appreciation (4 Credits)
In this course, students will develop college level familiarity with the visual arts by learning about the basic concepts, vocabulary, media, and abbreviated world history of the visual arts through readings, discussions, and writing.
Attributes: Arts Gen Ed, *The Arts Gen Ed, Liberal

ARTS 1020 Art & Sustainability (4 Credits)
In this course, students will examine the visual arts, focusing on various kinds of sculpture, as a process and instrument connecting the natural environment and human imagination to develop an appreciation for art as personal expression, conduit for social consciousness, and opportunity for a new esthetic based upon ecological awareness. Students will investigate how kinetic, repurposed, renewable, and upcycled land art contributes to the field of eco-minded art. They will also have the opportunity to create eco-minded art in various media.
Attributes: Arts Gen Ed, *The Arts Gen Ed, Liberal

ARTS 1025 Body Art: Tattooing: Introduction (4 Credits)
This course focuses on the art of tattooing, its significance, symbolism, and affiliations. The modification of the body spans thousands of years and throughout various cultures. Students will consider the history behind same, the socio-cultural influences, contemporary issues, the art's potential risks and complications, as well as the student's interest in the topic itself. Students can take only one level of this course (intro or advanced) to avoid redundancy within their degree program.
Attributes: Arts Gen Ed, *The Arts Gen Ed, Liberal

ARTS 1030 Collage (4 Credits)
The purpose of this course is for learners to investigate, create, experiment and learn about collage as an historical and cultural art form. Students will look at works of collage from both Western and Global perspectives and development. This course is also meant to be very process oriented and progressive, so students come out with a greater appreciation for practice and understanding of the medium.
Attributes: Arts Gen Ed, *The Arts Gen Ed, Liberal

ARTS 1040 Figure Drawing (4 Credits)
The purpose of this course is to develop perceptual and technical skills drawing the human figure, learning about proportions and structure, as well as understanding basic anatomy. The course will demonstrate the timeless relevance of the human form as subject matter and as a primary vehicle through which an artist makes use of the visual language to plan, process, and create. The course will include an introduction to skeletal anatomy in order to increase understanding and accuracy in drawing the figure.
Attributes: Arts Gen Ed, *The Arts Gen Ed, Liberal

ARTS 1050 Humanities Through the Arts (4 Credits)
Through a study of various artistic and intellectual expressions, students will learn about the arts and humanities disciplines such as literature, art, music, theater, cinema, and so forth. Students will also learn about basic language of art and prominent artworks. Students will study several enduring themes in the humanities such as morality, happiness, freedom, and life and death attitudes, and how they are expressed through the arts. Students will analyze the arts in historical, social, (multi)cultural, biographical, and aesthetic contexts and develop ability to critically respond, interpret, and evaluate the arts. This course was previously ART-221634 Humanities through the Arts. Prerequisites: None. Corequisites: None.
Attributes: Humanities Gen Ed, Arts Gen Ed, *Humanities Gen Ed, *The Arts Gen Ed, Liberal

ARTS 1055 Impressionism: The Birth of Modern Art (4 Credits)
This course focuses on an era within the history of art in 19th century France, and events that contributed to the birth of modern art. Social, cultural, political and philosophical ideas that shaped and changed the way art was created and defined will be discussed. The course will begin with an analysis of the historical, social, and theoretical issues, such as the reconstruction of Paris, Napoleon III, the role of female artists, government sponsored art exhibitions, the Salon shows, and the Anonymous Society of Painters and its impact in the art world. The course will look at the works of the artists who would be labeled the Impressionist and for whom the art movement Impressionism emerged.
Attributes: Humanities Gen Ed, Arts Gen Ed, *The Arts Gen Ed, Liberal

ARTS 1065 Introduction to Drawing (4 Credits)
This course introduces students to the fundamental concepts and techniques of drawing while learning about the elements of design. Drawing is an essential practice that is needed in order to move from simple to complex forms of artistic expression. Working from direct observation and/or photographs, students learn art processes and how to use various drawing materials and tools. They also learn about visual literacy and apply it to their practice while learning about the work of past and current art practitioners. Students will reproduce and present a final drawing project and oral presentation about an artist of their choice. Subjects covered include still life, floral, textures, landscape, portraiture, mannequins, and the figure.
Attributes: Arts Gen Ed, *The Arts Gen Ed, Liberal

ARTS 1075 Introduction to Painting (4 Credits)
This course acquaints students with the formal elements of painting (color, composition, light, form, texture, figure ground relationship) through color-mixing and paint handling exercises. Color theory and its functionality will be emphasized and put into practice. Students will explore application of paint to canvas, panels, and/or paper working from still life or reference material. Prerequisites: Previous drawing experience. Prerequisites: Previous drawing experience.
Attributes: Arts Gen Ed, *The Arts Gen Ed, Liberal

ARTS 1080 Introduction to Studio Art (4 Credits)
Through a sequential study of artistic elements, art media, drawing and painting techniques, and art criticism, this course introduces students to the fundamentals of studio art. Students will build foundation art skills, as well as the beginning of a portfolio, through studio practice and assignments. Students will study line, shape and form, focusing on light, tonal drawing, and linear and atmospheric perspective in black and white and color. Students will also learn to critique art. Overall, students will learn about drawing as a form of artistic expression and studio creative process. This course was previously ART-221114 Introduction to Studio Art.
Attributes: Arts Gen Ed, *The Arts Gen Ed, Liberal

ARTS 1100 Early Art of the Netherlands: Introductory (4 Credits)
This course focuses on painting in the Netherlands. Students will consider formal characteristics and on-going iconographic concerns within the work of individual artists such as Jan van Eyck, Hieronymus Bosch, etc. We will also investigate the intersection of visual culture with class, economics, politics, and gender resulting in an understanding of the socio-cultural context of the art of Northern Europe from the fourteenth through the sixteenth centuries.
Attributes: Arts Gen Ed, *The Arts Gen Ed, Liberal

ARTS 1125 Watercolor Painting (4 Credits)
Watercolor Painting is an introductory course presenting the technical and aesthetic aspects of this creative art form and an overview of color theory, along with some of its historical and contemporary practitioners. Approximately half of the course is devoted to studying the theoretical and historical aspects of color, through both written and hands-on assignments, while the other half focuses on painting. Each module includes images and text of historical practitioners, including contemporary artists, and assignments that focus on the study and emulation of master artists. Students avidly write about and discuss their own work, and provide explanation of how it relates to either the theory or history of its origins. Previous drawing experience is helpful.
Attributes: Arts Gen Ed, *The Arts Gen Ed, Liberal

ARTS 1127 Drawing Into Painting (4 Credits)
This course merges the theoretical, technical and creative aspects of drawing and painting to create a portfolio of work. Within the genres of still life, interior, and landscape, students will gain experience in a variety of drawing tools such as graphite, conte crayon, and charcoal. Drawing foundations such as composition, perspective, contour, negative space, tonal, and gestural drawing are part of this creative art form. Ink, watercolor and/or gouache will provide a transition from drawing principles into representational and abstract painting. Students will visually document each project in brief written descriptions which will culminate in a final artist's statement. Diverse artists of inspiration such as Cezanne, Bonnard, Krasner, and Lam will provide historical and contemporary references. The process of presentation and critique will be ongoing, with two critiques at mid-term/end of term.
Attributes: Arts Gen Ed, *The Arts Gen Ed, Liberal

ARTS 1135 Writing About Art (4 Credits)
This course will provide the student with readings and exercises that will sharpen his/her areas of observation and critical assessment, and the elements involved in writing carefully organized responses to non-literary forms: visual art (painting, sculpture, photography, graphic arts, architecture, art installations), performance art (dance, theater, music), film, and emergent art forms in new media (digital/the internet).
Attributes: Arts Gen Ed, *The Arts Gen Ed, Liberal

ARTS 1140 Media and Visual Literacy (4 Credits)
The purpose of this course is to introduce the field of visual literacy and media studies at a foundational level. Learn to analyze, interpret, and understand the role that images and media play in your life and in our culture. Central to the course is a study of the artistic expression and creative process integral to images in the ever-changing media landscape such as advertising, consumer objects, photography, fashion, film and television through design and semiotic analysis. Students will also consider media ownership and its impact, as well as race, class, and gender, in mainstream media. They will also develop skills in "reading" images in the media and how they are influenced by, and an influence of, culture. This course was previously COMM 1025 Media Literacy and ART-222424 Media and Visual Literacy.
Attributes: Arts Gen Ed, *The Arts Gen Ed, Liberal

ARTS 1998 Individualized Studies in Art (ARTS) (1-8 Credits)
Students have the opportunity to develop individualized studies with their mentor in Art (ARTS). Please contact your mentor/advisor for more details.

ARTS 2020 Art History I: Prehistory to Renaissance (4 Credits)
In this course, we will study the history of Western art from Prehistory to the Renaissance with a focus on: basic art and art historical terminology, the basic periods and major art works of Western Civilization for this broad time frame, and how to 'read' works of art and architecture for their form, content and context.
Attributes: Arts Gen Ed, *The Arts Gen Ed, Liberal

ARTS 2025 Art History II: Baroque to Modern (4 Credits)
In this course, we will study the history of Western art from the High Renaissance to Postmodernism with a focus on: art and art historical terminology, the basic periods and major art works of Western Civilization for this broad time frame, and how to 'read' works of art and architecture for their form, content and context.
Attributes: Arts Gen Ed, *The Arts Gen Ed, Liberal

ARTS 2035 Diversity in the United States Arts (4 Credits)
This course samples artists and artistic expressions of diverse ethnic and sociocultural groups in the United States. Students will view, describe, and analyze various artistic forms, including ethnic and contemporary multicultural arts and crafts, and the creative processes inherent therein. Through interpreting artistic portrayals of race, ethnicity, gender, class, immigrant, and other identity categories, students will explain the historical and contemporary societal factors that shape the development and visual representations of individual and group identity. Through comparing artworks that probe the interrelated concepts and concerns of multiculturalism, equity, diversity, and inclusion, students will describe the complex social structures and systems that generate power, privilege, oppression, and opportunity in the art world. Through reviewing accounts of artists' lives, students will analyze artists' social justice arts and acts reflecting four principles of human rights, access, equity, and autonomous participation. Students will demonstrate their learning through discussion, writing, and visual assignments. This course was previously ART-222444 Diversity in the American Arts.
Attributes: Arts Gen Ed, *Diversity Gen Ed, *The Arts Gen Ed, Liberal

ARTS 2040 Eco Arts (4 Credits)
Ecological Art or Eco Art is a contemporary form of environmental art created by artists who are concerned about local and global environmental issues and situations. The field is growing rapidly with hundreds of artists working around the world. This interdisciplinary study of Eco Arts helps students become familiar with various eco arts texts, projects, works and theories as well as visiting and participating in Eco Arts sites/activities both online and in real time and creating their own projects using materials and concepts inspired by their learning.
Attributes: Arts Gen Ed, *The Arts Gen Ed, Liberal

ARTS 2041 African American Art (4 Credits)
This course will cover the evolution of African American art focusing on the twentieth century. In addition to taking a broad historical perspective based on influential social theory of the time, the student will look closely at the work of individual artists such as Edmonia Lewis, Augusta Savage, Henry Ossawa Tanner, Jacob Lawrence, Aaron Douglas, Archibald Motley, Romare Bearden, Elizabeth Catlett, Faith Ringgold, Beverly Buchanan, Betye Saar, Whitfield Lovell, Jean Michel Basquiat, and Kara Walker.
Attributes: Arts Gen Ed, *The Arts Gen Ed, Liberal

ARTS 2050 Introduction to the History of Western Architecture (4 Credits)
Developing a student's historical perspective, this course surveys the history of Western architecture and society from ancient times to the present. For this broad time frame, you will learn critical thinking skills about some of the major buildings and monuments, architects and major architectural styles in Western civilization. Your study, exploration, reading and viewing, plus the feedback you receive on posts and papers will introduce you to and develop your ability to: 1) Engage in the formal analysis of a building to enhance your artistic perspectives. 2) Develop the capacity to decipher relevant primary source texts and images as an introduction to artistic theory. 3) Understand the historical and social context of a building program, building, building complex and/or building site. 4) Analyze differing historical interpretations of a building program, building and/or monument. 5) Present papers on assigned questions whereby you synthesize your own thoughts while summarizing relevant scholarship, primary sources and formal analysis in order to enhance your critical thinking and research skills. This course was previously ART-221434 Introduction to the History of Western Architecture.
Attributes: Arts Gen Ed, Western Civilization Gen Ed, *The Arts Gen Ed, Liberal

ARTS 2055 Sculpture: Introductory (4 Credits)
This studio inspired course addresses the fundamental aspects of three dimensional design using an online workshop approach while looking at the history, theory and practice of sculpture. Students will engage in the creation of three dimensional work, applying basic concepts used in additive and subtractive sculpture to their visual work as a means of developing a strong three dimensional vocabulary. Explored during the term will be such concepts as relief sculpture, free standing sculpture, and environmental sculpture. Supporting the studio portion of this study students are expected to participate in all readings, online discussions, and group critiques as ways of informing their visual work while referencing both three dimensional aesthetics and art history discussed throughout the term. This course was previously ART-221354 Sculpture: Introductory.
Attributes: Arts Gen Ed, *The Arts Gen Ed, Liberal

ARTS 2998 Individualized Studies in Art (ARTS) (1-8 Credits)
Students have the opportunity to develop individualized studies with their mentor in Art (ARTS). Please contact your mentor/advisor for more details.

ARTS 3000 Advanced Nature Drawing (4 Credits)
Using knowledge and experience of the natural world as inspiration, the emphasis for this study will be refining the use of the essential elements of drawing. Students will bridge the gap between the role of artist as object maker and the role of the artist as innovative thinker and social commentator.
Attributes: Liberal

ARTS 3010 20th Century Art History I (4 Credits)
The first half of the twentieth century (1900-1950) changed the history of Modern Art. Organized chronologically, students learn about the social, economic, cultural, political, and artistic transformation of European art movements and their influence on American art and culture. From Paris to New York City, the United States emerged as an art world-leading power from Regional and Social Realism to Abstract Expressionism and the role of women in the arts. Prerequisites: College Writing.
Attributes: Humanities Gen Ed, Arts Gen Ed, *The Arts Gen Ed, Liberal

ARTS 3012 20th Century Art History II (4 Credits)
The Age of Pluralism (1950-2000) includes a plethora of changes, philosophies, and concepts in Modern Art. It gave voice to women and minority artists, included the proliferation of mass-produced art and culture, and advocated for environmentally and socially engaged art that responded to issues such as globalization and ethical practices. Through discussions, we will examine these interactions and how they contributed to forming new artistic aesthetics and inclusion at the dawn of the 21st century.
Attributes: Humanities Gen Ed, Arts Gen Ed, *Humanities Gen Ed, *The Arts Gen Ed, Liberal

ARTS 3020 A Sense of Place: Drawing from Nature: Advanced (4 Credits)
Students will learn to draw within differing environs/settings while placing a set emphasis on the treatment of plants, insects, animals, etc. As convictions inform effort, this course will also explore the lives and work of the early botanical illustrators such as Ferdinand Bauer to the contemporary work of Alice Tangerini; several of the environmental artists to include David Nash, Bob Verschueren, and Nils-Udo; the beasts and birds of Walton Ford; as well as others via readings, websites, PowerPoint presentations, and/or film. This course is meant for those interested in environmental studies (designed to fulfill wider social context), art (designed to fulfill technical proficiency/ competence in methods and techniques), culture, and history. Prerequisites: n/a. Corequisites: n/a.
Attributes: Arts Gen Ed, *The Arts Gen Ed, Liberal

ARTS 3025 Advanced Drawing (4 Credits)
This course will assist students in deepening and expanding their drawing skills by emphasizing one's own personal approach in style, concepts, visual vocabulary, media, and thematic content. It provides an opportunity for students to develop a high degree of artistry, originality, and aesthetics in drawing, including research on art practitioners throughout history. Students will create and present a portfolio accompanied by a reflective essay about their art practice, research and work done during the term. Students should have previous drawing, painting, or other art studio course.
Attributes: *The Arts Gen Ed, Liberal

ARTS 3030 Advanced Drawing: Comics (4 Credits)
The comic is both a cultural icon and practice - a sequential art. This course will place an emphasis on the major aspects of comic book creation to include its history, illustration, expressive anatomy, inking, storyboarding, and plot/writing.
Attributes: Arts Gen Ed, *The Arts Gen Ed, Liberal

ARTS 3035 Advanced Graphic Design (4 Credits)
In this course, students will focus on developing and producing a complete marketing campaign utilizing different graphic mediums that would be utilized to advertise a business. Students will assess a customer's needs and develop a campaign plan utilizing the basics of the grid system. Students will work through a design scenario for a business that has a need for an advertising campaign to be developed utilizing several mediums of design for delivery. This course will enable students to think critically and to work on a variety of advanced graphic design problems typically encountered by visual artists in today's marketplace. Prerequisites: Successful completion of a related introductory study or relevant advanced level experience.
Attributes: Arts Gen Ed, *The Arts Gen Ed, Liberal

ARTS 3040 Advanced Painting (4 Credits)
This course emphasizes students' personal approach in style, concepts, visual vocabulary, media, and thematic content. It provides an opportunity for students to develop a high degree of artistry, originality, and aesthetics in painting, including research on painting trends and art practitioners throughout history. Students will create and present a portfolio accompanied by a reflective essay about their art practice, research and work done during the term. Students should have a previous drawing, painting, or other art studio course.
Attributes: *The Arts Gen Ed, Liberal

ARTS 3050 American Architectural History (4 Credits)
This study asks students to learn to recognize and understand the various types of buildings and building styles within the United States. This necessarily includes discussions of the manner in which social, cultural, economic, political, and historic phenomena are created by and represented in American architecture. As well, a thorough exploration of American architecture necessitates inquiries of interactions between the history and architecture of the United States and the history and architecture of other world cultures.
Attributes: Liberal

ARTS 3055 American Art History (4 Credits)
This course asks students to explore the American experience as it is portrayed in American art. This necessarily includes discussions of the manner in which social, cultural, economic, political, and historic phenomena are created by and represented in American art. As well, a thorough exploration of American art necessitates inquiries of interactions between the history and art of the United States and the history and art of other world cultures.
Attributes: Arts Gen Ed, *The Arts Gen Ed, Liberal

ARTS 3065 Art Criticism (4 Credits)
In this course, the student will develop an advanced college level familiarity with the major schools of thought in art criticism from Antiquity to current times. This will include a review of the elements of art and the principles of design; an examination of the Imitation, Expression and Formal theories of art; plus, analyzing the ideas of Roland Barthes and Denis Dutton.
Attributes: Arts Gen Ed, *The Arts Gen Ed, Liberal

ARTS 3075 Arts Management (4 Credits)
This course focuses on the history, theory, and practice of arts management. It provides opportunities for practical application of theory and technique through projects such as research and case studies related to the development of marketing, business or strategic plans, arts manager's portfolio, the role of arts manager in the community, and the development of arts organizations or programs. Comparisons between profit and not for profit organizations provide a context for issues of fundraising and various conceptual approaches to management. Prerequisites (must complete before registering): Prior knowledge, skills, or experience in art and business or management, as well as upper-level standing with advanced level academic skills This course was previously ART-223524 Arts Management.
Attributes: Liberal

ARTS 3080 Arts of Native North America (4 Credits)
In this course, students will examine the arts and artists of Indigenous people of North America in the broad categories of visual arts, performing arts, language arts and material culture as expressions of values in non-Western cultures. Topics include a survey of arts and material culture beginning with the post-contact through the modern era in terms of the continuity of practices in religious and secular arts; individual and communal representation and response to social, political and spiritual circumstances. This survey also includes modern and contemporary artists working in a broad range of media and categories.
Attributes: Liberal

ARTS 3090 Baroque Art & Architecture (4 Credits)
In this course, we will explore the art and architecture of the Baroque in Italy, France, Spain, the Netherlands, Flanders and England. Our analysis will include relevant historical context, artistic innovation and developing artistic theories.
Attributes: Arts Gen Ed, *The Arts Gen Ed, Liberal

ARTS 3095 Body Art: Tattooing: Advanced (4 Credits)
The modification of the body spans thousands of years and throughout various cultures. This course focuses on the art of tattooing, its significance, symbolism, and affiliations. This course will also consider the history behind tattooing, the socio-cultural influences, contemporary issues, the art's potential risks and complications, as well as the student's interest in the topic itself. Students will take only one level of this course (intro or advanced) to avoid redundancy within their degree program.
Attributes: Arts Gen Ed, *The Arts Gen Ed, Liberal

ARTS 3105 Graffiti: Art or Vandalism? (4 Credits)
In this advanced level course, students will formulate an increasingly more sophisticated understanding and practice of graffiti. Graffiti is both an anonymous and public voice, created at times when no one is looking yet surfaces for all to see. It can be etched, carved, painted, stenciled, knitted, chalked, or even projected onto a surface. This course will focus on a set verve expressed by graffiti, which has incited rebellion, sparked social criticism, and cultivated change/peace. We will explore various topics and issues to include its historical context; aesthetics; legalities; collaborated efforts to promote peace; a set influence on other creative fields such as music, film, graphic design, advertising, and individual artists - i.e. Banksy (Great Britain), Os Gêmeos (Brazil), Daim (Germany), Shepard Fairey (United States); as no other art movement has had such a profound impact on the physical face of the modern world.
Attributes: Arts Gen Ed, *The Arts Gen Ed, Liberal

ARTS 3115 Cuba at the Crossroads: Art Culture and Identity (4 Credits)
Students in this course will examine the changing cultural and political landscape of Cuba. We will look at how economic, political and cultural factors come to bear on issues of identity, and how these are reflected in the arts. Students will learn about the history of the island and about the complex heritage of indigenous, African and Iberian cultures. Cuba's political and economic relationship to the U.S. will be examined, along with issues of race, class and gender in modern Cuban society.
Attributes: Other World Civilization Gn Ed, Arts Gen Ed, *The Arts Gen Ed, *World Hist & Glb Awnss Gen Ed, Liberal

ARTS 3135 Illustration (4 Credits)
This advanced level art course emphasizes technical proficiency, individual direction, and the history and theory of illustration. Traditional and non-computer based studio art tools will be the primary media for illustration. Learning activities focus on practicing different illustration styles and skills, developing briefs for illustration projects, and analyzing illustration styles from historical and theoretical standpoints. Students will create illustrations with a range of subjects, materials, and formats. Illustration exercises and other learning activities will foster students' ability to research and observe quality illustration styles and techniques as well as to critique illustration. Prior to taking this course, students should have taken a lower level studio art course or have experience in drawing and painting. This course was previously ART-223124 Illustration.
Attributes: Arts Gen Ed, *The Arts Gen Ed, Liberal

ARTS 3145 Issues in Contemporary Art (4 Credits)
Issues in Contemporary Art is an advanced study of the art as well as the historical and theoretical issues from the Eighties through the current decade. The methodology includes an analysis of the thematic frameworks which characterize the development and meaning of contemporary art, through the examination of related social and cultural issues, an overview of global museum and gallery exhibitions, and the development of a scholarly research project.
Attributes: Humanities Gen Ed, Arts Gen Ed, *The Arts Gen Ed, Liberal

ARTS 3150 Italian Renaissance Art & Architecture (4 Credits)
Students will explore the development of Italian Renaissance Art embracing the historical time frame that includes the Duecento, Trecento, Quattrocento and Cinquecento. We will look at the initial causes of the Renaissance: population increase, agricultural improvements, economic growth with the rise of trade and venture capitalism, and rise of the cities. Then, we will explore how this affected painting, sculpture and architecture.
Attributes: Arts Gen Ed, *The Arts Gen Ed, Liberal

ARTS 3160 Masters of the Renaissance: Advanced (4 Credits)
This course will explore three celebrated artists of the Italian Renaissance: Leonardo da Vinci, Michelangelo Buonarroti, and Raffello Sanzio (Raphael). Their careers span from roughly 1450 to 1565, encompassing a period generally referred to as the Early and High Renaissance within Italy. This course will present an in-depth analysis of each artist in relation to their training, stylistic development, oeuvre, the role of patronage, as well as myth/legend.
Attributes: Arts Gen Ed, *The Arts Gen Ed, Liberal

ARTS 3165 Material & Visual Culture (4 Credits)
People create objects and images, assigning them values and meanings that are specific to their culture, their time, and their place. In turn, those objects and images influence the ways in which people think, communicate, and learn. Often, these things express relationships of power and privilege, in their creation, their curation, and their exhibition. In this study, we will consider the ways people use images and objects to understand the world, create individual and group identities, explain their society and culture, formulate their group's identity within the larger world, and express relationships of power and privilege.
Attributes: Arts Gen Ed, *Diversity Gen Ed, *The Arts Gen Ed, Liberal

ARTS 3170 Mathematics & The Arts (4 Credits)
This course will ask students to examine the varied uses of mathematics within the arts. Basic arithmetic skills, in addition to more detailed algebraic and geometric principles, will be explored as they are applied within the arts. Further, students will be asked to collect and analyze data for a final project that asks them to look at the use of mathematics within popular culture.
Attributes: Mathematics Gen Ed, Arts Gen Ed, *Mathematics Gen Ed, *The Arts Gen Ed, Liberal

ARTS 3175 Medieval Art & Architecture (4 Credits)
In this course, students will study the art and architecture of the Middle Ages, roughly from the end of Roman Antiquity up to and including the Gothic style. The subject matter will include Early Christian art and architecture, Byzantine art and architecture, the Art of the Migrations, plus the art and architecture of the Carolingian, Ottonian, Romanesque and Gothic periods. A prior course in art history, art appreciation or studio art course that included some art history is advised.
Attributes: Arts Gen Ed, *The Arts Gen Ed, Liberal

ARTS 3180 Mixed Media (4 Credits)
This is a study for artists who are interested in and inspired by exploring how a diverse variety of materials and techniques might intersect in their creative endeavors. Rich combinations of techniques and materials, both traditional and non-traditional, will be sampled and utilized in structured and self-directed projects.
Attributes: Liberal

ARTS 3190 Nineteenth Century Art (4 Credits)
The purpose of this course is to enable the student to learn about the major artists, movements, and intellectual and cultural ideas that we normally associate with the broad span of late 18th into the 19th century. We will cover Neoclassicism, Romanticism and Realism in the arts, as well as some issues relating to the avant-garde, social protest, feminism and racism.
Attributes: Arts Gen Ed, *The Arts Gen Ed, Liberal

ARTS 3210 The Illustrated Man-Sci-Fi Metaphors & Ray Bradbury: Advanced (4 Credits)
This course facilitates a study of drawing via the genre of science-fiction. The student will explore the ways in which metaphors emerge, giving visual representation to same, within a quintessential work of the genre's central figure/work - Ray Bradbury's The Illustrated Man, where tattoos come to life. The focus of the study will center on the following - key compositional images (tattoos) that are compelling and imaginative; an environment that reflects a story's premise; the development of appropriate symbolism and mood; the researching of historical motifs; the expansion of drawing techniques; and the creation of a narrative flow. We will work collaboratively to present, in a visual fashion, Bradbury's short stories. The course will deal with drawing in various materials to include charcoal, pencils, conte crayons, and ink.
Attributes: Arts Gen Ed, *The Arts Gen Ed, Liberal

ARTS 3215 The Odd Couple of Art History – Van Gogh & Gauguin (4 Credits)
For a two-month period in 1888, Vincent van Gogh and Paul Gauguin shared a small yellow house located in the south of France. Known as the odd couple of art history, their time together is considered explosive, in temperament and yet more so in creativity. The images created by both men are astounding during this short-lived arrangement. And, it will end with the institutionalization of van Gogh resulting in a definitive break in van Gogh's relationship with Gauguin. The study of this artistic liaison and their work begins with a date - October 23, 1888.
Attributes: Arts Gen Ed, *The Arts Gen Ed, Liberal

ARTS 3225 The Renaissance & Reformation (4 Credits)
This study will explore the history and art of the Renaissance and Reformation and will present an in-depth analysis of the period to include the various artists in relation to their training, stylistic development, oeuvre, the role of patronage, as well as myth/legend.
Attributes: Liberal

ARTS 3250 Design Thinking: Advanced (4 Credits)
This course focuses on new trends in creative business thinking by looking at business with both an analytical and intuitive mind. It provides basic design theories and explains how they are applied practically in business. "Design Thinking" is a new trend of thinking which can contribute to a competitive advantage for many successful business entrepreneurs and transform arts or socially oriented projects The methods and knowledge gained from this course can be applied to any type of business or industry worldwide. This course is offered for our International Education program students.
Attributes: Liberal

ARTS 3260 Advanced Watercolor Painting (4 Credits)
Watercolor Painting is an advanced study presenting the technical and aesthetic aspects of this creative art form, along with some of its historical and contemporary practitioners.
Attributes: Liberal

ARTS 3996 Special Topics in Arts (1-8 Credits)
The content of this course will vary by term and section. Students may repeat this course for credit as long as the topic differs. Please refer to the Term Guide for course topic offerings.
Attributes: Liberal

ARTS 3998 Individualized Studies in Art (ARTS) (1-8 Credits)
Students have the opportunity to develop individualized studies with their mentor in Art (ARTS). Please contact your mentor/advisor for more details.

ARTS 4010 Art History: Methods and Theories (4 Credits)
Why are certain artworks considered important in art history? What are the methods and theories art historians use to gauge aesthetic, cultural, and historical significance of the artworks? Through exploring these questions, students will learn about the methods and cultural contexts for constructing their own brief accounts of art history. Specifically, students will apply the art history methods to select, observe, analyze, and discuss the artworks. Students will practice what an art historian would do when carrying out rigorous research and writing about a major artwork. Students will also examine the methodological and critical cultural issues in the field of art history. This course was previously ARTS-4010 Art History: A Study of Cultures. Students taking this course should have upper-level standing with advanced level academic skills. A lower-level art history class is highly recommended.
Attributes: Arts Gen Ed, *The Arts Gen Ed, Liberal

ARTS 4011 Arts-based Research Practice (4 Credits)
Through studying the concepts of arts-based research and samples from the visual, performing, narrative, and media arts, students learn to design and carry out arts-based research projects that combine artmaking activities in social research contexts. Specifically, students survey various research methods, tools, and resources appropriate to their arts disciplines and individual projects. Sample research practice might begin with a question emerged from artistic practice, employ artmaking as a part of research process, or consider research as an artistic practice.
Attributes: Liberal

ARTS 4015 Arts & The Environment: Advanced (4 Credits)
Students will explore, create, and perform work inspired by the natural and built world. We will investigate how diverse artists working in different media interpret and respond to nature, urban environments, and environmental concerns. The goal is to experience a range of conceptual approaches and aesthetic strategies in context with developing individual and/or collaborative projects that are informed by environmental themes.
Attributes: Arts Gen Ed, *The Arts Gen Ed, Liberal

ARTS 4020 Color Theory (4 Credits)
Understanding the interaction of color is a critical component of studio and digital art studies. In this course, we will learn how colors interact with each other as well as their effects on human perception. While the emphasis of this course is on the practice of methodically demonstrating color relationships in a series of hands-on assignments, the conceptual properties of color will be explored within the color studies as they relate to cultural/symbolic meaning, form and perception. Since critique and appropriate verbalization of color theory is a critical component of this course, each assignment will be accompanied by an explanatory statement.
Attributes: Arts Gen Ed, *The Arts Gen Ed, Liberal

ARTS 4035 Images of Women in Western Art (4 Credits)
This course is a critical survey of women's artworks, and their creative processes, from the Middle Ages to the present time. Through examining women artists' lives, creative achievements, and social justice work in historical and cultural contexts, students will also recognize various aspects of diversity, equity, inclusion, and social responsibility in the art world. Specifically, students will explore the historical and contemporary societal factors that shape women artists' development of self and group identity—encompassing gender, race, class, sexuality, and other social categories—and its portrayals in the visual arts. Students will analyze the structures in the Western art system that create dynamics of patriarchy, power, privilege, oppression, and empowerment and their effect on women artists' lives and artworks. Students will analyze principles of human rights, access, equity, and autonomous participation manifested in gender-based social justice arts.
Attributes: Arts Gen Ed, *Diversity Gen Ed, *The Arts Gen Ed, Liberal

ARTS 4055 Native North American History & Art (4 Credits)
The visual arts express the history, ideas and beliefs of the communities in which they are created. Therefore, this course begins with a foundational reading of topics in the histories and philosophies of Indigenous nations located in North America with an emphasis on the Indigenous perspective. Contextualized within this critical historical understanding, the course will consider the diversity of visual/artistic expression among Indigenous nations and examine the central role of Indigenous arts in storytelling, cultural continuity, resistance and sovereignty. The role of contemporary pan-Indian trends in Native North American art will be studied in the context of the global Indigenous movement. Corequisites: Visual Literacy.
Attributes: Other World Civilization Gn Ed, Arts Gen Ed, *The Arts Gen Ed, *World Hist & Glb Awnss Gen Ed, Liberal

ARTS 4070 What Is Art? (4 Credits)
This course focuses on the philosophies of art, the aesthetic theories, interpretations of art, and examples of art emerged from various times and parts of Western and non-Western societies. Students will contemplate on the enduring questions and issues related to, for example, the concepts of beauty, good art, and moral dimension of art; socio-cultural assumptions about art; definition, function, meaning, and value of art; and aesthetic qualities and experiences of art. Prior to registering, students should have prior college course or knowledge in art, philosophy, or cultural studies, as well as upper-level standing with advanced level academic skills. This course was previously ART-224514 What is Art?
Attributes: Arts Gen Ed, *The Arts Gen Ed, Liberal

ARTS 4122 Independent Arts Project (4 Credits)
The purpose of this study is for advanced level arts students of any genre to independently explore a larger project in their chosen art form(s) as well as engage with related artistic questions/concerns generated by their earlier experiences and current obsessions. Interdisciplinary and/or uses of multiple perspectives or media will be particularly encouraged by the mentor where applicable.
Attributes: Liberal

ARTS 4800 Arts Internship (4 Credits)
The internship is an opportunity for a student to apply the theories and methods of The Arts to a real-world experience. Students should work independently, with their mentor, and with the Career Services division well in advance of the internship term to find an internship opportunity that meets their specific needs and fits within their degree program and college level appropriateness. An internship may only be completed with the approval of the student's mentor.

ARTS 4998 Individualized Studies in Art (ARTS) (1-8 Credits)
Students have the opportunity to develop individualized studies with their mentor in Art (ARTS). Please contact your mentor/advisor for more details.

ASLG: American Sign Language (Undergraduate)

ASLG 1005 American Sign Language and Deaf Culture I (4 Credits)
This course will focus on the practice of American Sign Language (ASL), including foundational grammatical structures and necessary vocabulary for basic understanding and usage of the language. In addition, students will learn about the history, heritage, and culture of the Deaf in America. Students should be available for synchronous Microsoft Teams practice sessions once per week or biweekly. Special accommodations will be made for deployed military students. This course was previously CHS 251244 American Sign Language I.
Attributes: Foreign Language Gen Ed, *World Languages Gen Ed, Liberal

ASLG 1010 American Sign Language II (4 Credits)
This course is designed to be a continuation of ASL I. Students will build on and sharpen basic linguistic tools learned in ASL I, while also employing new tools that will enhance description, concept and use of space. Along with fingerspelling, numbers, and new vocabulary, students will focus on classifiers, spatial agreement, idiomatic expressions, and poetry to enhance their understanding of ASL signs and phrases. Prerequisites: ASLG 1005.
Attributes: Foreign Language Gen Ed, *World Languages Gen Ed, Liberal

ASLG 1998 Individualized Studies in American Sign Language (ASLG) (1-8 Credits)
Students have the opportunity to develop individualized studies with their mentor in American Sign Language (ASLG). Please contact your mentor/advisor for more details.

ASLG 2998 Individualized Studies in American Sign Language (ASLG) (1-8 Credits)
Students have the opportunity to develop individualized studies with their mentor in American Sign Language (ASLG). Please contact your mentor/advisor for more details.

ASLG 3296 American Sign Language III (4 Credits)
This course expands basic skills acquired in American Sign Language level 1 and 2. Emphasis is placed on expansion and refinement of expressive and receptive conversational skills, including vocabulary expansion, linguistic principles, classifications, sign fluidity, and transliteration. In addition to expanding their vocabulary, students will learn more complex grammatical features through narratives and dialogues. Prerequisites: American Sign Language II ASLG 1010 with a grade of "C", or equivalent.
Attributes: *World Languages Gen Ed, Liberal

ASLG 3996 Special Topics in ASLG (1-8 Credits)
Attributes: Liberal

ASLG 3998 Individualized Studies in American Sign Language (ASLG) (1-8 Credits)
Students have the opportunity to develop individualized studies with their mentor in American Sign Language (ASLG). Please contact your mentor/advisor for more details.

ASLG 4998 Individualized Studies in American Sign Language (ASLG) (1-8 Credits)
Students have the opportunity to develop individualized studies with their mentor in American Sign Language (ASLG). Please contact your mentor/advisor for more details.

BIOL: Biology (Undergraduate)

BIOL 1000 Survey of Biology (4 Credits)
This course is a one term survey of theories, principles, and concepts of the biological sciences. The topics covered include cell structure and function; energy and metabolism; mechanisms and patterns of inheritance; DNA and gene function; evolution; natural history; and the functions of biological communities, and ecosystems. Note: This course is intended for general education and it does not meet the guidelines for Biology concentrations.
Attributes: Natural Science Gen Ed, *Natural Science Gen Ed, Liberal

BIOL 1002 Human Biology (4 Credits)
This course provides an introduction to the theories, principles, and concepts of the biological sciences with an emphasis on human systems. The topics covered include the scientific method, basic biochemistry, cell structure and function; tissue organization; homeostasis and feedback systems; the structure and function of body systems; genetics and inheritance; and evolutionary theory.
Attributes: Natural Science Gen Ed, *Natural Science Gen Ed, Liberal

BIOL 1004 Human Nutrition (4 Credits)
This course provides an introduction to the theories, principles, and concepts underlying the use of nutrients by the human body. The topics covered include micro and macronutrients; the digestive tract; nutrient digestion, absorption, and metabolism; energy balance; the relationship of the diet to fitness, health, and life span; and essentials of food and diet analysis.
Attributes: Natural Science Gen Ed, *Natural Science Gen Ed, Liberal

BIOL 1006 Genomics & You (4 Credits)
This introductory level course provides the student with knowledge of the principles and application of human genomics, which addresses all genes and their interrelationships in order to identify their combined influence on the growth and development of the human organism. The course introduces the basics of molecular genetics and the principles of heredity and goes on to identify chromosomal disorders and gene mutations associated with human diseases. Students will explore the role of health professionals in genomics, including obtaining health histories, constructing pedigrees, and providing genetic counseling. Other topics include population genetics, newborn screening, perinatal genetics, pharmacogenomics, and ethical concerns.
Attributes: Natural Science Gen Ed, *Natural Science Gen Ed, Liberal

BIOL 1200 Biology I with Lab (4 Credits)
Biology I with Lab is the first course of the two-term sequence in general biology for science concentrations. This course serves as an introduction to the basic principles of biology, primarily in the domain of cellular and molecular biology. Themes include: basic biochemistry; cell structure; membrane structure and function; cellular respiration and photosynthesis; cell communication; the cell cycle; meiosis; the chromosomal and molecular basis of inheritance; gene expression; the biology of viruses; and biotechnology. The importance of the scientific method, definitions and characteristics of life, and evolutionary principles will be emphasized. Students will gain experience in basic laboratory techniques. This course uses a mandatory hands-on lab kit to provide students an authentic laboratory experience. The kit (in addition to the textbook) will add an additional cost to the Course Materials. See the Learning Contract/Syllabus for specific details. This course contains elements which rely on vision and motor skills to complete. If you have a visual or motor impairment and are considering registering for this course, it is recommended that you reach out to Accessibility Resources and Services (Disability.Services@sunyempire.edu) in advance of registration to determine if this course is appropriate and what alternatives may be available.
Attributes: Natural Science Gen Ed, *Natural Science Gen Ed, Liberal

BIOL 1201 Biology II with Lab (4 Credits)
Biology II with Lab is the second course of the two-term sequence in general biology for science concentrations. This course serves as an introduction to the basic principles of biology, primarily in the domain of microbial, plant and animal biology. Themes explored include: the biological diversity of bacteria, archaea, protists, and fungi; plant form and function, including plant structure, growth, development, and transport; animal form and function, including digestion, respiration, immune responses, excretion, endocrinology, reproduction, and neurology. The study of life forms is presented in the context of the principles of evolution and ecology and emphasizes the importance of interactions among organisms. This course uses a mandatory hands-on lab kit to provide students an authentic laboratory experience. The kit (in addition to the textbook) will add an additional cost to the Course Materials. See the Learning Contract/Syllabus for specific details. This course contains elements which rely on vision and motor skills to complete. If you have a visual or motor impairment and are considering registering for this course, it is recommended that you reach out to Accessibility Resources and Services (Disability.Services@sunyempire.edu) in advance of registration to determine if this course is appropriate and what alternatives may be available. Prerequisites: Biology I with Lab (BIOL 1200) or equivalent.
Attributes: Natural Science Gen Ed, *Natural Science Gen Ed, Liberal

BIOL 1204 Introduction to Cell Biology & Genetics (4 Credits)
This course provides an introduction to the theories, principles, and concepts underlying cell structure and function, and transmission and expression genetics. It is the first of a sequence of three introductory studies which prepares students for advanced level study in Biology. The topics covered include the biological macromolecules; cell membranes and cell organization; energetics; respiration; photosynthesis; cell division; modes of inheritance; structure and replication of DNA; and gene expression. Note: Students should select either Introduction to Cell Biology and Genetics (BIOL 1204) or Biology I with Lab (BIOL 1200).
Attributes: Natural Science Gen Ed, *Natural Science Gen Ed, Liberal

BIOL 1205 Introduction to Organismal Biology (4 Credits)
This course provides an introduction to the theories, principles, and concepts underlying the structure and function of organ systems in animals and plants. It is part of a sequence of three introductory studies which prepares students for advanced level study in Biology. In animals, the topics covered include circulation; respiration; digestion; excretion; immune responses; the endocrine, nervous, and musculoskeletal systems; reproduction; and development. Plant form and function; reproduction; and sensory systems are also covered. Highly Recommended (not required): Students will benefit from having taken either Introduction to Cell Biology and Genetics (BIOL 1204), or Biology I with Lab . Note: Students should select the two term sequence of Introduction to Organismal Biology (BIOL 1205) and Introduction to Population Biology (BIOL 1206), or Biology II with Lab (BIOL 1201).
Attributes: Natural Science Gen Ed, *Natural Science Gen Ed, Liberal

BIOL 1206 Introduction to Population Biology (4 Credits)
This course provides an introduction to the theories, principles, and concepts related to evolution, natural history, and ecology. It is part of a sequence of three introductory studies which prepares students for advanced level study in Biology. The topics covered include evolution and speciation; the history of life; systematics and a survey of prokaryotes, protists, fungi, plants, and animals; and the functions of biological populations, communities, ecosystems, and biomes. Note: Students should select the two term sequence of Introduction to Organismal Biology (BIOL 1205) and Introduction to Population Biology (BIOL 1206), or Biology II with Lab (BIOL 1201).
Attributes: Natural Science Gen Ed, *Natural Science Gen Ed, Liberal

BIOL 1210 Biology I: Lecture (3 Credits)
Biology I is the first course of a two-term sequence in general biology for science concentrations. This three-credit course covers the lecture and not the laboratory component of the sequence, which is offered as a separate course. Students will learn the basic principles of cellular and molecular biology, importance of the scientific method, definitions and characteristics of life, and evolutionary principles. Lecture topics include: basic biochemistry; cell structure; membrane structure and function; cellular respiration and photosynthesis; cell communication; the cell cycle; meiosis; the chromosomal and molecular basis of inheritance; gene expression; the biology of viruses; and biotechnology. This lecture course complements the lab component covered in Biology I Laboratory, but it is not a co-requisite to the lab.
Attributes: Natural Science Gen Ed, *Natural Science Gen Ed, Liberal

BIOL 1211 Biology I: Laboratory (1 Credits)
This is a one-credit laboratory course that supports the Biology I course. Students will learn basic knowledge of cellular and molecular biology through laboratory exercises. Laboratory topics include: chemical investigations involving organic biological macromolecules, diffusion and osmosis, cellular respiration, and photosynthesis; microscopic examination of cellular structures and the processes of mitosis and meiosis; solution of Mendelian genetics problems using Punnett squares; analysis of DNA and RNA molecules and the processes of transcription and translation; and observation of various types of viruses. This laboratory course complements the lecture component covered in Biology I, but it is not a co-requisite to the lecture. This course uses a mandatory hands-on lab kit to provide students an authentic laboratory experience. The kit (in addition to the textbook) will add an additional cost to the Course Materials. See the Learning Contract/Syllabus for specific details. This course contains elements which rely on vision and motor skills to complete. If you have a visual or motor impairment and are considering registering for this course, it is recommended that you reach out to Accessibility Resources and Services (Disability.Services@sunyempire.edu) in advance of registration to determine if this course is appropriate and what alternatives may be available.
Attributes: Liberal

BIOL 1212 Biology II: Lecture (3 Credits)
Biology II is the second course of a two-term sequence in general biology for science concentrations. This three-credit course covers the lecture and not the laboratory component of the sequence, which is offered as a separate course. Students will learn the basic principles of biology, primarily in the domain of microbial, plant and animal biology. Lecture topics include: biological diversity; plant form and function; animal form and function, including digestion, respiration, immune responses, excretion, endocrinology, reproduction, and neurology. The study of life forms is presented in the context of the principles of evolution and ecology and emphasizes the importance of interactions among organisms. This lecture course complements the lab component covered in Biology II Laboratory, but it is not a co-requisite to the lab. Prerequisites: Biology I (BIOL 1210) or equivalent.
Attributes: Natural Science Gen Ed, *Natural Science Gen Ed, Liberal

BIOL 1213 Biology II: Laboratory (1 Credits)
This is a one-credit laboratory course that supports the Biology II course. Students will learn basic knowledge of microbiology and plant and animal biology through laboratory exercises. Dissection techniques are explained and used to compare a variety of life forms and their internal anatomy. Laboratory topics include: the biological diversity of bacteria, archaea, protists, and fungi; plant form and function; and animal form and function. Life forms are compared and contrasted in the context of the principles of evolutionary adaptation. This laboratory course complements the lecture component covered in Biology II, but it is not a co-requisite to the lecture. This course uses a mandatory hands-on lab kit to provide students an authentic laboratory experience. The kit (in addition to the textbook) will add an additional cost to the Course Materials. See the Learning Contract/Syllabus for specific details. This course contains elements which rely on vision and motor skills to complete. If you have a visual or motor impairment and are considering registering for this course, it is recommended that you reach out to Accessibility Resources and Services (Disability.Services@sunyempire.edu) in advance of registration to determine if this course is appropriate and what alternatives may be available. Prerequisites: Biology I (BIOL 1210) or equivalent.
Attributes: Liberal

BIOL 1300 Anatomy & Physiology I (4 Credits)
This course is a survey of the structure and function of body systems. It is the first of two introductory studies of Anatomy and Physiology. The topics covered include anatomical organization; homeostasis; cell and tissue organization; metabolism; the integumentary system; the skeletal and muscular systems; the central and peripheral nervous systems; and the endocrine system. This study includes a project component to be determined by the instructor. Note: This study is intended for students in Health related concentrations.
Attributes: Liberal

BIOL 1301 Anatomy & Physiology II (4 Credits)
This study is a survey of the structure and function of body systems. It is the second of two introductory studies of Anatomy and Physiology. The topics covered include the cardiovascular system and blood; the lymphatic, digestive, respiratory, and excretory systems; water and acid/base balance; reproduction and development. This study includes a project component to be determined by the instructor. Prerequisite (must complete before registering): Anatomy and Physiology I (BIOL 1300) Note: This study is intended for students in health-related concentrations. This course was previously SMT-272734.
Attributes: Liberal

BIOL 1304 Anatomy & Physiology I with Lab (4 Credits)
This course is a survey of the structure and function of body systems. It is the first of two introductory studies of Anatomy and Physiology. The topics covered include anatomical organization; homeostasis; cell and tissue organization; metabolism; the integumentary system; the skeletal and muscular systems; the central and peripheral nervous systems; and the endocrine system. This course contains elements which rely on vision and motor skills to complete. If you have a visual or motor impairment and are considering registering for this course, it is recommended that you reach out to Accessibility Resources and Services (Disability.Services@sunyempire.edu) in advance of registration to determine if this course is appropriate and what alternatives may be available. Notes: This course uses a mandatory hands-on lab kit to provide students an authentic laboratory experience. The kit (in addition to the textbook) will add an additional cost to the Course Materials. See the Learning Contract/Syllabus for specific details.
Attributes: Natural Science Gen Ed, *Natural Science Gen Ed, Liberal

BIOL 1305 Anatomy & Physiology II with Lab (4 Credits)
This course is a survey of the structure and function of body systems. It is the second of two introductory studies of Anatomy and Physiology. The topics covered include the cardiovascular system and blood; the lymphatic, digestive, respiratory, and excretory systems; water and acid/base balance; reproduction and development. This course contains elements which rely on vision and motor skills to complete. If you have a visual or motor impairment and are considering registering for this course, it is recommended that you reach out to Accessibility Resources and Services (Disability.Services@sunyempire.edu) in advance of registration to determine if this course is appropriate and what alternatives may be available. Note: This course uses a mandatory hands-on lab kit to provide students an authentic laboratory experience. The kit (in addition to the textbook) will add an additional cost to the Course Materials. See the Learning Contract/Syllabus for specific details. Prerequisites: Anatomy and Physiology I with Lab (BIOL 1304) or equivalent.
Attributes: Natural Science Gen Ed, *Natural Science Gen Ed, Liberal

BIOL 1310 Anatomy and Physiology I: Lecture (3 Credits)
Anatomy and Physiology I is the first course of a two-term sequence in general Anatomy and Physiology for science concentrations. This three-credit course covers the lecture and not the laboratory component of the sequence, which is offered as a separate course. Students will explore anatomical organization; homeostasis; cell and tissue organization; metabolism; the integumentary system; the skeletal and muscular systems; the central and peripheral nervous systems; and the endocrine system. Notes: This lecture course complements the lab component covered in Anatomy and Physiology I Laboratory, but it is not a co-requisite to the lab.
Attributes: Natural Science Gen Ed, *Natural Science Gen Ed, Liberal

BIOL 1311 Anatomy & Physiology I: Laboratory (1 Credits)
This is a one-credit laboratory course that supports the Anatomy and Physiology I course. Students will learn basic knowledge of the general principles of Anatomy and Physiology through laboratory exercises. Students will practice dissection and laboratory techniques using laboratory equipment and preserved specimens. This course uses a mandatory hands-on lab kit to provide students an authentic laboratory experience. The kit (in addition to the textbook) will add an additional cost to the Course Materials. See the Learning Contract/Syllabus for specific details. Notes: This laboratory course complements the lecture component covered in Anatomy and Physiology I, but it is not a co-requisite to the lecture. This course contains elements which rely on vision and motor skills to complete. If you have a visual or motor impairment and are considering registering for this course, it is recommended that you reach out to Accessibility Resources and Services (Disability.Services@sunyempire.edu) in advance of registration to determine if this course is appropriate and what alternatives may be available.
Attributes: Liberal

BIOL 1312 Anatomy & Physiology II: Lecture (3 Credits)
Anatomy and Physiology II is the second course of a two-term sequence in general Anatomy and Physiology for science concentrations. This three-credit course covers the lecture and not the laboratory component of the sequence, which is offered as a separate course. Students will explore the cardiovascular system and blood; the lymphatic, digestive, respiratory, and excretory systems; water and acid/base balance; reproduction and development. This lecture course complements the lab component covered in Anatomy and Physiology II Laboratory, but it is not a co-requisite to the lab. Note: This lecture course complements the lab component covered in Anatomy and Physiology II Laboratory, but it is not a co-requisite to the lab. Prerequisites: Anatomy and Physiology I (BIOL 1310) or equivalent.
Attributes: Natural Science Gen Ed, *Natural Science Gen Ed, Liberal

BIOL 1313 Anatomy & Physiology II: Laboratory (1 Credits)
This is a one-credit laboratory course that supports the Anatomy and Physiology II course. Students will learn basic knowledge of the general principles of Anatomy and Physiology through laboratory exercises. Students will practice dissection and laboratory techniques using laboratory equipment and preserved specimens. This course uses a mandatory hands-on lab kit to provide students an authentic laboratory experience. The kit (in addition to the textbook) will add an additional cost to the Course Materials. See the Learning Contract/Syllabus for specific details. Notes: This laboratory course complements the lecture component covered in Anatomy and Physiology II, but it is not a co-requisite to the lecture. This course contains elements which rely on vision and motor skills to complete. If you have a visual or motor impairment and are considering registering for this course, it is recommended that you reach out to Accessibility Resources and Services (Disability.Services@sunyempire.edu) in advance of registration to determine if this course is appropriate and what alternatives may be available. Prerequisites: Anatomy and Physiology I (BIOL 1310) or equivalent.
Attributes: Liberal

BIOL 1400 Evolution & Ecology (4 Credits)
This course provides an introduction to the theories, principles, and concepts related to evolution, natural history, and ecology. The topics covered include Mendelian inheritance; evolution and speciation; the history of life; systematics; a survey of plants and animals; and the functions of biological populations, communities, and ecosystems. Note: This study is not intended for Biology concentrations.
Attributes: Natural Science Gen Ed, *Natural Science Gen Ed, Liberal

BIOL 1402 Introduction to Biological Anthropology (4 Credits)
This course examines biological (or physical) anthropology, or the evolution of the human species and the nature of contemporary human variation. To establish a framework for the study of human evolutionary biology, principles of evolutionary theory, inheritance, population biology and genetics will be examined. As humans are classified within the Order Primates, we will also study the evolution, ecology, and behavior of our closest living relatives: prosimians, monkeys and apes. Fossil evidence for human evolution will then be considered through comparisons with non-human primate ecology and evolution to reconstruct prehistoric hominid evolution.
Cross-listed with ANTH 1402.
Attributes: Natural Science Gen Ed, *Natural Science Gen Ed, Liberal

BIOL 1404 Wildlife Conservation (4 Credits)
This course is a survey of wildlife conservation and management. That means we will paint with a broad brush as we discuss a broad spectrum of topics related to wildlife conservation. Some topics could include: wildlife conservation as a social process encompassing, lay and professional activities in the use of wildlife resources, wildlife habitats, the science of wildlife conservation, as well as identify and discuss the role of government and private wildlife organizations and agencies.
Attributes: Natural Science Gen Ed, *Natural Science Gen Ed, Liberal

BIOL 1994 Special Topics in Biology (1-8 Credits)

BIOL 1995 Special Topics in Biology (1-8 Credits)

BIOL 1996 Special Topics in Biology (1-8 Credits)
The content of this course will vary by term and section. Students may repeat this course for credit as long as the topic differs. Please refer to the Term Guide for course topic offerings.
Attributes: Liberal

BIOL 1997 Special Topics in Biology (1-8 Credits)
The content of this course will vary by term and section. Students may repeat this course for credit as long as the topic differs. Please refer to the Term Guide for course topic offerings.

BIOL 1998 Individualized Studies in Biology (BIOL) (1-8 Credits)
Students have the opportunity to develop individualized studies with their mentor in Biology (BIOL). Registration for this class must be approved by the student's mentor.

BIOL 2000 Bioethics in Modern Medicine (4 Credits)
Bioethics is an interdisciplinary field of study and a set of social and cultural practices. It examines the moral questions raised by developments in biomedicine, biotechnologies and the life sciences. Ethical issues penetrate nearly every area of the biological, health care, clinical, social and behavioral sciences and medical humanities. This public health course uses empirical and theoretically-informed case-based approaches to provide an overview of the moral, philosophical, and cultural underpinnings of ethical issues in U.S. medical care and public health research practice.
Attributes: Liberal

BIOL 2002 Populations & Diseases (4 Credits)
Diseases may manifest differently in populations; diseases may also impact populations disproportionately. What determines how a disease progresses are a combination of genetic, biological, environmental and/or social factors. Adopting a public health approach is useful to interpret and understand how diseases manifest themselves and impact populations differently. This course is based on a careful examination of several diseases that may (or may not) affect populations differently. Concepts of risk, exposure, prevention and treatment will be explored in each disease module.
Attributes: Natural Science Gen Ed, *Natural Science Gen Ed, Liberal

BIOL 2004 Bioterrorism (2 Credits)
This course will cover the study of some biological organisms and toxins that may be used as weapons. This includes examining the type of organism (bacteria, virus, etc.) and the mechanism by which they are harmful. In the process, students will study the means by which their use can be prevented, appropriate defensive strategies and therapies that can be used to treat those who are affected by an attack. This course will focus on the biological aspects of bioterrorism, more than on the social, economic, or political aspects.
Attributes: Liberal

BIOL 2200 Microbiology with Lab (4 Credits)
This lower level course expands on topics covered in introductory biology courses and further explores the field of microbiology. Microorganisms are all around us, often unseen, generally beneficial, and occasionally harmful. This course will uncover this unseen world and study the diverse lives of microorganisms. Topics will include microbial structure and function; metabolism and growth; genetics and diversity; and disease and control. Students will gain experience in basic microbiology laboratory techniques. This course uses a mandatory hands-on lab kit to provide students an authentic laboratory experience. The kit (in addition to the textbook) will add an additional cost to the Course Materials. See the Learning Contract/Syllabus for specific details. Prerequisites: Biology I with Lab (BIOL 1200) and Biology II with Lab (BIOL 1201) or equivalents.
Attributes: Natural Science Gen Ed, *Natural Science Gen Ed, Liberal

BIOL 2201 Tropical Ecology (4 Credits)
This course covers the ecology and biodiversity of the Neotropics. In addition to content and interaction pertaining directly to the study, the there is a travel portion of the course that is conducted in the field in Central America. Depending on the sites, we will visit a range of habitats and thus range of ecologies of the flora and fauna. Habitats will include all or some of the following: lowland wet and moist forests, lower montane forest (cloud forest), rivers and wetlands, mangrove swamps and coral reefs. At several sites, we may explore the habitat at night, which may include travel by canoe and overnight stays in the forest. We may also visit remote indigenous communities.
Attributes: Liberal

BIOL 2202 Biology of Ecosystems (4 Credits)
Biology of Ecosystems examines the fundamental themes of biology through the study of living organisms in ecosystems. This course emphasizes the importance of biodiversity and the complex interaction and interdependence between plants and animals in healthy ecosystems. A single unifying theme is central to all biology: Darwin's theory of evolution by natural selection. All living things have evolved in the context of their physical and biotic environments. This course presents a plant and insect centered perspective that examines the ways that living organisms adapt to each other and to their environment. It also discusses ecological topics of widespread public concern.
Attributes: Natural Science Gen Ed, *Natural Science Gen Ed, Liberal

BIOL 2204 Ethnobotany (4 Credits)
Our human ancestors depended on plants for food, shelter, medicine, and clothing. Plants also had a key role in religion and mythology. Knowledge of plants and their uses was vital for survival for early peoples, and many cultures today still depend on plants for many of their resources. In this course, students will learn about plant biology and the role of plants in societies throughout the world. Ethnobotanical field methods will be introduced and students will engage in field/practical activities. Other topics for exploration and discussion will include conservation, sustainable development, bioprospecting, and intellectual property rights.
Attributes: Natural Science Gen Ed, *Natural Science Gen Ed, Liberal

BIOL 2206 Winter Ecology (4 Credits)
Winter Ecology is a study of the organisms that occupy niches in the ecosystems of temperate climates with seasonal temperature variations. Some animals have evolved special adaptations to survive cold climates, while others simply adapt their seasonal behaviors in an attempt to survive the cold. These physiological and behavioral adaptations are a major focus of this study. Plants, too, have evolved specialized mechanisms to survive the winter. These specializations are intimately related to the weather and temperature processes inherent in a winter climate. Human responses to the cold are also studied to provide a basis for comparison with other organisms. Prerequisites: None..
Attributes: Natural Science Gen Ed, *Natural Science Gen Ed, Liberal

BIOL 2208 Animal Behavior (4 Credits)
The course of animal behavior has long been fascinating, yet we still know very little about the animal mind and the interactions between non-human species. To humans, most of our understanding of behavior is either subjective or alien. In this course, students will be introduced to the core conceptual, theoretical, and applied aspects in the interdisciplinary field of animal behavior. We will examine various topics in this field, including communication, mate selection, sexual selection, neuroethology, cultural transmission, learning, and personality. Note: Students taking this course should not also take the Inside the Animal Mind: Insights into Animal Behavior, Ecology, and Evolution residency course. Prerequisites: Introductory Biology or Introductory Psychology (PSYC 1005).
Attributes: Natural Science Gen Ed, *Natural Science Gen Ed, Liberal

BIOL 2210 Inside the Animal Mind: Insights into Animal Behavior Ecology & Evolution (4 Credits)
In this residency course, students will learn about the behavioral ecology and evolution of animals, and understand how they experience their perceptual world and navigate the ecological challenges that allowed them to survive or become extinct. Students will be introduced to the core conceptual, theoretical, and applied aspects in the interdisciplinary field of animal behavior. In particular, they will examine various topics in this field, such as communication, mate selection, sexual selection, neuroethology, cultural transmission, learning, and personality. Note: Students taking this residency course should not also take Animal Behavior (BIOL 2208). Prerequisites: Introductory Biology or Introductory Psychology (PSYC 1005).
Attributes: Natural Science Gen Ed, *Natural Science Gen Ed, Liberal

BIOL 2220 Microbiology: Lecture (3 Credits)
This course explores the field of Microbiology with an emphasis on diseases caused by various types of pathogens and discusses latest topics such as antibiotic resistance and vaccination. This three-credit course covers the lecture and not the laboratory component of the sequence, which is offered as a separate course. Topics covered will include: history of microbiology; cellular organization; infection and infectious diseases; microbial growth and metabolism; microbial genetics; and immunity. Notes: This lecture course complements the lab component covered in Microbiology Laboratory, but it is not a co-requisite to the lab. This course contains elements which rely on vision and motor skills to complete. If you have a visual or motor impairment and are considering registering for this course, it is recommended that you reach out to Accessibility Resources and Services (Disability.Services@sunyempire.edu) in advance of registration to determine if this course is appropriate and what alternatives may be available. Prerequisites: Biology I with Lab (BIOL 1200) and Biology II with Lab (BIOL 1201) or equivalents.
Attributes: Natural Science Gen Ed, *Natural Science Gen Ed, Liberal

BIOL 2221 Microbiology: Laboratory (1 Credits)
This is a one-credit laboratory course that supports the Microbiology course. Students will learn basic knowledge of Microbiology through laboratory exercises. This course uses a mandatory hands-on lab kit to provide students an authentic laboratory experience. The kit (in addition to the textbook) will add an additional cost to the Course Materials. See the Learning Contract/Syllabus for specific details. Notes: This laboratory course complements the lecture component covered in Microbiology, but it is not a co-requisite to the lecture. This course contains elements which rely on vision and motor skills to complete. If you have a visual or motor impairment and are considering registering for this course, it is recommended that you reach out to Accessibility Resources and Services (Disability.Services@sunyempire.edu) in advance of registration to determine if this course is appropriate and what alternatives may be available. Prerequisites: Biology I with Lab (BIOL 1200) and Biology II with Lab (BIOL 1201) or equivalents.
Attributes: Liberal

BIOL 2400 Plant Biology (4 Credits)
This course is a focused introduction to plant biology and provides the foundational knowledge for advanced study of plants. Topics include the structure and function of plant cells and tissues; plant physiology and development; plant genetics and evolution; plant classification and systematics; and an introduction to plant ecology. The course also explores the economic significance of plants and the relationships between plants and people. Hands-on and/or field activities are included in the learning activities. Prerequisites: Biology I with lab (BIOL 1200) and Biology II with lab (BIOL 1201).
Attributes: Natural Science Gen Ed, *Natural Science Gen Ed, Liberal

BIOL 2995 Special Topics in Biology (1-8 Credits)

BIOL 2996 Special Topics in Biology (1-8 Credits)

BIOL 2998 Individualized Studies in Biology (BIOL) (1-8 Credits)
Students have the opportunity to develop individualized studies with their mentor in Biology (BIOL). Registration for this class must be approved by the student's mentor.

BIOL 3200 The Biology of Being Human (4 Credits)
This study explores human 'uniqueness' from a biological perspective, in particular examining major features of human social and sexual behavior. Insights from ethology, evolutionary biology, and neurobiology are synthesized into a picture of human nature, behavior, and history. Implications of evolutionary theories of animal social behavior and their implications to humans are considered. This course is based on the pioneering work on 'human as social animals' by Drs. Paul Bingham and Joanne Souza from Stony Brook University. Prerequisite (must complete before registering): Biology I with Lab (BIOL 1200) or Introduction to Cell Biology and Genetics (BIOL 1204) Notes: This study meets the guidelines for Biology concentrations. This course is intended for both science and non-science students
Attributes: Liberal

BIOL 3204 Genetics (4 Credits)
This advanced level course explores the field of genetics. It expands on topics covered in introductory biology courses and extends prior knowledge of molecular genetics and the basic principles of heredity. The course emphasizes the importance of the scientific method, and investigates techniques used by scientists to unravel the intricacies of genetics. Topics include the history of genetics, Mendelian genetic principles, quantitative genetics, chromosome structure and mapping, mutations, gene expression, and current genetic biotechnologies. Students will learn the underlying principles behind modern genetics laboratory techniques and discuss the ethical ramifications of recent breakthroughs in genetic research. Prerequisites: Biology I with Lab (BIOL 1200) and Biology II with Lab (BIOL 1201) or equivalents.
Attributes: Natural Science Gen Ed, *Natural Science Gen Ed, Liberal

BIOL 3206 Cell Biology (4 Credits)
This study involves a detailed analysis of eukaryotic cell structure and function. It is suitable for advanced undergraduates who are pursuing a concentration in the life sciences. The topics covered include organelle structure and function; bioenergetics; cell respiration; photosynthesis; cell membranes and membrane trafficking; cell interactions and responses; the cytoskeleton and cell motility; the organization and expression of genetic material; and cell division. Emphasis is placed on the experimental background for selected topics. Highly Recommended (not required): Organic Chemistry I (CHEM 3220) or Organic Chemistry I with Lab (CHEM 3210) and Biology II with Lab (BIOL 1201) Prerequisites: Biology I with Lab (BIOL 1200) and Chemistry I with Lab (CHEM 1205) and Chemistry II with Lab (CHEM 1206) or equivalents .
Attributes: Natural Science Gen Ed, Liberal

BIOL 3208 Molecular Biology (4 Credits)
The aim of this course is to understand the key concepts of the central dogma of molecular biology, including organization of genomes and mechanisms of replication, repair and recombination processes, transcription, RNA processing, translation, and the regulatory mechanisms that control all aforementioned processes. Students will also gain a basic understanding of experimental techniques that have shaped our understanding of these concepts through the use of digital lab simulations and case studies. Prerequisites: Biology I with Lab (BIOL 1200) and Biology II with Lab (BIOL 1201) and Chemistry I with Lab (CHEM 1205) and Chemistry II with Lab (CHEM 1206) or equivalents.
Attributes: Natural Science Gen Ed, Liberal

BIOL 3210 Biology of Microorganisms (4 Credits)
This is an advanced level course exploring of microorganisms. Topics to be explored include biochemistry and cell biology of microorganisms; growth and growth prevention of bacteria; classification of microorganisms; viral genetics and replication cycles; interactions between microbes and host (including immunology); and a survey of human diseases caused by microorganisms. Students will learn the concepts with a historical perspective. Students will also learn about important infectious diseases that affect humans and their causative agents. Prerequisite (must complete before registering): Biology I with Lab (BIOL 1200) or Introduction to Cell Biology and Genetics (BIOL 1204) Note: This course meets the guidelines for Biology concentrations. This course is intended for science students.
Attributes: Liberal

BIOL 3212 Biology of the Brain (4 Credits)
Building on underlying concepts of biology, this course explores the structure and function of the human nervous system in order to provide a biological basis for understanding such topics as sensory perception, movement and coordination, regulation of thirst, hunger and temperature, sleep and dreams, and cognition. Neuroanatomy and neurophysiology will be studied, along with investigations into biorhythms, clocks, language, learning, and memory. Emphasis is on critical interpretation of scientific literature and research, as well as the acquisition of fundamental concepts of neurobiology relevant to some health issues. Prerequisites: Biology I with Lab (BIOL 1200) and Biology II with Lab (BIOL 1201) or equivalents.
Attributes: Natural Science Gen Ed, Liberal

BIOL 3214 Human Physiology (4 Credits)
This course involves a detailed analysis of the mechanisms, integration, and regulation of body systems. The topics covered include cell and tissue structure; metabolism, metabolic controls and energy balance; homeostasis; endocrine system; central and peripheral nervous systems; muscle and control of movement; cardiovascular system and blood flow; respiratory system and gas exchange; and urinary system and fluid balance. Prerequisites: Introduction to Cell Biology and Genetics, and Introduction to Organismal Biology; or Biology I and II; or Anatomy and Physiology I and II; and General Chemistry I and II.
Attributes: Liberal

BIOL 3302 Evolution (4 Credits)
A study of current evolutionary theory, including systematics, with an examination of macroevolutionary patterns and microevolutionary processes. This course approaches evolutionary biology as a process, illustrating the interplay between theory, observation, testing and interpretation. The student will be expected to examine and evaluate biological phenomena in light of the evolutionary processes that shaped them. Specific evolutionary studies are used to illustrate the application of theory as a tool for understanding natural systems. Prerequisites: Biology I with Lab (BIOL 1200) and Biology II with Lab (BIOL 1201) or equivalents.
Attributes: Liberal

BIOL 3304 Conservation Biology (4 Credits)
Conservation Biology is a biological science which focuses on the preservation of species and the protection of habitats. In this study, students will explore the ways species, populations, and communities interact with and modify the ecosystems in which they exist. They will examine the characteristics of, and the processes operating within, natural environmental systems that influence patterns of species distribution, influence adaptation and evolutionary trends, and contribute to the diversity and resiliency of ecological communities. Students will examine a variety of conservation theories and models and consider the ways human activities can promote or hinder conservation efforts. This course contains elements which rely on vision and motor skills to complete. If you have a visual or motor impairment and are considering registering for this course, it is recommended that you reach out to Accessibility Resources and Services (Disability.Services@sunyempire.edu) in advance of registration to determine if this course is appropriate and what alternatives may be available. Prerequisites: Biology I with Lab (BIOL 1200) and Biology II with Lab (BIOL 1201) or equivalents.
Attributes: Liberal

BIOL 3306 Ecology (4 Credits)
This course will examine relationships of both biotic (living) and abiotic (non-living) elements of the environment that influence the distribution and abundance of organisms. Major topics include: population regulation, competition, predation, ecosystem energetics, mathematical models, and nutrient cycling. The course covers topics in the areas of individual, population, community, and ecosystem ecology, as well as humanity's effect on natural systems. Prerequisites: Biology II with Lab (BIOL 1201) or Introduction to Population Biology (BIOL 1206) or Biology of Ecosystems (BIOL 2202) or Evolution and Ecology (BIOL 1400), and foundational knowledge in biology such as that gained in a lower level biology sequence or introductory ecology course, or equivalent.
Attributes: Natural Science Gen Ed, Liberal

BIOL 3308 Plant Ecology (4 Credits)
Plant ecology is the scientific study of interactions that determine the distribution and abundance of plants within the environment. In this course Students will learn the principles and concepts of plant ecology through an examination of plants within the environment. Topics will include: the individual plant and how it interacts with its environment; population biology; community ecology; global patterns of plant ecosystems; and the impacts of human activities on plants. Some of the subjects covered are unique to plants, such as photosynthesis and the ecology of plant-soil interactions. Prerequisites: Biology I with Lab (BIOL 1200) and Biology II with Lab (BIOL 1201) or equivalents.
Attributes: Natural Science Gen Ed, Liberal

BIOL 3310 Tropical Ecology (4 Credits)
This course covers the ecology and biodiversity of the Neotropics. In addition to content and interaction pertaining directly to the study, the there is a travel portion of the course that is conducted in the field in Central America. Depending on the sites, we will visit a range of habitats and thus range of ecologies of the flora and fauna. Habitats will include all or some of the following: lowland wet and moist forests, lower montane forest (cloud forest), rivers and wetlands, mangrove swamps and coral reefs. At several sites, we may explore the habitat at night, which may include travel by canoe and overnight stays in the forest. We may also visit remote indigenous communities. BIOL 3306 recommended Prerequisites: BIOL 1200 and BIOL 1201; or, BIOL 1204, BIOL 1205, and BIOL 1206; or, BIOL 1210, BIOL 1211, BIOL 1212, and BIOL 1213.
Attributes: Liberal

BIOL 3400 Marine Biology (4 Credits)
Marine Biology is the study of living organisms within saltwater ecosystems. This course covers the anatomy, physiology, and behavior of major groups of marine organisms and investigates the biochemistry, cell biology, genetics, and microbiology of life in the sea. Marine Biology presents an evolutionary and ecological approach that emphasizes the profound interdependence among marine organisms and their adaptations to each other and to their environment. Students will study factors responsible for the relative abundance and distribution of marine species and the factors influencing biodiversity. Students will read scientific studies, interpret data, make connections, and write about marine biology topics. Prerequisites: Biology I with Lab (BIOL 1200) and Biology II with Lab (BIOL 1201) or equivalents.
Attributes: Natural Science Gen Ed, Liberal

BIOL 3402 Comparative Vertebrate Anatomy & Physiology (4 Credits)
This course examines a number of areas in biology that focus specifically on vertebrates, such as evolution, speciation, behavior, anatomy, and physiology. The first cordate (vertebrate) organisms appeared on Earth about 542 million years ago. Vertebrate organisms evolved features that made them unique and, yet, they maintained biological characteristics that are also similar. Students will consider a comparative approach for examining life history characteristics of mammals, fish, birds, and reptiles. Throughout the term, students will also engage in dissections of vertebrate species to identify comparative anatomical features that enable species to survive in their respective environments. They will then consider the modifications in physiological processes that accompany form and function. Prerequisites (must complete before registering): Biology I with Lab (BIOL 1200) or Introduction to Cell Biology and Genetics (BIOL 1204), or equivalent, and Biology II with Lab (BIOL 1201) or the two-term sequence: Introduction to Organismal Biology (BIOL 1205) and Introduction to Population Biology (BIOL 1206), or equivalent. Corequisites: An upper level Organismal Biology course and Evolution Highly Recommended (not required): Students should have foundational knowledge gained in an introductory biology sequence, or human anatomy and physiology, and a general ecology course.
Attributes: Liberal

BIOL 3404 Primate Behavioral Ecology (4 Credits)
This course will present and discuss the social lives of the nonhuman primates. Topics may include primate evolution and taxonomy and an introduction to behavioral ecology and sociobiology. Students will then examine and discuss select groups of living primates. The course will also explore several themes in primate behavioral ecology including reproductive strategies, sexual selection, behavioral endocrinology, cooperation and conflict, cultural transmission, primate cognition and conservation as we cover the wide array of factors related to the lives of the non-human primates. Highly Recommended (not required): Biology II with Lab (BIOL 1201) or Introduction to Organismal Biology (BIOL 1205) and Introduction to Population Biology (BIOL 1206)
Attributes: Liberal

BIOL 3406 Zoonotic Diseases (2 Credits)
Historically, reports of zoonotic disease ravaged entire populations of human. To that extent, people knew very little of the likelihood that diseases could be passed from an animal to a human, and knew even less about what kinds of microbial organisms may be responsible for expressing human illness. In this study, students will learn about the kinds of microorganisms that are often hosted by animals, but have the potential to infect humans. Students will also study their life history characteristics, mechanisms for disease transmission, and the epidemiology of disease infection. Prerequisites: Biology I with Lab (BIOL 1200) or Introduction to Cell Biology and Genetics (BIOL 1204) or equivalents. Corequisites: Cell Biology (BIOL 3206) and Microbiology with Lab (BIOL 2200) and Introduction to Epidemiology (HSCI 1010).
Attributes: Liberal

BIOL 3408 Advanced Biological Anthropology (4 Credits)
Biological anthropology is a subfield of the larger discipline that studies humankind as a zoological species. As biological anthropology is firmly rooted in evolutionary theory, the evolutionary biology of humans is the central focus of the course. This is an advanced study of concepts in biological anthropology including genetics, evolutionary theory, paleontology, comparative anatomy & morphology, primate biology/behavioral ecology and hominid variability provide the foundation for understanding humanity's place in nature. Prerequisites: BIOL 1201, BIOL 1400, or BIOL 1402, or equivalent..
Cross-listed with ANTH 3408.
Attributes: Liberal

BIOL 3502 Cellular and Molecular Neuroscience (4 Credits)
In this one-semester, upper-level course, the structure and function of neurons are investigated. Students will build an understanding of how neuronal cell function determines higher brain processes, such as sensation and memory. In particular, neuronal development, neuronal activity, synapse formation and synaptic transmission will be studied in detail. Prerequisites: Biology I with lab (BIOL 1200) and Biology II with lab (BIOL 1201), or Anatomy and Physiology I with lab (BIOL 1304) and Anatomy and Physiology II with lab (BIOL 1305).
Attributes: Liberal

BIOL 3602 Phytochemistry (4 Credits)
Phytochemistry is a biology study to help students gain an understanding of how phytochemicals, the chemical compounds produced by plants, affect plant communities and the species and populations they interact with. Phytochemicals influence plant growth, predation by insects, fungal and bacterial interactions in plants and competition between plant communities. Phytochemistry is also an important component of human nutrition, pharmacognosy and human health. Human nutrition focuses on the constituents of foods and their nutritive value, including vitamins, minerals and metabolites. Pharmacognosy is the branch of science pertaining to the use of medicinal drugs derived from plants. Phytochemicals affect everyday life from the coffee we drink, to supplements we take and what foods we may utilize in our diets. Prerequisites: Plant Biology (BIOL 2400), Plant Ecology (BIOL 3308), and Chemistry I with lab (CHEM 1205)
Attributes: Liberal

BIOL 3604 Plant Physiology (4 Credits)
Plant physiology is the study of plant morphology, anatomy, function and behavior. It investigates the plant processes such as photosynthesis, metabolism, reproduction, respiration, growth, environmental stress, hormonal production and other processes that promote the survival of a given individual or species. Students will learn the function of plant parts as they pertain to growth, structural support, reproductive mechanisms and the production of defenses. Prerequisites: Plant Biology (BIOL 2400).
Attributes: Liberal

BIOL 3800 Bioethics (4 Credits)
Bioethics is an interdisciplinary field of study and a set of social and cultural practices. It examines the moral questions raised by developments in biomedicine, biotechnologies and the life sciences. Ethical issues pervade nearly every area of the biological, health care, clinical, social, and behavioral sciences. This course uses a case-based approach to provide an overview of the historical, moral, philosophical, and cultural underpinnings of ethical issues in biological, and medical research practice. Prerequisites: One term of Biology (BIOL).
Attributes: Liberal

BIOL 3996 Special Topics in BIOL (1-8 Credits)
The content of this course will vary by term and section. Students may repeat this course for credit as long as the topic differs. Please refer to the Term Guide for course topic offerings.
Attributes: Liberal

BIOL 3998 Individualized Studies in Biology (BIOL) (1-8 Credits)
Students have the opportunity to develop individualized studies with their mentor in Biology (BIOL). Registration for this class must be approved by the student's mentor.

BIOL 4102 Diseases of the Brain (4 Credits)
This is a one-semester, upper-level course for science concentrations and is designed to introduce students to a broad range of neurological and neuropsychiatric diseases and disorders in order to understand how genetic and environmental perturbations can disrupt normal brain function. The primary focus will be on understanding the biological basis of nervous system dysfunction. For each disease discussed, the subject matter will be organized to explain how normal brain function is impacted, as well as the biological mechanisms underlying dysfunction and current efforts to develop effective treatments. Prerequisites: Biology I with lab (BIOL 1200) and Biology II with lab (BIOL 1201), or Anatomy and Physiology I with lab (BIOL 1304) and Anatomy and Physiology II with lab (BIOL 1305), and Biology of the Brain (BIOL 3212) or any upper-level neuroscience course (BIOL 35XX) .
Attributes: Liberal

BIOL 4200 Kinesiology (4 Credits)
This course combines the knowledge from applied biological sciences, such as anatomy and physiology, and pairs it with physical sciences, such as physics, to understand human movement. Students will learn about body movement and its impact on the human body. They will also learn ways in which they can improve movement and reduce stress on the musculoskeletal system that can cause serious pain or injury. Students will engage in self-directed exercises that enable them to identify the kind of movement that involve specific groups of muscles, bones, and accompanying physiological processes. Completion of an introductory biology sequence that covers the human body is required. This course contains elements which rely on vision and motor skills to complete. If you have a visual or motor impairment and are considering registering for this course, it is recommended that you reach out to Accessibility Resources and Services (Disability.Services@sunyempire.edu) in advance of registration to determine if this course is appropriate and what alternatives may be available. Prerequisites: Biology I with Lab (BIOL 1200) or Introduction to Cell Biology and Genetics (BIOL 1204) and Biology II with Lab (BIOL 1201) or Introduction to Organismal Biology (BIOL 1205) and Introduction to Population Biology (BIOL 1206) or Anatomy & Physiology I with Lab (BIOL 1304) and Anatomy & Physiology II with Lab (BIOL 1305) or Anatomy & Physiology I (BIOL 1300) and Anatomy & Physiology II (BIOL 1301).
Attributes: Liberal

BIOL 4206 Immunology (4 Credits)
This course teaches in depth the molecular and cellular interactions of our immune system, how an immune response develops and the disorders of the immune system. The microenvironments where immune cells develop and mature are explored in detail. Signal transduction pathways that mediate ligand recognition and response by immune cell receptor complexes are described. The interplay between innate and adaptive immune responses to ensure effective neutralization of a specific pathogen are explored. The process of gene rearrangement during the development of T and B cell populations are studied. The multistep process required for the activation and proliferation of T and B lymphocytes during cell mediated and humoral immune responses are studied. Knowledge of the immune system will be utilized to understand various phases of cancer immunoediting, the role of genetics in hypersensitivity and the Biology of HIV. This course uses a mandatory hands-on lab kit to provide students an authentic laboratory experience. The kit (in addition to the textbook) will add an additional cost to the Course Materials. See the Learning Contract/Syllabus for specific details. This course contains elements which rely on vision and motor skills to complete. If you have a visual or motor impairment and are considering registering for this course, it is recommended that you reach out to Accessibility Resources and Services (Disability.Services@sunyempire.edu) in advance of registration to determine if this course is appropriate and what alternatives may be available. Prerequisites: Microbiology with Lab (BIOL 2200) or Molecular Biology (BIOL 3208) or Cell Biology (BIOL 3206) or equivalent.
Attributes: Liberal

BIOL 4300 Herpetology (4 Credits)
In this course, students will learn about in-depth concepts in herpetology, the study of reptiles and amphibians. Students will study the evolution and phylogeny of herpetological groups. In addition, students will have the opportunity to engage in taxonomic identification of northeast reptiles and amphibians. They will study the anatomical structures and physiological processes across taxonomic species that are adaptive to survival across nearly all terrestrial, and some marine and aquatic, biomes. Emphasis will be on the reproductive history in reptiles and amphibians, physiological and behavioral ecology. Students will consider species conservation, and the impact of global climate change on specific reptile and amphibian species. Prerequisites: Biology I with Lab (BIOL 1200) or Introduction to Cell Biology and Genetics (BIOL 1204), or equivalent and Biology II with Lab (BIOL 1201) or Introduction to Organismal Biology (BIOL 1205) and Introduction to Population Biology (BIOL 1206) or Zoology or Ecology (BIOL 3306) or Animal Behavior(BIOL 2208), or equivalent. Completion of an introductory biology sequence, equivalent, or permission from the instructor is required.
Attributes: Liberal

BIOL 4302 Animal Learning (4 Credits)
In this course, students will examine the traditional areas in the science of learning from both a biological and psychological perspective, including current theoretical and research considerations of classical conditioning, instrumental conditioning, aversive control of behavior and discrimination learning. Students will study these topics, as demonstrated from mainly animal models; however, these principles may also be applied to humans. Students will be required to demonstrate these principles of learning by engaging in a research project of a particular topic of interest. In addition, learners will undergo standard ethics protocols for research on animals and/or humans before engaging in a term project that demonstrates a learning phenomenon discussed in the course. This course contains elements which rely on vision and motor skills to complete. If you have a visual or motor impairment and are considering registering for this course, it is recommended that you reach out to Accessibility Resources and Services (Disability.Services@sunyempire.edu) in advance of registration to determine if this course is appropriate and what alternatives may be available. Prerequisites: Biology I with Lab (BIOL 1200) and Biology II with Lab (BIOL 1201) or equivalents, Introductory Psychology (PSYC 1005), Statistics (MATH 1065), and Research Methods equivalent .
Attributes: Natural Science Gen Ed, Liberal

BIOL 4304 Ornithology (4 Credits)
Ornithology explores all aspects of the biology of birds, including anatomy and physiology, evolution, and ecology. The history of ornithology is covered, as well as conservation efforts for endangered birds. In the laboratory portion of the course, the student will develop and perfect a variety of bird identification techniques, and investigate unique aspects of birds, including behavior, flight, habitats, and anatomy and physiology. The course emphasizes the importance of the scientific method and investigates techniques used by scientists to conduct research. Studies of bird populations are essential to provide information relevant to the health of our ecosystems. Prerequisites: Biology I with Lab (BIOL 1200) and Biology II with Lab (BIOL 1201) or equivalents.
Attributes: Natural Science Gen Ed, Liberal

BIOL 4306 Mammalogy (4 Credits)
In this course, students will learn about the different taxonomic species of animals that are considered mammals. They will also explore the natural history, evolution, taxonomy and systematics of mammalian species. Students will also consider the anatomic structures and physiological processes that enable mammals to survive across all biomes of the biosphere. As students learn about the various phylogenetic groups, they will further study species as models for behavioral ecology. Lastly, students will examine the factors that have led to species decline, and consider the conservation of mammals, and the strategies used in management strategies for species survival. Prerequisites: Biology I with Lab (BIOL 1200) and Biology II with Lab (BIOL 1201) or equivalents.
Attributes: Liberal

BIOL 4308 Marine Mammalogy (4 Credits)
Marine mammalogy is the scientific study of all orders of marine mammals, and their evolution, biology, ecology, and behavior. In this course, students will examine the taxonomic breadth and evolution of the marine mammal world. Students will also examine how the different anatomical structures and physiological processes across the taxa enable species to engage in ecological interactions within their immediate environment. They will investigate how different marine mammal species have adapted to select aspects of the marine habitat, including marine or aquatic systems, pelagic and inshore environments, and species found across marine biomes. Students will become familiar with the similarities and differences between closely related and distant marine species. The impact of human-animal interactions, marine mammal fisheries, and conservation has on specific species is also discussed. Prerequisites: Biology I with Lab (BIOL 1200) and Biology II with Lab (BIOL 1201) or equivalents.
Attributes: Liberal

BIOL 4310 Aquatic Biology & Ecology (4 Credits)
This course provides students with an overview of aquatic biology and ecology, including physical processes specific to freshwater systems (e.g., wetlands, ponds, lakes, streams, and rivers), aquatic biota, aquatic community interactions, ecosystem processes, and the conservation and management of freshwater ecosystems. During this course, students will engage in field-related activities to demonstrate common themes in the discipline, and conduct independent sampling of aquatic biota for species identification and to measure biodiversity. Students will conduct empirical research projects, and engage in aquatic field methods, data collection, and analysis. Thematically, students will also examine the importance of ecosystem and biota conservation, and the impact of sustainable actions on freshwater systems. Prerequisites: Ecology (BIOL 3306), Evolution (BIOL 3302), and Statistics (MATH 1065) .
Attributes: Liberal

BIOL 4400 Principles of Pharmacology (4 Credits)
Principles of Pharmacology is a one-semester, upper-level course for science concentrations. This four-credit course delves deeply into the pharmacology and pharmacokinetics of various drug classes. The molecular mechanisms of action behind the drugs and their clinical applications will be reviewed. Note: This course is intended for students in health-related or biology concentrations. Prerequisites: Organic Chemistry I with Lab (CHEM 3210) or Organic Chemistry I (CHEM 3220), and Biochemistry (CHEM 3400).
Attributes: Liberal

BIOL 4408 Molecular Biotechnology (4 Credits)
This course will examine the history, current state, and likely future of molecular biotechnology. Students will explore how research problems in fields such as health care, environmental science, industry, bioinformatics, agriculture, biodefense, and forensics can be solved with a biotechnological approach. Relevant organizations along with "real world" information on a variety of molecular techniques and regulations will be studied. The course will analyze food labeling laws, as well as gene patenting. The implications of evolutionary developmental biology (Evo Devo) and anthropology will be investigated. Ethical considerations of various biotechnologies will be discussed, along with comparisons of potential careers in the industry. Prerequisites: Genetics (BIOL 3204) and Molecular Biology (BIOL 3208) or equivalents.
Attributes: Liberal

BIOL 4410 Plant Biotechnology (4 Credits)
This course will provide students with advanced knowledge in plant breeding using recombinant DNA and tissue culture techniques. Activities such as online discussion forums, literature review, hands-on and virtual laboratory experiences and creation of a final project will enhance student learning and promote critical and analytical thinking. Topics include-Impact of Plant Biotechnology on Agriculture, Plant Breeding, Molecular Genetics, Recombinant DNA, Vector Design, Transgenic Plant Production, Regulations and Biosafety, and Field Testing of Transgenic Plants. The Laboratory portion of this course requires the purchase of a Lab Kit. Prerequisites: Plant Biology (BIOL 2400) and Molecular Biology (BIOL 3206).
Attributes: Liberal

BIOL 4700 Contemporary Topics in Biology (4 Credits)
This course offers in-depth exploration of current research in the biological sciences. Students will write papers explaining the underlying biology, methods, key results, and significance of biological research. Students should have completed advanced level courses in biology.
Attributes: Liberal

BIOL 4996 Special Topics in BIOL (1-8 Credits)
The content of this course will vary by term and section. Students may repeat this course for credit as long as the topic differs. Please refer to the Term Guide for course topic offerings.
Attributes: Liberal

BIOL 4998 Individualized Studies in Biology (BIOL) (1-8 Credits)
Students have the opportunity to develop individualized studies with their mentor in Biology (BIOL). Registration for this class must be approved by the student's mentor.

BUSN: Business (Undergraduate)

BUSN 1005 Business Communication (4 Credits)
This course will emphasize strategies for writing and editing business communications, including letters, emails, memos, short reports, and other business-related documents. It will cover principles of writing mechanics, audience orientation, and design. Critical thinking and problem-solving skills related to the writing of business documents will be utilized. Prerequisites: A previous college writing course is recommended.
Attributes: Liberal

BUSN 1010 Business Law I (4 Credits)
This course will introduce students to the basics of business law, principally focusing on contract and transactional law. Students will also be introduced to the UCC (Uniform Commercial Code), commercial paper and banking law.

BUSN 1015 Introduction to Business (4 Credits)
This course is designed to serve generally as a first business class to be taken by students in business and related concentrations. Its main objective is to provide a brief overview of the basic concepts and principles of contemporary business topics such as business ethics, economics, e-business, management, marketing, accounting, and finance.

BUSN 1998 Individualized Studies in Business (BUSN) (1-8 Credits)
Students have the opportunity to develop individualized studies with their mentor in Business (BUSN). Registration for this class must be approved by the student's mentor.

BUSN 2005 Business Law II (4 Credits)
This course builds on the material covered in Business Law 1 (or equivalent) as students will learn about advanced principles and concepts of business law, contract law, transactional law, the UCC (Uniform Commercial Code), commercial paper and banking law. Prerequisite (must complete before registering): Legal Environment Business I (BUSN 1025) or Business Law I (BUSN 1010), or equivalent

BUSN 2010 Business Statistics (4 Credits)
This course is designed to introduce basic statistics and its various models and applications to students majoring in business related fields. This introductory class provides statistical and mathematical knowledge to develop critical thinking skills that will allow students to recognize, describe, analyze, and solve real-world problems using statistical models and mathematical methods. Highly Recommended: College Mathematics (MATH 1000) or equivalent
Attributes: Mathematics Gen Ed, *Mathematics Gen Ed, Liberal

BUSN 2015 Computer Applications in Business Management & Economics (4 Credits)
This is an introductory level course that focuses on the use of information systems, technologies, applications, and system software in order to analyze and solve contemporary business, management, and economics problems.

BUSN 2175 Personal Finance Management (4 Credits)
This course provides an introduction to personal financial management. Some topics that may be included are: personal financial decision making, interpreting financial data, budget planning, risk management, retirement and estate planning. The basic financial concepts of time value of money, asset valuation and risk and return will be presented. Students will be introduced to the fundamental concepts, techniques and theories for making effective financial decisions. Prerequisite (must complete before registering): College Mathematics (MATH_1000), or equivalent Successful completion of this course prepares the student for studies in Investing and Corporate Finance. The course satisfied quantitative skills guidelines. The course may not be considered to satisfy Finance components for accounting concentration/major/or degree program. This course was previously BME-212424 Personal Finance. Corequisites: .

BUSN 2998 Individualized Studies in Business (BUSN) (1-8 Credits)
Students have the opportunity to develop individualized studies with their mentor in Business (BUSN). Note: Registration for this class must be approved by the student's mentor.

BUSN 3005 Business Enterprise in American History (4 Credits)
Business Enterprise in American History is an interdisciplinary course, which provides the student with an appreciation of the evolution of business enterprise from Colonial provincial trading to America's presence in the global marketplace. The course gives the student an understanding of the following: the evolution of business institutions, practices, and values over three centuries of American history; the key enterprises and individuals that marked turning points in American business history; the history of specific innovations and practices in business enterprise as solutions to the problems of growth encountered in the 19th and 20th centuries and how these solutions shaped business as we know it today; the present-day situation of business enterprise in America and the challenges presented by global competition. All of the above are placed within the context of the diversity and change of American culture and society. This course was previously BME-213034 Business Enterprise in American History.
Attributes: American History Gen Ed, *US History & Civ Engmt Gen Ed, Liberal

BUSN 3010 Business Ethics (4 Credits)
This study is designed to facilitate an understanding of philosophy of ethics and ethical decision-making process. The study emphasizes the overall philosophies, theories, and concepts of moral reasoning in making informed ethical decisions in various areas of business and business management. Prerequisites: BUSN 3010, MGMT 1005, or equivalent..
Attributes: Humanities Gen Ed, Liberal

BUSN 3020 Business & Sustainability (3-4 Credits)
This course introduces students to the major environmental challenges facing humanity in the coming decades and the implications for the business sector. The course is not aimed exclusively at business students, and students from other areas of study will have the chance to add value by contributing other perspectives. Students will study real world successful enterprises that have profited by incorporating sustainability into their business model. This course is offered for our International Education program students.
Attributes: Liberal

BUSN 3030 Corporate Governance (4 Credits)
This course will introduce the field of corporate governance, defined as the accountability of corporate managers and the formal relationships between the various stakeholders of the firm. Students will become familiar with theory relating to the nature and role of the firm in the economy, with a special focus on the modern public corporation. The central theme of the course will be the debate between the shareholder and stakeholder models of corporate governance and managerial accountability, and the implications of these standpoints on theories of ethical business practice and the proper social function of the corporation. The impact of the corporate governance model selected on the values and culture of corporations will also be examined, alongside concepts such as corporate social responsibility (CSR). Notes: The course does not assume knowledge of the material of other business courses, and is focused on broad conceptual issues and discussions of the role and purpose of the modern joint stock corporation. The course will include some of the material covered in other more general business ethics courses, but there is no significant duplication since here there is a much deeper focus on corporate governance and on the specific issues facing the financial sector. This course is offered for our International Education program students.

BUSN 3040 Electronic Commerce (e-Commerce) (4 Credits)
This course focuses on how conventional business practices are changing as a result of the Internet and associated information technologies. Students will explore concepts relating to conducting business online and investigate the many complex issues that have emerged. The course will include topics such as online sales and marketing, business-to-business processes, globalization, social networking, legal issues, and security. The content contributes to students' understanding of organizations within broader contexts. Prerequisites (must complete before registering): An introductory business course, such as Introduction to Business, Management Principles, or equivalent, is recommended. Advanced-level reading, writing, and critical thinking skills are required.

BUSN 3045 Entertainment Law (4 Credits)
The aim of this course is to introduce the students to the principles of entertainment law and its applications using case law and analysis. Highly Recommended (not required): Basic knowledge of business law. Examples of courses that could provide this foundation include: Legal Environment Business I (BUSN 1025) I or Legal Environment Business II (BUSN 2020), or Business Law I (BUSN 1010) or Business Law II (BUSN 2005), or equivalents.

BUSN 3060 Gender and Historical Perspectives on Sports and Entertainment (4 Credits)
This course will explore the role of men and women in contemporary times and since antiquity in the sports and entertainment industry. The economic, financial, and societal impact on the United States, western civilization, and societies across the world, currently and throughout history, will be explored. Highly Recommended (not required): At least one course in English, Western Civilization, World History, or equivalent.
Attributes: Liberal

BUSN 3075 Legal Environment of Business in Europe (3 Credits)
This course introduces students to the basic concepts of government and the legal system; the nature, formation, and operation of business entities and organizations; and the European, international and local environments within which businesses operate. Students will learn to recognize legal issues, prevent legal disputes, and shape the policies of their businesses within the rule of law and ethics. Highly Recommended (not required): A previous course in Business or Management, or relevant work experience. This course is offered for our International Education program students.
Attributes: Liberal

BUSN 3080 Legal Issues in Business Environments (4 Credits)
This is an advanced level study, which examines the basic principles of the American legal system and issues in private (e.g. contracts and sales, torts, product and service liability, agency, property and business associations, among others) and public law (e.g., governmental regulations) as they relate to business and business management. The emphasis of this study will be in developing the ability to engage in critical thinking and legal analysis. Prerequisites (must complete before registering): Advanced-level reading, writing, and critical thinking skills are required. Highly Recommended (not required): Business Law I (BUSN 1010), Legal Environment Business I (BUSN 1025), or equivalent
Attributes: Liberal

BUSN 3085 Music Entrepreneurship (4 Credits)
This course will examine the emerging field of music entrepreneurship, what it involves, and how musicians, music industry managers, independent producers and promoters are increasingly following the entrepreneurial path to carve their niche in the music industry rather than just working as employees for the mega music corporations. Students will also learn how to operate as music entrepreneurs utilizing the varied available technological tools that they have at their disposal and which are essential in running and operating a music enterprise. Highly Recommended (not required): At least one Introductory Business course equivalent.

BUSN 3095 The Music Business (4 Credits)
The goal of this course is have students gain both foundational and advanced knowledge of the music industry and how the music business operates at the micro and macro levels.

BUSN 3122 Management Information Systems (4 Credits)
In this course, students explore the impact of advances in information technology in the context of organizational decision making and the potential of an effective management information system to contribute to organizational learning, to be a source of competitive advantage, and to assist an organization competing in a global arena. By exploring systems from a managerial and organizational perspective, students will develop the capacity to examine the interactions among people, technology, and processes and recommend solutions to complex business problems. Prerequisite (must complete before registering): Principles of Management (MGMT 1005), or equivalent. Students should have a basic understanding of computers along with a fundamental understanding of computer use in an organizational environment. In addition, students should have an understanding of basic management principles. This can be gained through a course such as Management Principles or equivalent knowledge through professional experience. This course was previously SMT-273754 Management Information Systems. Cross-listed with MGIS 3010.

BUSN 3127 Business Analytics (4 Credits)
Business Analytics prepares students to make better managerial decisions using quantitative methods, tools and models. Students will develop data literacy, acquire analytical skills in building, applying and evaluating models, learn about applications of business analytics by the world's top companies, and gain hands-on experience working with advanced Excel functions. Topics include descriptive analytics: visualize, analyze and interpret data to gain business insights; predictive analytics: make predictions about the future from historical data using regression and forecasting; risk analysis: apply Monte Carlo simulations to forecast the likelihood of uncertain outcomes; prescriptive analytics: determine optimal strategies in situations involving several decision alternatives using optimization tools; and the basics of data mining. Students will learn how to build analytics models for a variety of complex business problems, including problems in finance, marketing, human resources, production planning and project management. Prerequisites: Statistics or Calculus.

BUSN 3996 Special Topics in BUSN (3-4 Credits)
The content of this course will vary by term and section. Students may repeat this course for credit as long as the topic differs. Please refer to the Term Guide for course topic offerings.
Attributes: Liberal

BUSN 3997 Special Topics in BUSN (3,4 Credits)
The content of this course will vary by term and section. Students may repeat this course for credit as long as the topic differs. Please refer to the Term Guide for course topic offerings.

BUSN 3998 Individualized Studies in Business (BUSN) (1-8 Credits)
Students have the opportunity to develop individualized studies with their mentor in Business (BUSN). Registration for this class must be approved by the student's mentor.

BUSN 4010 Business Policy & Strategic Management (3-4 Credits)
This course provides an engaging look into new and traditional strategic management in business. Through the topics in this course, students will develop an understanding of the wide range of theories and research available in the field, from competitive strategy and industry analysis to environmental trends and ethics. This is a capstone course and should be taken in the student's final year of study, after completing most of the concentration courses. This course is offered for our International Education program students.

BUSN 4015 Comparative International Business Law (3 Credits)
This advanced level liberal arts course is designed for upper level undergraduate students majoring in business or related disciplines. This course will give students from many cultures and traditions a broad view of the overall structure of the legal environment for global business while providing a comprehensive look at critical legal issues and functions in international business: how businesses are governed and regulated; the main concepts underlying international business and the regulatory framework which applies to business relationships in a global context. Topics include state responsibility, dispute settlement, multinational enterprises, foreign investment, securities regulations, financing, commercial trade in goods, services and labor, intellectual property, sales and transportation. No single legal system is emphasized; both the diversity and similarities of business and of the law are explored. This course is offered for our International Education program students. Prerequisites: Business Law I (BUSN 1010), or equivalent.
Attributes: Liberal

BUSN 4020 Free Markets Entrepreneurship & Capitalism (3,4 Credits)
This course acquaints students with the role of free markets and entrepreneurship as the keystones and foundation of capitalism, which constitute the essence of the American economic system. Prerequisites (must complete before registering): Microeconomics (ECON 2020) or Macroeconomics (ECON 2015) and Introduction to Business, or Equivalents.

BUSN 4025 Global Business Strategies (3 Credits)
This course is concerned with the field of business policy and strategic management, as well as providing a conceptual framework for policy formulation and strategic planning. The course also looks at the development of organizational policy as it applies to finance, marketing, production, operations, and human resources within the broad areas of management and systems. A major goal of this course is for students to develop a general business and management point of view in the context of a global business environment. Students are expected to integrate their knowledge from their prior studies and work experiences into this course. This course is offered for our International Education program students. Prerequisites: Principles of Management (MGMT 1005) and Marketing Principles (MRKT 1005) and Human Resource Management (HRMS 3015) and Corporate Finance (FSMA 3010), or equivalent coursework or knowledge.
Attributes: Liberal

BUSN 4030 International Business (4 Credits)
In this course, students will acquire an advanced understanding of the theories, concepts, and practices involved in international business. Topics include: the nature and patterns of international business; economic, socio-cultural, political, legal and labor issues; the role of international organizations; the international monetary system; theories of trade, investment and economic development; operational and strategic management issues related to business with foreign nations; and the significance of international trade agreements. This is an upper-level course requiring advanced level writing, analytical, and research skills. To fully benefit from the course students should take it in the final half of their degree program. Highly Recommended: Macroeconomics (ECON 2015) Prerequisites: Principles of Management (MGMT 1005) or Introduction to Business (BUSN 1015), or equivalent.

BUSN 4035 International Business Law (4 Credits)
This course introduces students to the major principles and legal concepts associated with international business law as well as its application in the international business arena via the case study and related methodologies. Prerequisite (must complete before registering): Business Law I (BUSN 1010) or Business Law II (BUSN 2005), or equivalent This course was previously BME-214214 .
Attributes: Liberal

BUSN 4040 The Music & Entertainment Industry (4 Credits)
In this course, students examine the major principles and concepts associated with music and entertainment industry business policies and the real life implications of developing and applying effective policies to further the business interests. Prerequisites (must complete before registering): This is capstone course and thus any advanced management course(s) are appropriate prerequisites.

BUSN 4123 Senior Project Proposal (2 Credits)
The student will prepare a proposal for the senior project and engage in educational planning. The senior project facilitates the integration and reflection of knowledge acquired from university learning which is aimed at creating an original culminating work. Educational planning includes the preparation of a rationale essay articulating how the program of study for the bachelor's degree meets the student's educational and career goals. For the senior project proposal, the student will pose a question to be addressed under the guidance of the ESC mentor. The student and mentor will discuss the focus and design of the research question to be developed. The student will identify the appropriate resources needed to address the question and submit the proposal to the mentor. The thesis, based on the proposal submitted for this study, will be carried out the following semester. Notes: As part of a capstone course, students should enroll in Senior Project Proposal during their final year of study. All lower-level concentration courses should be complete, as well as at least two advanced level concentration courses or their equivalent. This course will be used as part of the Educational Planning credit. This course is offered for our International Education program students.
Attributes: Liberal

BUSN 4150 Senior Project Thesis (3 Credits)
The student will complete the senior project thesis as planned in the proposal phase of this study. The project provides an opportunity to conduct an in-depth examination of a topic of interest related to the study program that emerged from the student's earlier course work, and in this regard will complete educational planning by focusing on the mastery of academic skills, college level writing and presentation, and independent research and critical thinking. The student will be expected to produce a major research paper that meets the standards established during the proposal stage and prepare the final drafts of the rationale essay. Note: This course will be used as part of the Educational Planning credit. This course is offered for our International Education program students. Prerequisites: Senior Project Proposal (BUSN 4123).
Attributes: Liberal

BUSN 4998 Individualized Studies in Business (BUSN) (1-8 Credits)
Students have the opportunity to develop individualized studies with their mentor in Business (BUSN). Registration for this class must be approved by the student's mentor.

CHEM: Chemistry (Undergraduate)

CHEM 1002 Chemistry in Context (4 Credits)
This study is designed for non-science majors. It will introduce the fundamental principles and concepts of chemistry and apply them to understand a variety of contemporary environmental and socio-technological issues. Core chemistry topics include atomic and molecular structure, stoichiometric calculations, chemical bonding, periodicity of properties of the elements, thermochemistry, properties of gases and solutions, chemical reactions, and an overview of the classes of organic. Principles of chemistry will be applied to the consideration of quality of air and water, global warming, acid rain, energy production and utilization, synthetic materials, recycling, drugs, and nutrition. Highly Recommended (not required): The ability to manipulate simple algebraic expressions Note: No prior knowledge of chemistry is required.
Attributes: Natural Science Gen Ed, *Natural Science Gen Ed, Liberal

CHEM 1205 Chemistry I with Lab (4 Credits)
Chemistry I with Lab is the first course of the two-term sequence in general chemistry for science majors. It teaches students to understand the basic chemical principles behind chemical reactions. The course will start by introducing the definitions and tools used in chemistry, and will then move on to present the models used to describe atoms and molecules and their interactions (chemical bonds). The student will learn to predict, write, and balance chemical reactions, including the exchange of heat (energy). The students will also learn the characteristic behaviors of gases, liquids and solids. Students will gain experience in basic laboratory techniques. This course uses a mandatory hands-on lab kit to provide students an authentic laboratory experience. The kit (in addition to the textbook) will add an additional cost to the Course Materials. See the Learning Contract/Syllabus for specific details. This course contains elements which rely on vision and motor skills to complete. If you have a visual or motor impairment and are considering registering for this course, it is recommended that you reach out to Accessibility Resources and Services (Disability.Services@sunyempire.edu) in advance of registration to determine if this course is appropriate and what alternatives may be available.
Attributes: Natural Science Gen Ed, *Natural Science Gen Ed, Liberal

CHEM 1206 Chemistry II with Lab (4 Credits)
Chemistry II with Lab is the second course of the two-term sequence in general chemistry for science majors. The course will examine the characteristics of aqueous solutions, followed by the principles and applications of kinetics and chemical equilibrium. Specific chemical reactions will be explored, including acid-base neutralization, precipitation, and solubility. Attention will then focus on thermodynamics and electrochemistry. After introducing the basics of nuclear chemistry, heavy isotopes, and radiation, the trends of reactivity and characteristics of metals and non-metals will be presented, followed by an overview of the basic chemistry of organic compounds. Students will gain further experience in basic laboratory techniques. This course uses a mandatory hands-on lab kit to provide students an authentic laboratory experience. The kit (in addition to the textbook) will add an additional cost to the Course Materials. See the Learning Contract/Syllabus for specific details. This course contains elements which rely on vision and motor skills to complete. If you have a visual or motor impairment and are considering registering for this course, it is recommended that you reach out to Accessibility Resources and Services (Disability.Services@sunyempire.edu) in advance of registration to determine if this course is appropriate and what alternatives may be available. Prerequisites: Chemistry I with Lab (CHEM 1205) or equivalent.
Attributes: Natural Science Gen Ed, *Natural Science Gen Ed, Liberal

CHEM 1210 Chemistry I: Lecture (3 Credits)
Chemistry I is the first course of a two-term sequence in general chemistry for science concentrations. This three-credit course covers the lecture and not the laboratory component of the sequence, which is offered as a separate course. Students will learn the basic chemical principles behind chemical reactions. They will study the models used to describe atoms and molecules and the chemical bonds that form between them. Students will learn to predict, write, and balance chemical reactions. Other topics will include exchange of heat (energy) and characteristic behaviors of gases, liquids and solids. Notes: This lecture course complements the lab component covered in Chemistry I Laboratory, but it is not a co-requisite to the lab.
Attributes: Natural Science Gen Ed, *Natural Science Gen Ed, Liberal

CHEM 1211 Chemistry I: Laboratory (1 Credits)
This is a one-credit laboratory course that supports the Chemistry I course. Students will learn basic knowledge of the general principles of chemistry through laboratory exercises. Students will practice laboratory techniques using chemical laboratory equipment. This course uses a mandatory hands-on lab kit to provide students an authentic laboratory experience. The kit (in addition to the textbook) will add an additional cost to the Course Materials. See the Learning Contract/Syllabus for specific details. Notes: This laboratory course complements the lecture component covered in Chemistry I, but it is not a co-requisite to the lecture. This course contains elements which rely on vision and motor skills to complete. If you have a visual or motor impairment and are considering registering for this course, it is recommended that you reach out to Accessibility Resources and Services (Disability.Services@sunyempire.edu) in advance of registration to determine if this course is appropriate and what alternatives may be available.
Attributes: Liberal

CHEM 1212 Chemistry II: Lecture (3 Credits)
Chemistry II is the second course of a two-term sequence in general chemistry for science concentrations. This three-credit course covers the lecture and not the laboratory component of the sequence, which is offered as a separate course. Students will learn the characteristics of aqueous solutions, and the applications of kinetics and chemical equilibrium. They will study specific chemical reactions, such as acid-base neutralization, precipitation, and solubility. Other topics will include thermodynamics, electrochemistry, introduction to nuclear chemistry, characteristics of metals and non-metals, and basic chemistry of organic compounds. Notes: This lecture course complements the lab component covered in Chemistry II Laboratory, but it is not a co-requisite to the lab. Prerequisites: CHEM 1210 or equivalent.
Attributes: Natural Science Gen Ed, *Natural Science Gen Ed, Liberal

CHEM 1213 Chemistry II: Laboratory (1 Credits)
This is a one-credit laboratory course that supports the Chemistry II course. Students will learn basic knowledge of the general principles of chemistry through laboratory exercises. Students will practice laboratory techniques using chemical laboratory equipment. This course uses a mandatory hands-on lab kit to provide students an authentic laboratory experience. The kit (in addition to the textbook) will add an additional cost to the Course Materials. See the Learning Contract/Syllabus for specific details. Notes: This laboratory course complements the lecture component covered in Chemistry II, but it is not a co-requisite to the lecture. This course contains elements which rely on vision and motor skills to complete. If you have a visual or motor impairment and are considering registering for this course, it is recommended that you reach out to Accessibility Resources and Services (Disability.Services@sunyempire.edu) in advance of registration to determine if this course is appropriate and what alternatives may be available. Prerequisites: Chemistry I (CHEM 1210) or equivalent.
Attributes: Liberal

CHEM 1994 Special Topics in Chemistry (1-8 Credits)
Attributes: Liberal

CHEM 1995 Special Topics in Chemistry (1-8 Credits)
Attributes: Liberal

CHEM 1996 Special Topics in Chemistry (1-8 Credits)
Attributes: Liberal

CHEM 1997 Special Topics in Chemistry (1-8 Credits)
Attributes: Liberal

CHEM 1998 Individualized Studies in Chemistry (CHEM) (1-8 Credits)
Students have the opportunity to develop individualized studies with their mentor in Chemistry (CHEM). Registration for this class must be approved by the student's mentor.

CHEM 2220 Principles of Organic Chemistry (4 Credits)
This survey of organic chemistry may be of interest to students concentrating in life sciences. It will examine on structure, properties, and reactions of the main classes of organic compounds: alkanes and cycloalkanes; alkenes and alkynes; aromatic compounds (benzene and its derivatives); alcohols, ethers, and thiols; amines; aldehydes and ketones; carboxylic acids, anhydrides, esters, and amines; and stereochemistry of organic molecules. Students will be introduced to functional group chemistry, reaction mechanisms, the relationship between molecular structure and reactivity, and to main spectroscopic techniques used for molecular structure elucidation. Numerous examples will illustrate the biological and medical applications of organic chemistry. Notes: This study might be of interest to students with concentrations in life sciences. Students pursuing concentration in chemistry are to take Organic Chemistry I with Lab (CHEM 3210) or Organic Chemistry I (CHEM 3220), and Organic Chemistry II (CHEM 3221). Prerequisites: Chemistry I with Lab (CHEM 1205) and Chemistry II with Lab (CHEM 1206) or equivalents.
Attributes: Liberal

CHEM 2998 Individualized Studies in Chemistry (CHEM) (1-8 Credits)
Students have the opportunity to develop individualized studies with their mentor in Chemistry (CHEM). Registration for this class must be approved by the student's mentor.

CHEM 3200 Inorganic Chemistry (4 Credits)
This one semester survey of modern inorganic chemistry introduces descriptive inorganic chemistry, with emphasis on its physical principles and practical applications. Topics include chemical bonding, molecular orbital theory, symmetry and group theory, main group elements, the crystalline solid state, acid-base and donor-acceptor chemistry of d-block metals, and the structure, bonding, reactivity, electronic spectra, and some reaction mechanisms of their coordination compounds. Notes: This is a stand-alone course. It should not be taken by students planning to take the two-term sequence of inorganic chemistry: Chemistry I with Lab (CHEM 1205) and Chemistry II with Lab (CHEM 1206). Prerequisites: Chemistry I with Lab (CHEM 1205) and Chemistry II with Lab (CHEM 1206) or equivalents.
Attributes: Liberal

CHEM 3210 Organic Chemistry I with Lab (4 Credits)
Organic Chemistry I with Lab is the first course of a two-term sequence in organic chemistry designed for science concentrations. The discipline of organic chemistry involves identifying the molecular structure and properties of substances found in nature, and finding ways of synthesizing these substances. This Organic Chemistry I with Lab course introduces students to many of the basic concepts required for this process. Students will investigate the mechanisms of organic reactions to gain the ability to predict the outcomes of similar reactions. Other topics will include nomenclature, molecular structure, chemical reactivity, isomers, thermodynamics, and kinetics. Students will gain experience in organic chemistry laboratory techniques. This course uses a mandatory hands-on lab kit to provide students an authentic laboratory experience. The kit (in addition to the textbook) will add an additional cost to the Course Materials. See the Learning Contract/Syllabus for specific details. This course contains elements which rely on vision and motor skills to complete. If you have a visual or motor impairment and are considering registering for this course, it is recommended that you reach out to Accessibility Resources and Services (Disability.Services@sunyempire.edu) in advance of registration to determine if this course is appropriate and what alternatives may be available. Prerequisites: CHEM 1205 and CHEM 1206, or equivalents.
Attributes: Liberal

CHEM 3220 Organic Chemistry I (4 Credits)
Organic Chemistry I is the first part of a two-term course sequence designed for students majoring in physical and life sciences. It introduces fundamental principles of organic chemistry with an emphasis on functional group chemistry, the relationship between molecular structure and reactivity, and reaction mechanisms. Topics include classes of organic compounds and their functional groups; nomenclature; organic reactions and their mechanisms; isomerism; properties and conformations of alkanes and cycloalkanes; stereochemistry; alkyl halides and nucleophilic substitution and elimination reactions; properties, synthesis and reactions of alkenes and alkynes; and main spectroscopic tools for molecular structure elucidation. Prerequisites: Chemistry I with Lab (CHEM 1205) and Chemistry II with Lab (CHEM 1206) or equivalents.
Attributes: Liberal

CHEM 3221 Organic Chemistry II (4 Credits)
Organic Chemistry II is the second part of a two-term course sequence designed for students majoring in physical and life sciences. It continues to introduce the study of structure, reactions, and synthesis of the major classes of organic compounds. Topics include radical reactions, alcohols and ethers, conjugated unsaturated systems, aromatic compounds, aldehydes and ketones, carboxylic acids and their derivatives, and amines. Prerequisites: Chemistry I with Lab (CHEM 1205) and Chemistry II with Lab (CHEM 1206) or equivalents, and Organic Chemistry I with Lab (CHEM 3210) or Organic Chemistry I (CHEM 3220) or equivalent.
Attributes: Liberal

CHEM 3300 Physical Chemistry I (4 Credits)
This course is designed for students majoring in Chemistry and requires strong quantitative skills. The goal of the two-term course sequence in Physical Chemistry is to introduce students to the theoretical models and laws that help explain the physical, thermal, electrical and chemical properties of matter. The main focus of this first part of the sequence will be kinetic molecular theory of gases, gas laws, and the three laws of thermodynamics. Additional topics will be selected among: free energy and chemical potential, chemical equilibrium, electrolyte and nonelectrolyte solutions, electrochemistry, and chemical kinetics. Notes: Basic knowledge of Calculus is strongly preferred. Prerequisites: CHEM 1205, CHEM 1206, and MATH 1040 or MATH 1140, or equivalents.
Attributes: Liberal

CHEM 3302 Physical Chemistry II (4 Credits)
This course is designed for students majoring in Chemistry and requires strong quantitative skills. The goal of the Physical Chemistry course sequence is to introduce students to the theoretical models and laws that help explain the physical, thermal, electrical and chemical properties of matter. The focus of this second part of the sequence will be Quantum Chemistry, the Solid State and Surface Thermodynamics. Specific topics will include: Introduction to Quantum Mechanics, Quantum Mechanics Model Systems, the Hydrogen Atom, Atomic and Molecular Orbital Theories, Symmetry in Quantum Mechanics, Rotational Spectroscopy, Vibrational Spectroscopy, Electronic Spectroscopy, Magnetic Spectroscopy, and Statistical Thermodynamics. Notes: Basic knowledge of Calculus is strongly preferred. Prerequisites: Chemistry I with Lab (CHEM 1205) and Chemistry II with Lab (CHEM 1206), and Algebra (MATH 1040) or Precalculus (MATH 1140), or equivalents, and Physical Chemistry I (CHEM 3200).
Attributes: Liberal

CHEM 3400 Biochemistry (4 Credits)
This study focuses on explaining biology in chemical terms. Its main topics are subdivided into three categories. The first one, structure and function of biomolecules, covers properties of water, acids, bases, and buffers; amino acids and peptide bonds; three-dimensional structure of proteins; enzymes, enzyme kinetics, and mechanisms; coenzymes, and vitamins; carbohydrates; and lipids and biological membranes. The second category, energetics and metabolism, includes glycolysis, Krebs cycle, glycogen mechanism and gluconeogenesis, electron transport and oxidative phosphorylation, lipid metabolism, amino acids and nucleotide metabolism. Finally, the third category, genetic information, focuses on nucleic acids and related biochemical pathways. Notes: This course is designed for science students who would prefer one term of Biochemistry. Prerequisites: Chemistry I with Lab (CHEM 1205) and Chemistry II with Lab (CHEM 1206) and Biology I with Lab (BIOL 1200) and Biology II with Lab (BIOL 1201) or equivalents.
Attributes: Natural Science Gen Ed, Liberal

CHEM 3600 Principles of Instrumental Analysis: Spectroscopy & Separation Techniques (4 Credits)
This course is designed for science majors. A survey of spectroscopic and chromatographic methods, including theoretical background and operating principles of chemical instrumentation, will be provided. Application of these methods of instrumental analysis to solutions of chemical problems, including identification and characterization of chemical compounds, will be emphasized. Topics in molecular spectroscopy include UV-Visible and Infrared spectroscopy, Mass Spectrometry, and Nuclear Magnetic Resonance spectroscopy. Techniques of separation include single- and multi-stage methods, with emphasis on gas and liquid chromatography. Prerequisites: Organic Chemistry II, and Physics II with Lab II or equivalent.
Attributes: Liberal

CHEM 3602 Quantitative Chemical Analysis (4 Credits)
This course is designed for science majors. It focuses on physical understanding of the principles of analytical chemistry and their applications in chemistry and other disciplines, including life and environmental sciences. Selected modern analytical techniques will be surveyed with emphasis on their operating principles and on applications of theoretical principles and analytical instruments to practical problem solving. Topics include: the analytical process, measurements, analytical tools, experimental error, quality assurance and calibration methods, activity, systematic treatment of chemical equilibria, acid-base equilibria and titrations, fundamentals of electrochemistry, types of electrodes, potentiometry, and electroanalytical techniques. Prerequisites: Prerequisites: Chemistry I with Lab (CHEM 1205) and Chemistry II with Lab (CHEM 1206) or equivalents.
Attributes: Liberal

CHEM 3996 Special Topics in CHEM (2-6 Credits)
Attributes: Liberal

CHEM 3998 Individualized Studies in Chemistry (CHEM) (1-8 Credits)
Students have the opportunity to develop individualized studies with their mentor in Chemistry (CHEM). Registration for this class must be approved by the student's mentor.

CHEM 4200 Inorganic Chemistry I (4 Credits)
This is the first part of the two term course sequence in inorganic chemistry, designed for chemistry majors. It introduces descriptive inorganic chemistry, with emphasis on its physical principles and practical applications. Topics include chemical bonding in polyatomic molecules, molecular symmetry and group theory, the crystalline solid state, acid-base reactions in aqueous and non-aqueous media, redox chemistry, chemical characterization techniques, and properties and reactions of the main group elements. Prerequisites: Organic Chemistry II, and Physical Chemistry I.
Attributes: Liberal

CHEM 4201 Inorganic Chemistry II (4 Credits)
This second study in the two-term course sequence of modern inorganic chemistry focuses on the d-block metals. Topics include characteristic physical and chemical properties and reactivity of metals, their coordination chemistry, isomerism, valence bond model and molecular orbital theories, crystal field stabilization, electronic absorption and emission spectra, and magnetic properties. The discussion of general principles is followed by a systematic consideration of the d-block metals, their physical properties, chemistry of their inorganic, coordination, and organometallic compounds, and the importance of these inorganic and organometallic compounds in industry, catalysis, materials, nanotechnology, and biological processes. Prerequisite (must complete before registering): Inorganic Chemistry I (CHEM 4200)
Attributes: Liberal

CHEM 4300 Environmental Chemistry I (4 Credits)
Environmental Chemistry I is the first part of a two-term course sequence designed for advanced level students majoring in natural sciences. The purpose of the Environmental Chemistry studies is for the student to gain knowledge about the chemistry of current environmental problems in order to critically evaluate them and provide possible solutions to these issues. Main topics that will be covered this first part of the sequence include: atmospheric chemistry, air pollution, energy and climate change. The study will also devote time to learn about Green Chemistry, the initiative set forth to encourage chemical companies to develop products and processes that reduce environmental hazards. Notes: Basic knowledge of Calculus is strongly preferred. Prerequisites: Chemistry I with Lab (CHEM 1205) and Chemistry II with Lab (CHEM 1206), and Algebra (MATH 1040) or Precalculus (MATH 1140), or equivalents, and Organic Chemistry I (3220) or equivalent.
Attributes: Liberal

CHEM 4301 Environmental Chemistry II (4 Credits)
Environmental Chemistry II is the second part of a two-term course sequence designed for advanced level students majoring in natural sciences. This second course of the sequence will focus on toxic organic chemicals, water pollution, soil pollution and purification techniques. In addition, students will continue to learn about processes that have been developed to meet Green Chemistry standards. Notes: Basic knowledge of Calculus is strongly preferred. Prerequisites: Chemistry I with Lab (CHEM 1205) and Chemistry II with Lab (CHEM 1206), and Algebra (MATH 1040) or Precalculus (MATH 1140), or equivalents, Organic Chemistry I (3220) or equivalent, and Environmental Chemistry I (CHEM 4300).
Attributes: Liberal

CHEM 4400 Biochemistry I (4 Credits)
This course is the first part of a two term course sequence designed for students majoring in chemistry and life sciences. Its main objectives are to explain biology in chemical terms; introduce the language of biochemistry; examine physical, chemical, and biological context of biochemical reaction mechanisms; establish the relationship between structure and function and between different biochemical processes; and explore the most important biochemical research techniques. The main topics include the structure and function of the four major classes of biomolecules - proteins, carbohydrates, lipids, and nucleic acids, as well as the biological membranes and transport. Prerequisites: Organic Chemistry I and II A background in physical chemistry is helpful, but not required.
Attributes: Liberal

CHEM 4401 Biochemistry II (4 Credits)
This second portion of the two term course sequence in biochemistry, designed for students majoring in chemistry and life sciences, will focus on biosignaling, bioenergetics, organization and regulation of biosynthetic pathways, metabolism, DNA replication and RNA transcription. Topics include the principles of bioenergetics; degradation and biosynthesis of carbohydrates, fatty acids, amino acids, and nucleic acids; signal transduction; oxidative phosphorylation; and integration and regulation of metabolism. Prerequisites: Biochemistry I.
Attributes: Liberal

CHEM 4998 Individualized Studies in Chemistry (CHEM) (1-8 Credits)
Students have the opportunity to develop individualized studies with their mentor in Chemistry (CHEM). Registration for this class must be approved by the student's mentor.

CHFS: Child & Family Studies (Undergraduate)

CHFS 1005 Intimate Relationships & Marriage (4 Credits)
This course is an overview of the science of family development, covering major theories and developmental frameworks. This course emphasizes important social contexts that influence family processes, including variations in family structures/functions, and social, psychological, and historical variables that influence familial experiences. Strategies used in helping professions promote and support optimal family functioning and career opportunities for marriage and family professionals are also explored. Note: This course is aligned with the Community and Human Services Area of Study guidelines for Knowledge of Human Behavior and Diversity.
Attributes: Liberal

CHFS 1998 Individualized Studies in Child and Family Studies (CHFS) (1-8 Credits)
Students have the opportunity to develop individualized studies with their mentor in Child and Family Studies (CHFS). Registration for this class must be approved by the student's mentor.

CHFS 2005 Child Abuse & Neglect (4 Credits)
This course discusses forms of child abuse and neglect. Students will explore the causes of and risk factors for abuse within a psycho-social framework. Community and Human Service Area of Study guidelines for Knowledge of Human Behavior.
Attributes: Liberal

CHFS 2010 Exploring the Professions: Careers in Gerontology (2 Credits)
This course will expose students to careers associated with the elderly. Students will explore professional and educational attainment, as well as laws, resources, policies, and programs associated with gerontological services. Students will learn about the history of professional caregiving for older adults in the United States. Community and Human Service Area of Study guidelines for Knowledge of Service Delivery.

CHFS 2015 Helping Children & Adolescents Cope with Bullying (4 Credits)
This course will define bullying and provide an overview of the range of ways that adults can intervene. The statistics on bullying across American schools are staggering, and the subsequent impact on child and adolescent well-being--cognitive, social and emotional development is especially concerning. Students will examine ways to identify and intervene on micro, mezzo, and macro levels on behalf of children and adolescents. Note: This course is aligned with the Community and Human Services Area of Study guidelines for Knowledge of Service Delivery and Skills.
Attributes: Liberal

CHFS 2027 Stress and Resilience in Families (4 Credits)
This study focuses on theoretical and practical frameworks for understanding and intervening in distressful individual, couple, and family issues. An emphasis is placed on contextual factors, particularly those unique to marginalized and diverse populations. Note: This course is aligned with the Community and Human Services Area of Study guidelines for Knowledge of Human Behavior and Diversity.
Attributes: Liberal

CHFS 2122 Introduction to Family Studies (4 Credits)
This course will cover the major theories and developmental frameworks in family development. Important social contexts that influence family processes, including variations in family structures/functions, and social, psychological, and historical variables that influence familial experiences will be emphasized. Career opportunities for marriage and family professionals are also explored. Community and Human Service Area of Study guidelines for Skills and Application.
Attributes: Liberal

CHFS 2132 Introduction to Cyberbullying (4 Credits)
In a world highly dependent upon the Internet and social media for information and social support, children, adolescents, and young adults are increasingly subject to bullying both within school and online. This course will introduce students to physical bullying and cyberbullying, the definitions of each, and where both are more likely to occur. Focus will also be placed on the warning signs of cyberbullying that parents, teachers, and mental health professionals need to heed as well as ways of preventing future cyberbullying occurrences among this population.
Attributes: Liberal

CHFS 2997 Special Topics in CHFS (2,4 Credits)

CHFS 2998 Individualized Studies in Child and Family Studies (CHFS) (1-8 Credits)
Students have the opportunity to develop individualized studies with their mentor in Child and Family Studies (CHFS). Registration for this class must be approved by the student's mentor.

CHFS 3010 Cultural Perspectives on Aging (4 Credits)
This study will provide the student with the opportunity to examine the experiences and processes of aging in a cross-cultural context. The course will examine how gender, ethnicity, race, and socio-economic factors shape the physical, cognitive/emotional, and sociocultural experiences of aging. Students will reflect on the impact of cultural expectations, myths, norms, roles and practices - marriage, grandparenting, family structure, social organization, policies, religion, and spirituality. Aging and retirement are viewed in cross-cultural perspective, with reference to the effects of industrialization, globalization, and information technologies. Note: This course is aligned with the Community and Human Services Area of Study Guidelines for Knowledge of Human Behavior, Diversity and Service Delivery.
Attributes: Liberal

CHFS 3015 Child Welfare in the United States (4 Credits)
This study provides an overview of child welfare services in the United States from both historical and contemporary perspectives. Topics may include child maltreatment and protection, preventive family services, the range of out-of-home placements, and the impact of poverty on the lives of families involved in the child welfare system. Note: This course aligns with the Community and Human Services Area of Study guidelines for Knowledge of Service Delivery. This course is part of the BS in Public Health program.
Attributes: Liberal

CHFS 3020 Childhood Trauma: Theory Treatment & Recovery (4 Credits)
This study provides students with an overview of theories, research, and interventions related to children who have experienced stress and trauma. Students will learn the signs and symptoms of stress and trauma as well as strategies to help children cope and develop resiliency. The impact of present day trauma will be considered in the context of historical, generational and racial trauma in the lives of children and families. Note: This course aligns with the Community and Human Services Area of Study guidelines for Diversity, Knowledge of Human Behavior, Skills and Application and Integration.
Attributes: Liberal

CHFS 3022 Counseling Children & Adolescents (4 Credits)
In this study students will explore the various theories, models, and treatment approaches for working with children and adolescents who need counseling. Students will learn techniques that helping professionals use for assessment, engagement, and intervention. An important part of this study is examining counseling children and adolescents in various social and cultural contexts. This course aligns with the Community and Human Services area of study guidelines for Knowledge of Human Behavior, Skills, and Application and Integration.
Attributes: Liberal

CHFS 3025 Elder Abuse (4 Credits)
This course will provide an overview of violence and abuse issues as they relate to older adults and the elderly. The causes of elder abuse will be examined, as well as the role of family dynamics and cultural factors. This course meets the Community and Human Services Area of Study guidelines for Knowledge of service delivery, Knowledge of human behavior and Skills.
Attributes: Liberal

CHFS 3030 Family Intervention (4 Credits)
This course covers family theories, assessments, and interventions to create a framework for understanding, evaluating and implementing a variety of family interventions. Students will learn and critique intervention and preventative tactics used to address crises occurring across the family life cycle. The course also explores research-supported therapeutic approaches that are effective for working with diverse families, with attention to distinct family contexts, strengths, needs, values, traditions and beliefs. This course meets the Community and Human Services Area of Study guidelines for Skills and Application and Integration. This course is aligned with the BS in Addiction Studies program guidelines for Skills, Assessment & Education, and Application and Integration.

CHFS 3035 Global Perspectives on Aging (4 Credits)
Explore the topic of aging as a global phenomenon with cross-cultural, multinational resource implications for health care systems and health and human services providers. Study the interdisciplinary topic of global aging from an international, primarily non-Western perspective with emphasis on learning country-specific models for engaging the worldwide trend of aging populations. Understand the health and human service implications for aging policy and practice driven by cultural practices, geographic resources, demographics, traditions of kinship structures and perceptions of disability around the globe. Note: This course aligns with the Community and Human Services Area of Study guidelines for Diversity and Knowledge of Service Delivery. This course was previously CHS-253314 Global Perspectives on Aging.
Attributes: Liberal

CHFS 3040 Understanding Adoption (4 Credits)
By examining the controversies and policies of adoption, we will better understand the evolving child welfare system, and cultural attitudes towards families created by adoption. Note: This course is aligned with the Community and Human Services Area of Study guidelines for Knowledge of Service Delivery.
Attributes: Liberal

CHFS 3045 Human Service Practice with Older Adults (4 Credits)
The purpose of this course is to explore the specific human services skills necessary in working with the aging population. This course will expose students to current demographic, statistics and trends. The course will also present current knowledge and skills preparation to prepare students for working with aging and elderly clients who may require human service interventions in a variety of settings. The course will expose students to specialized issues faced by various vulnerable and marginalized populations. This course is aligned with the Community and Human Services area of study guidelines for Skills and Diversity. This course was previously CHS-253324 Human Service Practice with Older Adults.

CHFS 3050 Interpersonal Violence (4 Credits)
The course examines prevalent forms of interpersonal violence and their impact on individuals, families, and communities, including child abuse, elder abuse, intimate partner violence, gender-based violence, dating violence, and sibling abuse. Interpersonal violence and abuse preventions, interventions, policies, laws and community-based services will also be covered. This course is aligned with the Community and Human Service Area of Study guidelines for Knowledge of Human Behavior, Knowledge of Service Delivery, Skills and Application and Integration. This course is part of the BS in Public Health program.
Attributes: Liberal

CHFS 3055 Investigation for Protective Services (4 Credits)
Persons conducting investigations into child abuse and neglect, adult/elder abuse and neglect, childcare delivery, other kinds of personal care, as well as workplace issues, and accidents have a need for theoretical knowledge and skills to conduct non-police investigations. Students will be able to apply ethical principles to interviews and investigations when working with special populations such as children and the intellectually challenged.

CHFS 3060 Multicultural Study of Children & Families (4 Credits)
This study examines variations in family life across cultures. Enculturation will also be explored. Note: This course aligns with the Community and Human Services area of study guidelines for Diversity.
Attributes: Liberal

CHFS 3065 Supporting Active Military Veterans & their Families (4 Credits)
The purpose of this study is to develop an understanding of the challenges facing active duty military, veterans, and their families; and to develop an informed position on providing support to them. Note: This course aligns with the Community and Human Services area of study guidelines for Knowledge of Human Behavior, Skills, and Application and Integration.
Attributes: Liberal

CHFS 3122 African American Relationships Marriages and Families (4 Credits)
This interdisciplinary study examines cultural, historical and interpersonal factors that influence the shifting structure and function of African American families and intimate relationships, including an overview of engagement and treatment strategies used in working with of couples and families. Topics covered include: love, dating, courtship, cohabitation, marriage and its alternatives, childbirth and parenting, and crisis faced in intimate relationships such as divorce and family violence. Note: This course is aligned with the Community and Human Services Area of Study guidelines for Knowledge of Human Behavior and Diversity.
Attributes: Liberal

CHFS 3127 Understanding Mental Illness in Children and Adolescents (4 Credits)
This course explores mental illnesses diagnosed in children and adolescents; the social and environmental contexts in which they manifest will also be explored. Students will learn how to distinguish between common disorders and identify challenges of assessment of children and adolescents. Media portrayal and stigmas of mental illness will also be examined. Prerequisite (must complete before registering): A minimum of 64 credits or an associate degree Note: This course is aligned with the Community and Human Services Area of Study guidelines for Knowledge of Human Behavior.
Attributes: Liberal

CHFS 3133 Cyberbullying and Family Contexts (4 Credits)
This course delves into the influence of cyberbullying on family dynamics, with a focus on helping professionals, educators, and parents to support cyberbullying victims and their families as they cope and adress the behavior of perpetrators. The exploration extends to the destructive nature of cyberbullying across diverse populations and addresses how families in different communities understand and manage this issue. This course is aligned with the Community and Human Services Area of Study guidelines for Skills. Prerequisites: It is strongly recommended students complete CHFS 2132 Introductionto Cyberullying before registering for this course..
Attributes: Liberal

CHFS 3137 Child and Family Policy (4 Credits)
This course will uncover the reciprocal linkages between family functioning and public and private policies in the United States. Students will identify policies developed to address child/family issues and problems. The course will explore the extent to which policies have been based on the principles of risk and protection and contemplate the ways in which social policies have impacted children, youth, and families across diverse personal and service domains. Topics include policies relevant to health, poverty, disability, education, child welfare and protection, and juvenile justice. This course meets the Community and Human Services guidelines of Knowledge of Service Delivery, Application, and Diversity.
Attributes: Liberal

CHFS 3996 Special Topics in CHFS (2-6 Credits)
The content of this course will vary by term and section. Students may repeat this course for credit as long as the topic differs. Please refer to the Term Guide for course topic offerings.
Attributes: Liberal

CHFS 3997 Special Topics in CHFS (4 Credits)
The content of this course will vary by term and section. Students may repeat this course for credit as long as the topic differs. Please refer to the Term Guide for course topic offerings.
Attributes: Liberal

CHFS 3998 Individualized Studies in Child and Family Studies (CHFS) (1-8 Credits)
Students have the opportunity to develop individualized studies with their mentor in Child and Family Studies (CHFS). Registration for this class must be approved by the student's mentor.

CHFS 4005 Cognitive Behavioral Strategies (4 Credits)
This course focuses on the theory and practice of cognitive and behavioral interventions in human services. This course will examine several common problems that affect children and adolescents; students will learn techniques and skills to address these problems. Students will also learn about the cognitive concept of "schema" in cognitive theory; and how this relates to issues of power and privilege. This course aligns with the Community and Human Services area of study guidelines for Skills and Diversity.
Attributes: Liberal

CHFS 4020 Interventions with Vulnerable Youth (4 Credits)
This course explores the conditions and circumstances that place young people at risk. Students will consider the context of different levels of systems impacting youth, including poverty and racism. Vulnerable and underserved populations of youth will be assessed. Students will examine the position of vulnerable and underserved youth in their own communities and propose policies and programs to support and protect them. This course aligns with the Community and Human Services area of study guidelines for Knowledge of Human Behavior, Diversity, and Skills and Application.
Attributes: Liberal

CHFS 4025 Pregnancy & Parenting (4 Credits)
This study integrates biological and cultural approaches to pregnancy and parenting, drawing on critical perspectives from anthropology, human development, epigenetics, sociology and public/global health. The student will examine the impact of biological and cultural diversity, along with environmental factors, while considering current theories and contemporary trends, local and global. The student will also explore recent literature on the biocultural, evolutionary, and life-course perspectives on pregnancy and parenting, which has shown that early life environment shapes future health, from pre-conception to adolescence. Note: This course aligns with the Community and Human Services area of study guidelines for Knowledge of Human Behavior.
Attributes: Liberal

CHFS 4030 Processes of Divorce (4 Credits)
Relying on theory and research related to marital dissolution, students will examine the impact of divorce on children and adults in various family roles across multiple social situations. This study will explore policy implications and practical application relevant to relational dissolution. Note: This course aligns with the Community and Human Services area of study guidelines for Knowledge of human behavior.
Attributes: Liberal

CHFS 4035 Trauma & Recovery in Adults (4 Credits)
The study will introduce students to trauma theory, practice, and stages of recovery as related to work with adults. The study addresses the experiences of people who have suffered traumas including sexual and/or domestic violence, combat, and political terror. Students will explore treatment strategies that may include working with groups, individuals, and families. This course aligns with the Community and Human Services area of study guidelines for Knowledge of Human Behavior, Knowledge of Service Delivery, and Skills. This study will not cover childhood trauma. Please see Childhood Trauma: Theory, Treatment and Recovery for further study of childhood trauma. Prerequisites: N/A. Corequisites: N/A.
Attributes: Liberal

CHFS 4041 Family Dynamics: Research and Theory (4 Credits)
This course will take an in-depth look at various family theories and related research. This may include systems theory, exchange theory, family development theory, symbolic interactionism, and others. Learners will gain a clearer understanding of the role of theory to understand family dynamics and guide research. Special attention is paid to the ways that family systems and sub-systems interact and affect individual roles and relations within the family structure.
Attributes: Liberal

CHFS 4998 Individualized Studies in Child and Family Studies (CHFS) (1-8 Credits)
Students have the opportunity to develop individualized studies with their mentor in Child and Family Studies (CHFS). Registration for this class must be approved by the student's mentor.

CHIN: Chinese (Undergraduate)

CHIN 1005 Introductory Chinese: Language & Culture (4 Credits)
Introductory Chinese: Language and Culture is designed for students who have no previous Chinese instruction. The course focuses on enabling students to communicate effectively in elementary Chinese, and introduces students to students to traditional Chinese beliefs and contemporary culture. All language skills will be practiced: listening, speaking, reading and writing. Students will learn about China and its regions through a wide variety of resources: online resources, texts, videos, blogs and Podcast. Students should be available for oral practices scheduled between at least twice a week. Special accommodations will be made for army students. This course was previously CUL-221244 Introductory Chinese: Language and Culture.
Attributes: Foreign Language Gen Ed, *World Languages Gen Ed, Liberal

CHIN 1998 Individualized Studies in Chinese (CHIN) (1-8 Credits)
Students have the opportunity to develop individualized studies with their mentor in Chinese (CHIN). Please contact your mentor/advisor for more details.

CHIN 2998 Individualized Studies in Chinese (CHIN) (1-8 Credits)
Students have the opportunity to develop individualized studies with their mentor in Chinese (CHIN). Please contact your mentor/advisor for more details.

CHIN 3998 Individualized Studies in Chinese (CHIN) (1-8 Credits)
Students have the opportunity to develop individualized studies with their mentor in Chinese (CHIN). Please contact your mentor/advisor for more details.

CHIN 4998 Individualized Studies in Chinese (CHIN) (1-8 Credits)
Students have the opportunity to develop individualized studies with their mentor in Chinese (CHIN). Please contact your mentor/advisor for more details.

COMM: Communications (Undergraduate)

COMM 1002 Digital Communication Culture and Careers: Intro (2 Credits)
This course will introduce you to the fields of Digital Communication and the culture surrounding it. Students will get established and learn about communities in social media, consider cultural ramifications of digital communication, learn about careers in digital communication, the future of digital communication, and consider concentrations that may lead them to those careers. This course is open to all students, and is ideal for new students in particular, but will serve to partially fulfill the Educational Planning guideline for students concentrating in Digital Communication. Students may take this OR COMM 3002 Digital Communication Culture and Careers: Advanced, not both.
Attributes: Liberal

COMM 1005 Intercultural Communication (2-3 Credits)
Students will explore various approaches to culture and intercultural communication at a foundational level; sample different styles of communication in different countries, ethnicities, and groups; consider the potential for miscommunication in the United States and abroad; and identify strategies for conflict reduction, teamwork, and leadership. After taking this course, students should more sensitive to the communication needs of others and understand how to improve their personal intercultural communication competence. Can be part of a Communications concentration, or an elective for a variety of concentrations. This course was previously CUL-221232 Intercultural Communications.
Attributes: Liberal, Partial Basic Comm Gen Ed

COMM 1010 Interpersonal Communication (4 Credits)
The student will be introduced to the communication process and skills for effective interpersonal communication. Concepts related to both verbal and nonverbal communication will be examined. Students will have an opportunity to reflect on their own interpersonal communication skills and competencies. Topics such as relational dynamics, interpersonal conflict and improving communication climates will be addressed.
Attributes: Basic Communication Gen Ed, Liberal

COMM 1020 Introduction to Communication (4 Credits)
Why study communication? What can you do with it? Introduction to Communication provides students with an overview of the major fields of communication and key theories that support them. Students will develop an understanding of foundational communication theories at the interpersonal, group, organizational, and mass levels of communication and will apply these theories to evaluate communications in real-world settings. Students will be able to apply verbal and nonverbal communication strategies in order to reach specific audiences and understand how others communicate. Prerequisite (must complete before registering): Ability to write a college level essay. Highly Recommended (not required): College Writing (COMW 1005), or equivalent. This, along with Media Literacy, are the foundation courses in a Communication, Communication and Media, or Communication and Writing Curriculum. It may also be appropriate for students in the social sciences, or as an elective for students who simply want to learn about the field of Communication. This course was previously CUL-221234.
Attributes: Liberal

COMM 1030 Public Speaking (4 Credits)
Public Speaking provides students with an overview of the process of speech making. Students will investigate the basic elements of a speech; ways to plan and prepare, write, conduct, and evaluate speeches; the impact and responsibilities of public speaking; the necessity of considering an audience's specific needs; and ways to increase comfort while speaking in front of a group. Concepts of speaking, listening, and performing are considered and applied. Students will create and conduct different types of speeches that are tailored to the specific needs of an audience.
Attributes: Basic Communication Gen Ed, *Communication Gen Ed-Oral, *Communication Gen Ed-Written, Liberal

COMM 1054 Critical Listening Skills (4 Credits)
This study seeks to help students understand different kinds of listening and develop their listening skills. Class time will be spent understanding and practicing listening skills.
Attributes: Liberal

COMM 1998 Individualized Studies in Communication (COMM) (1-8 Credits)
Students have the opportunity to develop individualized studies with their mentor in Communications (COMM). Please contact your mentor/advisor for more details.

COMM 2010 Writing for Digital Media (4 Credits)
How do you write for maximum impact in a variety of digital media? What are best practices, and what are common mistakes made in print, online, through social media and video or audio used to explain, sell, or promote something? This course is designed to help students to understand the operations of modern communication and give them experience developing, analyzing, and critiquing content in advertising, public relations, or journalism. Students will come away with a better understanding of the purposes and functions of communication, develop skills in producing content for digital media, and be able to effectively critique digital media products using contemporary communication tools. In order to take this course, the student must have the ability to write college essays.
Attributes: Humanities Gen Ed, *Communication Gen Ed-Oral, *Communication Gen Ed-Written, *Humanities Gen Ed, Liberal

COMM 2016 Digital Communication Strategies I (2 Credits)
Communicating in the 21st Century requires specialized skills such as effective videoconferencing, writing for online and mobile platforms, using visual, video and gaming apps, understanding virtual environments, and conducting business remotely. This course teaches the differences between digital and traditional communication methods, with a focus on the fundamentals of communication applied to virtual settings and online tools.

COMM 2104 Communication for Success (3 Credits)
Communication for Success is an introduction to college level reading, writing and researching for students who are non-native English language learners. This course has been specifically designed to address the basic expectations of clear, academic expression to help college students write essays, research projects, and presentations that involve the selection, assessment, and usage of appropriate academic resources. Topics of the course include: the difference between social discourse and academic writing; increasing English language skills in vocabulary and mechanics; developing a thesis statement, writing a first draft, editing, paraphrasing arguments and identifying main ideas; citing sources and avoiding plagiarism, as well as using online writing and research resources and the Empire State College virtual library.
Attributes: Basic Communication Gen Ed, Liberal

COMM 2998 Individualized Studies in Communications (COMM) (1-8 Credits)
Students have the opportunity to develop individualized studies with their mentor in Communications (COMM). Please contact your mentor/advisor for more details.

COMM 3002 Digital Communication, Cultures & Careers Advanced (2 Credits)
This course will introduce you to the fields of Digital Communication and the culture surrounding it. Students will get established and learn about communities in social media, consider cultural ramifications of digital communication, learn about careers in digital communication, the future of digital communication, and consider concentrations that may lead them to those careers. This course is open to all students, and is ideal for new students in particular, but will serve to partially fulfill the Educational Planning guideline for students concentrating in Digital Communication.
Attributes: Liberal

COMM 3005 Communication Analysis (4 Credits)
Develop skill in comprehending underlying meanings in public communications. Develop the ability to spot flaws and strengths in others' arguments, detect manipulative communication strategies and recognize mythic/narrative dimensions in everyday communication. Conduct critiques of rhetoric and research propaganda campaigns. Sources for analysis include student-selected items such as speeches, editorials, films, advertisements, or magazine articles. Work with basic principles of argumentation and debate, rhetorical criticism, the narrative paradigm, social influence and propaganda analysis. Develop critical skills for responding competently to the multi-mediated, corporately-managed communication that exists in the current communication environment. Prerequisites: Introduction to Communication or the equivalent. College writing or the equivalent. Ability to use and cite scholarly sources. This course is an upper level Communication and Media elective that is a part of the concentration. It should be taken after foundational courses. This course was previously CUL-223314 Communication Analysis.
Attributes: Basic Communication Gen Ed, Liberal

COMM 3010 Communication Theories (4 Credits)
This course introduces students to a wide range of communication theories that help to explore and explain how individuals and groups communicate at the interpersonal, organizational, and mass communication levels. Students will explore a variety of theoretical perspectives and apply theoretical lenses to explain communications and to develop communication strategies for real-life communication situations. Prerequisite (must complete before registering): Ability to write at an upper level Notes: This is designed for students planning to concentrate in some aspect of Communication. Students planning to attend graduate programs in Communications may also want to consider taking Social Science Methods and Theory (or Qualitative and/or Quantitative Methods) and Statistics.
Attributes: Basic Communication Gen Ed, *Communication Gen Ed-Oral, *Communication Gen Ed-Written, Liberal

COMM 3015 Social Media: Communication & Culture (4 Credits)
This course gives students the chance to use a variety of social media applications to promote a message of their choice (example: marketing a product, spreading a news story). Students will study media history, including earlier phases of the Internet, learn to distinguish among various social networking tools. Email, Facebook, TikTok, LinkedIn and Twitter are just a few of the applications one might use to promote a business, send a message to the public, forward news, tell a story, or keep up with old friends and new acquaintances. In addition, students will explore cultural ramifications such as the spread of fake news, and the ability for activist groups to organize to make social change. This course allows students to improve their writing, oral presentation, and research skills. Prerequisite (must complete before registering): Ability to write college essays Highly Recommended (not required): College Writing (COMW 1005), or equivalent, ability to use the online library Notes: For students in Communication, Communication & Media or Digital Communication, recommend taking after News and Feature Writing and/or Media Writing. For students in any area of business, recommend taking after Marketing Principles.
Attributes: Basic Communication Gen Ed, *Communication Gen Ed-Oral, *Communication Gen Ed-Written, Liberal

COMM 3016 Digital Communication Strategies II (4 Credits)
Communicating in the 21st century requires specialized skills such as effective videoconferencing, writing for online and mobile platforms, using visual, video and gaming apps, understanding virtual environments, and conducting business remotely. This course teaches the differences between digital and traditional communication methods, with a focus on advanced communication applied to large group communication using virtual tools. Discussion and written assignments focus on digital community and culture, including human behavior in virtual environments. Prerequisites: The ability to write at the advanced college level utilizing scholarly research.
Attributes: *Communication Gen Ed-Oral, *Communication Gen Ed-Written, Liberal

COMM 3025 Media Ethics & Law (3,4 Credits)
Learn the basic principles and application of the First Amendment as it relates to communications and media. Since First Amendment rights are constantly evolving we will examine its application to free, political, and commercial speech, advertising and ethical components related to them. Explore the government's monitoring and restriction of media and the balancing act and various tests the courts apply when allowing journalistic reporting versus a defendant's right to a fair and impartial trial. Media include Print, Radio, Television, Video Games, and the Internet. This course covers ethics and the legal and policy guidelines for in Communications and Media. Appropriate for students considering Law School Prerequisite (must complete before registering): Ability to write a college essay and incorporate and cite scholarly work from the library Highly Recommended (not required): College Writing (COMW 1005), or equivalent, and Introduction to Communication (COMM 1020) Notes: This course is a "junior" level course for students concentrating in communications or media. It should not be a first course in the area, unless they are planning to attend law school and this is one of several legal studies courses they are taking. This course was previously CUL-223884 Media.
Attributes: Liberal

COMM 3027 Data Visualization (4 Credits)
This course gives students the essential concepts and tools for data visualization. It teaches history, theories and techniques required to understand and represent data online. It allows students in digital communication and other concentrations to effectively analyze and use charts, graphs, polls, maps, interactive quizzes and other tools for representing data. Students will learn to obtain, analyze and present data, learn the basics of appropriate coding and apps, analyze data visualizations for issues of bias or misrepresentation, and represent data in an ethical and truthful ways. A suggested sequence is Writing for Digital Media, followed by News & Feature Writing. These courses should be taken prior to 21st Century Journalism. Strongly recommended Statistics, and/or Contemporary Math, Math for the Inquiring Mind, or another math course that includes statistics. In addition, students should plan to conduct tutorials on various programs or applications that will help them conduct this work.
Attributes: Liberal

COMM 3030 News & Feature Writing (4 Credits)
What is journalism? Students will study and practice news writing. Through repeated practice, students will learn how to use journalistic story structures to organize writing; interviewing and other information gathering strategies; protocols of fact-checking; and uses of grammar, sentence structure, and style to strengthen overall writing. While the course is designed to offer students interested in possible careers in journalism an introduction to the trade, it also will appeal to those interested in strengthening their overall writing and editing skills. Prerequisite (must complete before registering): Completion of the General Education requirement in Basic Communication. Highly Recommended (not required): College Writing (COMW 1005), or equivalent, and information literacy skills and ability to conduct library research Notes: This is an appropriate course as part of the Concentration for students concentrating in Communications, Media, Journalism, Writing or similar Concentrations. Students in other areas may choose it as an elective This course was previously CUL-221614 News and Feature Writing.
Attributes: Liberal

COMM 3045 Television & Culture (4 Credits)
Television is an important influence on our culture, and is definitely not 'just entertainment.' In this course, you will study television as a cultural artifact. Students will investigate television's distinctive features, programming and cultural impact. Acquire skill in interpreting the sort of cultural impact television programs may have on viewers. Consider the ways that gender, race, class, sexuality, disability and age are featured on television shows. Discover the way television's generic conventions create limits on the creativity of television producers. Become a more knowledgeable and selective viewer. Learn to interpret television ratings and track the performance of various shows. Read and critically evaluate articles. This course can include considerations of theory, history, and ethics. Highly Recommended (not required): A lower level study in media literacy or critical or literary theory This course, and The American Cinema, are appropriate for students beginning upper level work. It's a good "sequel" to Media and Visual Literacy and a good predecessor to Women, Girls, and the Media, or any other course about "difference" in the media such as race, sexuality etc.
Attributes: Humanities Gen Ed, *Humanities Gen Ed, Liberal

COMM 3055 Organizational Communication (3 Credits)
The purpose of this course is to understand basic principles of organizational and communication theory. The course examines the theories and practice of organizational communication, as well as the modern practice in written, oral, and online communications used in organizations. Specific attention will be given to the themes of communication, empowerment, and technology and their impact on organizations.
Attributes: Liberal

COMM 3060 Political Communication (3 Credits)
This course explores the ways in which popular media shape and reflect perceptions of politics and government, the structural and situational factors which shape political discourse and the recurrent motives and purposes of communicators. A practical approach is used in the course, with an emphasis on the creation and assessment of political campaign communications.
Attributes: Liberal

COMM 3065 Global Communication & Media (4 Credits)
This course explores the role of media historically through shaping and creating national and global issues, including the growth and trajectory of global cultural commodification. Media such as news, propaganda, advertising, music, cinema, television, internet, gaming, social media, crypto, and cybercrime will be explored to the extent that they have shaped global issues, historical events and culture. Through multidimensional and different cultural perspectives, students will use theory to critically assess shifts in media patterns of production, distribution, and consumption in the larger context of globalization. Essential concepts of international communication will be examined, such as international broadcasting, international communication law and regulation, and cultural trends in communication and information technologies. Recommended: At least one course in communication or media studies (film, television, the internet, games).
Attributes: *World Hist & Glb Awnss Gen Ed, Liberal

COMM 3070 Leadership Communication (4 Credits)
Leadership Communication addresses theories, processes, forms and techniques of professional communication for leaders in all contexts. Students will explore issues of active listening, motivation, conflict resolution/mediation and interpersonal communication techniques as well as analyze communication situations and create effective communication in a variety of media. Students will be exposed to the power of persuasion, humor, vocal dynamics, physical energy, a strong message and the desire to communicate. Students will prepare oral presentations using PowerPoint or similar types of presentation tools. Prerequisites: Students should have basic computer and college level writing skills.
Attributes: Basic Communication Gen Ed, Liberal

COMM 3080 Communication for Success: Advanced (3 Credits)
This is an advanced level communication course which helps students enhance their skills in academic communication through critical reading, writing, research, and visual presentations. The premise of this course is to enable students to learn, think and express themselves critically. Assignments and exercises focus on logical thinking, reflection, understanding and coherence, as well as how to find and use evidence to support ideas and shape written and oral arguments. Students will work on topics such as paraphrasing, summarizing, developing strong theses and topic sentences, researching topics and citing references, as well as crafting both personal and research essays which will be presented orally. Students will develop visual and oral communication strategies to present their ideas and research topics effectively. This course is specifically intended for non-native English speakers.
Attributes: *Communication Gen Ed-Oral, *Communication Gen Ed-Written, Liberal

COMM 3085 Analyzing Race, Class & Gender in the Media (3 Credits)
In this advanced level course, students will analyze the historical and contemporary reality of race, class, and gender on a global level with a focus on media representation. Students will critically examine the social construction of race, class, gender, and other forms of social difference (sexuality, ethnicity, age, dis/ability) through an intersectional lens. Students will explore and analyze structural discrimination and aspects shaping individual and group identity in the context of popular narratives and media portrayal. Topics may include: white privilege, colorism, double consciousness, respectability politics, segregation, redlining, etc.
Attributes: *Diversity Gen Ed, Liberal

COMM 3122 Rhetorical Dimensions of Race Class & Gender (3 Credits)
Exploration of race, class and gender, with an emphasis on conceptual tools developed since the 1970s in both empirical studies and critical thought about these categories. The students will develop analytic methods for understanding distinctions and controversies, e.g., the difference between sex and gender; the difference between race and ethnicity; arguments for and against affirmative action; and the ways in which race, gender and class overlap.
Attributes: Liberal

COMM 3127 Advanced Public Relations (3,4 Credits)
By combining academic thinking in PR with practical tasks in strategy development and implementation based on real life examples, the course provides an insight in core tasks of the Communications and Public Affairs functions within organizations. The course builds on the previously gained knowledge of basic PR concepts and extends on it, with focus on particular capabilities in development of communications strategies for corporate reputation building and protection, corporate social responsibility programs and marketing PR programs. The interrelation of Communications and Public Affairs function with other management disciplines, as well as processes of engaging key external stakeholders, are explained. Building on the knowledge gained in the "Public Relations Principles" course, it will extend particularly on the development of communication strategies for various subfields of corporate communication and PR.
Attributes: Liberal

COMM 3996 Special Topics in COMM (1-6 Credits)
The content of this course will vary by term and section. Students may repeat this course for credit as long as the topic differs. Please refer to the Term Guide for course topic offerings.
Attributes: Liberal

COMM 3997 Special Topics in COMM (1-6 Credits)
The content of this course will vary by term and section. Students may repeat this course for credit as long as the topic differs. Please refer to the Term Guide for course topic offerings.

COMM 3998 Individualized Studies in Communications (COMM) (1-8 Credits)
Students have the opportunity to develop individualized studies with their mentor in Communications (COMM). Please contact your mentor/advisor for more details.

COMM 4005 Capstone in Communication & Media (4 Credits)
Are you close to graduation and planning a career in communications, journalism, advertising, PR, broadcasting, digital media, or Internet content creation? Have you been studying media as a cultural form and plan to continue, in graduate school or on your own? If so, this course is for you. Consider 'new economy' solutions to the changing media environment through readings, research, interviews, and discussions, develop or refine a resume and portfolio or web site of past work that will present you as someone who is prepared for an entry level job or to study the subject further, and develop a past paper into a writing sample. Prerequisites (must complete before registering): At least 3 upper level courses in Communications, Media Studies, or related field Notes: Designed for students within 24 credits of Graduation. Designed as a final course, for students done with most concentration courses and Ed Planning. Gives Ed Planning credit, however, not a substitute for planning the degree as currently constructed. This course was previously CUL-224324 Capstone in Media and Communications.
Attributes: Liberal

COMM 4015 Women, Girls & the Media (4 Credits)
Focusing on women and girls, including transgender women, this course examines representations of gender, sexuality, race, class, dis/ability, and other intersecting axes of identity and power in the media. Students will consider issues of authorship, production, and spectatorship (audience) and how various media content (film, television, print journalism, advertising, and new and digital media) enables, facilitates, and challenges inequalities in society. Drawing from various media studies approaches, students will learn to interpret media in relation to its larger social, cultural, and historical contexts, conduct in-depth research, and have the option to create original media content. Recommended after Media Literacy, and at least one of: Television and Culture, American Cinema, American Popular Music in the 20th Century or Images of Women in Western Civilization, or Introduction to Women's, Gender, and Sexuality Studies. Students should have previous experience with some kind of media or cultural studies, the ability to write at an advanced level, and conduct scholarly research.
Attributes: Humanities Gen Ed, *Diversity Gen Ed, *Humanities Gen Ed, Liberal

COMM 4025 Communication Decisions (4 Credits)
This is an advanced level course for students in Communications and/or Media studies, designed to enable students to apply basic rhetorical and communication theories to the decision making process. Students also identify and examine effective forms of communication technologies for such purposes. Prerequisite (must complete before registering): The successful completion of Mass Communications & Society (CUST 3045) or Speech Communication, or equivalent introductory communications course Assumptions about Surrounding Related Courses: Communications Decisions is designed as a capstone course for students with concentrations in Communications.
Attributes: Liberal

COMM 4120 21st Century Journalism (4 Credits)
Utilize writing skills, data visualization skills, and digital communication skills to develop fully interactive journalistic or other types of writing, publicize the writing online, and use data analytics to tailor your message. A suggested sequence is Writing for Digital Media, followed by News & Feature Writing, Data Visualization then this course. Strongly recommended Statistics, and/or Contemporary Math, Math for the Inquiring Mind, or another math course that includes statistics. In addition, students should plan to conduct tutorials on various programs or applications that will help them conduct this work.
Attributes: Liberal

COMM 4123 Senior Project Proposal (2 Credits)
The student will prepare a proposal for the senior project and engage in educational planning. The senior project facilitates the integration and reflection of knowledge acquired from university learning which is aimed at creating an original culminating work. Educational planning includes the preparation of a rationale essay articulating how the program of study for the bachelor's degree meets the student's educational and career goals. For the senior project proposal, the student will pose a question to be addressed under the guidance of the ESC mentor. The student and mentor will discuss the focus and design of the research question to be developed. The student will identify the appropriate resources needed to address the question and submit the proposal to the mentor. The thesis, based on the proposal submitted for this study, will be carried out the following semester. Prior to taking this course, all lower-level concentration courses should be complete, as well as at least two advanced level concentration courses or their equivalent. Notes: As part of a capstone course, students should enroll in Senior Project Proposal during their final year of study. This course will be used as part of the Educational Planning credit.
Attributes: Liberal

COMM 4150 Senior Project Thesis (3 Credits)
The student will complete the senior project thesis as planned in the proposal phase of this study. The project provides an opportunity to conduct an in-depth examination of a topic of interest related to the study program that emerged from the student's earlier course work, and in this regard will complete educational planning by focusing on the mastery of academic skills, college level writing and presentation, and independent research and critical thinking. The student will be expected to produce a major research paper that meets the standards established during the proposal stage and prepare the final drafts of the rationale essay. Prerequisite (must complete before registering): Successful completion of Senior Project Proposal (COMM 4123) Note:This course will be used as part of the Educational Planning credit.
Attributes: Liberal

COMM 4998 Individualized Studies in Communication (COMM) (1-8 Credits)
Students have the opportunity to develop individualized studies with their mentor in Communications (COMM). Please contact your mentor/advisor for more details.

COMW: Writing (Undergraduate)

COMW 1005 College Writing (3,4 Credits)
College writing focuses on the basics of academic writing: writing processes, essays, research skills. Students will write and evaluate thesis statements for essays, and learn how to develop the thesis idea with supporting details. Students will learn how to structure ideas and information in essays. Students will learn how to research, incorporate, and document sources to support a thesis argument. Depending on their goals and needs, students may take any of five different, introductory, college writing courses: (COMW 1005), (COMW 1015), (COMW 1010), (COMW 2005), or (COMW 2020). Although all of these courses deal with similar skills and knowledge (writing process, thesis, support, documentation), they have different emphases. Note that, according to college policy, students can include up to 8 introductory-level expository/college writing credits in their ESC degree.
Attributes: Basic Communication Gen Ed, *Communication Gen Ed-Oral, *Communication Gen Ed-Written, Liberal

COMW 1015 College Reading & Writing (3,4 Credits)
Work with reading and writing processes such as previewing a text, organizing text information, identifying main ideas, annotating, summarizing, evaluating information, outlining, writing, and revising. Read selections in a variety of academic texts, and write several essays. Read and write essays to inform, react, apply, analyze, and synthesize. Complete a final research paper applying reading, writing, and thinking skills. This course does not overlap with College Writing. While College Writing focuses mainly on the writing process with students choosing their own writing topics, College Reading and Writing focuses equally on reading and writing processes, with students writing about concepts from assigned articles to learn different ways of approaching, thinking, and writing critically about what they read. Note: this is not a remedial course. Students must write grammatically and read with understanding in order to develop reading, writing, and thinking skills on the college level. This course was previously COMW 1015 Introduction to College Reading and Writing. Depending on their goals and needs, students may take any of five different, introductory, college writing courses: COMW 1005, COMW 1015, COMW 1010, COMW 2005, or COMW 2020. Although all of these courses deal with similar skills and knowledge (writing process, thesis, support, documentation), they have different emphases. Note that, according to college policy, students can include up to 8 introductory-level expository/college writing credits in their ESC degree.
Attributes: Basic Communication Gen Ed, *Communication Gen Ed-Oral, *Communication Gen Ed-Written, Liberal

COMW 1998 Individualized Studies in Writing (COMW) (1-8 Credits)
Students have the opportunity to develop individualized studies with their mentor in Writing (COMW). Please contact your mentor/advisor for more details.

COMW 2005 Effective Academic Writing (2,3 Credits)
This course examines different types of academic writing (e.g., collage, reflective essay, critique, persuasive research essay, lesson) and key elements of style that writers manipulate to create effective writing (e.g., sentence structure, paragraph creation, diction, language choice). Although the course will provide the chance to work on basic academic writing concepts (e.g., creating a thesis, researching and documenting sources), the focus will be on extending this learning to different types of academic writing and making writing more precise, concise, and interesting. This course will provide students with the opportunity to apply and refine basic college writing skills to create effective academic prose. This course was previously CUL-232042 Effective Academic Writing. Depending on their goals and needs, students may take any of five different, introductory, college writing courses: COMW 1005, COMW 1015, COMW 1010, COMW 2005, or COMW 2020. Although all of these courses deal with similar skills and knowledge (writing process, thesis, support, documentation), they have different emphases. Note that, according to college policy, students can include up to 8 introductory-level expository/college writing credits in their ESC degree. This course may be used to fulfill educational planning credit with mentor approval.
Attributes: Liberal, Partial Basic Comm Gen Ed

COMW 2030 Communication for Professionals (4 Credits)
Communication for Professionals focuses on the theories, processes, and forms of professional communication. Students consider communication variables (e.g., audience, purpose, role, cultural context) to analyze professional communication situations and create effective communications. Students will create a variety of professional communications which may include letters, memos, emails, social media posts, negative and persuasive messages, resume, cover letter, business report, and/or proposal. Students will do an oral presentation/speech using visuals. Students are encouraged to create actual communications that they can use at work or in a professional capacity. Assumptions about surrounding courses: appropriate as an elective for students concentrating in Communications/Media, but is not a substitute for Introduction to [Mass] Communication or Media Literacy.
Attributes: Basic Communication Gen Ed, *Communication Gen Ed-Oral, *Communication Gen Ed-Written, Liberal

COMW 2998 Individualized Studies in Writing (COMW) (1-8 Credits)
Students have the opportunity to develop individualized studies with their mentor in Writing (COMW). Please contact your mentor/advisor for more details.

COMW 3005 Proposal Writing and Logical Argument (3 Credits)
Develop analytical, research, and writing skills at the upper level. Proposal Writing offers a way of honing these skills in a concrete, real-world context. Students will read and analyze sample proposals and build on basic communication theory to learn what constitutes appropriate proposal content and format. Students will learn how to find, use, and evaluate the quality of evidence to logically support their proposal ideas. Students will write a short proposal planning assignment and two longer, formal, work- or community-related proposals. They will share and provide feedback on drafts as part of learning how to analyze a proposal's effectiveness. Students will also investigate proposals as a form of logical argument, learning about basic elements of argument, different argument strategies, and common errors in logical argument. Additionally, they will learn about visual rhetoric and do a short oral/visual proposal presentation and written analysis of visuals used to support their evidence. student must have the ability to do advanced-level work Notes: Students cannot take both Proposal Writing (COMW 2015) and Proposal Writing and Logical Argument (COMW 3005). This course may be used for educational planning credit with mentor approval.
Attributes: Basic Communication Gen Ed, *Communication Gen Ed-Oral, *Communication Gen Ed-Written, Liberal

COMW 3006 Research Writing: Advanced (3-4 Credits)
This course is designed to provide in-depth work in research writing. Students will learn how to create a research question, find and reading journal articles, check facts, and question a source, while doing an annotated bibliography, drafting-writing-revising a literature review, and doing an oral presentation based on the literature review. The course will focus these assignments on one topic of the student's choice for the term. Students also maintain a journal throughout, to promote fuller understanding of themselves as writers and researchers. Students will end the term with an advanced-level, analytical research paper as well as an understanding of the multiple ways in which research may be approached. This course may be used to fulfill educational planning credit with mentor approval. To be successful in this course, students should have the ability to do advanced-level work including familiarity with library-based research; introductory-level work in college writing preferred.
Attributes: Basic Communication Gen Ed, *Communication Gen Ed-Oral, *Communication Gen Ed-Written, Liberal

COMW 3015 Technical Writing (4 Credits)
Technical Writing investigates how to create concise, usable information for end users who need to learn how to do a task, use a product, or complete a process. Course assignments may include such things as instructions, work documentation, analytical reports, oral reports, and/or web page mock-up. Students learn how to plan for writing by analyzing their specific audience and purpose as the first step in the document design process. Students also learn what constitutes appropriate information and effective design, how to use visuals and headings, and how to choose precise language appropriate to the document's purpose and audience. The goal of the course is to create a variety of technical documents that are usable, readable, and accessible, as well as culturally, ethically, and legally appropriate. Technical Writing is suitable for students in all fields who need to articulate practical information clearly and efficiently. Required Skills: The ability to read a journal article and write at an advanced undergraduate level.
Attributes: Basic Communication Gen Ed, *Communication Gen Ed-Oral, *Communication Gen Ed-Written, Liberal

COMW 3122 Proposal Writing (2 Credits)
Develop analytical, research, and writing skills at the upper level. Proposal Writing offers a way of honing these skills in a concrete, real-world context. Students will read and analyze sample proposals and build on basic communication theory to learn what constitutes appropriate proposal content and format. Students will learn how to find, use, and evaluate the quality of evidence to logically support their proposal ideas. Prerequisite (must complete before registering): Ability to do advanced-level work Notes: Students cannot take both COMW 3122 Proposal Writing (2 cr.) and COMW 3005 Proposal Writing & Logical Argument (3 cr.). This course may be used for educational planning credit with mentor approval.
Attributes: Liberal, Partial Basic Comm Gen Ed

COMW 3996 Special Topics in COMW (1-8 Credits)
The content of this course will vary by term and section. Students may repeat this course for credit as long as the topic differs. Please refer to the Term Guide for course topic offerings.

COMW 3998 Individualized Studies in Writing (COMW) (1-8 Credits)
Students have the opportunity to develop individualized studies with their mentor in Writing (COMW). Please contact your mentor/advisor for more details.

COMW 4998 Individualized Studies in Writing (COMW) (1-8 Credits)
Students have the opportunity to develop individualized studies with their mentor in Writing (COMW). Please contact your mentor/advisor for more details.

CRJS: Criminal Justice (Undergraduate)

CRJS 1005 Introduction to Criminal Justice (4 Credits)
This course provides an introduction, overview and survey of crime and the American criminal justice system. Types of crime and problems with its assessment will be explored, as well as the challenges associated with the administration of the various segments of the criminal justice system (i.e., policing, adjudication, and corrections).
Attributes: Liberal

CRJS 1998 Individualized Studies in Criminal Justice (CRJS) (1-8 Credits)
Students have the opportunity to develop individualized studies with their mentor in Criminal Justice (CRJS). Please contact your mentor/advisor for more details.

CRJS 2005 Introduction to Criminology: Theorizing Crime (4 Credits)
This course introduces students to the major theories and perspectives associated with the study of crime, criminality and crime control. The course includes a detailed exploration of conventional, or "mainstream," theories/perspectives (classical, biological, psychological, sociological) as well as an overview of critical criminology and more contemporary theoretical developments.
Attributes: Liberal

CRJS 2998 Individualized Studies in Criminal Justice (CRJS) (1-8 Credits)
Students have the opportunity to develop individualized studies with their mentor in Criminal Justice (CRJS). Please contact your mentor/advisor for more details.

CRJS 3005 Alternatives to Incarceration (4 Credits)
This course examines the various options to traditional correctional institutions, as we know them today. Through this study, students will examine the current systems of corrections that criminologists often say have failed almost as many individuals as for whom it was created to serve. Topics may include: parole, probation, boot camps, substance abuse treatment centers, electronic monitoring, intensive supervision, house arrest, community service and day-reporting centers. Prerequisite: The student should have an understanding of the structure and functions of the various parts of the criminal justice system and the relationship of federal, state and local criminal-justice agencies, such as might be learned in a course in Introduction to Criminal Justice. Highly Recommended (not required): Introductory study in sociology, psychology and/or human development This course was previously CHS-264644, Alternatives to Incarceration.
Attributes: Liberal

CRJS 3009 Criminal Law & Procedure (4 Credits)
This course will provide students with the basis of criminal law and criminal procedure. Students will enhance their prior knowledge of Criminal Law by developing an understanding of criminal theory. The course will also address Constitutional criminal protections such as the right to privacy, protection against illegal search and seizure and right to remain silent.
Attributes: Liberal

CRJS 3015 Courts & the Administration of Justice (4 Credits)
This course examines the procedures, structures and functions of state and federal trial and appellate courts. Methods by which crimes are prosecuted and adjudicated in the courts will be examined; such controversial issues as plea-bargaining and the use of the death penalty will be analyzed; and special attention will be given to alternative methods of adjudicating criminal disputes, such as mediation, "drug courts" and restorative justice. The student should be familiar with reading, analyzing and "briefing" legal cases, as might be learned in such introductory law courses as Introduction to Law and the Legal System or Legal Environment of Business. This course was previously CHS 263694 Courts and the Administration of Justice.
Attributes: Liberal

CRJS 3020 Law Enforcement Intelligence Analysis (4 Credits)
This course focuses on the field of law enforcement intelligence analysis, with an emphasis on pro-active, intelligence-led policing and human rights. Students will examine the theory underpinning the relatively recent development of intelligence analysis in law enforcement including topics such as: comparative perspectives on theory development; common obstacles to applying intelligence analysis techniques in law enforcement settings; the benefits of intelligence analysis, especially in terms of data analytics and improving the efficacy of law enforcement investigations; and future applications of intelligence analysis in efforts to reduce crime, prevent crime and apprehend criminals. Recommended prior knowledge: The learner should understand the basic structure and functions of the criminal justice system. Knowledge of common information systems is also useful to ensure success in this course. This course was previously titled CRJS 3020 Crime and Intelligence Analysis.

CRJS 3030 Criminal Investigation (4 Credits)
This study provides the student with a comprehensive and forward-thinking examination of criminal investigation in the field. Consideration of conduct at the crime scene including; interviewing and interrogation of witnesses and suspects, use of informants, and techniques of surveillance. Emphasis is on the special techniques employed in particular kinds of investigation, and the presentation techniques of the police in court.

CRJS 3036 Principles of Fraud Examination & Financial Forensics (4 Credits)
This course introduces the principles of fraud examination and financial forensics as an oversight process for the private and public sector as well as not-for-profit-organizations. Students learn the fundamental tools and knowledge of fraud examination and fraud taxonomy using actual real-world fraud cases, research studies and educational materials provided by the Association of Certified Fraud Examiners. Emphasis is placed on understanding the causes of fraud, criminology theories, the investigation process including interviewing techniques and preparation for fraud trial, prevention of fraud, and resolution techniques. Students consider the financial impact of fraud, organizational culpability of fraud, disciplinary mechanisms and ethical standards. This course covers in its components professional ethics and social responsibility, research and communication skills in business. This course might be of particular interest to students pursuing concentrations in Criminal Justice as well as Accounting or any business or related discipline. The course satisfies business and professional ethics and social responsibility, and communication guidelines. This course is cross listed with ACCT-3035. This course was previously BME-213404 Principles of Fraud Examination and Financial Forensics. Prerequisites: Knowledge gained through experience or courses in the following subjects: Financial Accounting (through a course such as Introductory Accounting; The U.S. legal system (through a course such as Legal Environment of Business 1 or Introduction to Criminal Justice or Introduction to Law and the Legal System); human behavior (through a course such as Introduction to Psychology, Criminology or Deviance and Social Control).
Cross-listed with ACCT 3035.

CRJS 3045 Forensic Science (4 Credits)
This course provides a theoretical perspective of the issues and techniques of scientific criminal investigation. The main focus is on the fundamental principles of the physical and biological sciences with concerns for the applications of these principles as an aid to the resolution of legal questions. The value and assistance of various scientific aids to the criminal investigator are presented. Physical evidence encountered at a crime scene will be analyzed in terms of processing and selection of the type of forensic procedures to be utilized. Topics to be examined include; forensic pathology, toxicology, odontology, anthropology, questioned documents, serology, DNA evidence, other types of evidence, and the role of the crime laboratory.
Attributes: Liberal

CRJS 3050 Juvenile Justice & Delinquency (4 Credits)
This course critically examines the nature, causes and control of juvenile delinquency and justice. Topics to be covered include: historical developments, the range of contemporary alternatives for counseling and treatment, legal issues and functions of juvenile justice agencies, and consideration of future directions in juvenile justice. The student should have an understanding of the structure and functions of the various parts of the criminal justice system and the relationship of federal, state and local criminal-justice agencies, such as might be learned in a course in Introduction to Criminal Justice prior to taking this course.
Attributes: Liberal

CRJS 3055 Organized Crime (4 Credits)
The purpose of this individual tutorial is to examine the origins, organization, function and control of organized crime.
Attributes: Liberal

CRJS 3065 Race Crime & Justice (4 Credits)
The number of persons of color who are arrested and convicted of crime in the United States is grossly disproportionate to their representation in the general population. This course examines the role of race and racial bias in the definition of crime and criminal conduct, in the methods of policing, in crime reporting and reporting victimization, in the decisions of courts, and in the imposition of the death penalty and in treatment in prisons and other correctional settings. Students should be able to examine facts and problems, analyze issues, research remedies, apply theoretical concepts, examine alternatives, and formulate and communicate solutions.
Attributes: Liberal

CRJS 3070 Criminology, Victimology, and Restorative Justice (4 Credits)
This course examines the nature, scope and impact of crime in the United States and the independent and interdependent operations and influences of the police, courts and corrections. Historical, current, and emerging issues concerning due process and the provision of criminal justice services are explored.
Attributes: Liberal

CRJS 3996 Special Topics in CRJS (1-4 Credits)
The content of this course will vary by term and section. Students may repeat this course for credit as long as the topic differs. Please refer to the Term Guide for course topic offerings.
Attributes: Liberal

CRJS 3998 Individualized Studies in Criminal Justice (CRJS) (1-8 Credits)
Students have the opportunity to develop individualized studies with their mentor in Criminal Justice (CRJS). Please contact your mentor/advisor for more details.

CRJS 4005 American Corrections (4 Credits)
This study provides a critical examination of the intention and implementation of correctional policy and practices. Using historical development as a way of understanding current ideas, the history of corrections will be traversed, taking into consideration the justification and effects of corrections. This can be supported through work within the field of criminal justice, or related civil service fields. Introductory study in sociology, psychology and/or human development is desirable but not required. The student should have an understanding of the structure and functions of the various parts of the criminal justice system and the relationship of federal, state and local criminal justice agencies, such as might be learned in a course in Introduction to Criminal Justice prior to taking this course. Prerequisites: The student should have an understanding of the structure and functions of the various parts of the criminal justice system and the relationship of federal, state and local criminal justice agencies, such as might be learned in a course in Introduction to Criminal Justice.
Attributes: Liberal

CRJS 4010 Comparative Criminal Justice Systems (4 Credits)
This course examines criminal justice systems in England, France, Germany, Saudi Arabia, China, and Japan, in terms of the four families of law: Common Law, Civil Law, Socialist Law, and the Islamic (Sacred) Law. Comparative analyses of criminal procedure, constitutions, court systems, law enforcement agencies, and correction systems are conducted. This is a capstone course for students in criminal justice requiring a final comprehensive research project. Additional previous coursework in introductory sociology, psychology and/or human development is desirable but not required. The student should have an understanding of the structure and functions of the various parts of the criminal justice system and the relationship of federal, state and local criminal-justice agencies, such as might be learned in a course in Introduction to Criminal Justice and/or through extensive work within the field of criminal justice. Students should possess an advanced competency in formal, college level analytical writing, being able to examine facts and problems, analyze issues, research remedies, apply theoretical concepts, examine alternatives and formulate and communicate solutions. This course was previously CHS-264614 Comparative Criminal Justice Systems. Prerequisites: .
Attributes: Liberal

CRJS 4015 Criminal Justice Management & Policy (4 Credits)
The purpose of this study is to critically examine key concepts and foundations of management theory related to the planning, organizing, staffing, controlling, and leading functions to related, but significantly different, sectors of the criminal justice system: police, courts, and corrections. Readings in general management, police, courts and corrections management are required. Strong skills in writing and documenting work are required. The student should have an understanding of the structure and functions of the various parts of the criminal justice system and the relationship of federal, state and local criminal-justice agencies, such as might be learned in a course in Introduction to Criminal Justice prior to taking this course. This course was previously CHS-263614 Criminal Justice Management and Policy.
Attributes: Liberal

CRJS 4020 Internship in Criminal Justice (4 Credits)
The purpose of the internship in criminal justice is to provide the student the opportunity to acquire knowledge, and to develop, learn, and refine core practice skills. Students are assigned to an agency based on career objectives to evaluate the theoretical and actual operational functions of the agency in the provision of public safety services. Student will also reflect upon the experience.

CRJS 4025 Police Community Relations (4 Credits)
This course focuses on the relationship between police and the community with recommendations for ways of working together to reduce crime. Emphasis is placed on policing in a culturally-diverse society.
Attributes: Liberal

CRJS 4030 Women Crime & Criminology (4 Credits)
In this course, students will gain an understanding of the many issues concerning women in the criminal justice system, examine how societal complexities affect women as offenders, victims, and criminal justice professionals, and better understand the overlooked problems faced by women in the criminal justice system. This course was previously SOC 283414 Women, Crime & Criminology
Attributes: Liberal

CRJS 4998 Individualized Studies in Criminal Justice (CRJS) (1-8 Credits)
Students have the opportunity to develop individualized studies with their mentor in Criminal Justice (CRJS). Please contact your mentor/advisor for more details.

CRWR: Creating Writing (Undergraduate)

CRWR 1000 Introduction to Creative Writing (4 Credits)
This study introduces the student to multiple genres within the craft of creative writing. Poetry, fiction, and creative nonfiction will be explored through readings, written application of techniques and concepts, and careful attention to the writing process including pre-writing and revision. Readings will be drawn from a diverse range of perspectives and voices, and students will trace the development of each form within its historical context. Along with craft practice, students will gain experience in describing, interpreting, and critiquing poetry and prose.
Attributes: Liberal

CRWR 1005 Crafting Personal Narratives in Creative Nonfiction: Intro (4 Credits)
Creative nonfiction refers to the genre of writing that is 'true' yet draws upon the techniques of craft which fiction writers make use of in order to tell richly detailed and often moving personal stories, and/or to explore ideas through writing in creative in ways. Students will fain familiarity with the stages of developing a work of creative nonfiction, from brainstorming to drafting and revising the finished piece. Prerequisite (must complete before registering): The ability to write clear, grammatically correct paragraphs at the college level.
Attributes: Liberal

CRWR 1015 Creative Nonfiction: Introductory (4 Credits)
Creative Nonfiction: Introductory focuses on items such as memoirs, personal essays, portraits, essays of place, and/or narrative journalism/personal essays. Students use the tools of storytelling to develop an engaging voice, add personal authority to their expression, and write truthfully about the real world. Students will both analyze published works and create and revise their own writing via peer writing workshops. Students should take either CRWR 1015 Creative Nonfiction: Introductory or CRWR 3015 Creative Nonfiction: Advanced - not both. This course can fulfill either Humanities OR The Arts general education credit (not both).
Attributes: Humanities Gen Ed, Arts Gen Ed, *Humanities Gen Ed, *The Arts Gen Ed, Liberal

CRWR 1020 Portraiture in Poetry (4 Credits)
How can a poet, like a painter, effectively present the personality, appearance, history and nuances of a dimensional human being? Does a poem become a true homage to another person and tell a larger story for the reader? This study will explore ways that poets bring the people in their lives - friends, family, strangers, celebrities, the inhabitants of random encounters and imagination - to the page in evocative and vivid ways. We will examine how they use various poetic elements, including imagery, description, narrative, observation, and voice (or its absence), in addition to creating atmosphere and an emotional or political environment, to create these 'portraits.'
Attributes: Liberal

CRWR 1025 Screen Writing (4 Credits)
Students will learn about and practice the conventions of dramatic writing for the screen. They will study dramatic structure, character development, and techniques for telling a story through film. Students should be prepared to engage in writing exercises as well as developing a new screenplay.
Attributes: Arts Gen Ed, *The Arts Gen Ed, Liberal

CRWR 1030 Screenplays: From Concept to Production (4 Credits)
This study will explore the mechanics, research, development, design, and technical considerations (direction, budget, casting, props, filming, studio/recording facilities) when constructing and writing scripts for theatrical film and feature video. Commercial properties and documentary film will also be examined as an influential force, both in television, independent, and wide-release entertainment.
Attributes: Arts Gen Ed, *The Arts Gen Ed, Liberal

CRWR 1035 Creative Writing: The Short Story (4 Credits)
Students in this course will study and practice the art of writing the short story. The course will begin with discussing short story writing theory and by analyzing sample stories, if deemed necessary. The student will work with the instructor for aid in planning and developing one's own stories and for purposes of critiquing and rewriting. The student will write an appropriate number of short stories as deemed appropriate. During the course, the student will demonstrate a competency in the use of story elements--e.g., situation, conflict, plot development, scene and summary treatment, characterization, character relationships, description and dialogue, and theme.
Attributes: Liberal

CRWR 1040 Creative Writing: Fiction (4 Credits)
Students will consider the basic elements of fiction (e.g., plot, character, setting, theme) from the point of view of the creative writer, who makes both conscious and unconscious choices about these elements in the process of artistic creation. They will read about the process of writing short fiction, and read a variety of short works that exemplify fictional elements to analyze the choices that other writers have made. They will also apply concepts to the creation, discussion, and revision of your own creative work. This course focuses on the writing process. This course was previously CUL-222504 Creative Writing: Fiction.
Attributes: Arts Gen Ed, *The Arts Gen Ed, Liberal

CRWR 1045 Stories We Think We Know (Intro) (4 Credits)
What do we really know about the stories of American women? What stories do they tell about themselves in the letters they write? In this course, we will explore women's letter writing from the Colonial Period to the present day. Students will not only read primary source letters written by women they might know about from history books, but we also read letters written by diverse groups of women across different time periods of the American experience. We also will engage in creative non-fiction epistolary (letter writing) activities and writing assignments to imagine the time, space, and place in which these women lived. Students will use the tools of storytelling, thematic analysis, and character development as they interact with and analyze women's letters. During this course, we will cover the themes of letter writing; communication; creative non-fiction; first person narrative; and the concept of public versus private discourse. Note: Students should only take the introductory or advanced level of this course but not both. This course was previously CRWR 1045 Narratives We Think We Know - Intro.
Attributes: Humanities Gen Ed, Arts Gen Ed, *The Arts Gen Ed, Liberal

CRWR 1996 Special Topics in Creative Wrt (1-8 Credits)
Attributes: Liberal

CRWR 1998 Individualized Studies in Creative Writing (CRWR) (1-8 Credits)
Students have the opportunity to develop individualized studies with their mentor in Creative Writing (CRWR). Please contact your mentor/advisor for more details.

CRWR 2005 Microfiction (4 Credits)
In this course, the student will become familiar with "Flash" or "Micro Fiction." They will study its form within the context of conventional short and longer prose pieces, and submit pieces of original microfiction for review and critique. Elements such as plot, characterization and motive, narrative and tense will be examined.
Attributes: Arts Gen Ed, *The Arts Gen Ed, Liberal

CRWR 2015 Storytelling & Rites of Passage (4 Credits)
Family narratives give us a sense of self, family, tradition, and place. Writing family stories is a creative way to examine family structures, loyalties, and how identities are molded. This study examines the connection of self with the rites, rituals, values, beliefs, and intergenerational relationships that come to us through our family stories.
Attributes: Liberal

CRWR 2998 Individualized Studies in Creative Writing (CRWR) (1-8 Credits)
Students have the opportunity to develop individualized studies with their mentor in Creative Writing (CRWR). Please contact your mentor/advisor for more details.

CRWR 3005 Crafting Personal Narratives in Creative Nonfiction: Advanced (4 Credits)
This study will build upon and enhance the student's basic understanding of the craft of creative nonfiction and how to make use of literary techniques to develop engaging creative essays and writings inspired by real life. Students will refine their own writing craft, learn to provide insightful and constructive critiques of the writing of others, and read significant works of contemporary creative nonfiction. Prerequisite (must complete before registering): Creative Nonfiction: Introductory (CRWR 1015), or equivalent.
Attributes: Liberal

CRWR 3010 Creating Fictional Worlds (4 Credits)
Creating Fictional Worlds explores the ways that writers create vivid and immersive settings for their stories, whether they are realistic, make-believe, or as deeply imagined and researched as Tomi Adeyemi's Legacy of Orisha trilogy. Students will learn theoretical and practical aspects of worldbuilding and create a world of their own. They will research sources and materials appropriate to discovering and refining the world of their stories, including library and online research in matters of culture, history, geography, ecology, ethnicities, socioeconomics, and more. They will analyze several well-known books to understand what gives them their fascinating power, and write one or more stories/chapters/acts/poems set in the world they have created.
Attributes: Liberal

CRWR 3015 Creative Nonfiction: Advanced (4 Credits)
Creative Nonfiction: Advanced focuses on such items as memoirs, personal essays, portraits, essays of place, and/or narrative journalism/personal essays. Students use the tools of storytelling to develop an engaging voice, add personal authority to their expression, and write truthfully about the real world. Students will analyze published works through discussion and literary analysis essays. Students will also create and revise their own writing, participating in peer writing workshops to help move drafts into more final form. Creative Nonfiction is offered at both introductory and advanced levels. Students should take the course just once, either CRWR 1015 Creative Nonfiction: Introductory or CRWR 3015 Creative Nonfiction: Advanced - not both. Prior to taking this course, students should take a course in literature, college writing, or creative writing. This course can fulfill either Humanities OR The Arts general education credit (not both).
Attributes: Humanities Gen Ed, Arts Gen Ed, *Humanities Gen Ed, *The Arts Gen Ed, Liberal

CRWR 3025 Creative Writing: Poetry (4 Credits)
In this contract the student will study examples of outstanding and poetry, consult poetry and poetry writing handbooks as appropriate or necessary, and meet regularly with his/her mentor as well compose her/his own original poems.
Attributes: Liberal

CRWR 3030 Stories We Think We Know (Adv) (4 Credits)
This course will engage students in the exploration of women's letter writing from the Colonial Period to the present day. Through reading and analyzing letters written in a myriad of formats from the Colonial Period to the present day, students will learn about women's letter writing as a form of personal (and at times public) representation of feelings, thoughts, and historical recordings. Additionally, the course builds upon and enhances students' understanding of the craft of creative writing with a focus on creative nonfiction in the form of epistolary writing (the writing of letters). Using literary techniques inspired by the real life events and content of primary source letters, students will engage in research and refine their writing craft through creative non-fiction epistolary (letter) writing. Students will move beyond the tools of basic storytelling and character development to scene development, dramatization, dialogue, and description. During this course, we will cover the themes and topics of letter writing and its evolution; creative non-fiction; primary source analysis; research; and the concept of public versus private discourse. Note: Students should only take the introductory or advanced level of this course and not both.
Attributes: Humanities Gen Ed, Arts Gen Ed, *The Arts Gen Ed, Liberal

CRWR 3035 Dramatic Writing: The Hero's Journey (4 Credits)
This course examines Joseph Campbell's work about the hero's journey with specific focus on character development and action. Students will develop an appreciation of the hero's journey structure, and the many possibilities of application that this model offers to screenwriters and playwrights. Students must have the ability to write clearly and effectively at the college level.
Attributes: Arts Gen Ed, *The Arts Gen Ed, Liberal

CRWR 3045 Plays & Playwriting (4 Credits)
The principal aim of this course is for the student to write their first play. Secondarily, the student will study as appropriate important and model plays by outstanding modern American playwrights.
Attributes: Liberal

CRWR 3050 Portraiture in Poetry (4 Credits)
How can a poet, like a painter, effectively present the personality, appearance, history and nuances of a dimensional human being? Does a poem become a true homage to another person and tell a larger story for the reader? This course will explore ways that poets bring the people in their lives - friends, family, strangers, celebrities, the inhabitants of random encounters and imagination - to the page in evocative and vivid ways. We will examine how they use various poetic elements, including imagery, description, narrative, observation, and voice (or its absence), in addition to creating atmosphere and an emotional or political environment, to create these 'portraits.'
Attributes: Arts Gen Ed, *The Arts Gen Ed, Liberal

CRWR 3055 Poetry & Healing (4 Credits)
In this course, the student will examine poetry as a literary art form that has been utilized as a tool for healing in personal and institutional situations, and within societal/historic contexts. Students will learn how expressing personal narratives through poetry can encourage personal healing. They will also create their own poems in this genre and develop their skills in writing poetry that heals.
Attributes: Arts Gen Ed, *The Arts Gen Ed, Liberal

CRWR 3065 Special Topics in Creative Writing (4 Credits)
This study will vary according to the special topic being offered and specified in the subtitle. Studies may include ground-breaking approaches to creative writing, new and/or hybrid creative forms, special thematic approaches, historical applications, major authors, emerging literary movements, and more. All special topic studies in creative writing will include reading and writing, critical analysis, and consideration of the content studied in relation to historical and contemporary literary practices.
Attributes: Liberal

CRWR 3075 The Art of Memoir (4 Credits)
In this course, we will read memoirs written by a variety of writers, look at how these writers have edited their lives, what they have included and omitted, and from a literary point of view, at the ways they constructed their stories. Students will write critically about the memoirs they read and use these memoirs as models to begin writing their own memoirs. This study will develop the students' critical thinking, reading and writing skills, and hopefully provide them with new insights and records of their lives. Students much have a prior creative writing course.
Attributes: Arts Gen Ed, *The Arts Gen Ed, Liberal

CRWR 3080 Wild Thoughts: Writing Creatively About Nature (4 Credits)
Nature writing begins with close observation of the natural world and recording what we see. Writing down our observations becomes a tool to explore our perceptions and reactions to what we are observing. Nature writing is exploratory and reflective; it teaches us how to look deeply. As part of the natural world, the writer must also observe him or herself and draw the reader into that world, too. Through written assignments, projects, discussions, and weekly oral presentations, we will use nature writing to learn not just about nature, but from nature about the interconnection, the interrelationships that form our world and give meaning to our existence. The course culminates in a final project which is then presented orally to the class. Prior to taking this course, students must take at least one college level writing course.
Attributes: Basic Communication Gen Ed, *Communication Gen Ed-Oral, *Communication Gen Ed-Written, Liberal

CRWR 3122 Spiritual Memoir (4 Credits)
This study offers students the opportunity to consider their own and others' faith-based and spiritual beliefs and traditions and discover how these mysteries can be revealed in concrete terms through memoir. Spiritual memoir include images and imaginings, memory and mystery, poignant memories and messy ones, in other words, life.
Attributes: Liberal

CRWR 3996 Special Topics in CRWR (4 Credits)
The content of this course will vary by term and section. Students may repeat this course for credit as long as the topic differs. Please refer to the Term Guide for course topic offerings.
Attributes: Liberal

CRWR 3998 Individualized Studies in Creative Writing (CRWR) (1-8 Credits)
Students have the opportunity to develop individualized studies with their mentor in Creative Writing (CRWR). Please contact your mentor/advisor for more details.

CRWR 4015 Poetry of the Oppressed: Verse Under Fire (4 Credits)
In this course, students will examine poetry created under the duress and extreme conditions of political oppression, war time captivity, and incarceration. They will analyze this poetry for its artistic significance in terms of style and content. They will also look at how each piece expresses the feelings and experiences of people in difficult political and personal situations.
Attributes: Arts Gen Ed, *The Arts Gen Ed, Liberal

CRWR 4025 Creating a Graphic Narrative (4 Credits)
Students in this course will study Graphic novels as a significant and influential part of the literary canon, capturing both personal odyssey and cultural events while heightening awareness of larger historical, political, and social issues. The student will have the opportunity to study, as resource material, what pivotal comics figure Will Eisner termed, 'Sequential Art,' and practice the nuances of storytelling through narrative and pictures. The student will then plot, write, and design a graphic manuscript of one of several genres: memoir/personal narrative, current/historic events, fictional, children's/YA narrative, or a subgenre with approval by the mentor.
Attributes: Arts Gen Ed, *The Arts Gen Ed, Liberal

CRWR 4998 Individualized Studies in Creative Writing (CRWR) (1-8 Credits)
Students have the opportunity to develop individualized studies with their mentor in Creative Writing (CRWR). Please contact your mentor/advisor for more details.

CSCI: Computer Science (Undergraduate)

CSCI 1010 Introduction to Computers (4 Credits)
This introductory course provides the student with a comprehensive overview of computer systems, introducing computer hardware, system and application software, networks, information systems, and computer security. Students will explore topics in computer hardware, peripheral devices and their functions; computer operating systems and software applications, digital media, data, and file management; fundamentals of networks, Internet and web technologies; basics of computer programming, database, information systems; computer security, privacy, ethics and access to technology. Students will also develop an understanding of computers and related technology and how they are being used in the world today. Notes: Students must have regular access to a personal computer with access to the Internet, a text editor and word-processing application, and a web browser.

CSCI 1015 Introduction to Database Design (4 Credits)
This study begins with an introduction to the use of a database. A good database design starts with a list of the data that you want to include in your database. Students will learn the principles of designing the structure of the tables in a database. They will also engage in developing other related tables, creation of questions needed for the database to answer, and normalization of a database. Highly Recommended (not required): Familiarity with computer applications.

CSCI 1020 Introduction to Networks (4 Credits)
This introductory course provides the student with a comprehensive overview of computer networks, introducing network protocols and standards, physical media, topologies, network devices and communication infrastructure. Students will explore in-depth the most important concepts in contemporary networking, such as TCP/IP, Ethernet, wireless transmissions, virtual networks, and security. After completing the course students will be able to select an appropriate network design, hardware, and software for a given environment and build a simple network, maintain, troubleshoot, and manage the network. Notes: Students must have regular access to a personal computer with access to the Internet, a text editor and word-processing application, and a web browser. This course was previously SMT-272124 Introduction to Networks.

CSCI 1998 Individualized Studies in Computer Science (CSCI) (1-8 Credits)
Students have the opportunity to develop individualized studies with their mentor in Computer Science (CSCI). Registration for this class must be approved by the student's mentor.

CSCI 2010 Introduction to C++ & OOP (4 Credits)
This course deals with object-oriented programming (OOP) using C++. The main topics of discussion include C++ language features and the implementation of the OOP features of encapsulation, classes, inheritance, polymorphism and data hiding. C++ programming examples will be discussed and students will work on hands-on C++ programming assignments. Prerequisite (must complete before registering): College Mathematics or equivalent Highly Recommended (not required): An introductory-level college mathematics study that included algebra and problem solving. Notes: Students must have the ability to install software. This course is sufficient to address the programming component of Computer Science concentration guidelines. This course was previously SMT-272504, Introduction to C++ and OOP.

CSCI 2015 Introduction to Object-Oriented Programming: Java (4 Credits)

Explore computer programming and the object-oriented language, Java. This course introduces techniques and processes that are necessary in a professional software development setting. A background in programming is not assumed. Topics include modern software development tools including debuggers; general programming techniques; object-oriented programming; maintainability; algorithm design; and event-driven, graphical interface design. Students will enhance their ability to develop software in industry. Prerequisite (must complete before registering): College Mathematics or equivalent Highly Recommended (not required): An introductory-level college mathematics study that included algebra and problem solving Notes: Students must have the ability to install software. This course is sufficient to address the programming component of Computer Science concentration guidelines. This course was previously SMT-272984, Introduction to Object-Oriented Programming: JAVA.

CSCI 2020 Introduction to Programming with Python (4 Credits)

Python is a powerful programming language that is relatively easy to read. It is one of the fastest-growing programming languages and is becoming an integral part of many professions, from finance and insurance to technology, healthcare, retail, and e-commerce. This course provides a basic introduction to the language of Python and its programming environment as a foundation for other courses and future jobs in the field such as Data Analytics. In this course, students will learn the syntax of the Python programming language, develop practical applications, and interpret data that goes beyond Excel using Python. Students will also learn collaboration and teamwork with a team project. Prerequisites: None. Corequisites: None.

CSCI 2998 Individualized Studies in Computer Science (CSCI) (1-8 Credits)

Students have the opportunity to develop individualized studies with their mentor in Computer Science (CSCI). Registration for this class must be approved by the student's mentor.

CSCI 3000 Computer Operations & Security (4 Credits)

As computers become ever more present and interconnected in modern society, the IT professional needs to be more and more concerned with the issues of levels of service, security and recovery. This course will cover the topics of management and security; quality of service and system performance; viruses, worms, trojan horses and denial-of-service; firewalls; and strategies for ensuring appropriate levels of security. A student project of sufficient rigor will be the core of this course. Prerequisite (must complete before registering): Introduction to Networks Highly Recommended (not required): Familiarity with the core concepts of networking, including awareness of the existence of protocols; an understanding of hardware such as routers, hubs and switches, common operating systems, basic systems and network security. This knowledge can be gained in Introduction to Networks. Specifically, students in this course should have knowledge in the following areas: Basic concepts of networks, basic hardware and software concepts; elementary algebra. This course was previously SMT-273324, Computer Operations and Security.

CSCI 3005 Computer Organization & Architecture (4 Credits)

Students will explore the structure and function of computers and develop a deep understanding of the nature and features of contemporary computer systems. The computer system is characterized in terms of structure - the way in which components are interconnected, and function - the operation of the individual components. The course will cover CPU architecture, memory, I/O system, primary and secondary storage, numbering systems, computer arithmetic and digital logic, RISC, CISC, multicore architectures, different levels of parallelism, and performance related issues. Assumptions about surrounding courses: Students should have an understanding of computers, data structures and algorithms, and discrete mathematics. Notes: Students should select either this course, or Computer Organization and Assembly Language as part of their degree program as there is substantial overlap in the course curriculums.

Attributes: Liberal

CSCI 3010 Computer Organization & Assembly Language (4 Credits)

This course explores the relationship between hardware and software. Students will learn how the electronics of a computer form the basis of computer programming. Topics include systems of data representation, comparison of machine languages, the structure of memory, the operation of the Arithmetic Logic Unit, real and virtual memory, and race conditions. Assembly language programming projects reinforce the concepts of registers, the binary representation of numbers and the underlying machine language. Assumptions about surrounding courses: Students should be competent computer programmers, and understand data structures and algorithms and discrete mathematics. Notes: Students should select either this course, or Computer Organization and Architecture as part of their degree program as there is substantial overlap in the course curriculums.

CSCI 3015 Data Structures & Algorithms (4 Credits)

Data structures and algorithms have been found by programmers to be applicable to many different programming situations. This course focuses on algorithms for searching and sorting, and on stacks, queues and trees, which are specific structures for storing data. Prerequisites: Computer Programming II or Object-Oriented Programming Assumptions about surrounding courses: The Object-Oriented Programming course should be in the same language as this course is using. Student should verify which language is being used. This course was previously SMT-274304 Data Structures and Algorithms.

CSCI 3020 Operating Systems (3-4 Credits)

This course builds on lower level topics in process synchronization, inter-process communication and file system organization. It starts with a brief historical perspective of the evolution of operating systems over the last fifty years and then covers the major components of most operating systems, with particular focus on the advanced topics in concurrency, deadlock protection, multiprocessor scheduling, computer system modeling and virtual memory management etc. Simulated lab experiments will be used to illustrate key concepts. Assumptions about surrounding courses: Experiential knowledge of the functionality of operating systems; familiarity with operating systems; experience in systems programming; or knowledge of network systems. This course was previously SMT-273644 Operating Systems

CSCI 3122 Visual Basic Computer Programming (4 Credits)

This course provides the beginning programmer with complete coverage of all major introductory programming topics, with an emphasis on the Visual Basic 2010 programming language. Visual Basic applications are presented in a real-world setting. Students learn how to plan and create their own interactive windows applications. GUI design skills and object-oriented programming concepts are emphasized throughout the course.

CSCI 3900 Advanced Java (3,4 Credits)
This course builds on the previous prerequisite course, Programming in Java or Introduction to Object-Oriented Programming: Java. Topics include multi-threading, JDBC, collections, methods and classes, applets and Java Web Start, multimedia, networking, Java Server Faces, Ajax Enabled JSFs, Web Services and Java 2D. Students will learn advanced syntax, capabilities and APIs of the Java programming language and of the Java Standard Edition (SE) platform. The course exposes students to advanced programming topics and techniques needed to build enterprise software systems. Prerequisite (must complete before registering): Introduction to Object-Oriented Programming: Java; Data Structures and Algorithms Notes: Currently, this course is only offered through the College's International Programs. It is recommended that students complete the Strategies in Learning (SIL) course before taking this course.
Cross-listed with INFT 3997.

CSCI 3905 C#.NET Programming (4 Credits)
This course emphasizes writing efficient program code through proven techniques in object-oriented programming (OOP) and event-driven programming. An introduction to the C# language is provided in the context of object-oriented analysis design concepts making use of UML. In addition to basic C# language constructs, the course teaches Lambda expressions, LINQ applications and generic collections. Advanced topics in building the GUI and event handling with Windows Forms and Windows Presentation Foundation applications are covered. It teaches software development employing the C#.NET language in the environment of Visual Studio. Prerequisites (must complete before registering): Introduction to C++ & OOP or equivalent Notes: Currently, this course is only offered through the College's International Programs.

CSCI 3910 Mobile Applications with Android (4 Credits)
This course teaches designing, developing, testing, debugging, and distributing professional level Android applications. It presents major concepts of this leading-edge mobile computing technology in the context of complete working Android applications. The course provides a smooth transition from traditional Java software development to mobile development in one of its most promising platforms, Android. Prerequisite (must complete before registering): Introduction to Object-Oriented Programming: Java or equivalent. Notes: Currently, this course is only offered through the College's International Programs.

CSCI 3915 Network Administration and Management (4 Credits)
In this course, students will configure network equipment, install network tools and accomplish tasks and duties similar to what network administrators, network and help desk technicians and IT installers do in their daily work. Students will cement the knowledge they gained in previous data communication networking coursework by practicing what they already know in theory, as they install and configure network devices, such as switches, routers, firewalls, network management software and other network related tools in a lab environment. Prerequisite (must complete before registering): Data Communications and Networking or equivalent. Notes/Comments: Currently, this course is only offered through the College's International Programs.

CSCI 3996 Special Topics in CSCI (3-4 Credits)
The content of this course will vary by term and section. Students may repeat this course for credit as long as the topic differs. Please refer to the Term Guide for course topic offerings.
Attributes: Liberal

CSCI 3998 Individualized Studies in Computer Science (CSCI) (1-8 Credits)
Students have the opportunity to develop individualized studies with their mentor in Computer Science (CSCI). Registration for this class must be approved by the student's mentor.

CSCI 4000 Advanced Computing Models: Virtualization Cloud & Mobile Computing (4 Credits)
Students will explore the impact of the new wave of advanced computing, such as virtualization technologies, and cloud and mobile computing, as services and delivery models on business and the society. Topics include abstraction, virtualization, hypervisors, load balancing, and utilization of virtualization technologies at different system levels. Students will develop a broad understanding of cloud computing service and delivery models, research directions in architecting modern data center computing, exploit opportunities afforded by modern cloud computing such as scalable distributed systems and mobile applications, data storage, security, monitoring, fogging, and more. Assumptions about surrounding courses: Students should have a basic understanding of computers, networks, database applications, along with a fundamental understanding of computer use in an organizational environment.
Attributes: Liberal

CSCI 4005 Software Engineering (4 Credits)
Computer scientists and software engineers need to learn formal methodologies for designing robust and reliable software systems in order to effectively and efficiently build and maintain these large and/or complex software projects. In this course, students will learn the concepts of software engineering including software processes, requirements specification, software verification and validation, and software evolution. Prerequisites (must complete before registering): Computer Programming I or equivalent; Data Structures and Algorithms or equivalent; Discrete Mathematics or equivalent Assumptions about surrounding courses: -An understanding of the general principles and characteristics of programming and programming languages such as one would gain in an introductory programming course or through professional experience. -A familiarity with data structures and the ability to identify appropriate data structures along with an understanding of the principles of algorithm design including the ability to design correct and efficient algorithms such as one would gain in a course on Data Structures and Algorithms or through professional experience. -A working knowledge of functions, relations, and sets; formal logic; proof techniques; basics of counting; graphs and trees; and discrete probability such as one would gain in a course on Discrete Mathematics. -It is recommended that students also have a familiarity with the social context of computing and professional and ethical responsibility such as one would gain in a course on Social, Professional & Ethical Issues in Computing. This course was previously SMT-274144 .
Attributes: Liberal

CSCI 4015 Theory of Computation (4 Credits)

Theory of Computation is a capstone course for computer science. It is concerned with theoretical aspects such as regular languages, finite automata, context-free languages, pushdown automata, the Church-Turing thesis, Turing machines, decidability, the halting problem, time complexity, and P and NP classes. Students will improve their ability to learn mathematics independently and improve their ability to create proofs. Prerequisite (must complete before registering): Discrete Mathematics Assumptions about surrounding courses: It is essential to know general methods of proof and have some prior experience with proving theorems. To achieve this, the contents of Discrete Math taken at the advanced level are essential. A course in proofs is recommended. Notes: Theory of Computation is usually a requirement for graduate school in Computer Science.

Attributes: Liberal

CSCI 4900 E-Commerce Applications (4 Credits)

This course provides the student with the knowledge and skills necessary to create the components/pages of a website that provides the capability to sell products to the consumer or business, collect payment due and provide the data to the other systems and applications that will complete the order process. Topics include setup and configuration in Dreamweaver of a testing environment with PHP/ MySQL and Apache web, fundamentals of PHP and good database design, usage of Dreamweaver behaviors in designing dynamic web pages, and using ready custom-built PHP functions. Prerequisite (must complete before registering): Introduction to Object-Oriented Programming: Java; Data Structures and Algorithms Notes/Comments: Currently, this course is only offered through the College's International Programs. It is recommended that students complete the Strategies in Learning (SIL) course before taking this course.

CSCI 4998 Individualized Studies in Computer Science (CSCI) (1-8 Credits)

Students have the opportunity to develop individualized studies with their mentor in Computer Science (CSCI). Registration for this class must be approved by the student's mentor.

CUST: Cultural Studies (Undergraduate)

CUST 1010 Humor in the Workplace (2 Credits)

Examine the nature of humor and the uses of humor as a communication strategy in the workplace, whether office, hospital, or home. Consider the psychological and physiological benefits of humor and learn effective strategies for incorporating humor into workplace settings. Examine culture and gender considerations as well as appropriate uses of humor in communication situations. Assignments include a humor journal and a plan of action to incorporate humor into a recurring workplace situation. This course was previously CUL-222342 Humor in the Workplace.

Attributes: Liberal

CUST 1998 Individualized Studies in Cultural Studies (CUST) (1-8 Credits)

Students have the opportunity to develop individualized studies with their mentor in Cultural Studies (CUST). Please contact your mentor/advisor for more details.

CUST 2030 Introduction to Critical Thinking (2 Credits)

Learn concepts basic to critical thinking (clear communication, persuasion, argument, fact and opinion, etc.) in a real-world, problem-solving context. This course was previously CUL-232312 Introduction to Critical Thinking. Students cannot take both CUST 2020 and CUST 2030. This course may be used to fulfill educational planning credit with mentor approval.

Attributes: Liberal

CUST 2998 Individualized Studies in Cultural Studies (CUST) (1-8 Credits)

Students have the opportunity to develop individualized studies with their mentor in Cultural Studies (CUST). Please contact your mentor/advisor for more details.

CUST 3015 Food & Drink in Cultural Context: Advanced (4 Credits)

Learn to consider food and/or drink as examples of cultural practice and cultural expression at an advanced level.

Attributes: Humanities Gen Ed, *Humanities Gen Ed, Liberal

CUST 3021 Women and Humor (4 Credits)

What is women's humor? Why has humor by women been largely resisted or overlooked? This study will examine women's use of humor as a form of social protest. In particular, we will look at the movement away from domestic humor of 19th century writers toward the use of satire by writers of the interwar period to the return of domestic humor in the 1950s and the revisioning of female and feminist humor today. Students will gain knowledge of theories of humor and satire as well as an understanding of the changing role of women in America from the 1850s to the present.

Attributes: Humanities Gen Ed, Liberal

CUST 3051 Queer History and Theory (4 Credits)

This course is an advanced exploration of Queer History and Theory. Developed in response to historical and contemporary social structures and systems that have marginalized individuals and groups based on gender and sexuality, queer histories and theories interrogate gender and sexuality in connection with other axes of power, privilege, and oppression such as race and class, in the pursuit of social justice, including the imagining of possible futures. Focusing on queer knowledge production primarily in the United States, the course is organized around social structures and systems, and concepts centered in queer thought such as the state, colonialism, racism, empire and imperialism, militarism and security, science, law and policy, religion, family and kinship, capitalism, labor, language, the body, and media. Students should have previous experience with some gender and sexuality studies course such as Introduction to LGBTQ+ Studies, Introduction to Women's, Gender, and Sexuality Studies, Sex and Sexuality: Facts and Fictions, etc. Prerequisites: Students should have previous experience with some gender and sexuality studies course such as Introduction to LGBTQ+ Studies, Introduction to Women's, Gender, and Sexuality Studies, Sex and Sexuality: Facts and Fictions, etc. .

Attributes: *Diversity Gen Ed, Liberal

CUST 3060 Korean Popular Culture: Understanding the Hallyu Wave (4 Credits)

This course explores Korean popular culture, particularly music and television (K-pop and K-drama). The current global popularity of Korean media ("hallyu wave") is analyzed in historical and sociopolitical context. Topics of study include: the formation of national Korean popular culture under Japanese colonization, the impacts of U.S. imperialism on South Korea's entertainment industries, and the growth of K-pop following the 1997 IMF crisis. The course also explores how the genres of K-pop and K-drama are utilized to address contemporary Korean social issues.

Attributes: *Diversity Gen Ed, *Humanities Gen Ed, Liberal

CUST 3062 Jazz Age Literature Culture (4 Credits)
This course is an exploration of the literature and culture of America in the 1920s, and its relation to other manifestations of the material culture of the time, such as music, film, affluence and celebrity. By the end of the course, students should be more astute as a readers, viewers and listeners, more proficient as writers and should have enhanced their insight into the ways in which the literature of the '20s was a product of the cultural, social and political context.
Attributes: Liberal

CUST 3070 Deaf Studies: Advanced (4 Credits)
This is an in-depth study of the field of Deaf Studies that highlights cutting-edge concepts and theories at use in this field. The course will show how Deaf people and sign languages are integral aspects of human diversity and how societies have responded to this diversity across different social, temporal, and cultural moments and movements.
Attributes: Liberal

CUST 3152 Queering American Culture (4 Credits)
Examine recent and historical forms of cultural representation in the U.S. (e.g., plays, novels, movies, memoirs, television programming, comic strips, and/or other cultural texts) for what they say about LGBTQ+ lives in America. Questions that may be considered include: How have LGBTQ+ people historically been represented in American culture? How do LGBTQ+ people seek to represent themselves? How has LGBTQ+ activism sought to challenge systems and structures of oppression organized around gender, sexuality, race, class, and other aspects of social difference? What does it mean to "queer" American culture? This course was previously CUL-243204 Queering American Culture. Prerequisites: Introduction to LGBTQ+ Studies, Introduction, or general background knowledge of gay and lesbian history and culture. Cross-listed with GSST 3152.
Attributes: *Diversity Gen Ed, *Humanities Gen Ed, Liberal

CUST 3167 African History & Culture (4 Credits)
In this multidisciplinary approach to Africa's civilizations and cultures, students will gain knowledge of African history and its interactions with the Western world. Students will gain an understanding of structures, systems, and interrelationships between and across the nations of the continent through an exploration of the history of colonization and its impacts; different geographic regions of the continent; and a variety of literary and journalistic texts. Students also will explore such issues as sustainability and well-being by bringing in shared resources on such topical issues as disease prevention and spread, climate change, family and kinship networks, women and development, religion, and literature. Students engage in discussions, prepare case studies, and write short essays and a research paper, and prepare a visual presentation based on some aspect of their research. This course was previously HIS-243344 African History and Culture. Prerequisites: Introductory coursework in world history, advanced level research and writing skills. Cross-listed with HIST 3010.
Attributes: Other World Civilization Gn Ed, *World Hist & Glb Awnss Gen Ed, Liberal

CUST 3182 Exploring Place History: Advanced (4 Credits)
This advanced level research course gives students an opportunity to propose and carry out a semester long, self-directed, in-depth research agenda. The focus of the research is on place as a community in a geographical location or physical environment. Students can explore the local history of the place where they live (or some other place of interest and research, among other things, a particular topic or period of local history by engaging with historical scholarship, consulting local archives and historical societies and/or interviewing community members who have witnessed local history. Students also will collaborate with others interested in history, the arts, and culture to learn concepts for thinking about place as process, a coming together of nature and culture, the local and global and of issues ranging from gender, class, ethnicity and the environment to modernization, conservation, and preservation. This course was previously HIS-244774 Exploring Place: History.
Attributes: Liberal

CUST 3350 Modern China (4 Credits)
This study explores the modernization of China's culture, social relations, economy and politics during the 19th, 20th and 21st centuries. Students may investigate topics such as the collapse of China's imperial order in the face of alien invasion and internal rebellions; political, cultural and economic revolutions inspired by Western models; the history and evolution of the leadership of the Chinese Communist Party leadership of China since 1949; contemporary controversies regarding expanding democracy and human rights; etc. This course was previously HIS-243324 . Prerequisites: Introductory level coursework in modern world history of Pacific Asia history is recommended. Cross-listed with HIST 3350.
Attributes: Other World Civilization Gn Ed, *World Hist & Glb Awnss Gen Ed, Liberal

CUST 3380 Nature in American History (4 Credits)
This course explores the history of changing relationships between American culture and its environment, as that relationship has been manifest physically as well as conceptually. Students will gain familiarity with the main eras and episodes of American history as they relate to American culture's grounding in nature: the European encounter with a (supposedly) virgin wilderness; the rapid exploitation of resources that accompanied westward and industrial expansion; the closing of the frontier and the development of resource conservationism; continued industrialization of the nature-culture relationship through nearly a century of war; the modern tension between economics and a concern for ecological health and balance. This course was previously HIS-243544 Nature in American History.
Cross-listed with HIST 3380.
Attributes: American History Gen Ed, Liberal

CUST 3425 Sex and Sexuality: Facts and Fictions (4 Credits)
Sex is a matter of intense interest, both personally and academically. This course is about sexuality and the way it has been represented, perceived, and experienced from the nineteenth century through to the present. Students will consider the ways that sexuality has been defined and how it defines categories of identity. Using history, literature, and theory, students will come to a clearer understanding of the ways that sexuality, as a category, has changed over time. Through readings and discussion, students will consider the cultural history of sexuality and its impact on the current sexual climate. A course in gender, sexuality, or psychology would be helpful but there are no specific prerequisite courses. This course was previously Sex and Sexuality in Western Civilization.
Attributes: Western Civilization Gen Ed, *Humanities Gen Ed, Liberal

CUST 3996 Special Topics in Cultural Stu (1-8 Credits)
Attributes: Liberal

CUST 3998 Individualized Studies in Cultural Studies (CUST) (1-8 Credits)
Students have the opportunity to develop individualized studies with their mentor in Cultural Studies (CUST). Please contact your mentor/advisor for more details.

CUST 4010 Exploring Place: Humanities (4 Credits)
Learn about the culture of the place you live (or some other place of interest), whether you define that place as a neighborhood, a whole village or town or city, a geographical region, or a watershed. Note: this course overlaps with Exploring Place: Arts and Exploring Place: History. Students interested more in the artistic cultural aspects (including visual culture, say, or music) of place should take Exploring Place: Arts. No more than one of these three should be included in a degree program. This course was previously CUL-224764 Exploring Place: Humanities.
Attributes: Humanities Gen Ed, Liberal

CUST 4020 Medical Humanities (4 Credits)
This class--which should be of interest to Humanities students, but also to Pre-Med, Nursing, and Health Sciences students, as well as students in other health-related fields--will explore critically important questions about health, illness, and the practice of medicine. We will consider the ways that medical practitioners and patients tell their stories, and locate these in their social, cultural, and historical contexts. We will also consider the ethical questions to which these narratives lead.
Attributes: Humanities Gen Ed, *Humanities Gen Ed, Liberal

CUST 4996 Special Topics in CUST (1-8 Credits)
The content of this course will vary by term and section. Students may repeat this course for credit as long as the topic differs. Please refer to the Term Guide for course topic offerings.
Attributes: Liberal

CUST 4998 Individualized Studies in Cultural Studies (CUST) (1-8 Credits)
Students have the opportunity to develop individualized studies with their mentor in Cultural Studies (CUST). Please contact your mentor/advisor for more details.

DANC: Dance (Undergraduate)

DANC 1005 Western Dance History (4 Credits)
This course investigates the history of dance, primarily Western and primarily theatrical, from antiquity to the beginning of the twentieth century. The student will explore the development of dance forms chronologically in relation to significant social, political, and cultural movements of each era. Course materials will include texts and related archival materials. Dance philosophy and aesthetics will be studied to address the development of dance in Western culture, while acknowledging the interplay of dance practices in non-Western cultures.
Attributes: Arts Gen Ed, *The Arts Gen Ed, Liberal

DANC 1012 DEL Essentials: An Introduction to Dance Education Laboratory (4 Credits)
The DEL Essentials is a studio-based introductory course held at the 92nd Street Y Harkness Dance Center that provides an overview of the key components of the nationally acclaimed DEL (Dance Education Laboratory) Model of teaching dance to children and teenagers. Participants will examine Laban Movement Analysis (LMA) as a framework for dynamic and scaffolded lesson planning, explore the DEL method of collaborative dance making, gain effective teaching strategies, and learn how to make connections between dance and other disciplines. Students interested in our partnership program with the 92nd Street Y Dance Education Laboratory must contact Lucy Winner (Lucy.Winner@sunyempire.edu) for permission to enroll in this study. Students will also be expected to register at DEL (Dance Education Laboratory).
Attributes: Liberal

DANC 1998 Individualized Studies in Dance (DANC) (1-8 Credits)
Students have the opportunity to develop individualized studies with their mentor in Dance (DANC). Please contact your mentor/advisor for more details.

DANC 2998 Individualized Studies in Dance (DANC) (1-8 Credits)
Students have the opportunity to develop individualized studies with their mentor in Dance (DANC). Please contact your mentor/advisor for more details.

DANC 3005 Western Dance History: The Twentieth Century (4 Credits)
This study is a survey of dance history, primarily Western and theatrical, from the beginning of the twentieth century to the present. The student will investigate the development of dance styles, techniques and practices within their historical and socio-cultural contexts. Diverse works by seminal twentieth-century choreographers will be viewed and analyzed. The student will discuss the study materials with the mentor at scheduled meetings throughout the term. Responses to the study materials will be in the form of a series of short essays. There will be archival materials for review in conjunction with the readings. The study will culminate in a research project exploring an aspect Western concert dance during the twentieth century to the present day.
Attributes: Arts Gen Ed, *The Arts Gen Ed, Liberal

DANC 3010 DEL Foundations (6 Credits)
This course provides an overview of the key components of the nationally acclaimed DEL (Dance Education Laboratory) model of teaching dance in a wide variety of learning contexts. Participants explore DEL's comprehensive and inclusive model of dance education through active movement exploration, dance making, and scaffolded lesson planning based on the Laban Movement Analysis (LMA) framework. Participants interact in the online community by engaging in personal dance making, collaborative choreography, practice teaching, and self and peer reflection. In addition, participants gain an understanding of broad developmental benchmarks and effective and inspired teaching strategies to support diverse learners and align with local, state and/or national dance standards. This course was previously DANC 3010 Foundations of Dance Education – Dance Education Laboratory Partnership. Students interested in our partnership program with the 92nd Street Y Dance Education Laboratory must contact Cindy Bates (Cynthia.Bates@sunyempire.edu) for permission to enroll in this study. Students will also be expected to register at DEL (Dance Education Laboratory). Note that this course at DEL typically runs October to December so students register for it at Empire in the Fall term as the course ends during that term.
Attributes: Liberal

DANC 3015 DEL Dance-Making & LMA (Laban Movement Analysis) (4 Credits)
Delve into Dance Making as a key component of the DEL (Dance Education Laboratory) model. Participants learn how to embed dance-making experiences into their lesson and unit plans, and understand how to apply the LMA (Laban Movement Analysis) framework of Body, Effort, Space, and Relationship in order to generate an extensive movement vocabulary for student-centered choreography. Different entry points for dance making for diverse student populations will be explored, offering dancers possibilities for creating innovative dances for themselves, their students, and the community. The goal of Dance Making and LMA is to guide dancers and dance educators to encourage students to create material in an authentic, expansive, and self-directed way through collaborative decision-making that allows deep engagement in the creative process and empowered ownership of their artistry. Students interested in our partnership program with the 92nd Street Y Dance Education Laboratory must contact Cindy Bates (Cynthia.Bates@sunyempire.edu) for permission to enroll in this study. Students will also be expected to register at DEL (Dance Education Laboratory). Note that this course at DEL typically runs February to March so students register for it at Empire in the Spring term as the course ends during that term.
Attributes: Liberal

DANC 3027 DEL Dance for Students with Disabilities: Studio-Based (4 Credits)
The studio-based course will integrate dance/movement therapy theory with concepts of development and best practices in dance education to teach participants how to create dance activities that engage the strengths and meet the needs of children and adolescents who have emotional, behavioral, learning, sensory, and/or physical challenges. Participants will learn group and individual strategies to promote positive behavior and will be guided in applying these strategies in their own dance/movement therapy or dance education settings. Class sessions will include lectures, discussion, movement experiences, small group work, and audio-visual media. Additional assignments will include reading, writing, and creative work. Students interested in our partnership program with the 92nd Street Y Dance Education Laboratory must contact Lucy Winner (Lucy.Winner@sunyempire.edu) for permission to enroll in this study. Students will also be expected to register at DEL (Dance Education Laboratory).
Attributes: Liberal

DANC 3028 DEL Dance for Students with Disabilities (Online) (4 Credits)
The course will integrate dance/movement therapy theory with concepts of development and best practices in dance education to teach participants how to create dance activities that engage the strengths and meet the needs of children and adolescents who have emotional, behavioral, learning, sensory, and/or physical challenges. Participants will learn group and individual strategies to promote positive behavior and will be guided in applying these strategies in their own dance/movement therapy or dance education settings. Class sessions will include lectures, discussion, movement experiences, small group work, and audio-visual media. Additional assignments will include reading, writing, and creative work. Students interested in our partnership program with the 92nd Street Y Dance Education Laboratory must contact Lucy Winner (Lucy.Winner@sunyempire.edu) for permission to enroll in this study. Students will also be expected to register at DEL (Dance Education Laboratory).
Attributes: Liberal

DANC 3050 DEL Dance for Early Childhood (4 Credits)
In this interactive and participatory studio-based course, students will explore the DEL (Dance Education Laboratory) Dance for Early Childhood curriculum. Students gain experience in creating developmentally appropriate dance activities for children ages 3-7 years old. This course will cover the following topics: developmentally appropriate lessons and content for early childhood, developmental patterns and the sensory system, games and short activities, basics of early childhood dance lesson planning, LMA (Laban Movement Analysis) vocabulary as a springboard for dance learning and lesson plan organization, strategies for effective teaching, working with children with disabilities, teaching children online, using video prompts, and collaborative lesson planning with peers. This class is part of our partnership with the Dance Education Laboratory (DEL) of the 92nd Street Y Harkness Dance Center in NYC. Students interested in our partnership program with the 92nd Street Y Dance Education Laboratory must contact Lucy Winner (Lucy.Winner@sunyempire.edu) for permission to enroll in this study. Students will also be expected to register at DEL (Dance Education Laboratory).
Attributes: Liberal

DANC 3998 Individualized Studies in Dance (DANC) (1-8 Credits)
Students have the opportunity to develop individualized studies with their mentor in Dance (DANC). Please contact your mentor/advisor for more details.

DANC 4005 Dance Across World Cultures (4 Credits)
This course is a cross-cultural examination of dance traditions from around the world in their historical, critical, artistic and socio-cultural contexts. Students will learn to observe and contextualize a variety of dance traditions and differentiate folk, popular and classical traditions. Students will learn and apply culturally relevant terminology and concepts to describe, critique, and write about dance from critical, analytical and ethnographic (writing about culture) perspectives. Students must have upper-level standing with advanced level academic skills. This course was previously ART-223504 Dance Across World Cultures. Prerequisites: .
Attributes: Humanities Gen Ed, Arts Gen Ed, *The Arts Gen Ed, Liberal

DANC 4010 DEL Culturally Responsive Dance-Making and Pedagogy (4 Credits)
In this course, participants delve into the key components of cultivating culturally responsive dance-making and pedagogy in dance education based on the work of Dr. Nyama McCarthy-Brown. Videos and additional resources guide dance educators through a process of self-examination and teacher reflection while providing culturally responsive teaching tools. Participants will examine how culture, identity, and race show up in their dance-making and teaching practice and will reflect on how race and other marginalizing stereotypes operate in their learning environments. In addition, participants will be given building blocks of culturally responsive anti-racist teaching strategies to de-center Whiteness in the dance classroom. Students interested in our partnership program with the 92nd Street Y Dance Education Laboratory must contact Cindy Bates (Cynthia.Bates@sunyempire.edu) for permission to enroll in this study. Students will also be expected to register at DEL (Dance Education Laboratory). Note that this course at DEL typically runs May to July so students register for it at Empire in the Summer term as the course ends during that term.
Attributes: Liberal

DANC 4015 DEL Embodied Dance History: Reimagining Modern Dance (4 Credits)
This eight-week online course is designed for dance educators who want to re-imagine American modern dance history through the lens of embodied and inquiry-based learning. The course content is derived from the DEL (Dance Education Laboratory) at Jacob's Pillow "DELving into Dance History" series that investigates dance artists through multiple contextual lenses in order to gain an inclusive understanding of dance history. Participants will engage in collaborative research, have access to multi-modal course resources and primary sources, and interact with the rich content on the Jacob's Pillow interactive site. This class is part of our partnership with the Dance Education Laboratory (DEL) of the 92nd Street Y Harkness Dance Center in NYC. Students interested in our partnership program with the 92nd Street Y Dance Education Laboratory must contact Lucy Winner (Lucy.Winner@sunyempire.edu) for permission to enroll in this study. Students will also be expected to register at DEL (Dance Education Laboratory).
Attributes: Liberal

DANC 4020 DEL Inspiration to Design (4 Credits)
In this course, participants delve into the key components of lesson plan and curriculum design using the DEL (Dance Education Laboratory) framework and informed by Understanding by Design. Participants learn how to develop scaffolded, developmentally appropriate, and standards-based dance learning activities that draw connections to dance artistry, theme-based learning, and arts integration. Participants learn how to design dynamic lessons that align student learning objectives with content and assessments. By the end of the course, participants will write an original six lesson dance unit to share with their peers. This course also includes one-on-one coaching from course facilitators. This class is part of our partnership with the Dance Education Laboratory (DEL) of the 92nd Street Y Harkness Dance Center in NYC. Students interested in our partnership program with the 92nd Street Y Dance Education Laboratory must contact Cindy Bates (Cynthia.Bates@sunyempire.edu) for permission to enroll in this study. Students will also be expected to register at DEL (Dance Education Laboratory). Note that this course at DEL typically runs September to October so students register for it at Empire in the Fall term as the course ends during that term.
Attributes: Liberal

DANC 4025 DEL Diverse Voices: Dance History in NYC (4 Credits)
Participants will be introduced to dance units from the "DEL (Dance Education Laboratory) Tracing Footsteps: honoring Diverse Voices in Dance History in NYC" curriculum including Native American Dance History: Roots to Branches, History of Tap Dance: Soul Rhythms, Into the Heart of Chinatown: Hidden Voices, and Salsa Stories. Participants will gain an overview of each module, explore components of the "grade band" specific dance units, learn genre-specific dance terminology, engage in culturally responsive pedagogy practices, identify innovative instructional practices, and apply the DEL model to collaborative dance making and lesson plan design. Through dance practice, choreography, collective inquiry, and exposure to a wide range of multi-modal resources (guest dance artists and facilitators, video tutorials, and visually stimulating teaching materials), participants will learn how to bring dance history to life in their dance classrooms. This class is part of our partnership with the Dance Education Laboratory (DEL) of the 92nd Street Y Harkness Dance Center in NYC. Students interested in our partnership program with the 92nd Street Y Dance Education Laboratory must contact Lucy Winner (Lucy.Winner@sunyempire.edu) for permission to enroll in this study. Students will also be expected to register at DEL (Dance Education Laboratory).
Attributes: Liberal

DANC 4998 Individualized Studies in Dance (DANC) (1-8 Credits)
Students have the opportunity to develop individualized studies with their mentor in Dance (DANC). Please contact your mentor/advisor for more details.

DIGA: Digital Arts (Undergraduate)

DIGA 1010 Digital Art & Design: Introductory (4 Credits)
This course provides the technical and aesthetic foundation to master concepts of effective digital design, layout, and image manipulation while learning Adobe Photoshop, an industry standard digital art software. Students will develop a working knowledge of how two-dimensional bit-map images are acquired, created and manipulated; expand visual communications skills; cultivate an individual artistic style; and gain basic understandings of the creative and technical processes inherent in digital art and design. Students will also participate in digital design projects, individual and group critique, discussion of topics relevant to digital art and design, portfolio development and evaluation, and creative research. Requirements: Hardware: PC or Mac. Software: Adobe Creative Cloud subscription. Since this course requires students to use computer and software intensively, they should have strong interests in using the computer as a design tool and have intermediate computer skills. This course was previously ART-222454 Digital Art and Design: Introductory.
Attributes: Arts Gen Ed, *The Arts Gen Ed, Liberal

DIGA 1035 Introduction to Digital Editing (4 Credits)
Students in this course will learn about the creative and technical processes required for digital video production and postproduction. Students will learn the aesthetics of editing including the choice of images and designing their time and sequence. They will also learn how to use industry software (such as Adobe Premiere Pro) for nonlinear video editing.
Attributes: Arts Gen Ed, *The Arts Gen Ed, Liberal

DIGA 1998 Individualized Studies in Digital Arts (DIGA) (1-8 Credits)
Students have the opportunity to develop individualized studies with their mentor in Digital Arts (DIGA). Please contact your mentor/advisor for more details.

DIGA 2010 Digital Presentation (4 Credits)
This is a beginner's course in digital presentation. As such, we will explore the different aspects of self-presentation in public and online formats and learn techniques to make the process more manageable and effective. . Students will investigate the inner workings of online presentations and discourse, including the basic elements of a presentation, ways to write and evaluate work, the impact and responsibilities of public/private speaking, understanding an audience's needs, and developing ways to increase comfort while presenting in a variety of formats,and to refine physical skills in body language and voice production. This course was previously CUL-222614 .
Attributes: Liberal

DIGA 2020 Writing for New Media (4 Credits)
This is a study for students who are interested in writing for the new media form of the weblog.

DIGA 2122 Introduction to Digital Photography (4 Credits)
This introductory study is designed for students who want to learn how to use a digital camera to capture, edit, and manipulate photographic images. This study is intended for the student who has working knowledge of the basics of either the Windows or Mac operating system, as well as having a basic knowledge of traditional photography (or equivalent experience). This plan will be implemented by reviewing principles of composition; discussing and practicing various styles of photography; learning to use appropriate digital photographic editing software, and, finally, how to prepare the final images for various means of display, from hard copy printing to digital display.
Attributes: Liberal

DIGA 2998 Individualized Studies in Digital Arts (DIGA) (1-8 Credits)
Students have the opportunity to develop individualized studies with their mentor in Digital Arts (DIGA). Please contact your mentor/advisor for more details.

DIGA 3015 Advanced Digital Photography (4 Credits)
This course is designed for students who wish to advance their skills in digital photography. In order to gain a better understanding of the art of picture taking, students will learn aesthetic principles for taking better pictures in various genres of photography. Students should have a solid foundation in the technical skills necessary for operating a camera so they can build advanced level technical skills in this course. Prior to taking this course, students should have successful completion of a related introductory study or relevant experience.
Attributes: Arts Gen Ed, *The Arts Gen Ed, Liberal

DIGA 3020 Advanced Digital Presentation (4 Credits)
In this advanced level digital presentation study, students will review and incorporate increasingly sophisticated techniques of self-presentation in public, online, and hybrid formats in addition to composing and critiquing their original work. Students will analyze their own and others digital presentations, looking for the elements of effective presentations, the impact and responsibilities of public/private speaking, understanding different audiences' needs, and the evolving etiquette(s) of delivering presentations in a variety of formats.
Attributes: Liberal

DIGA 3025 Advanced Web Design (4 Credits)
How do digital media artists and designers produce effective web sites to communicate and share their art and design projects? This course will prepare students to apply advanced theories and techniques to the design of visually engaging and accessible web content for the digital media arts. Students will learn to plan and produce dynamic web sites to create an interactive and responsive user experience. They will learn how to write for the web while integrating such dynamic elements as digital images, graphic design, animation, digital video, artificial intelligence (AI), augmented and virtual reality, and 3D tools. As part of the planning process, students will learn to articulate a vision, set goals, prepare a timeline, create a visual wireframe and storyboard, identify web design tools, and write a detailed proposal. They will incorporate web usability, responsive web design, user-centered design, and web accessibility requirements and standards to develop meaningful, reliable, accessible, and artistic web content. Students will apply advanced techniques using both coding and web design programs. They will produce several individual web design projects, a collaborative web site, and culminating digital portfolio. Prerequisites: Successful completion of an introductory web design course or relevant advanced level experience.

DIGA 3030 Blogging (4 Credits)
In the twenty-first century it is not only important to create and maintain an online presence whether for work or other professional/personal pursuits, it is also crucial that one's online materials are impressive and impeccable: well-written and arresting, both visually and in terms of information presentation. Blogging and digital presentation incorporates the varied fields of copy writing, journalism, marketing, advertising, public relations, internet technologies, visual information, graphic design and visual arts, among others.
Attributes: Liberal

DIGA 3035 Digital Art & Design: Advanced (4 Credits)
In this course, students learn advanced digital art and design using the Adobe Creative Suite applications such as Photoshop Extended, Illustrator, InDesign, Flash, Dreamweaver, Fireworks & Bridge. Students develop expertise in working with bitmap and vector images. Through creative exercises, projects, individual and group critiques, portfolio development and evaluation, research, and written assignments, students develop effective visual communication skills, strengthen individual artistic style, and demonstrate a sophisticated, professional understanding of technical and creative processes inherent in digital art. This course is for advanced-level students with previous knowledge of Adobe Photoshop and the prior skills needed to learn advanced digital art techniques. OS Platform: PC or Mac, Required software: Adobe Creative Suite. Students should have completed an introductory level digital art course and introductory level knowledge of Adobe Photoshop. This course was previously ART-224444 Digital Art and Design: Advanced.
Attributes: Arts Gen Ed, *The Arts Gen Ed, Liberal

DIGA 3036 Ethics of Digital Art & Design (4 Credits)
What are the ethical considerations of digital art and design? For centuries, artists have contributed innovative perspectives about how to see and understand the world through creative expression. Contemporary artists and designers make bold artistic statements of their own with digital media and virtual technologies. In a digital world, however, it is easy to manipulate representations of reality and publish information that has been altered by technology. The availability of digital tools has provided everyone with the creative potential to produce and share their own digital information but how do we verify the trustworthiness of this content? By analyzing the relationship between artistic theory and practice, we will discuss how artists and designers investigate human experience in digital environments. This exploration of ideas involves the study of ethics related to social, cultural, political, and technological issues. As part of this inquiry, we will examine your individual and social responsibilities when producing and sharing digital media.
Attributes: Arts Gen Ed, Liberal

DIGA 3040 Digital Storytelling (3-4 Credits)
Digital Storytelling combines the artistic theory of storytelling with digital media technologies. Students integrate digital storytelling concepts with artistic practice to write, plan, produce, publish, and present digital narratives. They develop individual stories and a collaborative project based on the research of a social issue or cause. This process includes generating story ideas, developing narrative structures, conducting peer reviews and planning effectively with well-written scripts and visual storyboards. Students analyze ethical issues such as intellectual property, information bias, privacy protection, and the rights of storytelling subjects. They identify effective digital tools for combining images, audio, text, and video into cohesive digital stories. Students demonstrate their knowledge about the aesthetics of digital storytelling and communicate their ideas through writing, digital media production and oral presentations. Continuous learning occurs throughout the course with readings, discussions, writing, scaffolded assignments, peer reviews, and collaborative participation in the final research project.
Attributes: Basic Communication Gen Ed, Arts Gen Ed, *Communication Gen Ed-Written, *The Arts Gen Ed, Liberal

DIGA 3045 Game Design & Development (4 Credits)
This course covers the history, theory and practice of game design and development using an online workshop approach. Students will apply principles and practices of designing and developing tabletop, board and video games to the game design project of their choice. Game structure, formal and dramatic elements and system dynamics will be examined. Students will work on individual and group projects to explore best practices in design conceptualization, prototyping methods and play testing, culminating in a functional game design prototype. Though experience with advanced digital programs is not required, students will experiment with various free digital game design applications. Prerequisites: Advanced Level Standing. Students taking the course must have access to digital devices (such as a desktop computer, laptop, tablet or smartphone, headset or USB microphone) allowing them to take photographs, record audio and video, edit digital assets within the applications of their choice, and upload these for game design projects and critiques. They will be expected to research and select digital applications, create accounts to access free or low cost tools, and use tutorials and other digital resources to learn them. Some game applications may require downloading. This course was previously ART-223334 Game Design and Development.
Attributes: Liberal

DIGA 3050 Information Design (4 Credits)
How do we understand the design of information through diverse media formats and in our everyday life? By exploring this topic, you will learn how to effectively analyze, interpret, and describe the information around you. This course involves the study of artistic theory in relation to such concepts as usability, sense-making, wayfinding, data visualization, user-experience (UX) design, accessibility, and human computer interaction (HCI). We will apply critical thinking to analyze the fundamentals of information design in different media formats such as text, diagrams, charts, signs, museum displays, infographics, and evolving digital media. We will research the integration of digital information that is visual, verbal, and textual in relation to metaphoric, aesthetic, and narrative elements. This course welcomes students from multiple disciplines and from a wide range of fields including business, communication, marketing, science, math, statistics, visual art, digital art, computer science and technical writing. This course was previously ART-224104 Information Design.
Attributes: Liberal

DIGA 3065 Digital Media Arts (4 Credits)
What are the theoretical foundations of digital media arts? This course will examine artistic theory related to the aesthetic, social, and ethical considerations of this emerging field. Students will analyze digital media artworks and participate in discussions with peers about interdisciplinary perspectives and wide-ranging artistic genres. They will investigate the intersection of theory and practice by planning and producing multimodal projects such as digital stories, short films, animation, virtual worlds, installations, and/or multimedia artworks. Advanced level digital media arts require effective collaboration among artists from different genres. This course will include a significant collaborative project as well as opportunities to focus on individual artistic growth. All projects will be tailored to fit the expertise and interests of each student cohort. Students taking the course must have advanced knowledge and experience with one or more of the following areas: digital art and design, computer arts, video, electronic music, digital storytelling, filmmaking, game design, animation, visual effects, motion graphics, animation art and design, digital photography, 3D virtual worlds, digital performance, and audio production.
Attributes: Liberal

DIGA 3070 New Media Advocacy (4 Credits)
New Media Advocacy is a hands-on production course in which students will learn how to create and utilize new media (audio, video, social media platforms) for social justice movements and advocacy efforts. Over the course of the semester we will investigate the power of storytelling and how new media can assist in community driven campaigns to connect and involve the public in movements for change. How can visual arts be creatively used to share resources, disseminate information, and encourage public engagement?
Attributes: Arts Gen Ed, *The Arts Gen Ed, Liberal

DIGA 3072 Creating Communication & Meaning with Virtual Game Worlds (4 Credits)
This course will introduce students to the Unity Game engine platform and the Unity Multiplayer environment to create a real-time networked game world that can be used for play, learning and communication. Students will playtest these worlds with classmates and critically evaluate the worlds using criteria from supporting readings and videos from the field of game design and game culture.
Attributes: Liberal

DIGA 3080 Digital Painting (4 Credits)
The purpose of Digital Painting is to provide a creative environment that combines digital painting, montage, and digital imaging to create a body of final artwork for portfolio presentation. We will discuss the crossover possibilities of photography and collage. Through the use of digital painting, scanned images and original or appropriated photographs, students will produce work that expands the perspective of how photography can be combined with painting to create collage works. Students will also learn about the historical and contemporary practice of collage through examples of selected artists working in and with the digital genre.
Attributes: Arts Gen Ed, *The Arts Gen Ed, Liberal

DIGA 3996 Special Topics in DIGA (2-4 Credits)
The content of this course will vary by term and section. Students may repeat this course for credit as long as the topic differs. Please refer to the Term Guide for course topic offerings.
Attributes: Liberal

DIGA 3998 Individualized Studies in Digital Arts (DIGA) (1-8 Credits)
Students have the opportunity to develop individualized studies with their mentor in Digital Arts (DIGA). Please contact your mentor/advisor for more details.

DIGA 4000 Creating Digital Art (4 Credits)
The purpose of this study is for the student to merge their interests in traditional art forms such as drawing and painting with state-of-the art digital technology such as Photoshop and/or other platforms for creating digital art. They will also study artists whose work has made strides in this area, including but not limited to Amy Sillman, David Hockney, Alex Rockman, and others to be researched by the student. The goal is to learn technology that will enhance the production of unique art works, by refining knowledge both aesthetically and technically. The study will culminate in the creation of a digital portfolio of work with accompanying written description and references. Prior to taking this course, student should have strong drawing and/or painting ability, proficiency in Adobe Photoshop, at least two previous studio art courses on the advanced level and familiarity with contemporary art and artists. Note: Adobe Photoshop is required.
Attributes: Liberal

DIGA 4005 Advanced Collage: Digital Portfolio (4 Credits)
The purpose of this study is for advanced students of collage to investigate, create, experiment and continue to hone their skills and craft in the medium. This study is also meant to be very process oriented so students build a progressive body of work and create a final digital portfolio to showcase their art.
Attributes: Liberal

DIGA 4010 Detroit Media Arts and Activism Residency (4 Credits)
In this course, students will learn about media-based organizing, a collaborative process that uses media, art, or technology to address the roots of problems and advance holistic solutions towards a more just and creative world. Concepts and theories of "intersectionality" which recognize the interconnected nature of social categorizations such as race, class, and gender will be explored as students learn how intersectionality relates to current activism and coalition building initiatives. As part of this course, students are required to participate in the annual Allied Media Conference in Detroit, Michigan. Held every other summer, the conference brings together a vibrant and diverse community of people using media to incite change: filmmakers, radio producers, technologists, youth organizers, writers, entrepreneurs, musicians, dancers, and artists.
Attributes: Liberal

DIGA 4015 History & Theory of New Media (4 Credits)
What does history teach us about new media? How does artistic theory expand our thinking about the evolution of digital technologies and related virtual environments? Exploring new media through the lens of both history and theory creates a deeper understanding of our connected world. Students will investigate the development of digital media during key moments in history. Emphasis is given to theories that involve the social, cultural, and aesthetic dimensions of new media. We will discuss readings by established and emerging scholars and conduct academic research to further illuminate course topics. Learning activities include collaborative discussions, writings, case studies, and a final research project about new media. Prior to taking this course, students should take an advanced level course in digital arts, digital media, media studies, or the equivalent. This course was previously CUL-223544 History and Theory of New Media.
Attributes: Liberal

DIGA 4020 Independent Digital Arts Project (4 Credits)
The purpose of this study is for advanced level digital arts students to independently explore a larger project in their chosen art form(s) as well as engage with related artistic questions/concerns generated by their earlier experiences, interdisciplinary leanings and current obsessions. Interdisciplinarity and/or uses of multiple perspectives or media will be particularly encouraged by the mentor where applicable.
Attributes: Liberal

DIGA 4122 Professional Digital Portfolio (4 Credits)
How do you effectively present your original academic, artistic, and professional work for external audiences? How do you curate and assess these materials in a culminating digital portfolio? The design of a unifying portfolio prepares students to craft and hone their work into a sophisticated online presentation. The contents of your digital project may include a combination of visual, audio, written, design, and mixed-media content, as well as interactive games, digital stories, digital media, virtual worlds, maker—objects, photography, and artworks. Your fully-developed portfolio will serve as a distinguished culmination of your work for graduate schools, art galleries, networking opportunities, employment applications, professional promotions, and/or in support of a business, entrepreneurship, or non-profit entity. Prior to taking this course, students should have taken an advanced level course in digital arts, digital media, media studies, or the equivalent.
Attributes: Liberal

DIGA 4998 Individualized Studies in Digital Arts (DIGA) (1-8 Credits)
Students have the opportunity to develop individualized studies with their mentor in Digital Arts (DIGA). Please contact your mentor/advisor for more details.

DIGA 4999 Capstone in Digital Media Arts (4 Credits)
This capstone course applies artistic theory in digital media arts to the development of a substantial culminating project. Students plan and produce an original project that builds upon their overall work in the Digital Media Arts Program. Students will apply artistic theory to emerging and experimental digital technologies that are integrated with such artistic practices as poetry, performance, narration, screenwriting, choreography, acting, dance, photography, painting, illustration, drawing, and/or music. The capstone project may include such multimodal formats as digital storytelling, digital painting, digital film, digital photography, animation, installation, immersive virtual worlds, gaming, augmented reality, or virtual reality. Students taking this course should have advanced-level standing.
Attributes: Liberal

DIGS: Digital Studies (Undergraduate)

DIGS 1998 Individualized Studies in Digital Studies (DIGS) (1-8 Credits)
Students have the opportunity to develop individualized studies with their mentor in Digital Studies (DIGS). Please contact your mentor/advisor for more details.

DIGS 2998 Individualized Studies in Digital Studies (DIGS) (1-8 Credits)
Students have the opportunity to develop individualized studies with their mentor in Digital Studies (DIGS). Please contact your mentor/advisor for more details.

DIGS 3998 Individualized Studies in Digital Studies (DIGS) (1-8 Credits)
Students have the opportunity to develop individualized studies with their mentor in Digital Studies (DIGS). Please contact your mentor/advisor for more details.

DIGS 4998 Individualized Studies in Digital Studies (DIGS) (1-8 Credits)
Students have the opportunity to develop individualized studies with their mentor in Digital Studies (DIGS). Please contact your mentor/advisor for more details.

DISB: Disability Studies (Undergraduate)

DISB 1010 Direct Support Professional Course 1 (4 Credits)
This course is the first level of Direct Support Professional certification. This course will provide an overview of the code of ethics, crisis prevention and intervention, provision of person-centered supports, and supporting health and wellness. NOTE: This course is only for those individuals interested in the DSP level 1 certification.

DISB 1998 Individualized Studies in Disability Studies (DISB) (1-8 Credits)
Students have the opportunity to develop individualized studies with their mentor in Disability Studies (DISB). Registration for this class must be approved by the student's mentor.

DISB 2005 Creative Arts Therapy with Children with Autism & Other Special Needs (4 Credits)
The purpose of this study is to understand the needs of young people with traits of autism spectrum disorders. The healing elements of creative arts therapy will be examined. The techniques that can be utilized to engage children with autism and special needs will be discussed. This course is aligned with the Community and Human Services Area of Study guidelines for Skills/Application, and Diversity.
Attributes: Liberal

DISB 2010 Disabilities in the Workplace (4 Credits)
This course explores workplace accommodation and inclusion laws, policies and practices to case analyses. The study will also cover prevailing social assumptions, biases and perspectives that can undermine equality in hiring, firing, pay, promotion, training and any other terms or conditions of employment for individuals with disabilities. Note: This course is aligned with the Community and Human Services Area of Study guidelines for Skills and Diversity.
Attributes: Liberal

DISB 2015 Disabled in America (4 Credits)
This study provides an overview of the range of disabilities, assistive technologies, and accommodations in the United States. Topics will include the history of recent legislation regarding the disabled, as well as the civil rights and life style issues of the disabled. Current initiatives in education, employment, housing, transportation, communication, cultural activities, recreation, health services, and access to public services may be covered. Note: This course is aligned with the Community and Human Services Area of Study guidelines for Diversity. This course was previously CHS-252054 Disabled in America.
Attributes: Liberal

DISB 2020 Health & Disabilities in Human Services Advocacy (4 Credits)
Individuals with disabilities may frequently experience comorbid health conditions and need subsequent care. This course will introduce the student to comorbid health conditions, the types of health care that is needed. The role of the human service worker as an advocate will be discussed, as will the role of self-advocacy in the patient. Note: This course is aligned with the Community and Human Services Area of Study guidelines for Skills and Diversity.
Attributes: Liberal

DISB 2025 Human Services Practice with Disabilities (4 Credits)
This study will provide an understanding of the diversity of disabilities and several models of practice in the disabilities field. Students will understand various interventions, skills, and treatment modalities needed to implement effective treatment interventions for working with individuals with disabilities. This course is aligned with the Community and Human Services Area of Study guidelines for Skills/Application.
Attributes: Liberal

DISB 2030 Direct Support Professional Course 2 – Individual (4 Credits)
This course is the second level of Direct Support Professional certification. The focus will be on topics specific to working with individuals and their families. Topics to be covered include: provision of person centered supports, assessment, supporting health and wellness, communication, and building and maintaining friendships and relationships. NOTE: This course is only for those individuals interested in the DSP level 2 certification. Prerequisites: The student must have completed the DSP 1 course.

DISB 2035 Direct Support Professional Course 2 - Community (4 Credits)
This course is the second level of Direct Support Professional certification. The focus will be on topics specific to working with organizations and the community. Topics to be covered include: documentation, advocacy, organizational participation, and community service and networking. NOTE: This course is only for those individuals interested in the DSP level 2 certification. Prerequisites: The student needs to have completed DSP 1 and DSP 2 - Individual.

DISB 2040 Direct Support Professional Course 3 (4 Credits)
This course is the third level of Direct Support Professional certification. Topics to be covered include: participant empowerment, facilitation of services, community living skills and supports, vocational, educational, and career support, training, self development, building and maintaining friendships and relationships, advocacy, and organizational participation. NOTE: This course is only for those individuals interested in the DSP level 3 certification. Prerequisites: The student must have completed DSP 1 and 2.

DISB 2045 Frontline Supervisors for Direct Support Professionals (4 Credits)
This course is for individuals interested in obtaining Frontline Supervision Certification. Topics to be covered include: health, wellness, and safety, direct support, cultural awareness and responsiveness, participant support and plan development, monitoring and assessment, facilitating community inclusion across the lifespan, advocacy and public relations, service management and quality assurance, promotional professional relations and teamwork, staff recruitment, selection, and hiring, development, leadership, professionalism, and self-development. NOTE: This course is only for those individuals interested in the DSP FLS certification. Prerequisites: An individual must have completed DSP 1, 2, and 3 courses.

DISB 2998 Individualized Studies in Disability Studies (DISB) (1-8 Credits)
Students have the opportunity to develop individualized studies with their mentor in Disability Studies (DISB). Registration for this class must be approved by the student's mentor.

DISB 3005 ADHD & Neurodiversity (4 Credits)
This study explores the diverse and growing ADHD (Attention Deficit and Hyperactivity Disorder) and neurodiversity as a biocultural and biomedical phenomenon. The sociocultural context, current debates and controversies surrounding diagnosis, and popular treatments will be explored. This study provides the student with multiple opportunities to gain a more nuanced understanding of ADHD and the services provided to these individuals. This course is aligned with the Community and Human Services Area of Study guidelines for Knowledge of Human Behavior and Skills/Applications.
Attributes: Liberal

DISB 3010 Cross-Cultural Perspectives on Disabilities (4 Credits)
In this study, the student will understand and analyze the sociological, cultural, psychological, and economic perspectives and issues in human services when working with people with disabilities in the United States. Note: This course is aligned with the Community and Human Services Area of Study guidelines for Skills and Diversity.
Attributes: Liberal

DISB 3020 Human Service Practice with Children with Disabilities (4 Credits)
This course will provide the student with an understanding of the range of disabilities seen in children in human services practice and the types of skills, programs, and policies that are applicable to them. Topics in this study may include evaluating federal and New York State Laws surrounding special education, differentiating between the types of disabilities seen in children, applying assessment and implementation of intervention strategies and programs for children with disabilities, assessing the needs of the family, and exploring the partnerships between the family and provider. This course is aligned with the Community and Human Services Area of Study guidelines for Knowledge of Human Behavior and Skills.
Attributes: Liberal

DISB 3025 Psychosocial Impact of Illness & Disability (4 Credits)
This study will explore the psychological and social impact of illness and disability on the individual and family. Topics for the study may include: psychological coping strategies that may be used by individuals with disabilities and/or their families; personal and societal factors that may impact the disability experience, such as gender, race/ethnicity, culture, and socioeconomic status; and the various types of interventions that are available. Note: This course is aligned with the Community and Human Services Area of Study guidelines for Knowledge of Service Delivery and Skill/Applications This course is part of the BS in Public Health program.
Attributes: Liberal

DISB 3030 The Disability Rights Movement: Policy and Legislation (4 Credits)
This study examines the history of the disability movement in the United States, with an emphasis on reform, inequality, social control, disenfranchisement, and the relationship between power, policy and practice. An emphasis on the complex and multi-faceted societal view of disabilities will be examined and its relation to human services practice and policy. Note: This course is aligned with the Community and Human Services Area of Study guidelines for Knowledge of Service Delivery, Diversity, and Application and Integration.
Attributes: Liberal

DISB 3998 Individualized Studies in Disability Studies (DISB) (1-8 Credits)
Students have the opportunity to develop individualized studies with their mentor in Disability Studies (DISB). Registration for this class must be approved by the student's mentor.

DISB 4005 Aging With a Developmental Disability (4 Credits)
The purpose of this study is to examine current issues and clinical approaches used for individuals with a developmental disability as they age. Societal changes, research trends and current assessment tools used to help diagnose health changes for an individual with a developmental disability may be examined. This course is aligned with the Community and Human Services Area of Study guidelines for Skills/Applications.
Attributes: Liberal

DISB 4010 Assessment & Evaluation of Disabilities (4 Credits)
The purpose of this study is to better understand assessment issues, principles, approaches and techniques that are used when working with individuals with a disability and their families. The course will prepare students to identify, gather and analyze relevant information required to make decisions about and formulate intervention plans. This course aligns with the Community and Human Services area of study guidelines for Skills/Applications.

DISB 4998 Individualized Studies in Disability Studies (DISB) (1-8 Credits)
Students have the opportunity to develop individualized studies with their mentor in Disability Studies (DISB). Registration for this class must be approved by the student's mentor.

ECET: Early Childhood Studies (Undergraduate)

ECET 1005 Exploring the Professions: Children & Child Care (2 Credits)
Explore the opportunities to work with children in the field of early childhood education. Students will explore child care credentialing, professionalism, ethics and the foundations of teaching and learning in formal and informal child care settings. The course places emphasis on ways to enhance development and learning through an environment and curriculum that supports young children and families. Please note: This course may be used for educational planning credit with mentor approval. This course was previously EDU-232422 Exploring the Professions: Children and Child Care.
Attributes: Liberal

ECET 1010 Introduction to Early Childhood Education (4 Credits)
This course provides an introduction to the core body of knowledge, skills, values, and dispositions early childhood educators must demonstrate to effectively promote the development, learning, and well-being of all young children, birth through grade 2. Topics include historical influences, program types, observation & assessment, developmentally and culturally appropriate practice across the developmental domains, professionalism, ethics, and current issues and trends including the New York State Learning Standards.

ECET 1996 Special Topics in ECET (1-8 Credits)
The content of this course will vary by term and section. Students may repeat this course for credit as long as the topic differs. Please refer to the Term Guide for course topic offerings.
Attributes: Liberal

ECET 1998 Individualized Studies in Early Childhood Studies (ECET) (1-8 Credits)
Students have the opportunity to develop individualized studies with their mentor in Early Childhood Studies (ECET). Please contact your mentor/advisor for more details.

ECET 2005 Creative Arts for Young Children (4 Credits)
This study presents a practical approach to designing play environments as we guide young children in creatively expressing themselves through the arts: visual arts, dance and movement, and drama. Developmentally appropriate practice will be emphasized as students incorporate materials and explore their safe use and function with children. Additional topics may include extending creativity into the home with families, multicultural art forms, and emphasis on addressing national standards. Prerequisites: Prerequisites: Child Development or equivalent.
Attributes: Liberal

ECET 2010 Early Childhood Professionalism Family & Culture (4 Credits)
This course examines professional standards for early care and education programs and caregivers such as such as the NAEYC Code of Ethical Conduct, the NYS Core Body of Knowledge, and state regulations. Students will learn what it means to advocate for children and families as well as how culture and family structure impact parenting values and childrearing beliefs. Effective communication strategies will also be addressed.
Attributes: Liberal

ECET 2015 Health Safety & Nutrition in Children's Programs (4 Credits)
This course will prepare professionals to meet the physical and nutritional needs of children in formal, non-formal and home settings. The course addresses safety requirements, factors influencing eating behaviors and physical activity patterns, intervention strategies, and program policies that promote healthy eating and physical activity within state and federal guidelines. Additional topics may include major public health and nutrition-related issues for young children including SIDS prevention, child abuse and neglect, positive health routines, childhood diseases, and food safety within the context of children's programs. This course was previously EDU-252314 Health, Safety, and Nutrition in Children's Programs.

ECET 2075 Early Childhood Curriculum Planning and Assessment (4 Credits)
Students will explore early childhood curriculum with a focus on environmental design for the purpose of adopting and implementing intentional instructional practices such as responsive care for our youngest children. This course will explore a broad repertoire of developmentally appropriate and culturally and linguistically relevant, anti-bias, and evidence-based teaching approaches that build on children's natural curiosity, deepen children's knowledge and awareness, and sustain active engagement with ideas and materials through play. Students will investigate nationally recognized environmental rating scales such as the ITERS/ECERS, and explore how to utilize formal and informal assessment tools to enhance the classroom environment and their teaching practice.

ECET 2996 Special Topics in ECET (1-8 Credits)
The content of this course will vary by term and section. Students may repeat this course for credit as long as the topic differs. Please refer to the Term Guide for course topic offerings.
Attributes: Liberal

ECET 2997 Special Topics in ECET (1-8 Credits)
The content of this course will vary by term and section. Students may repeat this course for credit as long as the topic differs. Please refer to the Term Guide for course topic offerings.

ECET 2998 Individualized Studies in Early Childhood Studies (ECET) (1-8 Credits)
Students have the opportunity to develop individualized studies with their mentor in Early Childhood Studies (ECET). Please contact your mentor/advisor for more details.

ECET 3005 Challenging Behaviors in Early Childhood (4 Credits)
In this course the student will explore challenging behaviors in young children and the role of the adult during the early childhood years. Biological, neurological, and environmental influences on children's behaviors will be explored; in addition to, how to plan for crises, develop individualized behavior plans, and evaluate the effectiveness of the plan. Topics addressed in this study may include a variety of problem-solving approaches and classroom management techniques. Prerequisites: HUDV 3015 Child Development or equivalent and at least 1 course in early childhood curriculum and planning.

ECET 3010 Children's Programs: Administration (4 Credits)
The purpose of this course is to provide directors and prospective directors an understanding of the administration of an effective organizational structure for children's programs including personnel and human resource management. Topics covered in this study include: the purpose and development of vision and mission statements, strategic planning, management theory and roles and responsibilities of administrators, development of personnel policies and procedures, job descriptions, performance evaluations, and leadership styles. This study meets Topics 1 and technology from Topic 3 of the Children's Program Administrator Credential of New York State. Prerequisites: 18 credits in child development and/or related early childhood coursework and experience in children's programs.
Attributes: Liberal

ECET 3015 Children's Programs: Design & Supervision (4 Credits)
This course examines various professional practices associated with children's programs including curriculum development, design of the learning environment, and program assessment and evaluation. Topics may include: developmentally appropriate practice, individualizing for the whole child, planning for children with special needs, the caregiver's role in supporting play and developing a nurturing learning environment, program evaluation and using technology applications in curriculum and to improve home and school communication. This course covers topics 3 and 5 for the New York State Children's Program Administrator Credential.   Prerequisites: 18 credits in child development and/or related early childhood coursework and experience in children's programs. This course was previously CHS-253214.

ECET 3020 Children's Programs: Ethical & Professional Standards (4 Credits)
In this course students will research applicable federal, state, and local laws pertaining to the administration of children's programs. Students will examine policies and regulations relevant to maintaining safe and healthy environments.#This course provides an exploration of ethical principles and responsibilities fundamental to professionals working with children, families, staff, and the community. This course also provides the student with opportunities to review the National Association for the Education of Young Children Code of Ethical Conduct, including ethical responsibilities for information technology, and the Supplement for Early Childhood Program Administrators. This course covers topics 3 and 4 for the New York State Children's Program Administrator Credential. Prerequisites: 18 credits in child development and/or related early childhood coursework and experience in children's programs.
Attributes: Liberal

ECET 3025 Children's Programs: Financial Planning & Budgeting (4 Credits)

In this course students will learn the critical nature of financial planning and its process for children's educational programs. Students will explore financial planning as a process for success in the stability and sustainability of children's programs. Topics may include publicity and marketing strategies, budgeting, and financial planning. Students will engage in hands-on experience with the financial planning process and the practical applications around fiscal administration of a children's program.#This course covers topics 2 and 4 for the New York State Children's Program Administrator Credential. Prerequisites: ECET 3010, ECET 3015, and ECET 3020.

ECET 3030 Curriculum & Environments for Infants & Toddlers (4 Credits)

This course is intended for students who provide direct care for infants and toddlers as well as for program administrators and educational coordinators who incorporate infant/toddler programming into infant toddler programs. Students will leave with an in-depth understanding of curriculum and environments for young children birth to three including developmentally appropriate practices and the teacher's role in supporting development of infants and toddlers.#There will be an emphasis on health and safety, curriculum planning including goals, environments, and building responsive relationships with the children and families. Prerequisites: HUDV 3030 Infant/Toddler Development, HUDV 3015 Child Development, or equivalent.
Attributes: Liberal

ECET 3035 Curriculum & Environments for Preschoolers (4 Credits)

This course is intended for students who provide direct care for preschoolers as well as for program administrators and educational coordinators. This study is designed to give students an in-depth understanding of curriculum and environments for young children from three to five years of age. Students will learn developmentally appropriate practices and the teacher's role in supporting development of preschoolers in the classroom. There will be an emphasis on curriculum planning, learning environments, and the role of teachers and parents. Prerequisites: HUDV 3015 Child Development, or equivalent.
Attributes: Liberal

ECET 3037 Professional Preparation for Early Childhood Education (2 Credits)

In this specialized course, students in the early childhood education teacher preparation program will investigate all program requirements, including all NYSED and SUNY General Education Requirements. Students will analyze personal, academic, and career goals and the relationships among these goals. Students will think ahead to identify practicum placements and examine student teaching assignments and the role of self-assessment in teaching. Please note: This course is restricted to ECE students and should be taken in the first term of the program.

ECET 3040 Emergent Literacy (4 Credits)

In this course the student will examine the latest research in literacy development, defined as the development of skills in language, reading and writing; for young children birth through age 8. The student will investigate literacy development from the emergent stages of early childhood through early elementary grades, how to incorporate the principles and methods of using literacy to improve learning, and how to translate this research into good instructional practices. Other topics included in this study may include literacy and culture, assessing literacy development, and family literacy.

ECET 3050 Observation & Assessment of Children (4 Credits)

This course will focus on observation, documentation, and assessment techniques in order to understand children's growth and development. Students will engage in practical observation and assessment activities involving the physical, cognitive, language, social and emotional development of children. Students will utilize and interpret formal, informal and authentic assessments for children; the appropriate and ethical uses for assessment, and methods of inquiry relevant to the field. Observations are required. Please note: This course is expected for students concentrating in early childhood studies. Prerequisites: EDST 3015 Child Development (or equivalent), HUDV 3030 Infant/Toddler Development (or equivalent), or HUDV 3060 Early Childhood Development.

ECET 3060 Young Children & Technology (4 Credits)

Learn how the field of early childhood education has come to embrace emerging technology and find appropriate ways to integrate it into teaching and learning practice. Students in this study will research professional recommendations regarding the use of technology and interactive media in early childhood, explore how technology can be used to support teaching and learning, and how technology can be used to connect home, school, and community. Prerequisites: Students should have knowledge of child development and curriculum development such as that gained in Child Development and Curriculum and Environments for Preschoolers. Basic experience with technology is required; students will be required to interact with a wide variety of websites and social media applications. This course was previously EDU-233424 Educational Technology in Early Childhood.

ECET 3065 Music Across the Early Childhood Curriculum (4 Credits)

Music plays a foundational role in early learning, which provides reason for intentionally integrating music throughout infant-toddler-preschool activities and curriculum. As a hallmark of evidenced-based practice, students will examine research and theories relating music activities to social, emotional, physical, and cognitive skills including language and literacy development. Discussions will include the integration of music from various cultures and share the benefits of music for all children and their families.
Attributes: Liberal

ECET 3070 Issues and Advocacy in Early Childhood Education (2 Credits)

In this interactive course, students will explore common issues within the field of early childhood education and their professional role as advocates for change. Controversial issues will be explored and discussed from a research-based perspective. As an additional requirement of the course, students will complete all NYSED training components such as child abuse and maltreatment, means for instructing students for the purpose of preventing child abduction, preventing alcohol, tobacco and other drug abuse, safety education, and providing instruction in fire and arson prevention. Additional topics include the prevention of and intervention in school violence, means for the prevention of and intervention in harassment, bullying (including cyberbullying), and discrimination within educational settings. Students must be enrolled in the ECE registered program.

ECET 3080 Assessment in Early Childhood Education (2 Credits)
Early childhood assessment utilizes tools to gather and provide educators, parents, and families with critical information about a child's development and learning. In this course, students will explore both formal and informal methods of assessing student learning and the means of analyzing one's own teaching practice -- and skill in using information gathered through assessment and analysis. Students will learn to plan or modify instruction and develop skills in using various resources to enhance teaching. Assessment strategies such as formative and summative assessments, portfolios, standardized testing, outcomes, and/or practical applications with methods of sharing feedback with students will be explored. A focus will be placed on reflective teaching practices as a means of analyzing one's own teaching practice through information gathered through assessment. Please note: This course is required for students in the early childhood education program. It is open for all students, but anyone concentrating in early childhood studies is expected to take ECET 3050 Observation and Assessment and should discuss potential redundancy with their mentor.

ECET 3085 Early Childhood Experience: Language and Literacy (2 Credits)
In this first early childhood field observation experience students will observe young children and begin to apply their knowledge of language and literacy development in practical classroom situations. Students will investigate how young children demonstrate progress towards literacy skills/goals as defined by learning standards through responsive environments. Topics will emphasize how instruction is guided by the child's prior learning and various culturally, developmentally, and linguistically appropriate teaching practices. Emphasis will be placed on music as a foundation to language, English language learners, and methods of reading enrichment and remediation. Please note: Observation hours are required as per New York State Education Department (NYSED) requirements. Prerequisites: ECET 3040 Emergent Literacy .

ECET 3090 Early Childhood Experience: Special Education (2 Credits)
In this second early childhood observation experience, students will begin to apply their knowledge of special education and the inclusion of young children with exceptionalities in classroom situations. Students will focus on how to provide instruction that will promote engagement, understanding, participation, progress, and performance of students with disabilities in the general education curriculum through evidence-based instruction. Emphasis will be placed on the development of an agency appropriate for the individual needs of the child. Please note: Enrollment in the Early Childhood Education program is required. Additionally, observation hours are required as per New York State Education Department (NYSED) requirements. Prerequisites: EDST 2025 Intro to Special Education.

ECET 3122 Inclusion in Early Childhood Education (4 Credits)
In this course, the student will develop an understanding of special education for children birth to age five and how children are supported in inclusive early childhood settings through developmentally appropriate strategies for curriculum, instruction, and assessment. Topics in the course are varied but typically include early intervention and public policy, planning for inclusion, monitoring young children, the role of administration and the professional collaboration and cooperation required when working with individuals with multiple disabilities. Prerequisites: EDST 2025 Introduction to Special Education.
Attributes: Liberal

ECET 3996 Special Topics in ECET (2-4 Credits)
The content of this course will vary by term and section. Students may repeat this course for credit as long as the topic differs. Please refer to the Term Guide for course topic offerings.
Attributes: Liberal

ECET 3997 Special Topics in ECET (2-4 Credits)
The content of this course will vary by term and section. Students may repeat this course for credit as long as the topic differs. Please refer to the Term Guide for course topic offerings.

ECET 3998 Individualized Studies in Early Childhood Studies (ECET) (1-8 Credits)
Students have the opportunity to develop individualized studies with their mentor in Early Childhood Studies (ECET). Please contact your mentor/advisor for more details.

ECET 4005 Children's Program Administration: Capstone (4 Credits)
The capstone is the culminating course designed to fulfil the coursework portion of the New York State Children's Program Administrator Credential. The intent of this study is to provide the student with the opportunity to integrate the information and principles from Topics 1-5 of the competencies. Students will demonstrate mastery of the principles and skills as a children's program administrator through the completion of a portfolio or a final project. This course meets Topic 6 of the New York State Children's Program Administrator Credential. Students seeking the credential will need to complete 200 hours in administration in order to submit their application to the New York State Association for the Education of Young Children. In some cases, a student could take one of these courses concurrently with instructor approval. Prerequisites: ECET 3025.

ECET 4010 Curriculum Models in Early Childhood Education (4 Credits)
Students in this course will investigate the global perspectives of various curriculum models and early childhood programs with specialized philosophies, frameworks, and approaches to early childhood education including diverse learners. There will be an emphasis on curriculum planning, learning environments, and assessment within various cultural contexts. The models may vary, but examples include Head Start, Creative Curriculum, High Scope, Montessori, Pyramid, Reggio Emilia, Vygotsky, Waldorf, and/or The Project Approach. Prerequisites: Child Development (or equivalent) and at least 12 credits in early childhood coursework. This course was previously EDU-234244.
Attributes: Liberal

ECET 4015 Development & Meaning of Play (4 Credits)
This course will investigate the various theories of play, current research and trends, the meaning of play, and the interaction between play and child development, including play in its myriad forms. Topics may include using observation to analyze children's level of play skills and adults' role in play; the utility of play and fantasy at different developmental stages; different contexts for play; and the effect of external factors, such as media, gender differences, culture, and toys, on children's play. While it is not required, it might be helpful if students have taken a course in child development or equivalent. This course was previously HDV-284354 Development and Meaning of Play.
Attributes: Liberal

ECET 4020 The Science Behind Learning and Trauma in Early Childhood Settings (4 Credits)
Professionals in the field of early childhood education are becoming increasingly aware of the science behind learning and the science behind early-life trauma and its impact on learning and development. In this course students will review and discuss scientific and early childhood research and literature about learning, development, and trauma for the purpose of merging scientific knowledge with practice. Science literature will also be discussed as it relates to children and families, the impact of play, building relationships with children and families to promote healing, and explore self-care of the early childhood professional.
Attributes: Liberal

ECET 4030 Early Childhood Curriculum Planning Across the Content Areas (4 Credits)
Students in this course will take a deeper dive into curriculum development, instructional planning, and research-validated instructional strategies for teaching students with the full range of abilities. Using an interdisciplinary approach, students will have an opportunity to explore the learning standards and how they apply to the content area(s) and plan and implement interventions to help children meet developmental milestones and learning goals based on learning standards.

ECET 4122 Poverty and Early Learning (4 Credits)
This course encourages students to examine many types of poverty a child may experience and how living in poverty effects development within the context of the learning environment. Topics investigated in this course include the definition of poverty, the dynamics and culture of poverty, stress from poverty and the effect on development, and the effects on brain development and therefore, the child's ability to learn. For example, students may analyze how the social environment supports language and literacy skills in the preparation for reading texts.
Attributes: Liberal

ECET 4140 Early Childhood Practicum: Student Teaching I (6 Credits)
With an emphasis on curriculum and environments for prekindergarten and kindergarten, students will apply pedagogical methods as they begin the practicum component of the early childhood education program. Each student will apply this knowledge using early learning standards and other resources to make decisions about spontaneous and planned learning experiences and about curriculum development, implementation, and evaluation to ensure that learning will be stimulating, challenging, and meaningful to each child. This practicum will take place in an approved pre-kindergarten or kindergarten classroom. Please note: All program requirements must be met before the student can register for this course.

ECET 4150 Early Childhood Practicum: Student Teaching II (6 Credits)
With an emphasis on curriculum and environments for first and second grade, students will apply pedagogical methods as they begin the practicum component of the early childhood education program. Each student will apply this knowledge using early learning standards and other resources to make decisions about spontaneous and planned learning experiences and about curriculum development, implementation, and evaluation to ensure that learning will be stimulating, challenging, and meaningful to each child. This practicum will take place in an approved first or second grade classroom. Please note: All program requirements must be met before the student can register for this course.

ECET 4998 Individualized Studies in Early Childhood Studies (ECET) (1-8 Credits)
Students have the opportunity to develop individualized studies with their mentor in Early Childhood Studies (ECET). Please contact your mentor/advisor for more details.

ECON: Economics (Undergraduate)

ECON 1998 Individualized Studies in Economics (ECON) (1-8 Credits)
Students have the opportunity to develop individualized studies with their mentor in Economics (ECON). Registration for this class must be approved by the student's mentor.

ECON 2005 Principles of Economics (4 Credits)
This course provides an overview of micro- and macroeconomic issues. In microeconomics students examine individual decision-making in firms and households and the way they interact in markets. In the macroeconomic portion of the course students learn about the aggregate economy including GDP, inflation, growth, unemployment and interest rates. Major macroeconomic policies and policy issues are considered. Students must have an understanding of graphs and basic mathematical concepts prior to registering for this course. Students matriculated in the following programs cannot take this course: B.S. Accounting, B.B.A. Business Administration, and B.S. Business Administration.
Attributes: Social Science Gen Ed, *Social Sciences Gen Ed, Liberal

ECON 2010 Introductory Economics: Micro & Macro 6 Cr. (6 Credits)
This course provides an overview of micro and macroeconomic issues. In microeconomics students examine individual decision-making in firms and households and the way they interact in markets. In the macroeconomics portion of the course students learn about the aggregate economy including GDP, inflation, growth, unemployment and interest rates. Major macroeconomic policies and policy issues are considered. Students must have an understanding of graphs and basic mathematical concepts. Notes: This course is appropriate for students who need at least three credits of microeconomics and three credits of macroeconomics in their degrees. This course covers all of the material in the four credit version of Micro and Macroeconomics plus additional topics and issues in both micro and macroeconomics that are not covered in the four-credit version of the course. This course provides less comprehensive coverage of microeconomics or macroeconomics than the separate 4-credit courses in microeconomics and macroeconomics. Students should not take this course if they already have taken either microeconomics or macroeconomics. This course is appropriate for students who need at least three credits of microeconomics and three credits of macroeconomics in their degrees. This course covers all of the material in the four credit version of micro and macroeconomics plus additional topics and issues in both micro and macroeconomics that are not covered in the four credit version of the course. This course provides less comprehensive coverage of microeconomics or macroeconomics than the separate 4-credit courses in microeconomics and macroeconomics.
Attributes: Social Science Gen Ed, *Social Sciences Gen Ed, Liberal

ECON 2015 Macroeconomics (4 Credits)
This course provides a comprehensive overview of macroeconomic issues. The determination of output, employment, unemployment, interest rates, and inflation are studied. Monetary and fiscal policies are discussed. Important policy debates such as, the sub-prime crisis, social security, the public debt, and international economic issues are critically explored. The course introduces basic models of macroeconomics and illustrates principles with the experience of the U.S. and foreign economies. This 4-credit Macroeconomics course covers a broader array of macroeconomic topics than are included in the 4 and 6 credit courses that cover both microeconomics and macroeconomics. Intermediate Macroeconomics provides a deeper analysis of different macroeconomic models. International Finance provides a focus on the international aspects of the economic system, whilst Money & Banking involves a more detailed examination of the role of the banking system and money creation in a modern economy. Other specialized courses may examine the functioning of specific sectors as well as the gender and environmental aspects of environmental decision making. The course satisfies economics skills in BME guidelines. This course was previously BME-212214 Economics/Macro. Corequisites: Microeconomics (ECON 2020) Notes : Macroeconomics focuses on the working of the overall economy whereas Microeconomics emphasizes the behavior of individual actors, such as firms and households, under various constraints.
Attributes: Social Science Gen Ed, *Social Sciences Gen Ed, Liberal

ECON 2020 Microeconomics (4 Credits)
This course provides a comprehensive overview of microeconomic issues. Supply, demand and elasticity are studied. Consumer behavior and firm behavior are investigated. The basics of competitive markets, monopoly and other market structures are examined. Market failures including public goods and externalities are studied as well as public policies aimed at improving these market failures. The course introduces basic models of microeconomics and illustrates microeconomic principles with examples from everyday experience. Notes: Microeconomics emphasizes the behavior under various constraints of individual actors, such as firms and households. Macroeconomics focuses on the working of the overall or aggregate economy. This 4-credit Microeconomics course covers a broader array of microeconomic topics than are included in the 4 and 6 credit courses that cover both microeconomics and macroeconomics. Intermediate Microeconomics provides a deeper analysis of different microeconomic theories and models. Other specialized courses such as Labor Economics and Environmental Economics and Policy may examine the functioning of specific sectors as well as the gender and environmental aspects of environmental decision making. The course satisfies economics skills in BME guidelines. This course was previously BME-212224 Economics/Micro. Corequisites: Macroeconomics ECON 2015.
Attributes: Social Science Gen Ed, *Social Sciences Gen Ed, Liberal

ECON 2025 Contemporary Issues in Economics (4 Credits)
In this course students apply basic concepts of economic decision-making to a discussion and analysis of contemporary economics issues. Students learn about supply and demand concepts, health care, unemployment, inflation, taxation, monopoly and competition in certain industries, international trade and trade agreements. Students discuss and debate controversial and real world situations requiring the use of economic principles and concepts. Notes: This course is primarily intended for students who seek a basic knowledge of economics to improve their own decision-making in the marketplace, and to develop a better understanding of public policy affecting their incomes and budgets. This study is open to all students except those pursuing a concentration in Business Administration. The course satisfies economics skills in BME guidelines. This course was previously BME-211344 Contemporary Issues in Economics.
Attributes: Social Science Gen Ed, Liberal

ECON 2998 Individualized Studies in Economics (ECON) (1-8 Credits)
Students have the opportunity to develop individualized studies with their mentor in Economics (ECON). Registration for this class must be approved by the student's mentor.

ECON 3000 Alternative Economic Theories (3 Credits)
This course will introduce students to non-mainstream ideas in economics. Students will learn to challenge and critique established thinking and methodology in economics and examine alternative approaches. Heterodox theory will be covered and used to analyze a number of themes of recent and contemporary interest, including the debate on austerity, the origin of financial crises, the crisis in the Eurozone and inequality. Heterodox approaches examined will include: post-Keynesian, ecological, feminist, institutional and behavioral economics. Students will also gain an introduction to development economics. The course will also examine the moral and social aspects of economic policy decisions. A further objective is to enable students to apply their knowledge from the course to assess current economic issues. The course satisfies economics skills in BME guidelines. This course is offered for our International Education program students. Prerequisites: Macroeconomics ECON 2015.
Attributes: Liberal

ECON 3005 Applied Microeconomics (4 Credits)
Microeconomics studies incentives, constraints and allocation decisions taken by individuals and firms. In Applied Microeconomics, students will deepen their knowledge gained at introductory level and will apply it to real life cases. They will explore various economic tools, analytical techniques, sources of economic data and will perform in depth quantitative analysis of demand and supply, trends, optimal pricing, market activities, and competitive strategies. This study can overlap with Applied Macroeconomics as some of the initial concepts offer in-depth knowledge of the basic economic tools and models that are considered to be building blocks for any economic studies. Applied microeconomics focuses on analytical tools and techniques used to discuss and evaluate microeconomic concepts. It can also include a study and methods used in analysis of specialized economic fields such as real estate, sport, health, labor, agricultural, or industrial organization. It is not a substitute for Intermediate Microeconomics which builds on introductory studies by expanding microeconomic theories and concepts. The course satisfies economics skills in BME guidelines. Prerequisites: Principles of Microeconomics, an understanding of graphs and basic mathematical concepts.

ECON 3010 Behavioral Economics (4 Credits)
Behavioral economics studies the impact of social, cognitive and emotional factors on our economic decisions. Neoclassical economic analysis assumes that consumers, producers, borrowers and investors are selfish rational optimizing agents with well-defined preferences and perfect self-control. Research in psychology suggests that humans display irrational phenomena known as cognitive biases such as overconfidence, loss-aversion, altruism, mental accounting, endowment and status-quo bias. Our choices are influenced by the environment, framing of alternatives, anchoring, trust, social norm of fairness and mistakes in probabilistic judgment. Implications for financial decision making, marketing and pricing strategies by firms, and the design of public policies will be discussed. The course satisfies economics skills in BME guidelines. Prerequisites: Microeconomics ECON-2020.
Attributes: *Social Sciences Gen Ed, Liberal

ECON 3015 Behavioral Economics & Finance (4 Credits)
Behavioral Economics & Finance looks at the emotional and cognitive factors that affect how managers and professionals process information and make decisions in an economic environment. This course will explore how managers and professionals analyze factors like personal perspective, motivation, self-control, and internal versus external habits, in predicting and modeling behavior that influences economic choices.

  Topics will include the psychology of economics, financial decision making, rationality, overconfidence, motivation, and the impact of societal values and altruism as influencing factors in economics. It is expected that students will come away with a greater understanding of the impact of psychological and behavioral evidence has in economic and financial decision making. Behavioral Economics provides a more general introduction to the influence of psychology on economic theory, and covers a wider range of market phenomena and theoretical approaches. Behavioral Finance is much more focused on financial decisions, and on challenging the established theoretical precepts of financial economics. This course combines the study of psychology and its impact on economics and also provides an introduction to the more specific applications of psychology to finance. This course is offered for our International Education program students. Prerequisites: Macroeconomics (ECON 2015).
Attributes: Liberal

ECON 3020 Ecological Economics (4 Credits)
This advanced level economics study is open to all students and is also part of the Business and Environmental Sustainability Certificate. Ecological economics is a relatively new field that tries to incorporate fundamental resource constraints, scientific principles including the second law of thermodynamics and environmental problems into thinking about the economy, markets and policy. Much of the focus is on systems, global perspectives, and long run concerns. Several areas will be investigated in depth including externalities, public goods, and policies for dealing with these issues. Students can explore specific problems and possible remedies in areas such as water and air quality, energy consumption, transportation, biodiversity, or recycling in detail. Prior to taking this course, student should have an understanding of basic microeconomics. The course satisfies economics and understanding organization in a global context skills in BME guidelines.
Attributes: Social Science Gen Ed, Liberal

ECON 3025 Econometrics (4 Credits)
This course is an introduction to regression analysis. Econometrics is a powerful tool that helps answer questions that arise out of economic theory with data. It refers to the application of statistical methods to the quantification and critical assessment of hypothetical economic relationships using data. Students will be introduced to data collection and management, summary statistics and to regression models used in empirical economic as well as financial analysis. The course satisfies economics and quantitative skills in BME guidelines. Prerequisites: ECON-2020 and MATH-1065, or equivalent.
Attributes: Liberal

ECON 3030 Economic Policies of the European Union (3 Credits)
The first objective of this course is to enable students to critically analyze the flow of economic, financial and political information that deals with the global economy and directly or indirectly involves the European Union. The second objective is to develop an awareness of the multi-dimensional impacts of the economic policies actually conducted by the European Union, their objectives, logic, consistency and consequences within the context of 21st Century globalized capitalism. The third objective is to enable students to assess the workings of the complex institutional framework (Commission, European Investment Bank, specialized agencies, European Central Bank, Court of Justice...) which characterizes the European Union, from the point of view of their possible careers in public service, politics, journalism, corporate sector or simply as informed global citizens. This course is a very specialized overview of the economic policies adopted by EU institutions. The applications will therefore not be covered by any other course offering. However, there may be some overlap with material taught in Money & Banking, International Finance, International Trade & Finance and Economic and Social Contexts of Globalization. However, in none of these cases will there be sufficient duplication as to consider any combination of these courses as equivalent to Economic Policies of the EU. This course is offered for our International Education program students.
Attributes: Liberal

ECON 3035 Economics of Crime (4 Credits)
Economics of Crime will apply economic theories to examine decisions by potential criminals, the impact of crime on society, the full cost of crime and punishment, and the allocation of criminal justice resources. Basic economics concepts will be introduced: rational choice, opportunity costs, incentives and tradeoffs, marginal benefits and costs, supply and demand, market equilibrium, efficiency, externalities. Using these tools, in addition to current statistics and findings from economic literature, students will analyze public policies around corrections and prevention, legalization of drugs, gambling and prostitution, death penalty, gun control, private prisons, gangs, cheating, white collar crime and cyber crime. The course satisfies economics skills in BME guidelines.
Attributes: *Social Sciences Gen Ed, Liberal

ECON 3040 Economics of Gender Work & Family (4 Credits)
This course covers selected topics in labor economics, including the economic experiences of women, men, and ethnic minorities in the United States and economic theories that explain recent trends in work and family life. Basic economics concepts will be introduced: rational choice, opportunity costs, incentives and tradeoffs, comparative advantage, benefits and costs of marriage and children, labor supply and demand, wage determination, pay gaps, compensating wage differentials, labor unions, efficiency wage, minimum wage, unemployment, household production, human capital investment, and theories of discrimination. Using these tools, we will examine causes and consequence of gender and racial differences in wealth, earnings, labor force participation, marriage, divorce, fertility, longevity, and educational attainment. Economic policies related to labor markets and family will also be discussed. The course satisfies economics skills in BME guidelines.
Attributes: Liberal

ECON 3045 Economics of Labor Markets (4 Credits)
This course provides an economic analysis of the market for workers (the labor market). Students will analyze the determinants of labor supply and labor demand. Topics include educational and training investments, occupational choice, worker mobility, pay and productivity, wage structure, income inequality and policy issues such as labor shortages, the effects of minimum wage on employment, the labor effects of outsourcing, economic analysis of unemployment, the impact of welfare policy on labor supply and demand and the role of unions. Students will examine additional topics that may vary across terms. Additional topics may include gender wage differentials, economics of marriage and divorce, demographic trends and economic issues related to occupational health and safety, changes in levels of unionization and immigration. The course satisfies economics skills in BME guidelines. Highly Recommended (not required): Knowledge in Algebra that is needed for the introductory course in microeconomics. Note: This course is also listed as LABR 3055 Labor Economics. Students should not enroll in both ECON 3045 and LABR 3055. This course was previously LAB 263174 Labor Economics. Prerequisites: Microeconomics ECON 2020, or equivalent.
Attributes: *Social Sciences Gen Ed, Liberal

ECON 3050 Environmental Economics & Policy (4 Credits)
This study explores economic and policy issues related to natural resources and the environment. Several topics in the area of natural resource and environmental economics will be investigated in depth including externalities, property rights, and sustainable development. These topics and problems will be approached from multiple perspectives including consumers, firms, and policy makers. The objective of this study is to help students to think critically and analytically about our natural resources and the environment, with a particular focus on policy. Students must have an understanding of basic microeconomics. The course satisfies economics skills in BME guidelines.
Attributes: Social Science Gen Ed, *Social Sciences Gen Ed, Liberal

ECON 3055 Economic Issues in Health Care (4 Credits)
Healthcare economics uses the tools of microeconomic analysis to examine markets in the health sector including physician markets, hospital markets, pharmaceutical markets and health insurance markets. Students learn about managed care, and other types of health insurance, explore the effects of insurance on behavior, investigate reimbursement systems including new reimbursement models like value-based and bundled payments, and discuss factors that influence market outcomes in the healthcare sector including uncertainty, information asymmetries, and externalities. Current trends and issues facing the healthcare industry such as rising expenditures and new technologies are also investigated in this course. Prerequisites: Microeconomics (ECON 2020), or significant experience in the health sector.
Attributes: Social Science Gen Ed, *Social Sciences Gen Ed, Liberal

ECON 3060 History of Economic Thought (4 Credits)
History of Economic Thought examines major contributions to the field of economics through the development of ideas by the major thinkers. Systems of economic thought, theory and ideas, and consideration of application to former and current problems, are studied and compared in order to understand the historical development of the field. By the end of the course students should have developed a general understanding of the main approaches to the history of economic thought, a sound knowledge of the discipline of economics, and the ability to critically evaluate the major contributions to the theories of value, production, and distribution. The course satisfies economics skills in BME guidelines. Highly Recommended (not required): Appropriate Writing and internet and/or library research skills. This course was previously BME-213124 History of Economic Thought. Prerequisites: Microeconomics (ECON 3080) and Macroeconomics (ECON 2015), or equivalents.
Attributes: Liberal

ECON 3065 Industrial Economics (4 Credits)
Macroeconomics focuses on the national economy and its links to the worldwide economy. Intermediate macroeconomics deepens students' knowledge gained at the introductory level by exploring more advanced theories of the long-run aggregate equilibrium, economic growth, business cycles and economic fluctuations. Relationships between national income, unemployment, inflation, interest rates, exchange rates, consumption, investment, savings, taxes, government spending and money supply are examined. Applications of models to current government policies, the role of uncertainty in the decisions of different economic actors and the impact of policy changes on various sectors of the economy are also covered in this course. This course is offered for our International Education program students. Prerequisites: Macroeconomics (ECON 2015) and College Mathematics (MATH 1000).
Attributes: Liberal

ECON 3070 Industrial Organization (4 Credits)
Industrial organization examines the structure, conduct, and performance of firms and industries. Industrial organization is essentially the economic analysis of the conduct and performance of firms in imperfectly competitive markets and the relationship of this behavior to various market structures. Strategic behavior of firms is studied using game theory. Antitrust issues and the regulation of real-world competition are examined in detail. The goal of this course is to provide an understanding of how the qualities of actual markets and firms found in advanced capitalist economies influence firm performance and market outcomes when firms and markets differ substantially from models of perfect competition. The course satisfies economics skills in BME guidelines. Note: This course builds on learning gained through a study of introductory microeconomics. Prerequisites: Microeconomics (ECON 3080), or equivalent.
Attributes: Liberal

ECON 3075 Intermediate Macroeconomics (4 Credits)
Macroeconomics focuses on the national economy and its links to the worldwide economy. Intermediate macroeconomics deepens students' knowledge gained at the introductory level by exploring more advanced theories of the long-run aggregate equilibrium, economic growth, business cycles and economic fluctuations. Relationships between national income, unemployment, inflation, interest rates, exchange rates, consumption, investment, savings, taxes, government spending and money supply are examined. Applications of models to current government policies, the role of uncertainty in the decisions of different economic actors and the impact of policy changes on various sectors of the economy are also covered in this course. The course satisfies economics skills in BME guidelines. Prerequisites: Principles of Macroeconomics, College Level Math.
Attributes: Social Science Gen Ed, *Social Sciences Gen Ed, Liberal

ECON 3080 Intermediate Microeconomics (4 Credits)
Microeconomics is the study of rational choice behavior on the part of individual consumers and firms. Intermediate microeconomics builds up on students' knowledge gained at the introductory level and explores more advanced theoretical issues including supply and demand interaction, utility maximization, profit maximization, elasticity, labor markets, externalities, public goods, perfect competition, monopoly power, imperfect competition, and game theory. Policy applications and business strategies are discussed. The course satisfies economics skills in BME guidelines. Prerequisites: Microeconomics (ECON 2020).
Attributes: Social Science Gen Ed, *Social Sciences Gen Ed, Liberal

ECON 3085 International Economics (4 Credits)
The purpose of this course is to build an in-depth understanding of international economics. Students will build on foundational courses in economics, extending their knowledge to cover open economies interacting under the conditions of the contemporary financial system. The theoretical grounding for trade policy will be covered as well as the functioning of the international trade system. Students will learn the basics of international finance and gain an understanding of the institutional architecture of the global financial system. The knowledge learned in this course will be applied to the process of decision making within businesses working across national borders. International Finance provides a deeper focus on the financial aspects of the international economic system; although there is some degree of overlap with International Economics, the theoretical focus of the latter course means that they are far from being equivalent. Money & Banking involves a more detailed examination of the role of the banking system and money creation in a modern economy, and to some extent inevitably touches on the international financial system, but the emphasis is very different. Other specialized courses may examine the functioning of specific sectors as well as the gender and environmental aspects of economic decision making. The course satisfies economics and understanding organization in a global context skills in BME guidelines. This course was previously BME-214514 Corequisites: Microeconomics (ECON 2020) Macroeconomics (ECON 2015).
Attributes: *Social Sciences Gen Ed, Liberal

ECON 3090 International Political Economy (4 Credits)
Learn about the growing interdependence of global economic and political problems over last 25 years. Explore why the current set of global problems cannot be understood as just international politics or international economics. Focus on a complex multidisciplinary approach to study the causes and effects of globalization of markets. Topics include the nature and main theories of international political economy; the national systems of political economy; the evolution of international trade; the evolution of international financial system; the state and multinationals; the state and economic development; the political economy of regional integration; the nation-state in the global economy; the governance in the global economy. International Finance provides a deeper focus on the financial aspects of the international economic system. International Economics examines international trade, but without the political and institutional perspectives. Highly Recommended (not required): A course in economics or, equivalent. This course was previously BME-214424 International Political Economy.
Attributes: *Social Sciences Gen Ed, Liberal

ECON 3095 International Trade & Finance (3,4 Credits)
The purpose of the course is to provide students with the knowledge to understand and analyze international financial movements, incentives for foreign exchange of goods and services on the international level, and trade policies. Students will also learn about foreign exchange rates and international capital markets, the balance of payments accounts, and processes correcting surpluses and deficits. The course will also provide an overview of international institutions related to trade in the context of current issues. International Finance provides a deeper focus on the financial aspects of the international economic system, although there is sufficient overlap to merit a recommendation that students do not take both International Trade & Finance and International Finance. Money & Banking involves a more detailed examination of the role of the banking system and money creation in a modern economy. The technical details of the workings of capital markets and valuation would similarly be covered in courses on investment, security analysis and portfolio management. While the major exchange rate risks and exposures will be introduced, as well as the concept of hedging, the course will not cover the details of internal corporate management. Moreover this course does not cover in any great detail the field of development economics, which is also the subject of separate courses. This course is offered for our International Education program students. Prerequisites: Macroeconomics (ECON 2015).
Attributes: Liberal

ECON 3100 Public Finance (4 Credits)
Public finance is the study of the theory and practice of how governments raise revenue and make expenditures. Students learn about taxation at the federal and state level and public spending primarily at the federal level. On the expenditure side, students learn about the theory of public goods and externalities as well as specific spending programs such as health care and income security. On the taxation side, students learn about the incidence of taxation, how taxes affect the efficiency of markets, and the structure of the federal tax system for individuals and corporations. Students consider both fairness/equity and efficiency criteria in examining expenditures and taxation. Prerequisite (must complete before registering): Microeconomics (ECON 2020), or equivalent Note: This course builds on learning gained through a study of Microeconomics (ECON 3080).
Attributes: Liberal

ECON 3105 Public Finance & Economics (4 Credits)
This advanced, liberal arts course analyzes the interaction of government and the economy. The primary purpose of this course is to use microeconomic tools to study the effects of government policies on economic agent behavior and the impact of public expenditures and public taxation on the distribution of resources. The objective is to provide a comprehensive understanding of public economics, to explore models of public finance and their dynamics and to provide answers for economic and policy related questions. This course is offered for our International Education program students. Prerequisites: Macroeconomics (ECON 2015).
Attributes: Liberal

ECON 3110 Social & Economic Contexts of Globalization (3 Credits)
This course is designed to introduce students to the various aspects of globalization and help them understand and critically evaluate its effects on various spheres of our lives. It will deal with globalization in the areas of international politics, business and all kinds of social interactions. Students will learn to describe, analyze and discuss the effects of globalization on trade, business, media, social interaction, culture, environment, migration, religion and the power of international organizations and national governments. This course is offered for our International Education program students.
Attributes: Liberal

ECON 3115 The Global Financial Crisis & the Great Recession (3 Credits)
The purpose of this course is to introduce students to the financial crisis of 2008 and its aftermath in the context of history and economic theory. The course will introduce economic bubbles and crashes as financial phenomena. Students will learn about the functioning of financial markets through this study. Students will also gain an understanding of the impact of the bubble/crash cycle on the wider economy. Students will analyze the causes of these phenomena and examine possible policy options that might prevent them, or at least soften their impact. The course will also examine the longer-term social consequences of the crisis. This course is offered for our International Education program students. Prerequisites: Macroeconomics (ECON 2015).
Attributes: Liberal

ECON 3120 Economic Policies of the European Union (4 Credits)
The first objective of this course is to enable students to critically analyze the flow of economic, financial and political information that deals with the global economy and directly or indirectly involves the European Union (EU). The second objective is to develop an awareness of the multi-dimensional impacts of the economic policies actually conducted by the EU, their objectives, logics, consistency and consequences within the context of the 21st Century globalized capitalism. The third objective is to enable students to assess the workings of the complex institutional framework which characterizes the EU, from the point of view of their possible careers in the public service, politics, journalism, corporate sector or simply as informed global citizens. The fourth objective is to enable students to apply their knowledge from the course in a comprehensive assessment of a major current issue facing the EU. Assessment will be through a substantial written assignment. This course is offered for our International Education program students. Prerequisites: Microeconomics (ECON 2020) and Macroeconomics (ECON 2015).
Attributes: Liberal

ECON 3122 Money & Banking (4 Credits)
The course covers the monetary transmission mechanism, monetary policy and its relationship to assets pricing models. It introduces the theoretical, institutional, historical, and empirical aspects of money and banking, and investigates the insight into the relationship between the government's changing fiscal and monetary policies (especially the role of the Federal Reserve System), and the economy and business decisions. The course also examines the tools of monetary policies and their implications for households, businesses, and global economies. Prerequisite (must complete before registering): Microeconomics (ECON 2020), Macroeconomics (ECON 2015), or Principles of Economics (MGMT 6015), or equivalents. Notes: This course provides a basis for understanding International Finance as well as Monetary Policy. Coupled with Fiscal Policy it provides a theoretical understanding of the wider role of the federal government in attempting to provide full employment and price level stability for the economy. This course was previously BME-214414 Money and Banking.
Attributes: Social Science Gen Ed, *Social Sciences Gen Ed, Liberal

ECON 3125 New Perspectives in Economics (4 Credits)
This course will introduce students to non-mainstream ideas in economics. Students will learn to challenge and critique established thinking and methodology in economics and examine alternative approaches. Heterodox theory will be covered and used to analyze a number of themes of recent and contemporary interest, including the debate on austerity, the origin of financial crises, the crisis in the Eurozone and inequality. Heterodox approaches examined will include: post-Keynesian, ecological, feminist, institutional and behavioral economics. Students will also gain an introduction to development economics. The course will also examine the moral and social aspects of economic policy decisions. A further objective is to enable students to apply their knowledge from the course in a comprehensive assessment of a major current economic issue. Assessment will be through a substantial written assignment. This course is offered for our International Education program students. Prerequisites: Macroeconomics (ECON 2015).
Attributes: Liberal

ECON 3130 Topics in Contemporary Business & Economic Issues (3 Credits)
The purpose of this advanced level course is to present a multi-disciplinary study of the contemporary world through a major current event. Students will be introduced to a selected event (or possibly a set of related events). This will include a historical overview, an analysis of the political forces which led to the event, and an analysis of the reasons for the outcome and the possible impact. The aim of the course is to focus students' attention on the link between their studies and current affairs, presenting contemporary issues in the global economic and political system. Students will analyze the challenges and stresses that this system faces. This course is offered for our International Education program students. Prerequisites: Macroeconomics (ECON 2015).
Attributes: Liberal

ECON 3135 Business Government & Society (4 Credits)
Business, Government, and Society is an interdisciplinary approach to the study of the dynamic interrelationships among the three major sectors of an economy. It is an advanced level study that enables the student to develop insights into roles of government and business in society. It is a general audience study that can be taken by: students in management and business to help them meet the ethical and social responsibility aspect of the BUSINESS, MANAGEMENT & ECONOMICS (BME) guidelines; students in economics adding breadth to their concentration; and students outside the BME area of study who wish to further the interdisciplinary perspectives in their degree program plans. Prerequisites (must complete before registering): Some knowledge of economics is required while some background in any of the following is useful - management, history, political science, and philosophy. Students must demonstrate abilities to: write at an advanced level; conduct disciplined internet/library research; analyze case study issues and problems, discuss alternatives approaches to their resolution, and create well defended recommendations. This course was previously BME-214544 Business. The course satisfies BME guideline "ethical and social responsibility".
Attributes: Social Science Gen Ed, *Social Sciences Gen Ed, Liberal

ECON 3140 American Economic History (4 Credits)
This course is an overview of the development of the American economy from the antebellum period and the coming of the Civil War to the present day. The course combines economic analysis with political, social, and cultural history to understand the American economic experience. Students will also be expected to engage in independent research using library and internet resources and participate in class discussions and debates. Prerequisites: N/A. Corequisites: N/A.
Attributes: *US History & Civ Engmt Gen Ed, Liberal

ECON 3996 Special Topics in ECON (8 Credits)
Attributes: Liberal

ECON 3998 Individualized Studies in Economics (ECON) (1-8 Credits)
Students have the opportunity to develop individualized studies with their mentor in Economics (ECON). Registration for this class must be approved by the student's mentor.

ECON 4045 US Economic Policy: Its Domestic & Global Implications (4 Credits)
The aim of this course is to engage students in the examination and analysis of contemporary American economic policies that impact the domestic and international scene, and to evaluate the effectiveness of current and/or proposed new policies. Prerequisites: Microeconomics or Macroeconomics, or equivalent.
Attributes: Liberal

ECON 4998 Individualized Studies in Economics (ECON) (1-8 Credits)
Students have the opportunity to develop individualized studies with their mentor in Economics (ECON). Registration for this class must be approved by the student's mentor.

EDET: Educ in Emerging Tech (Undergraduate)

EDET 3997 Special Topics in EDET (2-4 Credits)
The content of this course will vary by term and section. Students may repeat this course for credit as long as the topic differs. Please refer to the Term Guide for course topic offerings.

EDPL: Educational Planning (Undergraduate)

EDPL 1005 Educational Planning: Introductory I (2 Credits)
Students develop an individualized degree plan and accompanying materials that respond to personal needs and interests as well as broad knowledge and skills expectations identified in ESC Area of Study Guidelines and SUNY General Education requirements. Students investigate personal, academic, and career goals and consider relationships among these goals, prior learning and experience, and relevant academic and professional criteria. Students and mentors may individualize this study as appropriate to the student's academic and/or professional goals. This course was previously EDU-232092 Planning and Finalizing the Degree: Introductory.
Attributes: Liberal

EDPL 1010 Educational Planning: Introductory II (4 Credits)
Students develop an individualized degree plan and accompanying materials that respond to personal needs and interests as well as broad knowledge and skills expectations identified in ESC Area of Study Guidelines and SUNY General Education requirements. Students investigate personal, academic, and career goals and consider relationships among these goals, prior learning and experience, and relevant academic and professional criteria. Students and mentors may individualize this study as appropriate to the student's academic and/or professional goals. The 4-credit version of this course requires work beyond the expectations of the 2-credit version.
Attributes: Liberal

EDPL 1015 Topics in Educational Planning: Introductory I (2 Credits)
This course will allow student and mentor to individualize learning activities that support planning the degree, based on student needs and interests. Students may work on a mixture of activities related to the nature of academic learning, expected academic skills, learning management skills, prior learning, and/or professional expectations. This course was previously EDU-232082 Educational Planning Workshop: Introductory.
Attributes: Liberal

EDPL 1020 Topics in Educational Planning: Introductory II (4 Credits)
This course will allow student and mentor to individualize learning activities that support planning the degree, based on student needs and interests. Students may work on a mixture of activities related to the nature of academic learning, expected academic skills, learning management skills, prior learning, and/or professional expectations. The 4-credit version of this course requires work beyond the expectations of the 2-credit version.
Attributes: Liberal

EDPL 1122 Introduction to Academic and Career Planning (4 Credits)
The student will be making important inquiries and decisions regarding a liberal arts education at Empire State College and the way this education will meet personal, academic, and career goals during this academic planning course. The purpose of this study is to assist the student in planning his or her degree program, sort out their prior learning and where it fits into the degree plan, and plan the studies needed to complete the degree. The process of Academic Planning outlined in this contract will provide the foundation for the development of an academic program that meets the student's personal and academic needs.

EDPL 1998 Individualized Studies in Educational Planning (1-8 Credits)
Students have the opportunity to develop individualized studies with their mentor in Educational Planning (EDPL). Please contact your mentor/advisor for more details.

EDPL 2005 Prior Learning Assessment (2 Credits)
This course focuses on individualized Prior Learning Assessment (iPLA). The purpose of the course is to help you think through what you've learned and how you've gained that knowledge, and to translate that thinking into appropriate requests for college credit-appropriate in terms of college-level learning, and appropriate to your degree plan. The course alternates and interweaves very concrete information (e.g., how Empire State College's prior learning assessment process works) and more abstract investigation (e.g., the nature of college-level learning). Each type of investigation informs the other. Not only will the course help you through the process of describing and documenting your learning, it will also help you understand the theory, conceptual framework, and different approaches to prior learning assessment. In this way, the course will add to your knowledge about learning and assessing learning. Note: Students need to have at least 3 potential areas for prior learning assessment; please consult Should I Pursue Credit through PLA? (https://courses.lumenlearning.com/suny-esc-educationalplanning/chapter/should-i-pursue-credit-through-pla/) for a brief self-assessment to determine if this course is appropriate. Students should also consult with their mentors before taking this course to determine appropriate areas to pursue through PLA. This course may be used to fulfill educational planning credit with mentor approval. This course was previously EDU-232192 Educational Planning Workshop: Prior Learning Assessment.
Attributes: Liberal

EDPL 2998 Individualized Studies in Educational Planning (1-8 Credits)
Students have the opportunity to develop individualized studies with their mentor in Educational Planning (EDPL). Please contact your mentor/advisor for more details.

EDPL 3005 Educational Planning: Advanced I (2 Credits)
Students develop an individualized degree plan and accompanying materials that respond to personal needs and interests as well as broad knowledge and skills expectations identified in ESC Area of Study Guidelines and SUNY General Education Requirements. Students investigate personal, academic, and career goals and consider relationships among these goals, prior learning and experience, and relevant academic and professional criteria. Students and mentors may individualize this study as appropriate to the student's academic and/or professional goals. The 4-credit version of this course requires work beyond the expectations of the 2-credit version. This course was previously EDU-233092 Planning and Finalizing the Degree: Advanced.
Attributes: Liberal

EDPL 3010 Educational Planning: Advanced II (4 Credits)
Students develop an individualized degree plan and accompanying materials that respond to personal needs and interests as well as broad knowledge and skills expectations identified in ESC Area of Study Guidelines and SUNY General Education Requirements. Students investigate personal, academic, and career goals and consider relationships among these goals, prior learning and experience, and relevant academic and professional criteria. Students and mentors may individualize this study as appropriate to the student's academic and/or professional goals. The 4-credit version of this course requires work beyond the expectations of the 2-credit version.
Attributes: Liberal

EDPL 3015 Topics in Educational Planning: Advanced I (2 Credits)
This course will allow student and mentor to individualize learning activities that support planning the degree, based on student needs and interests. Students may work on a mixture of activities related to the nature of academic learning, expected academic skills, learning management skills, prior learning, and/or professional expectations. As this is an upper-level study, students will complete additional analytical work, developed in consultation with their mentor. The 4-credit version of this course requires work beyond the expectations of the 2-credit version. This course was previously EDU-233082 Educational Planning Workshop: Advanced.
Attributes: Liberal

EDPL 3020 Topics in Educational Planning: Advanced II (4 Credits)
This course will allow student and mentor to individualize learning activities that support planning the degree, based on student needs and interests. Students may work on a mixture of activities related to the nature of academic learning, expected academic skills, learning management skills, prior learning, and/or professional expectations. As this is an upper-level study, students will complete additional analytical work, developed in consultation with their mentor. The 4-credit version of this course requires work beyond the expectations of the 2-credit version.
Attributes: Liberal

EDPL 3996 Special Topics in Educ Plnng (1-8 Credits)

EDPL 3998 Individualized Studies in Educational Planning (1-8 Credits)
Students have the opportunity to develop individualized studies with their mentor in Educational Planning (EDPL). Please contact your mentor/advisor for more details.

EDPL 4998 Individualized Studies in Educational Planning (EDPL) (1-8 Credits)
Students have the opportunity to develop individualized studies with their mentor in Educational Planning (EDPL). Please contact your mentor/advisor for more details.

EDSP: Special Education (Undergraduate)

EDSP 2025 Introduction to Special Education (4 Credits)
This survey course is designed for students interested in developing a broad understanding of inclusion/mainstreaming students with disabilities and special health care needs in classroom settings. It includes an examination of the general education teacher's role working with a team of collaborating professionals and family members of students with disabilities. This course also includes the professional, ethical, and legal foundations of special education services and inclusive practices that guide school policy and procedures. Students will be introduced to the categories of disabilities and the classification process, and state and federal special education laws and regulation. Effective practices such as differentiated instruction and accommodations, mainstreaming, inclusion, least restrictive environment, and the individualized education program (IEP).

EDSP 3005 Managing the Environment for Students with Disabilities (4 Credits)
The purpose of this course is to explore the theories and strategies of behavior management for students with disabilities in the pk-12 classroom setting. It covers broad conceptual and practical perspectives in addressing challenging behavior and behavior analysis. Topics include developing a positive atmosphere, using space effectively, time management, student accountability, behavioral intervention plans and functional behavior analysis, discipline models and/or specific techniques that promote the development of positive social interaction skills in classroom settings. Please note: This course was formerly EDST 3005 Classroom Management K-6 Prerequisites: EDSP 2025 Introduction to Special Education, EDSP 3025 Curriculum and Instruction for Students With Disabilities.

EDSP 3025 Curriculum and Instruction for Students with Disabilities (4 Credits)
This course will introduce evidence-based components to support the development of curricula and the selection of appropriate instructional strategies for teaching prek-12 students with the full range of disabilities. Students will be presented with characteristics of the range of disabilities, and specific instructional strategies and methods linked to learning processes and human development. Students will approach curriculum and instruction through a Universal Design for Learning/neurodiverse perspective including how to provide differentiated instruction and supports that enhance the learning of all students. Prerequisites: EDSP 2025 Intro to Special Education.

EDSP 3123 Autism Spectrum Disorder in Education (2 Credits)
This course offers a practical approach to understanding Autism Spectrum Disorders (ASD) including assessment and progress monitoring, and a variety of practices that support inclusion of children in classroom environments. Students will review both theory and evidence-based practices as the foundation for success when working with young children with ASD, including the principles of mainstreaming, inclusion, individualized educations program (IEP), and Positive Behavioral Intervention Supports (PBIS).

EDSP 4000 Assessment, Diagnosis and Evaluation of Student with Disabilities (4 Credits)
This study focuses on understanding the role of assessment and its applications to the identification of learners with disabilities. This includes the process of identifying, assessing, and diagnosing students with disabilities, including how to select and administer appropriate tests, interpret their results, and develop individualized education plans. This study will include practices of assessment, diagnosis and evaluation such as: planning, developing, and implementing Individualized Education Plans (IEPs) and Individualized Family Service Plans (IFSPs), methods of monitoring learners' progress through formal and informal evaluation approaches to diagnosis and remediation of specific learning problems, and the assessment of cognitive development, motor skill development, language development and communication skills. Students will practice using information gathered through assessment and analysis to plan or modify instruction. Prerequisites: EDSP 2025 Intro to Special Education, EDSP 3025 Curriculum & Instruction for Students with Disabilities.

EDST: Educational Studies (Undergraduate)

EDST 1005 Introduction to Teaching (2 Credits)
This course will introduce students to the profession of teaching and education. Students will be encouraged to think more deeply, more broadly, and more systematically about the role of teachers and explore teaching practices, various contexts of teaching and learning, as well as contemporary issues that relate to the teaching profession.

EDST 1122 Introduction to Digital Literacy (4 Credits)
Literacy in the 21st Century has gone beyond the ability to read and write. Cornell University defined digital literacy as, "the ability to find, evaluate, utilize, share, and create content using information technologies and the Internet (Cornell University, The Digital Literacy Project, n.d.)." This introductory course will examine digital literacy in the 21st Century, including, what it means to be digitally literate, key concepts in digital and information literacy, how to evaluate sources on the Internet, organizing information, presenting information, and effective research skills in the Internet age for educators. Students will contrast different types of literacy, explore digital citizenship, and evaluate different types of information from an educational perspective.
Attributes: Liberal

EDST 1996 Special Topics in EDST (2-4 Credits)
The content of this course will vary by term and section. Students may repeat this course for credit as long as the topic differs. Please refer to the Term Guide for course topic offerings.
Attributes: Liberal

EDST 1997 Special Topics in Educational Studies (2-4 Credits)
The content of this course will vary by term and section. Students may repeat this course for credit as long as the topic differs. Please refer to the Term Guide for course topic offerings.

EDST 1998 Individualized Studies in Educational Studies (EDST) (1-8 Credits)
Students have the opportunity to develop individualized studies with their mentor in Educational Studies (EDST). Please contact your mentor/advisor for more details.

EDST 2005 Schooling in America (4 Credits)
This course provides students with the sociological and historical background necessary to understand schooling in America. This course explores the various forms of schooling such as public, private, public schools, and others; education reforms and innovations that are transforming schools; and the role of our educational system in a democratic society. This course was previously SOC-282244 Schooling in America. This course is also cross listed as SOSC 2005. Credit cannot be given for both.
Cross-listed with SOSC 2005.
Attributes: Liberal

EDST 2006 School Age Programs: Introduction (4 Credits)
This introductory-level course will help students develop the skills necessary to work as staff or administrator in the many modalities of school-age care. This course covers professionalism in school-age care, predictable development of the school-age child, positive behavior management strategies, safety, health and nutrition. Competencies needed for excellence as a school age childcare professional are discussed. This course supports and enhances critical thinking, problem solving, self-reflections, self-management and provides a foundation for theory and application.
Attributes: Liberal

EDST 2010 Children's Literature Across the Curriculum (4 Credits)
This course offers students an opportunity to develop thematic activities based on quality children's literature that extend into content areas such as math, science, creative arts, technology, and/or social studies. Topics may include different approaches to integrating literature, lesson plans, the application of National Standards, family literacy, the differentiation of instruction for individual learners, and critical literacy. Prerequisites: Introduction to Children's Literature (or equivalent).

EDST 2998 Individualized Studies in Educational Studies (EDST) (1-8 Credits)
Students have the opportunity to develop individualized studies with their mentor in Educational Studies (EDST). Please contact your mentor/advisor for more details.

EDST 3006 School-Age Programs: Curriculum and Program Management (4 Credits)
This advanced-level course goes beyond the basic care of children in out-of-school environments and into curriculum development. Students will go on to study the challenging aspects of program planning, working with families, and how to evaluate and manage a high-quality school-age program. Competencies needed for excellence as a school age childcare professional are discussed. This course will help students apply theory and application necessary to manage to school-age programs.

EDST 3008 LGBTQ+ Youth & Education (4 Credits)
In this course, we will explore key issues that LGBTQ+ youth face within the P-12 U.S. educational system, and ways in which teachers and advocates are striving to make education more inclusive and welcoming to LGBTQ+ students. Issues may include: the risk of suicide for LGBTQ youth; history of LGBTQ+ inclusivity in public education in the U.S.; supportive movements in LGBTQ education; the role of educators and support staff; intersections of race, class, gender and sexuality and their impact on educational and health outcomes for students. In this course we will explore both the challenges that educators face and successes to date providing welcoming and inclusive educational experiences for LGBTQ+ youth. LGBTQ+ Youth and Education is a companion course to the 4 credit GSST 2005 Introduction to LGBTQ+ Studies; students may enroll in both courses. Introductory level course in LGBTQ+ Studies, or Women, Gender and Sexuality Studies is strongly recommended. Cross-listed with GSST 3008.
Attributes: *Diversity Gen Ed, Liberal

EDST 3012 Deaf Education in Bilingual Communities (4 Credits)
This course recognizes the fundamentals of general, special, and bilingual education and how they are infused into Deaf education. It will acquaint students with current issues, trends, and research in the education of Deaf and hard of hearing learners of all ages, including historic and current objectives, techniques, and results. The cultural, historical, philosophical, psychological, linguistic and social aspects of the Deaf community will also be addressed from the educational perspective. Students are challenged to rethink their conceptualization of "Deaf education" as well as "general education" based on their perceptions of their own cultural dimensions. Please note: This course is open only to participants in the ASL-English Interpretation Program (AEIP) through SUNY Empire State College and CUNY LaGuardia Community College.
Attributes: Liberal

EDST 3015 Curriculum Instruction & Assessment (4 Credits)
In this course students will explore theories of curriculum design and study examples of how they are applied in instructional practice in elementary, middle and/or high school settings. They will learn how to align learning outcomes with instruction and how to utilize assessment strategies such as informal and formal assessments, formative and summative assessments, portfolios, standardized testing, outcomes, and/or practical applications. Consideration is given to how different contexts and characteristics of learners influence design. This course was previously EDU-234144. Prerequisites: Learning Theories EDST 3045 or equivalent.

EDST 3020 Diversity in Educational Settings (4 Credits)
Students will develop an awareness of diversity, equity, inclusion and social justice through the lens of culture, race, gender, religion, economic class, family structures, abilities, and others. Topics include the ways children and families from various cultures are affected by, and effect, schools and programs; the role of the staff in creating open and inclusive environments; and/or the link between multicultural and environmental issues in educational settings.
Attributes: *Diversity Gen Ed, Liberal

EDST 3021 Language, Literacy, & Learning for School-age Children (4 Credits)
Students will explore the processes of language and literacy as they emerge in diverse educational settings with emphasis on theoretical approaches that support the learning process for learners. Topics are varied but focus on upper primary and typically include vocabulary acquisition, the development of reading, and writing competency, investigating instructional techniques including: the integration of language and literacy across all curricular areas; creating environments that support children's language and literacy learning within different cultural contexts, and theoretical frameworks.
Attributes: Liberal

EDST 3030 Historical Foundation of American Education (4 Credits)
This course focuses on the evolution of education in the United States beginning in colonial times. The student will examine the history of education and the historical evolution of curriculum and instruction in American schools. Topics include the legal and judicial issues both at the national and state level, the economics and politics of schooling, and the significant social and cultural challenges emerging in our country.
Attributes: Liberal

EDST 3036 Legal and Ethical Dimensions of Technology for Educators (2 Credits)
Our two-credit liberal learning course supports the Educational Area of Study Guideline in Professional Standards. It is designed to assist educators in developing a greater understanding of the ways in which technology, especially computer technology, affects our views of legal and ethical questions relating to intellectual property, individual liberty, and personal privacy. An emphasis will be placed on application in the K12 classroom, but all educators are encouraged to participate and apply the knowledge to their own settings. This course will cover various ways in which technology impacts education, from political decisions to student safety. Course participants have the opportunity to research areas such as cyberethics, cyberbullying, online education, and social media and to apply their findings to individualized projects and journal reflections.
Attributes: Liberal

EDST 3037 Culturally Responsive Engagement in Home, School, and Community (2 Credits)
This course will include a study of the relationship between the child, family, school, and the community with an emphasis on culturally responsive family engagement in educational settings. Topics typically include barriers to family engagement, informal and formal communication, developing partnerships, and innovative approaches to engaging families in their children's learning in school and at home. Family involvement in education and parent education will be emphasized.

EDST 3040 Learning Styles (2 Credits)
The purpose of the course is for the learner to understand how diverse learning styles impact the life of others as well as their own life. The concept 'learning styles' is a broad frame within which to include diverse paradigms for different ways of knowing. Learners will analyze learning style concepts from Western, Eastern, and Indigenous learning styles as well as learning styles within different learning contexts. Please note: This course does not meet the area of study guideline for learning theories. Please note: This course may be used for educational planning credit with mentor approval. This course was previously EDU-233222 Learning Styles.
Attributes: Liberal

EDST 3045 Learning Theories (4 Credits)
The purpose of this course is to reinforce the major learning theories and allow the student to identify characteristics associated with each theory. Students will examine the human capacity for learning and learn how to create assessments that are aligned with the content, content delivery, and the theoretical framework upon which the content delivery was based.   Prerequisites: HUDV 3015 Child Development or equivalent.
Attributes: Liberal

EDST 3050 Reflective Learning (2 Credits)
This course will help students better understand how adults learn and the importance of reflection to the learning process. Students will review traditional learning theory (Knowles) and contemporary learning theory (Zull) that investigate the importance of self-reflection, the social nature of learning, biological bases for learning, and emotional aspects of learning. The purpose of the course is to enable students to both learn about learning and apply concepts to become more aware of themselves as learners (and thus more able to direct their own learning). Please note: This course may be used for educational planning credit with mentor approval. This course was previously EDU-233022 Reflective Learning.
Attributes: Liberal

EDST 3065 Utilizing Technology in the Classroom (4 Credits)
This course will examine specific methods for utilizing technology (hardware, software, and networks) in educational settings. Students will research the various forms of electronic and digital technology used in today's schools, explore how to integrate it into teaching and learning practice, and learn to evaluate its success or failure in applied settings. Topics may include integrating technology into lesson plans, the Internet safety, and cyberbullying. Prerequisites: At least 1 course in curriculum development such as EDST 3015 Curriculum, Instruction, and Assessment.

EDST 3127 Models of Instructional Design (4 Credits)
This course will provide an overview of significant instructional design models used in training and educational settings. Students will explore each stage of the instructional design process and integrate those concepts into a practical application utilizing instructional technology. Different modes of learning will be explored. Prerequisites: EDST 3045 Learning Theories or equivalent.

EDST 3996 Special Topics in EDST (2-4 Credits)
The content of this course will vary by term and section. Students may repeat this course for credit as long as the topic differs. Please refer to the Term Guide for course topic offerings.
Attributes: Liberal

EDST 3997 Special Topics in EDST (2-4 Credits)
The content of this course will vary by term and section. Students may repeat this course for credit as long as the topic differs. Please refer to the Term Guide for course topic offerings.

EDST 3998 Individualized Studies in Educational Studies (EDST) (1-8 Credits)
Students have the opportunity to develop individualized studies with their mentor in Educational Studies (EDST). Please contact your mentor/advisor for more details.

EDST 4005 Adults as Learners: Theories & Strategies (4 Credits)
This course provides an understanding of adults as learners, making use of key learning theories from cognitive, emotional, and metacognitive perspectives. It is appropriate for students who are (or will be) involved with adult learners in academia, communities, or business; and who, as adult learners, wish to reflect on their personal process. The course focuses on approaches to adult learning and learning strategies associated with each approach. Prerequisites: HUDV 1015 Human Development or equivalent Please note: This course may be used for educational planning credit with mentor approval. This course was previously HDV-283184 Adults as Learners: Theories and Strategies.
Attributes: Liberal

EDST 4010 Human Learning: A Developmental Approach (4 Credits)
This course will examine developmental learning from its distant origins to the present. It surveys multiple perspectives (historical, biological, linguistic/symbolic, cognitive, and social/emotional) to ascertain various aspects of developmental and educational learning. Major theories will be discussed, with an emphasis on language and learning acquisition from birth through adulthood. Students will learn how behaviorism, constructivism, and other developmental lenses have contributed to the knowledge base of learning theories. Key points from learning theories will be used to help students understand developmental and educational theories and how to apply them to their practice. Note: This course may be used for educational planning credit with mentor approval.
Attributes: Liberal

EDST 4015 Teaching Critical Literacy (4 Credits)
Critical literacy is the ability to read texts in an active, reflective manner in order to better understand power, inequality, and injustice in human relationships. The purpose of this course is to help current and future teachers incorporate critical literacy regarding race, class, and gender as they plan literacy activities for children. Through texts and articles, students will explore issues of race, how it shapes our society, and how we handle those issues in the classroom. Students will explore how their choices can unconsciously marginalize certain groups of people as they integrate their knowledge of teaching, learning, and instructional design, and explore how the curricular choices they make can work both for and against them. Prerequisites: EDST 3045 Learning Theories (or equivalent), EDST 3015 Curriculum, Instruction, and Assessment (or equivalent), at least 1 course in written expression.
Attributes: Liberal

EDST 4020 Teaching Methods: Mathematics (4 Credits)
The purpose of this study is to examine the latest research and methods for mathematics instruction in elementary and/or middle school. Students will investigate how children develop number sense and skills in mathematical computation. Students will further investigate manipulatives and other instructional materials used to maximize the development of math skills. Finally, students will explore goals, objectives, and assessments in accordance with national and state standards. Please note: This study has not been approved and is not valid for future New York State certification. Prerequisites: At least 2 general education courses in mathematical processes.

EDST 4025 Teaching Methods: Reading in Elementary Schools (4 Credits)
This study examines the theories and methodologies of teaching reading in elementary schools. This course introduces the student to state and national standards related to reading and the use of expository and informational texts in elementary classroom settings. Students will explore a variety of techniques and assessment strategies. Additional topics may include literal understanding, text complexity, and close reading. Please note: This study has not been approved and is not valid for future New York State certification. Prerequisites: EDST 3045 Learning Theories, EDST 3015 Curriculum, Instruction, Assessment (or equivalent), and at least 1 course in written expression.

EDST 4030 Teaching Methods: Science (4 Credits)
Discover ways to engage students in learning activities that deepen their curiosity for science! The purpose of this study is to examine the latest research and methods for science instruction in elementary and/or middle school. Students will review scientific concepts and explore inquiry-based approaches that make teaching science fun for everyone. Students will explore goals, objectives, and assessments in accordance with national and state standards. Please note: This study has not been approved and is not valid for future New York State certification. Prerequisites: At least 2 general education courses in scientific processes.

EDST 4035 Teaching Methods: Writing in Elementary Schools (4 Credits)
This course introduces the best practices for teaching writing process in an elementary classroom. Students will be introduced to state and national standards related to writing such as composing narrative, argument, and informational texts. Components of the writing process will be explored from generating ideas and publication to writing across all disciplines for real purposes. Students will explore a variety of methods utilized in writing workshop such as guided writing, shared writing, and independent writing. Summative and formative assessment strategies will be examined. Please note: This study has not been approved and is not valid for future New York State certification. Prerequisites: EDST 3045 Learning Theories, EDST 3015 Curriculum, Instruction, and Assessment (or equivalent), and at least 1 course in written expression.

EDST 4040 Technology in Mathematics Education (4 Credits)
This course is designed to help students gain competence in selection, evaluation, and utilization of various instructional technologies in mathematics education. Application of new technologies to teaching and learning will be emphasized along with performance-based activities in instructional design for middle school and/or high school mathematics. This course will provide the student with an understanding of learning models and the impact technology can have toward enhancing and enriching the learning process. The use of technology tools for solving a variety of problems, evaluating student performance, and implementing blended learning systems will also be explored. Prerequisites: At least 2 general education courses in mathematical processes (such as MATH 1040 Algebra) are required. Recommended courses: Precalculus or higher. This study has not been approved and is not valid for future New York State certification.

EDST 4122 Measuring Learning (4 Credits)
In this study, students will review the types, purposes, procedures, uses, and limitations of assessment strategies and techniques, including formative and summative, and their implications for course-based assessment. The characteristics and uses of both formal and informal assessment instruments and procedures will be studied with emphasis on principles and practices for effective objective and standards-based instruction, including online learning environments. Prerequisites: EDST 3127 Models of Instructional Design.

EDST 4998 Individualized Studies in Educational Studies (EDST) (1-8 Credits)
Students have the opportunity to develop individualized studies with their mentor in Educational Studies (EDST). Please contact your mentor/advisor for more details.

EMGT: Emergency Management (Undergraduate)

EMGT 1998 Individualized Studies in Emergency Management (EMGT) (1-8 Credits)
Students have the opportunity to develop individualized studies with their mentor in Emergency Management (EMGT). Please contact your mentor/advisor for more details.

EMGT 2005 Introduction to Emergency Management (4 Credits)
This course introduces the student to the fundamental principles of emergency management and the related practices and policies of the profession. Concepts such as mitigation, preparedness, response, and recovery are covered as well as the relationship among federal, state and local agencies who share responsibility in managing emergencies. Further, the social, political and economic implications of disasters are explored.

EMGT 2998 Individualized Studies in Emergency Management (EMGT) (1-8 Credits)
Students have the opportunity to develop individualized studies with their mentor in Emergency Management (EMGT). Please contact your mentor/advisor for more details.

EMGT 3015 Emergency Communications (4 Credits)
This course provides students with an understanding of the fundamentals of communications and their application in emergency situations. Students will examine the use of oral and written communications in various levels of emergency and crisis situations. Prior to taking this course, students should be familiar with the fundamental principles of emergency management -- such as mitigation, preparedness, response and recovery -- and the relationship among federal, state and local agencies that share responsibility in managing emergencies. This course was previously CHS-263824 . Prerequisites: EMGT 2005 or equivalent.
Attributes: Liberal

EMGT 3020 Hazardous Materials & Public Awareness (4 Credits)
This study explores various characteristics of hazardous materials which fall on the BNICE spectrum, i.e. biological, nuclear, incendiary, chemical and explosives. These hazardous materials can be physically altered and used as Weapons of Mass Destruction. By studying the chemical and physical properties of hazardous materials, students discover exactly how and why the products are harmful and the range of outcomes that occur when someone is exposed to these substances. Students will learn that the release of hazardous material, whether accidental or intentional can be very harmful to the environment and people. Prerequisites: Introductory Biology or Chemistry
Attributes: Natural Science Gen Ed, Liberal

EMGT 3025 Incident Management & Leadership (4 Credits)
This study explores strategies and tactics used by skilled practitioners and emergency management personnel to protect life and property in their communities. The management of incidents using the Incident Command System, a nationwide standard that is federally mandated, will be explored. Since great managerial qualities often partner with great leadership skills, students will study principle-centered management and be exposed to the necessary methods to make effective decisions in extreme situations.
Attributes: Liberal

EMGT 3030 Leadership & Management in Disaster Response (4 Credits)
This course will help students deepen their managerial skills and leadership abilities by studying and applying leadership and management frameworks to situations and decisions that arise in the course of catastrophic events. Students will learn how to balance the needs for flexibility vs. control and the internal vs. external orientation to enhance the effectiveness of their organization in responding to events. Topics include historical perspectives of management in disasters, management of public resources, information systems, and command systems, understanding managerial styles and leadership strategies, and the elements of decision-making in extreme situations. NOTE: This course was previously offered as Organization and Management of Disaster Response. Students who have taken 264304, should not enroll in Leadership and Management in Disaster Response. This course was previously CHS-264304 Leadership and Management in Disaster Response. Prerequisites: MGMT 1005, or equivalent experience in some aspect of Emergency Management.

EMGT 3035 Managing Biological Terrorism as a Public Health Emergency (4 Credits)
The purpose of this course is to examine the roles and responsibilities of hospitals and public health agencies in planning for, responding to, and recovering from natural and human-made disasters, including bioterrorism. Depending on student's concentration, an introductory course, or equivalent, in emergency management, health administration, public health, public administration or public policy should be taken prior to taking this course. This course was previously CHS-264834 Managing Bioterrorism and Public Health Emergencies. Prerequisites: .
Attributes: Liberal

EMGT 3045 Mass Disasters: Implications for Public Policy (4 Credits)
This course explores the consequences of federal, state, and local policy decisions on the way that emergency managers carry out their work. An understanding of these consequences can help the emergency manager or policy analyst be an advocate for policies that help communities mitigate, plan and prepare for, respond to, and recover from natural and human-caused disasters. Students will draw policy lessons from studying a variety of disasters, large and small, that have occurred over the past several decades. Topics include federalism and inter-governmental relations and their connection to disaster planning and response, community resilience in recovery, and the legal and ethical obligations of the emergency management profession, among others. This course was previously CHS-264854 Mass Disasters: Implications for Public Policy. Students must have taken EMGT 2005 Introduction to Emergency Management or equivalent; and POLI 2100 The U.S. Political System or PAFF 2132 Introduction to Public Policy or equivalents.
Attributes: Liberal

EMGT 3050 Risk Analysis & Hazard Mitigation (4 Credits)
This course integrates the strategic planning of an organization or municipal entity with the risk assessment and mitigation process. Risk analysis and hazard mitigation can be applied to a wide range of functions and activities. Several special applications, however, are uniquely significant to organizations that, in the course of delivering their services to the public, cope with high-risk situations as an integral component of their missions. It is a fundamental tenet of risk management that it is an ongoing, evolving, regularly refreshed and continuously improved process. Students will develop an understanding of the complex evolution of risk management as both a concept and a physical fact. This course was previously CHS-264424 Risk Analysis and Hazard Mitigation.
Attributes: Liberal

EMGT 3996 Special Topics in Emergency Management (4 Credits)
The content of this course will vary by term and section. Each offering will be dedicated to a detailed investigation of a focused theme, idea, or problem associated with Emergency Management. Please refer to the Term Guide for course topic offerings. Students may repeat this course for credit as long as the topic differs.
Attributes: Liberal

EMGT 3997 Special Topics in Emergency Management (2-6 Credits)
The content of this course will vary by term and section. Each offering will be dedicated to a detailed investigation of a focused theme, idea, or problem associated with Emergency Management. Please refer to the Term Guide for course topic offerings. Students may repeat this course for credit as long as the topic differs.
Attributes: Liberal

EMGT 3998 Individualized Studies in Emergency Management (EMGT) (1-8 Credits)
Students have the opportunity to develop individualized studies with their mentor in Emergency Management (EMGT). Please contact your mentor/advisor for more details.

EMGT 4122 Disaster Intervention (4 Credits)
This course will explore various world wide catastrophic events and examine the means and methods brought to bear in response to these occurrences. Additionally, the politics of intervention will be explored since this complicated process usually determines the extent of the government's role, illustrated by the response of various public and private agencies. This course will explore various world wide catastrophic events and examine the means and methods brought to bear in response to these occurrences. Additionally, the politics of intervention will be explored since this complicated process usually determines the extent of the government's role, illustrated by the response of various public and private agencies.
Attributes: Liberal

EMGT 4998 Individualized Studies in Emergency Management (EMGT) (1-8 Credits)
Students have the opportunity to develop individualized studies with their mentor in Emergency Management (EMGT). Please contact your mentor/advisor for more details.

ENSC: Environmental Science (Undergraduate)

ENSC 1000 Earth Science (4 Credits)
The natural physical environment undergoes constant change that impacts human populations and natural ecosystems around the world. To better understand the dynamic interactions driving these patterns of change, Earth scientists employ a system science approach to the study of the dynamic interactions within and among the 4 spheres of the Earth: geosphere, hydrosphere, atmosphere, and biosphere. In this study, students examine Earth system dynamics including the rock cycle, tectonic activity, stream and ocean dynamics, and weather and climate systems. Students explore methods by which geological and climate histories have been reconstructed to establish a record of long term environmental change. This course contains elements which rely on vision and motor skills to complete. If you have a visual or motor impairment and are considering registering for this course, it is recommended that you reach out to Accessibility Resources and Services (Disability.Services@sunyempire.edu) in advance of registration to determine if this course is appropriate and what alternatives may be available.
Attributes: Natural Science Gen Ed, *Natural Science Gen Ed, Liberal

ENSC 1002 Energy: The Issues & the Science (4 Credits)
This course will discuss fundamental energy science principles. Students will examine the origin and flow of energy through the system, what it does, and its ultimate fate. Topics will include origins of energy resources, and the science of energy. Fundamental energy resources such as fossil fuels, nuclear, geothermal, tidal, solar, and wind will be examined along with their issues and related technologies. The course will look at current issues in energy involving economics, public policy, and environmental concerns through the scientific method. Students will be challenged to critically examine the use of energy in our society. This course was previously SMT-271544 Energy: The Issues and the Science.
Attributes: Natural Science Gen Ed, *Natural Science Gen Ed, Liberal

ENSC 1004 Global Climate Change (4 Credits)
There is little doubt that the Earth's climate is changing due to the influence of human activities. In this course, students will explore the evidence that climate change is occurring, how human activities have affected this process, the primary forces influencing the Earth's climates, and what steps can be taken to adapt to or mitigate these changes. This course requires students to examine, critique, and analyze global climate change using the scientific method and disciplinary approaches from social, political, and economic studies. They will also research climate solutions requiring analysis, synthesis, and evaluation. This course was previously SMT-272114 Global Climate Change.
Attributes: Natural Science Gen Ed, *Natural Science Gen Ed, Liberal

ENSC 1006 Introduction to Ecology & Sustainability (4 Credits)
This study provides an introduction to the principles of ecology, and an overview of biological adaptation and sustainable development. Emphasis will be on using the scientific method to learn about the organization and function of ecosystems, the interactions of human social systems with them, and how social institutions and processes contribute to, or conflict with, sustainability. Specific topics will include general ecology, population ecology, energy, pollution, global climate change, conservation, and land use issues. The course will integrate longstanding ecological principles with a more recent focus on achieving ecologically sustainable development. This course was previously SMT-271504 Introduction to Ecology and Sustainability.
Attributes: Natural Science Gen Ed, *Natural Science Gen Ed, Liberal

ENSC 1200 Environmental Science (4 Credits)
This study provides an introduction to the theories, principles, and concepts which are broadly related to the functioning of natural environmental systems and which are essential for understanding specific issues related to human use of resources and human interaction with the environment. The topics covered include the laws of matter and energy; ecosystems; evolutionary theory; species characteristics and speciation; population biology; climate and biomes; and air, water, soil, and energy resources. This course contains elements which rely on vision and motor skills to complete. If you have a visual or motor impairment and are considering registering for this course, it is recommended that you reach out to Accessibility Resources and Services (Disability.Services@sunyempire.edu) in advance of registration to determine if this course is appropriate and what alternatives may be available.
Attributes: Natural Science Gen Ed, *Natural Science Gen Ed, Liberal

ENSC 1998 Individualized Studies in Environmental Science (ENSC) (1-8 Credits)
Students have the opportunity to develop individualized studies with their mentor in Environmental Science (ENSC). Registration for this class must be approved by the student's mentor.

ENSC 2000 Principles of Environmental Sustainability (4 Credits)
This is an interdisciplinary study designed to introduce key concepts of environmental sustainability. Students will be introduced to the definitions of sustainability, systems thinking, and the skills needed to analyze human-environment interactions from a sustainability perspective. Students will learn how the biophysical world works, covering topics such as: ecosystem organization and functions; material cycles; ecological diversity and complexity; and the rate of ecological change. They will also consider the environmental impacts of human activities such as agriculture, fishing, extraction, manufacturing and building and propose sustainable solutions. The learning activities emphasize real-world problem-solving and critical thinking.
Attributes: Natural Science Gen Ed, *Natural Science Gen Ed, Liberal

ENSC 2998 Individualized Studies in Environmental Science (ENSC) (1-8 Credits)
Students have the opportunity to develop individualized studies with their mentor in Environmental Science (ENSC). Registration for this class must be approved by the student's mentor.

ENSC 3000 Meteorology (4 Credits)
In this study, students will explore meteorological processes and phenomena as they build upon their basic knowledge of atmospheric science: physical, chemical, and biological characteristics of the atmosphere, air masses, cloud formation, weather patterns, severe weather, global climates, and geological/historical patterns of climate change. Students will study flows of energy and moisture which drive global, regional, and local weather patterns. They will explore ways weather is forecasted-the methods and technologies behind the analysis of atmospheric conditions and weather prediction. They will analyze patterns and dynamics of severe weather including: tornadoes, hurricanes, typhoons, flooding, drought, heat waves, and blizzards. Prerequisites: Earth Science, Introduction to Geology, or Environmental Science. Foundational knowledge about Earth's system processes gained in a lower level earth science or atmospheric science course.
Attributes: Liberal

ENSC 3002 Global Climates (4 Credits)
The Earth's climates provide the temperature and moisture contexts for life on Earth. In this course, students will study ways the Earth's astronomical position and the atmosphere's interactions with land surfaces, oceans, and aquatic/terrestrial organisms create the global climates to which entire ecosystems have adapted. Students will apply methods of climate classification and climate data analysis. Students will explore methods by which climate has changed throughout geological time and examine current trends in climate change. Particular emphasis will be placed on the impacts of climate change on weather patterns (trends towards the extremes), species/species populations, water availability, and food security. Foundational knowledge in the natural sciences is required. This course contains elements which rely on vision and motor skills to complete. If you have a visual or motor impairment and are considering registering for this course, it is recommended that you reach out to Accessibility Resources and Services (Disability.Services@sunyempire.edu) in advance of registration to determine if this course is appropriate and what alternatives may be available. Prerequisites: Earth Science, Introduction to Geology, or Environmental Science, or equivalent.
Attributes: Liberal

ENSC 3004 Dendrology (2 Credits)
This course is an applied study in tree identification / classification (taxonomy) and habitat interpretation (forest composition and structure). Students will learn and apply diagnostic skills using a dichotomous key (focus on use of leaves, stems, and twigs in identification). They will explore the relationships between species characteristics-morphology, life history, etc.-and population and community patterns of distribution on a regional and global scale. Prerequisite (must complete before registering): Foundational knowledge gained in an introductory biology, environmental science, or ecology course, or equivalent.

ENSC 3006 Natural Disasters (4 Credits)
As human populations continue to increase, the probability of human encounters with natural hazards such as hurricanes, earthquakes, volcanic eruptions, flooding, mudslides, tornadoes, forest fires, blizzards, and tsunamis, also increases. This course explores the scientific processes behind natural disasters and examines the way disasters have impacted human populations--environmentally, culturally, economically, and politically--throughout history. The course heightens students' awareness of the impacts of more recent natural disasters on current populations around the world. Students explore ways inequities related to race, ethnicity, gender, access, and economy affect characteristics of disaster impact and apply their research to develop sustainable mitigation and recovery strategies. Highly Recommended (not required): Students should demonstrate proficiency in writing or critical thinking skills. This course contains elements which rely on vision and motor skills to complete. If you have a visual or motor impairment and are considering registering for this course, it is recommended that you reach out to Accessibility Resources and Services (Disability.Services@sunyempire.edu) in advance of registration to determine if this course is appropriate and what alternatives may be available.
Attributes: Natural Science Gen Ed, *Diversity Gen Ed, *Natural Science Gen Ed, Liberal

ENSC 3008 National Parks of the US: Geology Ecology & History (4 Credits)
In 1916, the US government established the National Park Service in an effort to conserve unique and breathtaking landforms and ecosystems for the enjoyment of future generations. In this study, students explore North American geology, physical geography, and ecology through their examination of the national parks. Students will compare approaches to the conservation and management of natural environments. They will consider possible answers to the paradox: How do conservationists and park managers preserve natural areas which are constantly changing? Prior to taking this course, students must have taken an introductory earth science or environmental science study, or equivalent College writing or critical thinking study, or equivalent.
Attributes: Natural Science Gen Ed, *Natural Science Gen Ed, Liberal

ENSC 3200 Urban Ecology (4 Credits)
Over half of the world's human population resides in urban areas. Within this context, research focused on urban socio-ecological systems becomes increasingly important; however, urban areas present natural and social scientists with unique challenges when conducting research. In this study, students will explore the broad, interdisciplinary field of Urban Ecology and the environmental issues and challenges facing growing urban populations. Examples of possible topics to be explored include: air quality, environmental justice, food accessibility, fragmentation, green spaces, light pollution, microclimates, sustainability, transportation, waste management, water resources, and urban ecosystems. Prerequisite (must complete before registering): An introductory environmental science or urban studies study, or equivalent.
Attributes: *Natural Science Gen Ed, Liberal

ENSC 3202 Forest Ecology (4 Credits)
Forest Ecology is a branch of the ecological sciences which focuses on species, species populations, and species communities that inhabit forest ecosystems. Students examine forest ecosystem dynamics, as they explore forest ecosystems around the world. Students consider the impacts human activities have had on global forests, in terms of conservation, restoration, and deforestation. Topics covered include biodiversity, climate and climate change-influences on forest distribution, dendrochronology, ecological disturbance, endemism, extinction, evolution, fire ecology, fragmentation and urbanization, invasive species, migration, soil ecology, sustainability, and vegetation dynamics. Prerequisites: Biology I, Biology of Ecosystems, Environmental Science, Ecology, or equivalent.
Attributes: Liberal

ENSC 3300 Soil Science (4 Credits)
Students will build upon their basic knowledge of soil forming processes, soil properties, and soil classification. Students will explore the many ways plants in natural and managed ecosystems interact with the soil upon which they depend for sustenance and support. Students will examine the physical properties of soils which promote or inhibit plant growth and regeneration and the pathways through which water and nutrients cycle in the environment. Students will also consider the impacts human activities have on soil quality, health, and resiliency, with particular emphasis on degradation/erosion, restoration/remediation, and the development of sustainable soil management strategies. Foundational knowledge in the area of Earth's systems gained in a lower-level earth or environmental science course is required. This course contains elements which rely on vision and motor skills to complete. If you have a visual or motor impairment and are considering registering for this course, it is recommended that you reach out to Accessibility Resources and Services (Disability.Services@sunyempire.edu) in advance of registration to determine if this course is appropriate and what alternatives may be available. Prerequisites: Earth Science (ENSC 1000), Environmental Science (ENSC 1200), Introduction to Geology (GEOL 1200), or equivalent.
Attributes: Liberal

ENSC 3302 Sustainable Living: Food & Energy (4 Credits)
Sustainability has been a major topic of public discussion and debate in recent years. At the same time, media headlines regularly grab our attention to current national health issues such as obesity. This upper level course combines both topics by exploring how our eating habits and current energy consumption impact the natural world. Students will become familiar with current trends to move communities to a more sustainable way of living. Topics will include: natural resources (focused on land and energy); why sustainability; food systems; energy and transportation choices; challenges and opportunities. Foundational knowledge about environmental systems gained in a lower level earth science or environmental science course. Prerequisites: Environmental Science (ENSC 1200) or equivalent.
Attributes: Liberal

ENSC 3304 Environmental Health (4 Credits)
Environmental Health examines how the environment can impact people, including chemical contamination by pesticides, industrial discharges of toxicants, hazardous wastes, diseases, radiation, air pollution, water pollution, and food safety. The course will discuss relevant laws, regulations, and policies. Students will discuss: what can be done to minimize the impacts of environmental hazards on public health; how human activities are having large-scale impacts on the Earth through global climate change; and, practical guidelines for occupational health and safety. This course is appropriate for students interested in furthering their knowledge on issues related to health and environmental hazards regardless of their concentration. Foundational knowledge in biology as well as earth and environmental science are necessary to understand basic concepts underlying the fate and transport of chemicals and diseases. Prerequisites: Biology I with Lab (BIOL 1200), Biology II with Lab (BIOL 1201), AND Introduction to Geology (GEOL 1200) or Global Climate Change (ENSC 1004) or Environmental Science (ENSC 1200) or equivalents.

ENSC 3600 Field Methods (4 Credits)
This study provides students with practical experience conducting independent fieldwork on research topics related to environmental geosciences. Students participate in data collection and data analysis and explore processes of science research and presentation. Examples of field research topics related to the analysis of natural environmental systems from which students can select include, but are not limited to: air quality, climate, ecosystem dynamics, geology, invasive species, soils, stream dynamics, water quality, and weather. This course contains elements which rely on vision and motor skills to complete. If you have a visual or motor impairment and are considering registering for this course, it is recommended that you reach out to Accessibility Resources and Services (Disability.Services@sunyempire.edu) in advance of registration to determine if this course is appropriate and what alternatives may be available.
Attributes: Liberal

ENSC 3996 Special Topics in ENSC Special Topics in ENSC Special Topics in ENSC (2-4 Credits)
Attributes: Liberal

ENSC 3998 Individualized Studies in Environmental Science (ENSC) (1-8 Credits)
Students have the opportunity to develop individualized studies with their mentor in Environmental Science (ENSC). Registration for this class must be approved by the student's mentor.

ENSC 4200 Contemporary Environmental Issues (4 Credits)
This interdisciplinary course examines a broad range of contemporary global environmental issues, such as biodiversity, pollution, population growth, and global warming, and focuses on how those big issues might affect us locally. It develops students' environmental literacy and enables them to take part in informed debate and action. It explores environmental materials in a variety of media and teaches students how to navigate these materials; how to analyze and evaluate information; how to balance information from a variety of scientific and non-scientific, objective and subjective sources; and how to develop arguments surrounding environmental problems. An understanding of basic environmental issues and concepts that would be gained in a lower-level ecology course is required. This course was previously SMT-274544 Contemporary Environmental Issues. Prerequisites: Introduction to Ecology and Sustainability (ENSC 1006) or Environmental Science (ENSC 1200) or Biology of Ecosystems (BIOL 2202) or equivalents.
Attributes: Natural Science Gen Ed, Liberal

ENSC 4202 Biogeography (4 Credits)
Biogeography is the study of the spatial and temporal distribution of plants, animals, and microorganisms. It is an interdisciplinary field of science which draws upon the theories and methodologies of ecology, historical geology, and physical geography to understand and to describe global, regional, and local patterns of life. Biogeographers study the ways patterns of species, populations, and communities vary from place to place and the ways those patterns have changed over geological and ecological spans of time. Biogeography has emerged as a field of study which informs conservation efforts and the design of effective natural reserves. Prerequisites: Biology I, or Environmental Science, or Ecology, or Biology of Ecosystems, or Introduction to Ecology and Sustainability Knowledge gained in an introductory biology, environmental science, physical geography, or ecology course or equivalent is required.
Attributes: Liberal

ENSC 4600 Ecology & Earth Systems Field Research (4 Credits)
This is a residency course that requires a three-day on-site meeting out in the field. Students will work collaboratively with a team of instructors on a scientific problem of their choice in the areas of ecology, biology, environmental science, earth science, and/or geology to design a research project, collect data and perform analysis, interpret results and prepare a written scientific paper of the work. The goal of this course is to provide students with an enriched learning experience based on skills necessary to undertake similar projects in their careers or future graduate program. Prerequisites: At least two of the following: Biology I and II; or Introduction to Cell Biology and Genetics, and Introduction to Organismal Biology or Introduction to Population Biology; or Ecology, or Biology of Ecosystems, or Introduction to Geology, or Environmental Science, or equivalent. Students should have foundational knowledge about ecology, biology, and/or earth sciences. Advanced level knowledge in any of these areas gained through 2000- and 3000-level courses is strongly recommended. This course is intended for students with concentrations in disciplines such as ecology, biology, geology, earth science, environmental science, and related fields.

ENSC 4800 Environmental Science Capstone (4 Credits)
The capstone course is a culminating experience which brings together the knowledge and experiences gained by a student throughout their undergraduate study. Students who undertake a capstone project in environmental science will work collaboratively with the tutor on a scientific problem of their choice as a final integrating experience in their degree plan. Students will develop and present a research project related to the environment or human interactions with the environment. Writing and presenting the thesis provides students with the skills necessary to undertake similar projects in their career field or future graduate program. Prerequisite (must complete before registering): Students need to have completed advanced level study in the environmental sciences. Note: Typically, this course is taken in a student's final year of study. This course contains elements which rely on vision and motor skills to complete. If you have a visual or motor impairment and are considering registering for this course, it is recommended that you reach out to Accessibility Resources and Services (Disability.Services@sunyempire.edu) in advance of registration to determine if this course is appropriate and what alternatives may be available.
Attributes: Liberal

ENSC 4998 Individualized Studies in Environmental Science (ENSC) (1-8 Credits)
Students have the opportunity to develop individualized studies with their mentor in Environmental Science (ENSC). Registration for this class must be approved by the student's mentor.

ENST: Environmental Studies (Undergraduate)

ENST 1998 Individualized Studies in Environmental Studies (ENST) (1-8 Credits)
Students have the opportunity to develop individualized studies with their mentor in Environmental Studies (ENST). Please contact your mentor/advisor for more details.

ENST 2998 Individualized Studies in Environmental Studies (ENST) (1-8 Credits)
Students have the opportunity to develop individualized studies with their mentor in Environmental Studies (ENST). Please contact your mentor/advisor for more details.

ENST 3005 Community Supported Agriculture (4 Credits)
Community Supported Agriculture holds great promise for reviving parts of rural America, providing a sustainable model of agriculture, and delivering high quality food to families. Students will learn about differences between community supported agriculture and other modern farming business and agricultural practices and techniques. Students will investigate different business models for community supported agriculture and how this approach to farming developed. Students will examine the benefits and challenges of this approach to food production and consider various ways in which community supported agriculture is beneficial to the environment, individuals and communities. This course integrates learning from business and economics, agricultural science and ecology in the study of community supported agriculture. Prerequisites: . Solid writing and research skills.
Attributes: Liberal

ENST 3010 Sustainability & Agriculture (4 Credits)
In this interdisciplinary study, students investigate efforts to create systems of sustainable agriculture in both the developed and the developing world. Students examine current and traditional agricultural practices and their use of water, soil and other resources from a critical sustainability perspective. Students also learn about economic, political, social and technological forces that influence agriculture and efforts to move agricultural practices in a sustainable direction. According to the UN, the world's population is projected to grow from roughly 7 billion people today to over 9 billion people in 2050. Feeding an additional 2 billion people will put further stresses on the environment, particularly water and soil resources. In addition, many people in the developing world as well as some in the developed world are struggling today to maintain healthy diets. Upon the completion of this course, students shall be able to: 1. Assess the differences between practices of sustainable agriculture and traditional agricultural practices and evaluate the different impacts on resource depletion. 2. Explain the challenges that developing countries face in ensuring food security and evaluate whether sustainable agricultural practices might improve food security in developing countries. 3. Compare innovative practices in sustainable agriculture, particularly related to soil and water, and explain how some organizations and countries are succeeding in using sustainable agriculture.
Attributes: Social Science Gen Ed, Liberal

ENST 3015 Iroquois Cultural Botany (4 Credits)
This study looks at the historical and cultural botanical practices of the Iroquois peoples who inhabit NY State and the surrounding region and the botanical interactions that occurred before and after European contact. Students will analyze the traditional ecological knowledge (Ethnoecology, TEK) of the Iroquois culture and how Native peoples utilized both indigenous and non-native species of plants for everyday life. Students will also develop hypothesizes of the potential implications for modern culture, medicine and biocultural diversity. Students will also collect and analyze data pertaining to phytochemistry: the chemical composition of plants. Prerequisites: BIOL 2204 Ethnobotany or BIOL 2002 Populations and Diseases or BIOL 1200 Biology I or ENSC 1006 Introduction to Ecology and Sustainability.
Attributes: Natural Science Gen Ed, Liberal

ENST 3998 Individualized Studies in Environmental Studies (ENST) (1-8 Credits)
Students have the opportunity to develop individualized studies with their mentor in Environmental Studies (ENST). Please contact your mentor/advisor for more details.

ENST 4998 Individualized Studies in Environmental Studies (ENST) (1-8 Credits)
Students have the opportunity to develop individualized studies with their mentor in Environmental Studies (ENST). Please contact your mentor/advisor for more details.

FILM: Film (Undergraduate)

FILM 1005 Frozen, Encanto, and Beyond: Analyzing Children's Animated Films (Introductory) (4 Credits)
What do children learn from the films they watch? In this course, students learn to analyze how films teach children about gender, sexuality, race, class, and more. Through the perspectives of gender studies, child development studies, and film studies, students will analyze a range of popular films aimed at young audiences. They will learn techniques for analyzing films and for understanding how audiences make meaning from what they perceive on the screen. Students in this course will also question the relationship between film and culture, especially as they consider how and when films direct children toward certain beliefs and when current cultural values guide the content of such films. Note: Students may take either the introductory or advanced version of this course, but not both.
Attributes: Arts Gen Ed, *The Arts Gen Ed, Liberal

FILM 1010 Harry Potter & The Entertainment Industry: Introductory (4 Credits)
In this course, students will consider some of the Harry Potter books as literature and will then consider how these specific books were adapted into films for international audiences. Students will look at how Harry Potter has become a marketing sensation by investigating how Harry Potter souvenirs, parties, costumes and more have become common household items for so many people. Lastly, students will study various Harry Potter theme parks. Throughout the term, students will consider the impact of Harry Potter on the literary and entertainment industries and on US culture as a whole. Note: Students should take the introductory or advanced level of this course but not both.
Attributes: Humanities Gen Ed, Arts Gen Ed, *The Arts Gen Ed, Liberal

FILM 1025 Introduction to Documentary Filmmaking (4 Credits)
Documentary filmmaking is an effective tool for both social justice and any form of non-narrative storytelling and gives individuals the power to tell profound stories with little to no-budget. This introductory course will give students an overview of how to create a documentary film by experimenting with tools in production along with learning techniques from established filmmakers to implement in their work.
Attributes: Liberal

FILM 1998 Individualized Studies in Film (FILM) (1-8 Credits)
Students have the opportunity to develop individualized studies with their mentor in Film (FILM). Please contact your mentor/advisor for more details.

FILM 2005 America on Film: Race Class & Gender (4 Credits)
Students in this course will screen a series of films that reflect issues of American identity, culture and the cultural politics of representation. Subjects under discussion will include race, class, gender, sexuality, changing definitions of American citizenship, sacred cultural myths, cultural politics, historical memory and the mythologizing of the American political process. Films representing a wide range of genres, styles, points of view and moments in cinema history will be screened and discussed.
Attributes: Humanities Gen Ed, Arts Gen Ed, *The Arts Gen Ed, Liberal

FILM 2010 Cell-phone Cinematography (4 Credits)
Although many market and political forces would like to maintain cell phones, iPods, iPads and other new media technologies solely as devices of distraction and entertainment, we have the capabilities and ingenuity to restore their potential as tools of social transformation and education. Students in this study will learn framing, camera movement, sound recording, control of natural light and the basics of story telling for small digital formats. We will also study compression techniques, hosting videos, and discuss the best distribution options or delivery mechanism for your project.
Attributes: Liberal

FILM 2015 Documentary Film (4 Credits)
This course will provide students with an opportunity to study the genre of documentary film. Particular attention will be paid to the ways in which these films are both material products of the culture and catalysts for change within that culture. Students will study the history, theory, and aesthetics of documentary film while also exploring current practices in this genre.
Attributes: Arts Gen Ed, *The Arts Gen Ed, Liberal

FILM 2998 Individualized Studies in Film (FILM) (1-8 Credits)
Students have the opportunity to develop individualized studies with their mentor in Film (FILM). Please contact your mentor/advisor for more details.

FILM 3005 Advanced Documentary Film Production (4 Credits)
Documentary filmmaking is an effective tool for both social justice and any form of non-narrative storytelling and gives individuals the power to tell profound stories with little to no-budget. This course will give students an overview of how to create a documentary film by experimenting with tools in production along with learning techniques from established filmmakers to implement in their work.
Attributes: Liberal

FILM 3010 Frozen, Encanto, and Beyond: Analyzing Children's Animated Films (Advanced) (4 Credits)
What do children learn from the films they watch? In this advanced level course, students learn to analyze how films teach children about gender, sexuality, race, class, and more. This course is grounded in the study of theory including cultural theory, child development theory, and film theory. Students use these theories to help them analyze a range of popular films aimed at young audiences. They will deepen their skills in using techniques for analyzing films and for understanding how audiences make meaning from what they perceive on the screen. Students in this course will also analyze the relationship between film and culture, especially as they consider how and when films direct children toward certain beliefs and when current cultural values guide the content of such films. Note: Students may take either the introductory or advanced version of this course, but not both. Students should have advanced level college reading and writing skills.
Attributes: Arts Gen Ed, *The Arts Gen Ed, Liberal

FILM 3015 Cuban Film Festival Residency (4 Credits)
In this dynamic, interactive course, students will attend three group meetings and then attend the Havana Film Festival New York (HFFNY) in New York City. Students will have the opportunity to meet with filmmakers and see the most recent films coming out of Cuba. Through the lens of media production, students will examine how issues related to cultural identity and social change are reflected in Cuban cinema today. [Only offered periodically when the festival is taking place.]
Attributes: Other World Civilization Gn Ed, Arts Gen Ed, *The Arts Gen Ed, *World Hist & Glb Awnss Gen Ed, Liberal

FILM 3020 El Surrealismo - Salvador Dali: Advanced (4 Credits)
This course presents a survey of the work of Salvador Dali expressed via film, a fascination that spanned his career -- his vision. Through the use of empirical evidence and theory, we will examine his successes, failures, the relationship of his art to film, the surrealist's vision of cinema as the intermediary state between life/dream, and the audience. A rich collection of film lends support to this study, one that produces a vivid filmic art history of a major 20th century surrealist.
Attributes: Humanities Gen Ed, Arts Gen Ed, *The Arts Gen Ed, Liberal

FILM 3025 Gender & Power in American Film (4 Credits)
This course will provide the student with an opportunity to examine the issues of gender and power in American film. It will consider film in its cultural context--examining the ways in which cinema is an expression of our culture and the ways in which our society is influenced and shaped by what we see on the screen. Important writings on the theory of film and its social consequences will provide a background for the discussion of the films.
Attributes: Arts Gen Ed, *The Arts Gen Ed, Liberal

FILM 3030 Harry Potter & The Entertainment Industry: Advanced (4 Credits)
In this advanced level course, students will consider some of the Harry Potter books as literature and will then consider how these specific books were adapted into films for international audiences. Students will also look at how Harry Potter has become a marketing sensation by investigating how Harry Potter souvenirs, parties, costumes and more have become common household items for so many people. Lastly, students will study various Harry Potter theme parks. Throughout the term, students will consider the impact of Harry Potter on the literary and entertainment industries and on US culture as a whole. Note: Students should take the introductory or advanced level of this course but not both.
Attributes: Humanities Gen Ed, Arts Gen Ed, *The Arts Gen Ed, Liberal

FILM 3040 Race & Representation in Cinema (4 Credits)
Students in this course will screen a series of films that are instructive for studying race and representation in American cinema. Films representing a wide range of genres, styles, points of view and moments in cinema history will be screened and discussed.
Attributes: Humanities Gen Ed, Arts Gen Ed, *The Arts Gen Ed, Liberal

FILM 3045 The Films of Alfred Hitchcock (4 Credits)
This course familiarizes students with the historical importance, themes, characterizations, social and religious perspectives, and formal/aesthetic innovations which are central to the work of Alfred Hitchcock. Students will learn about Hitchcock's artistic/aesthetic choices and unique visual style. They will also explore his approach to narrative development, cinematography, composition, editing and scoring with an emphasis on how these formal elements contribute to a body of work which continues to engage audiences.
Attributes: Humanities Gen Ed, *The Arts Gen Ed, Liberal

FILM 3050 The Golden Age: Hollywood Movies of the 1930s & 40s (4 Credits)
The 1930s was one of the most trying and transformative decades in American history. Otherwise known as the Great Depression, this era had a profound and lasting impact on our economic, political, social, and cultural life. The Depression was a body blow to the American psyche, a fundamental challenge to cherished ideals and beliefs about our society. Yet this time of terrible hardship also produced a 'golden age' in American popular culture. From movies and music to dance and design, many of the era's cultural achievements have stood the test of time. This course will provide an overview and exploration of Hollywood's Golden Age. Along with introducing you to many of the most important films (and film genres) from the 1930s & 40s, the study will explore how movies served as a kind of 'mirror' to American society: reflecting, sometimes reinforcing, but also challenging the social mores and dreams of Depression and WWII era America. Thus, in the process of placing these films within their historical context, my hope is that you will gain a greater understanding and appreciation of this crucial period in American life, as well as of the enduring legacy of movies from those years on our culture.
Attributes: Liberal

FILM 3052 The American Cinema (4 Credits)
In this course, students will study film as a cultural, social and artistic expression. They will investigate American cinema's origin and development, the rise of the studio and star systems, and the impact of television on film. We will also consider film genres and the American cinema's use of genre to reflect societal concerns. Students will investigate film techniques and develop a vocabulary for discussing the art of film. We will study the origin and development of classical Hollywood style and investigate Hollywood as an institution. Students will also practice active and critical viewing, and will complete research and critical writing about American film. Students must have at least one lower level humanities or arts criticism course. This course was previously COMM 3050 The American Cinema aka Film Studies Film Criticism Film Theory.
Attributes: Arts Gen Ed, *The Arts Gen Ed, Liberal

FILM 3998 Individualized Studies in Film (FILM) (1-8 Credits)
Students have the opportunity to develop individualized studies with their mentor in Film (FILM). Please contact your mentor/advisor for more details.

FILM 4005 Advanced Topics in Documentary Film (4 Credits)
Students in this advanced course will screen and respond to a series of documentary films and texts that engage with the ongoing conversation about representing reality on screen. Subjects under discussion will include ethics, propaganda, participant observation, reception, objectivity and framing. Films representing a wide range of styles, points of view and moments in documentary film history will be screened and discussed.
Attributes: Humanities Gen Ed, *The Arts Gen Ed, Liberal

FILM 4015 Dark Dreams: Studying the Horror Film (4 Credits)
Students will study the history and analysis of the horror film in this course. The course is organized around the gradual introduction of several key theories and approaches to studying horror film.
Attributes: Humanities Gen Ed, *The Arts Gen Ed, Liberal

FILM 4020 Experiments in Motion Media (4 Credits)
This course will delve into the world of experimental video and motion graphics. Students will choose from a variety of mediums (video, photos, cell phones, stopmotion animation, film, graphic design, etc.) to create experimental pieces of their own. We will begin the semester examining the historical development of motion media (with a specific emphasis on avant-garde cinema) and students will choose a specific artist and genre for in depth research. This artist and genre will serve as inspiration as students develop experimental works of their own and we explore the treatment of 'personal history' in artistic processes.
Attributes: Liberal

FILM 4025 Film Production Internship (4 Credits)
In this course, students will engage in a professional film production internship.
Attributes: Arts Gen Ed

FILM 4030 Leadership Through Film (4 Credits)
Have you ever admired the leadership qualities of certain film characters? This course teaches students the principles of leadership and helps them identify and analyze these principles through the medium of film. Students study topics related to leadership such as the traits and behaviors of successful leaders as well as how leaders use motivation and empowerment to build successful teams. Each topic about leadership will be explored through one or more films that demonstrate that topic in action. As you study leadership, you will also learn how to analyze and critique films.
Attributes: Arts Gen Ed, *The Arts Gen Ed, Liberal

FILM 4040 Transgender in American Film (4 Credits)
The purpose of this course is to provide the student with an opportunity to study the representation of transgender experience in film, and to consider these representations in terms of gender identity as a performative construct. Students will learn about the tools to engage in film analysis and apply these tools with the focus on the depiction of gender identity framed within transgender experience and representation.
Attributes: Arts Gen Ed, *The Arts Gen Ed, Liberal

FILM 4998 Individualized Studies in Film (FILM) (1-12 Credits)
Students have the opportunity to develop individualized studies with their mentor in Film (FILM). Please contact your mentor/advisor for more details.

FIRA: Fire Administration (Undergraduate)

FIRA 1998 Individualized Studies in Fire Services Administration (FIRA) (1-8 Credits)
Students have the opportunity to develop individualized studies with their mentor in Fire Services Administration (FIRA). Please contact your mentor/advisor for more details.

FIRA 2998 Individualized Studies in Fire Services Administration (FIRA) (1-8 Credits)
Students have the opportunity to develop individualized studies with their mentor in Fire Services Administration (FIRA). Please contact your mentor/advisor for more details.

FIRA 3020 Emergency Services Training & Education (4 Credits)
This course prepares students to manage and administer training and education programs in fire and emergency services. Topics include the many systems of training and education available and the concept of professional development on both individual and organizational levels. The focus is on safety, especially understanding and preventing training deaths and injuries. Discussion explores how higher education/training contributes to the professional development of fire-service personnel. This course was previously CHS-263284 Emergency Services Training and Education.
Attributes: Liberal

FIRA 3025 Fire Investigation & Analysis (4 Credits)
This course examines the technical, investigative, legal, and social aspects of the arson problem, including principles of incendiary fire analysis and detection, environmental and psychological factors of arson, legal considerations, intervention and mitigation strategies. Prerequisites: A basic knowledge of fire behavior and fire suppression. This course was previously CHS-264104 Fire Investigation and Analysis.

FIRA 3035 Fire Protection Structures & Systems (4 Credits)
This course examines the underlying principles involved in structural fire protection systems, building furnishings, and fire protection systems including water-based fire suppression systems, fire alarm and detection systems, special hazard suppression systems, and smoke management systems. Recommended: previous study in Algebra, College Writing or equivalents, and knowledge of building construction. This course was previously CHS-264074 Fire Protection Structures and Systems.

FIRA 3040 Fire & Emergency Services Administration (4 Credits)
This course reviews the history and development of the American Fire Service. Topics include: value engineering for capital resources; cost effectiveness in service delivery; fire prevention, suppression and investigation; and emergency medical services. Prerequisites: Introduction to Public Administration or equivalent, or significant practical background in administration and management. Recommended (1 or more): Accounting for Decision Makers, Management Principles, The American Political System, College Writing, Communication Decisions, Human Service Management or equivalents. This course was previously CHS-264014 Fire and Emergency Services Administration.

FIRA 3045 Personnel Management for the Fire & Emergency Services (4 Credits)
This course examines the functions of personnel management as they relate to the field of Fire and Emergency Services. Topics include personnel planning, staffing, supervision and discipline, labor relations, affirmative action and equal employment opportunity, employee motivation, productivity, compensation and performance evaluations. Prerequisites: Introduction to Public Administration and/or Advanced Fire Administration or equivalents, and have significant experience as a line officer. Recommended: Management Principles, Labor/Management Relations, Human Service Management, Theories of the Labor Movement, College Writing or equivalents. This course was previously CHS-264034 Personnel Management for the Fire and Emergency Services.

FIRA 3998 Individualized Studies in Fire Services Administration (FIRA) (1-8 Credits)
Students have the opportunity to develop individualized studies with their mentor in Fire Services Administration (FIRA). Please contact your mentor/advisor for more details.

FIRA 4005 Analytical Approaches for the Fire & Emergency Services (4 Credits)
This course explores the foundations of systems analysis, including fire prevention and suppression systems. Because fire department deployment analysis is the focus of much of the course, significant application of mathematics to the fire service is required, including formulas for resolving such issues as response time and resource utilization. Recommended: previous study in Accounting for Decision Makers, Business Mathematics, Statistics, Economics/Micro, Algebra or equivalents. This course was previously CHS-264044 Analytical Approaches for the Fire and Emergency Services.
Attributes: Liberal

FIRA 4020 Political & Legal Foundations of Fire Protection (4 Credits)
This course examines the legal aspects of the fire service and the political and social impacts of legal issues. A review of the U.S. legal system and in-depth coverage of legal and political issues will be used to frame the study. Recommended: Previous study in college writing, law and government. This course was previously CHS-264084 Political and Legal Foundations of Fire Protection.
Attributes: Liberal

FIRA 4998 Individualized Studies in Fire Services Administration (FIRA) (1-8 Credits)
Students have the opportunity to develop individualized studies with their mentor in Fire Services Administration (FIRA). Please contact your mentor/advisor for more details.

FREN: French (Undergraduate)

FREN 1005 French I (4 Credits)
This course is designed for students who have no previous French instruction. The course focuses on enabling students to communicate effectively in elementary French, and introduces students to the cultures of the Francophone world. All language skills will be practiced: listening, speaking, reading and writing. Students will be exposed to authentic French material from films, songs and websites. Students should be available for oral practices at least twice a week. Synchronous practices will take place between 7:30-9:00 pm (ET), unless advised otherwise. Special accommodations will be made for army students. This is the first course in a sequence French I and French II. This course was previously CUL 221324 French 1.
Attributes: Foreign Language Gen Ed, *World Languages Gen Ed, Liberal

FREN 1010 French II (4 Credits)
This course is designed to be a continuation of French I. Students will build on their introductory studies in French language and culture. They will learn functional grammar, vocabulary and cultural concepts that apply to many different practical real-life situations. Emphasis is on the development of appropriate discourse in contemporary cultural contexts. Interpretation of authentic materials, written and oral presentations. All language skills will be practiced: listening, speaking, reading and writing. Students will be required to weekly practice speaking and listening skills in real time. Synchronous practices will take place between 7:30-9:00 pm (ET), unless advised otherwise. Special accommodations will be made for army students. This course was previously CUL 221334 French 2. Prerequisites: French I or equivalent completion of French I.
Attributes: Foreign Language Gen Ed, *World Languages Gen Ed, Liberal

FREN 1998 Individualized Studies in French (FREN) (1-8 Credits)
Students have the opportunity to develop individualized studies with their mentor in French (FREN). Please contact your mentor/advisor for more details.

FREN 2998 Individualized Studies in French (FREN) (1-8 Credits)
Students have the opportunity to develop individualized studies with their mentor in French (FREN). Please contact your mentor/advisor for more details.

FREN 3998 Individualized Studies in French (FREN) (1-8 Credits)
Students have the opportunity to develop individualized studies with their mentor in French (FREN). Please contact your mentor/advisor for more details.

FREN 4998 Individualized Studies in French (FREN) (1-8 Credits)
Students have the opportunity to develop individualized studies with their mentor in French (FREN). Please contact your mentor/advisor for more details.

FSMA: Finance (Undergraduate)

FSMA 1998 Individualized Studies in Finance (FSMA) (1-8 Credits)
Students have the opportunity to develop individualized studies with their mentor in Finance (FSMA). Registration for this class must be approved by the student's mentor.

FSMA 2005 Introduction to Finance (4 Credits)
This introductory-level study introduces students to the key concepts and terminology of finance and lays the framework for the more advanced corporate finance course. The course will focus on general finance concepts, general business concepts, fundamentals of valuation, corporate decision making, and investor decision making. The student will be introduced to such topics as the objectives and functions of financial management, the financial environment affecting the firm, time value of money, capital budgeting, management and financing of working capital, financial analysis and planning, and debt structure. Prerequisites (must complete before registering): Introductory Accounting I (ACCT 2005), or basic knowledge of financial accounting and terminologies or equivalent, Economics/Macro or Economics/Micro, Algebra and/or Statistics or their equivalents Notes: There may be some overlap with basic topics in Corporate Finance (FSMA_3010) as an advanced-level course that follows, this course may lay the foundation for subsequent advanced finance courses. The course satisfies quantitative skills of business guidelines.

FSMA 2998 Individualized Studies in Finance (FSMA) (1-8 Credits)
Students have the opportunity to develop individualized studies with their mentor in Finance (FSMA). Registration for this class must be approved by the student's mentor.

FSMA 3005 Behavioral Finance (4 Credits)
This course is the study of how our choices and financial decisions are influenced by surrounding environment and bias that is based on our psychological and social foundations, framing of alternatives, anchoring trust, social norms of fairness and mistakes in probabilistic judgement. It examines the predictable factors and errors that can be avoided to guide decision-makers in making better financial choices in future investing, spending and saving decision in personal finance, corporate finance. It investigates the traditional financial theory, alongside main stream economic theory, assuming that individuals target utility maximization, intelligent and rational decision makers. Students will also learn how behavioral biases influence ethical decision making. Behavioral Economics provides a more general introduction to the influence of psychology on economic theory, and covers a wider range of market phenomena and theoretical approaches. Behavioral Finance is much more focused on financial decisions, and on challenging the established theoretical precepts of financial economics. This course is offered for our International Education program students.
Attributes: Liberal

FSMA 3010 Corporate Finance (4 Credits)
This study provides students with the fundamental theories of managerial finance which will enable them to understand the allocation of capital funds. The study focuses on the dynamic financial economic environment in which corporate financial decisions are made, the role of the financial manager within the firm and the empirical aspects of corporate finance. Topics include the financial environment; time value of money; risk and return tradeoff; techniques of financial analysis and planning; management of working capital; fixed assets and capital budgeting; capital structure, cost of capital; dividend policies; and sources of long-term financing. Highly Recommended (not required) to take concurrently: Introductory Accounting II (ACCT_2010) and Managerial Accounting Notes: While the course covers some valuation techniques at corporate level, greater depth would be covered in an Investing or Security Analysis course. Moreover, the course may touch upon topics in banking and international business as it applies to the (multi-national) corporations. The course satisfies the quantitative skills in business. This course was previously BME-213514 Corporate Finance. Prerequisite: Introductory Accounting I (ACCT 2005), Macroeconomics (ECON 2015), Microeconomics (ECON 2020), Algebra (MATH 1040), or Statistics (MATH 1065), or equivalents.

FSMA 3015 Entrepreneurial Finance for Small Business (4 Credits)
The course examines the financial aspects and strategies to establish and operate a small business in forms of sole proprietorships, partnerships, and small non-public held corporations. Among topics covered are obtaining funding for a new business, various sources of capital, entering and exit strategy, analysis of business processes and financial needs for business operations and sustainability. Prerequisites (must complete before registering): College Mathematics (MATH 1000), or equivalent, Understanding of accounting terminologies Notes: This study overlaps with Corporate Finance (FSMA 3010) as they both offer knowledge of the capital budgeting and Time Value of Money. Also, Entrepreneurial Finance for Small Business includes elements of Financial Statement Analysis that are included in accounting studies. The course satisfies the quantitative skills in business.

FSMA 3020 Finance Society & Ethics (4 Credits)
This course will examine the social purpose of finance. Students will discuss the role of financial intermediation in the broader economy and question the deepening process of financialization (i.e. the increasing reliance on financial markets). Topics covered will include the allocation of risk between financial institutions and the rest of society, corporate governance and the responsibilities of financial institutions towards the environment and the developing world. Alternative institutional models will be presented. Moreover, the ethical implications of the questions examined form a key element of the course. The course does not assume knowledge of the material of other finance courses, and is focused on broad conceptual issues and discussions of the impact of the financial sector on society rather than detailed quantitative analysis. The course will include some of the material covered in other more general business ethics courses, but there is no significant duplication since here there is a much deeper focus on finance and on the specific issues facing the financial sector. This course is offered for our International Education program students.
Attributes: Liberal

FSMA 3025 Healthcare Finance (4 Credits)
Healthcare Finance is designed to introduce and reinforce the concepts of accounting and financial management principles as well as practices Applied to healthcare enterprises. It provides students with the practices and tools used to analyze financial management statistics and issues in both for-profit and not-for-profit organizations in the US. Students will explore basic insurance concepts, reimbursement approaches, Medicare and Medicaid payment methods and foundations of medical coding. It provides students with basic foundation to examine and prepare financial statements, analyze cost behavior and allocation, perform profit analysis, pricing, planning, and budgeting. The study also covers basic financial and ethical concepts: financial risk and required return and long-term financing. Notes: This study overlaps with managerial and financial accounting studies by including basic concepts of statement analysis as well as pricing and service decisions and cost allocations. In addition, principle knowledge of financial management is introduced covering Time Value of Money and risk management. This course is part of the BS in Public Health program. Prerequisites: College Mathematics (MATH 1000), or equivalent.

FSMA 3030 International Finance (4 Credits)
This course prepares students to be leaders and catalysts in multinational business corporation's financial decision-making. Its objective is to educate the students, not only to function in a financially high-risk environment, but also to search for opportunities that create value to the organization by integrating the strategic and financial challenges that face today's multinational business enterprises. The course examines topics related to international trade, international currency values and exchange, international financial strategies and policies, foreign exchange exposures and risk in international markets, strategy to effectively penetrate foreign equity capital market, and debt structures of multinational business enterprises. Prerequisites (must complete before registering): Macroeconomics (ECON 2015) and Corporate Finance (FSMA 3010) Notes: It is assumed that trade policies will not be covered in detail in this course, since this would be covered in greater detail in other courses on international business. The technical details of the workings of capital markets and valuation would similarly be covered in investment courses. Whilst the major exchange rate risks and exposures will be introduced, as well as the concept of hedging, the course will not cover the details of internal corporate management. Moreover this course does not cover in any great detail the field of development economics, which is also the subject of separate courses. The course satisfied the skills of understanding organization in a global context. This course was previously BME-213424 International Finance.

FSMA 3035 Investment Analysis & Portfolio Management (3 Credits)
This course covers both the theory and practice of investing with an emphasis on introducing related important concepts. The main topics covered will be: types of investments and securities, markets, key concepts, elements of asset valuation, portfolio theory and derivatives. The course will also cover modern portfolio theory. The course will mirror current developments and the changing regulatory environment. Notes: Courses in accounting will lay the foundations for financial statement analysis that are a key part of understanding the process of valuing financial securities. While not an essential prerequisite for this course, a knowledge of accounting would provide a helpful background. While courses such as International Economics or International Finance touch on global capital markets, this course goes into much greater operational detail and the courses complement each other rather than serving as substitutes. This course is offered for our International Education program students. Highly Recommended (not required): Accounting Prerequisites: Macroeconomics (ECON 2015) and Introduction to Finance (FSMA 2005) or Corporate Finance (FSMA 3010) or equivalents.

FSMA 3040 Investment Banking (4 Credits)
The main objective of this course is to provide students with the necessary theoretical and conceptual tools to understand the investment banking industry. This course will provide an introduction to investment banking activities and the overall role of investment banking in the financial sector, the broader economy and in society. The course will provide an introduction to the skills necessary for investment, such as applied financial analysis, the mechanics of deal structuring, negotiation and alternative assets. Highly Recommended (not required): Courses in investment, such as Investing, Investment Analysis & Portfolio Management or Security Analysis and Portfolio Management should provide helpful background knowledge. But such courses are neither necessary for this course nor do they result in needless duplication. These courses provide technical skills. Investment Banking provides an overview of the structure and purpose of the investment banking industry, a very specific area, which would only be covered in passing in other finance courses. The knowledge required to manage the material covered in this course will be covered by a corporate finance course, or its equivalent. This course is offered for our International Education program students. Prerequisites: Corporate Finance (FSMA 3010), or equivalent.

FSMA 3045 Investment Management (4 Credits)
The course provides an overview of investment analysis, portfolio management, and financial markets. Students will examine major securities such as stocks, bonds and commodities, explore basic concepts related to Time Value of Money and expand them to valuation theories and techniques. Instruction also includes forces affecting security values, investment risk and return as well as investment vehicles. The study covers the development of modern portfolio theory, including elements of behavioral finance. Prerequisite (must complete before registering): Corporate Finance (FSMA 3010) Highly Recommended (not required): Basic knowledge in finance gained in the Corporate Finance or Managerial Finance studies. Notes: This study overlaps with Portfolio Management as they both offer in-depth knowledge of the financial markets and investment strategies. Also, Investment Management includes elements of Financial Statement Analysis that are included in accounting studies. This course was previously BME-213524 Investing.

FSMA 3055 Risk Management & Insurance (4 Credits)
The course introduces students to the general concept of risk and its management. It explores the various risks faced by individuals and firms, exposures to loss, and different techniques for managing these risks. They will explore different types of risk attitudes, steps of the risk management process, as well as different types of insurance policies. Prerequisites (must complete before registering): Introductory Accounting I (ACCT 2005) and Corporate Finance (FSMA 3010) or Investing, or equivalents.

FSMA 3122 Personal Financial Planning (4 Credits)
In this study, students examine key issues in personal financial planning and explore the underlying mathematical concepts as they build a personalized financial plan. Students will examine various saving and investment options, including but not limited to retirement saving and income, insurance, employee benefits, estate and trust planning, investment planning, and tax planning. Students apply financial modeling techniques to personal financial planning problems. Fundamental ethical considerations related to saving and investment will also be studied. Prerequisites (must complete before registering): Fundamentals of Finance or Personal Finance (FSMA 2010), or equivalent and a college math course such as algebra or statistics or equivalent.

FSMA 3998 Individualized Studies in Finance (FSMA) (1-8 Credits)
Students have the opportunity to develop individualized studies with their mentor in Finance (FSMA). Registration for this class must be approved by the student's mentor.

FSMA 4005 Financial Markets & Institutions (4 Credits)
This study provides an analysis and discussion of the role played by the financial markets and institutions in directing financial industry. The course perspective is both macro- and micro-financial. Among topics covered are the development of central banking and the Federal Reserve System and the impact of monetary policy on structure of interest rates and policy. It examines the process controlled by financial institutions such as investment banks, commercial banks, insurance companies, mutual funds agencies, and hedging funds. Prerequisites (must complete before registering): Microeconomics (ECON 2020), Macroeconomics (ECON 2015), Principles of Economics (MGMT 6015), Survey of Economics, Corporate Finance (FSMA 3010) or Managerial Finance , or Introduction to Finance (FSMA 2005) Introductory Accounting; college Level Math or equivalent Highly Recommended (not required): Basic knowledge in finance gained in the Corporate Finance or Managerial Finance studies. This study overlaps with Money and Banking as they both offer in-depth knowledge of the central banking. In addition, Financial Markets and Institutions reviews financial markets and investments which are also discussed in Portfolio Management and Investment Management studies.

FSMA 4010 Security Analysis & Portfolio Management (4 Credits)
This course examines various concurrent theories of investment portfolio management. Among topics to be covered are types of investments and securities, markets, key concepts such as net present value and basic discounted cash flow calculations, elements of asset valuation, portfolio theory and derivatives. The course will also cover the development of modern portfolio theory and newer thinking on the theoretical foundations of investment. Prerequisite (must complete before registering): Macroeconomics (ECON_2015), Introductory Accounting I (ACCT_2005), Mathematics for Business (MATH_1050), Corporate Finance (FSMA_3010) or Investment Management (FSMA_3045), or equivalents Corequisite: Statistics (MATH_1065) Notes: Courses in accounting will lay the foundations for financial statement analysis that are a key part of understanding the process of valuing financial securities. Whilst not an essential prerequisite for this course, a knowledge of accounting would provide a helpful background. Moreover, courses in introductory finance and / or corporate finance would provide a useful grounding in the working of the finance function within corporations. Whilst courses such as International Economics or International Finance touch on global capital markets, this course goes into much greater operational detail and the courses complement each other rather than serving as substitutes. This course was previously BME-214334 Security Analysis and Portfolio Management.

FSMA 4998 Individualized Studies in Finance (FSMA) (1-8 Credits)
Students have the opportunity to develop individualized studies with their mentor in Finance (FSMA). Registration for this class must be approved by the student's mentor.

GEOL: Geology (Undergraduate)

GEOL 1200 Introduction to Geology (4 Credits)
Geology is the core discipline of the Earth sciences and encompasses many different phenomena. This study focuses on the physical aspects of the Earth system, its major features, and the processes responsible for their formation. Themes central to the Earth system will be introduced: plate tectonics, rock cycle, volcanism, earthquakes, mass wasting, groundwater, streams, and climate. Students will become familiar with the material and then challenged to defend their views on the interplay of human activities and these natural processes. They will use data to understand geological systems and learn the roles of both science and policy. This course uses a mandatory hands-on lab kit to provide students an authentic laboratory experience. The kit (in addition to the textbook) will add an additional cost to the Course Materials. See the Learning Contract/Syllabus for specific details. This course contains elements which rely on vision and motor skills to complete. If you have a visual or motor impairment and are considering registering for this course, it is recommended that you reach out to Accessibility Resources and Services (Disability.Services@sunyempire.edu) in advance of registration to determine if this course is appropriate and what alternatives may be available.
Attributes: Natural Science Gen Ed, *Natural Science Gen Ed, Liberal

GEOL 1998 Individualized Studies in Geology (GEOL) (1-8 Credits)
Students have the opportunity to develop individualized studies with their mentor in Geology (GEOL). Registration for this class must be approved by the student's mentor.

GEOL 2200 Historical Geology with Lab (4 Credits)
Historical geology serves as an introduction to the development and history of Earth. On the grand scale, Earth is a constantly changing planet. Emphasis will be placed on: understanding the environments of the changing earth; evolutionary processes; the fossil record; application of fundamental principles of sequence stratigraphy to the reconstruction of ancient tectonic relationships; and, the procedures used in scientific analysis. Laboratory exercises provide support and reinforce the core concepts of the course. This course uses a mandatory hands-on lab kit to provide students an authentic laboratory experience. The kit (in addition to the textbook) will add an additional cost to the Course Materials. See the Learning Contract/Syllabus for specific details. Highly Recommended (not required): Introduction to Geology (GEOL 1200) or Earth Science (ENSC 1000). This course contains elements which rely on vision and motor skills to complete. If you have a visual or motor impairment and are considering registering for this course, it is recommended that you reach out to Accessibility Resources and Services (Disability.Services@sunyempire.edu) in advance of registration to determine if this course is appropriate and what alternatives may be available.
Attributes: Natural Science Gen Ed, *Natural Science Gen Ed, Liberal

GEOL 2998 Individualized Studies in Geology (GEOL) (1-8 Credits)
Students have the opportunity to develop individualized studies with their mentor in Geology (GEOL). Registration for this class must be approved by the student's mentor.

GEOL 3200 Geomorphology (4 Credits)
Geomorphology is the study of landforms and the processes that create them. The course examines how factors such as climate and bedrock structure influence landform development. We concentrate on the physical character of the United States and the geologic configurations which determine landform distribution. Students will explore topics in geomorphology through readings, hands-on activities and data sets. Readings will cover the areas of climatic geomorphology, chemical and physical weathering, fluvial processes, wind processes, glacial landform and coastal processes. Prerequisites: Introduction to Geology (GEOL 1200) or Earth Science (ENSC 1000) or foundational knowledge in geology and/or earth sciences.
Attributes: Natural Science Gen Ed, Liberal

GEOL 3202 Hydrology (4 Credits)
In this study, students will follow the pathways water takes through the environment as it interacts with the Earth's atmosphere (influencing patterns of precipitation and moderating climates), flows across the Earth's surface (cutting stream channels and valleys), provides habitats for diverse populations of aquatic organisms, and supplies humans with an essential resource for life, agricultural activities, and industrial processes. Students will examine ways human activities have altered local, regional, and global water cycles, and as a result, have altered patterns of relative humidity and precipitation, changed flood frequencies, modified channel flow, and impacted water quality and access to potable water. Foundational knowledge about Earth's system processes gained in a lower level course as well as proficiency in basic algebraic and statistical analysis are required. This course contains elements which rely on vision and motor skills to complete. If you have a visual or motor impairment and are considering registering for this course, it is recommended that you reach out to Accessibility Resources and Services (Disability.Services@sunyempire.edu) in advance of registration to determine if this course is appropriate and what alternatives may be available. Prerequisites: Earth Science, or Introduction to Geology; and, Algebra and Statistics, or equivalent.
Attributes: Liberal

GEOL 3996 Special Topics in GEOL: (1-8 Credits)
Attributes: Liberal

GEOL 3998 Individualized Studies in Geology (GEOL) (1-8 Credits)
Students have the opportunity to develop individualized studies with their mentor in Geology (GEOL). Registration for this class must be approved by the student's mentor.

GEOL 4998 Individualized Studies in Geology (GEOL) (1-8 Credits)
Students have the opportunity to develop individualized studies with their mentor in Geology (GEOL). Registration for this class must be approved by the student's mentor.

GSCI: General Science (Undergraduate)

GSCI 1000 Integrated Sciences (4 Credits)
This study seeks to introduce students to basic scientific principles and methods by integrating the following branches of science: physics, chemistry, astronomy, earth science and biology. These principles will be emphasized by applying them to real-world situations. Topics that will be introduced include: energy, laws of conservation of energy and matter, laws of thermodynamics, electricity, magnetism, atomic structure, wave properties, electromagnetic radiation, chemical bonding, materials in today's world, stars and the solar system, plate tectonics, earth cycles, classification of living organisms and the living cell. Student should select either this course or Physical Science as part of their degree program as there is substantial overlap in the course curriculums.
Attributes: Natural Science Gen Ed, *Natural Science Gen Ed, Liberal

GSCI 1004 Introduction to Forensic Science (4 Credits)
This study introduces students to the field of forensic science. Students will learn about the processes of correctly identifying, collecting, handling, and managing potential forensic evidence. In addition, the scientific concepts, principles and equipment that are employed in a forensic laboratory to analyze collected evidence will be discussed. Topics that will be covered include: physical evidence, physical properties of glass, soil, hairs, fibers and paint, organic and inorganic analysis of matter, microscope types, arson forensic, computers forensic, DNA and fingerprints.
Attributes: Natural Science Gen Ed, *Natural Science Gen Ed, Liberal

GSCI 1006 The Science of Cooking (4 Credits)
Cooking is a common, everyday activity and this course explores the fundamental concepts of biology, chemistry, and physics of food preparation. The chemistry and biology of basic food molecules and tastes and flavors are investigated and the impact of cooking on meats, vegetables, and baked goods is highlighted. The physics of heat transfer associated with different cooking methods is also explored. The course uses experimentation and observation to develop a broad understanding of an applied science. In doing so, applications of cooking methods requires access to a kitchen. This course is designed for non-science majors. This course contains elements which rely on vision and motor skills to complete. If you have a visual or motor impairment and are considering registering for this course, it is recommended that you reach out to Accessibility Resources and Services (Disability.Services@sunyempire.edu) in advance of registration to determine if this course is appropriate and what alternatives may be available.
Attributes: Natural Science Gen Ed, *Natural Science Gen Ed, Liberal

GSCI 1020 Physical Science (4 Credits)
This course introduces the fundamental principles of physics and chemistry. Conceptual understanding of scientific principles and their practical applications will be discussed in the context of students' everyday experiences with the natural world. Topics in physics include measurement, force, motion, work, energy, temperature and heat, waves and wave effects, optics, electricity and magnetism, atomic structure, and nuclear physics. The chemistry portion will introduce chemical elements and the periodicity of their properties, chemical bonding, different types of chemical reactions, and major classes of organic compounds. Prior to taking this course, students must have the ability to manipulate simple algebraic expressions. Notes: Students should select either this course or Integrated Science. This course would be of interest to parents of young children and future elementary school teachers.
Attributes: Natural Science Gen Ed, *Natural Science Gen Ed, Liberal

GSCI 1500 Science Colloquium (4 Credits)
This course aims to present an interdisciplinary seminar series that integrates science with current, popular, cultural, political, and environmental perspectives. Invited guest speakers across the natural and physical sciences present their research throughout the term. The research topics may include biology, chemistry, physics, ecology, environmental science, paleontology, geology, astronomy, psychology, and medicine. The goal of the course is to introduce students to an array of scientific disciplines through the application of the scientific method. As such, students will learn to use the scientific method to solve specific research questions and to consider how research may be important to everyday life. Students will have the opportunity to attend all seminars and interact directly with the guest scientists.
Attributes: Natural Science Gen Ed, *Natural Science Gen Ed, Liberal

GSCI 1998 Individualized Studies in General Science (GSCI) (1-8 Credits)
Students have the opportunity to develop individualized studies with their mentor in General Science (GSCI). Registration for this class must be approved by the student's mentor.

GSCI 2200 GPS & The New Geography (4 Credits)
The environment is a major topic of public discussion and debate. Spatial information and geographic literacy is a basis for a growing number of disciplines since location affects our understanding of natural systems, from agriculture to climate change. In this activity-based course students will explore environmental science from a geographic perspective using global positioning systems and mass GIS to gather and analyze geographically referenced environmental data while learning about the broader applications of these tools to environmental science and other fields. At the same time, they will gain some hands-on experience in gathering geographic data and entering it into maps. This course contains elements which rely on vision and motor skills to complete. If you have a visual or motor impairment and are considering registering for this course, it is recommended that you reach out to Accessibility Resources and Services (Disability.Services@sunyempire.edu) in advance of registration to determine if this course is appropriate and what alternatives may be available.
Attributes: Natural Science Gen Ed, *Natural Science Gen Ed, Liberal

GSCI 2998 Individualized Studies in General Science (GSCI) (1-8 Credits)
Students have the opportunity to develop individualized studies with their mentor in General Science (GSCI). Registration for this class must be approved by the student's mentor.

GSCI 3200 Geographic Information Systems (4 Credits)
Students will explore the application of spatial information to a range of problems in different organizational settings. Application areas might include: natural and social science, such as geography, geology, oceanography, archaeology and meteorology; government, such as city planning, law enforcement, military and social services; natural resource management, such as forestry and water resources management; and business, such as marketing. Topics will include data acquisition, accuracy, analysis and presentation and social and legal issues. This course contains elements which rely on vision and motor skills to complete. If you have a visual or motor impairment and are considering registering for this course, it is recommended that you reach out to Accessibility Resources and Services (Disability.Services@sunyempire.edu) in advance of registration to determine if this course is appropriate and what alternatives may be available. Prerequisites: Statistics (MATH 1065) or equivalent.

GSCI 3998 Individualized Studies in General Science (GSCI) (1-8 Credits)
Students have the opportunity to develop individualized studies with their mentor in General Science (GSCI). Registration for this class must be approved by the student's mentor.

GSCI 4200 Materials Science (4 Credits)
Materials Science will explore the different materials used in our world (metals, ceramics, polymers, composites and biomaterials), as well as their properties, history and applications. Topics that will be covered include: crystallographic structures identification and structures, metals, polymers, ceramics, carbon materials and composites, and measurement of mechanical properties. This course is designed for students majoring in the natural sciences and requires strong quantitative skills and mastery of topics typically covered in General Chemistry and Physics. Prerequisites: Organic Chemistry I, Algebra, and Physics I, or equivalent. This course is designed for students majoring in the natural sciences and requires strong quantitative skills and mastery of topics typically covered in introductory level courses in chemistry and physics as well as organic chemistry.
Attributes: Liberal

GSCI 4998 Individualized Studies in General Science (GSCI) (1-8 Credits)
Students have the opportunity to develop individualized studies with their mentor in General Science (GSCI). Registration for this class must be approved by the student's mentor.

GSST: Gender & Sexuality Studies (Undergraduate)

GSST 1005 Introduction to Women's Gender & Sexuality Studies (4 Credits)
This course offers students an overview of Women's, Gender, and Sexuality Studies, an interdisciplinary field that establishes gender and sexuality as fundamental categories of social power and cultural analysis. Students will learn about different types of feminism and a variety of social movements that gave rise to feminist thought and practices in the United States and globally. Considering scholarship from various fields and perspectives, students will explore intersections of gender, sexuality, race, ethnicity, class, nationality, religion, dis/ability, body size, and other facets of social identity that impact people's lives. Related courses may be disciplinary rather than interdisciplinary or multidisciplinary; for example: Women, Girls, and the Media (COMM), U.S. Women's Multicultural Life-Writings (LIT), Images of Women in Western Civilization (ART), Feminist Theory (CUL), Theories of LGBTQ Identities (CUL). This course was previously CUL 281324 Introduction to Women's and Gender Studies.
Attributes: Humanities Gen Ed, Liberal

GSST 1996 Speical Topics in GSST (2-8 Credits)

GSST 1998 Individualized Studies in Gender and Sexuality Studies (GSST) (1-8 Credits)
Students have the opportunity to develop individualized studies with their mentor in Gender and Sexuality Studies (GSST). Please contact your mentor/advisor for more details.

GSST 2005 Introduction to LGBTQ+ Studies (4 Credits)
This course provides an introduction to the field of Lesbian, Gay, Bisexual, Transgender, and Queer (LGBTQ) Studies. We will ask, what does it means to be lesbian, gay, bisexual, transgender, or queer, both historically and today? We will explore multiple answers to this question by learning about LGBTQ+ life through a variety of disciplines, including anthropology, history, psychology, educational, health and wellness, and the study of queer culture and media. Furthermore, we will incorporate race, class, gender and sexuality and other aspects of identity into our analyses of power, privilege, and oppression for LGBTQ+ people.
Attributes: Humanities Gen Ed, *Diversity Gen Ed, Liberal

GSST 2998 Individualized Studies in Gender and Sexuality Studies (GSST) (1-8 Credits)
Students have the opportunity to develop individualized studies with their mentor in Gender and Sexuality Studies (GSST). Please contact your mentor/advisor for more details.

GSST 3005 Queer Theory (4 Credits)
This course provides students with an in-depth knowledge of contemporary theories of sexuality, an interdisciplinary field called 'queer theory.' While queer theory often focuses on the complexity of lesbian, gay, bisexual, and transgendered identity, the elasticity of the term queer is one of its defining characteristics; the aim of queer theory is to challenge rigid categories and definitions. We will examine the inconsistencies and erasures that often characterize notions of sex, gender, sexuality, and sexual desire, and the categories that intersect with sexual identities such as race, ethnicity, class, nationality, dis/ability, and age. Students will apply queer theory to an array of events and texts Prerequisites: an introductory course in Women's, Gender, and Sexuality Studies
Attributes: Liberal

GSST 3008 LGBTQ+ Youth & Education (4 Credits)
In this course, we will explore key issues that LGBTQ+ youth face within the P-12 U.S. educational system, and ways in which teachers and advocates are striving to make education more inclusive and welcoming to LGBTQ+ students. Issues may include: the risk of suicide for LGBTQ youth; history of LGBTQ+ inclusivity in public education in the U.S.; supportive movements in LGBTQ education; the role of educators and support staff; intersections of race, class, gender and sexuality and their impact on educational and health outcomes for students. In this course we will explore both the challenges that educators face and successes to date providing welcoming and inclusive educational experiences for LGBTQ+ youth. LGBTQ+ Youth and Education is a companion course to the 4 credit GSST 2005 Introduction to LGBTQ+ Studies; students may enroll in both courses. Introductory level course in LGBTQ+ Studies, or Women, Gender and Sexuality Studies is strongly recommended. Cross-listed with EDST 3008.
Attributes: *Diversity Gen Ed, Liberal

GSST 3015 Feminist Theory (4 Credits)
This interdisciplinary course explores the central issues of feminist theory, such as ideologies of woman and man, sexual politics, the political economy of patriarchy, and the ways that race, ethnicity, dis/ability, age, nationality, class and other aspects of social identity intersect with gender and sexuality. Students will apply feminist theory to a variety of texts and events. Prerequisites: an introductory class in Women's, Gender, and Sexuality Studies.
Attributes: Liberal

GSST 3030 Sex & Gender in Global Perspective (4 Credits)
This course is a comparative exploration of gender and gender relations in different regions of the world. Using the concepts of intersectionality (of race, class, gender, etc.) and globalization we will examine how inequalities across sexes and genders are created and perpetuated in different cultural contexts. The course will examine topics such as: non-binary gender systems, variations in the sexual division of labor and economic organization, gender-based violence, and the impact of forces such as colonialism and globalization on gender issues. This course was previously SOC-283324 Sex and Gender in Cross-Cultural Perspective: Advanced.
Cross-listed with ANTH 3122.
Attributes: Social Science Gen Ed, *Diversity Gen Ed, Liberal

GSST 3152 Queering American Culture (4 Credits)
Examine recent and historical forms of cultural representation in the U.S. (e.g., plays, novels, movies, memoirs, television programming, comic strips, and/or other cultural texts) for what they say about LGBTQ+ lives in America. Questions that may be considered include: How have LGBTQ+ people historically been represented in American culture? How do LGBTQ+ people seek to represent themselves? How has LGBTQ+ activism sought to challenge systems and structures of oppression organized around gender, sexuality, race, class, and other aspects of social difference? What does it mean to "queer" American culture? This course was previously CUL-243204 Queering American Culture. Prerequisites: Introduction to LGBTQ+ Studies, Introduction, or general background knowledge of gay and lesbian history and culture. Cross-listed with CUST 3152.

HIST: History (Undergraduate)

HIST 1010 African- American History to 1861 (4 Credits)
This study examines how the growth of the United States to the Civil War embodied free enterprise and slavery, small farms and workshops along with plantations, and visions of liberty that simultaneously denied basic human rights to millions. The goal is to understand why and how these contrasts originated and evolved and how they shaped the course of U.S. history to 1861.
Attributes: American History Gen Ed, *US History & Civ Engmt Gen Ed, Liberal

HIST 1015 African-American History: 1861 –1941 (4 Credits)
Students in this course examine the degree to which Emancipation changed the quality of life for African Americans. Students consider how the slow pace of economic transformation in the South gave rise to sharecropping and the convict leasing system, which served to prevent African Americans from migrating to other regions of the country and influenced political, social, and cultural endeavors within the African-American community. This course concludes by analyzing how "external" developments such as U.S. involvement in World War I affected prospects for migration out of the South and created opportunities for a new beginning. This course was previously HIS-243124 The African American Experience.
Attributes: American History Gen Ed, *US History & Civ Engmt Gen Ed, Liberal

HIST 1020 American Art: The New World to the Modern World (4 Credits)
From very humble beginnings in the 17th century, American art ultimately displaced Paris as the center of the art world in the post - WWII era. The course examines the relationship of artists to major historical themes and developments, which means at each juncture we look at the topic from historical and art-historical perspectives. Throughout those years, there were incredible successes, raging controversies, and numerous struggles for dominance, as artists, patrons, critics, and the public made and remade their place in American society. In the 17th century, we explore European influences on painting and architecture, which mostly derive from English and Dutch sources, but then consider the arts in connection to the Triangle Trade and Consumer Revolution. In the 18th century, the Colonies see more immigration from other parts of Europe (German, Scots-Irish, French) and slavery becomes more widespread, which we follow through the 19th century to distinguish between planter culture and what becomes the more industrialized North – all of that influences the artistic tastes and expenditures of peoples in the colonies and states, as do the great variety of political and religious views. From the 19th century through the 20th century, the public is exposed to art through media, public monuments, museums, and exhibitions, and paintings increasingly depicted immigrants, Indians, slaves, as well as people of all classes. Students will consider how artists gradually found a place in American culture, how art became a profession in an evolving nation, and how art influences and is influenced by diverse societies.
Attributes: American History Gen Ed, *The Arts Gen Ed, *US History & Civ Engmt Gen Ed, Liberal

HIST 1025 American Colonial History (4 Credits)
During this course students will explore important events in Colonial American history from the pre-colonial era through the mid-eighteenth century. Students will examine various political, social and cultural themes in this course, including European conquest; the American Natives' response to the European presence; the beginnings of English America; the settlement of the Puritan Colonies; growth and conflict in New England; Spanish policy and Native Response in New Mexico; ethnic diversity of the Middle Colonies; the Caribbean connection; expansion in the south; slave life and culture; religious awakenings; America in the early eighteenth century; and colonial America at the mid-eighteenth century. Critical reading skills and the ability to analyze and evaluate primary and secondary historical sources and produce written interpretations will be emphasized. .
Attributes: Liberal

HIST 1030 American Military History (4 Credits)
This course, offered through the Civil War Residency, explores important events in American Military history from the pre-colonial era through the 21st century. While every aspect of American history will not be discussed in depth, students will examine various political, social and cultural themes in this study, some in great detail. Critical reading skills and the ability to analyze and evaluate primary and secondary historical sources and produce written interpretations will be emphasized.
Attributes: American History Gen Ed, *US History & Civ Engmt Gen Ed, Liberal

HIST 1045 Arab Israeli Conflict (4 Credits)
The student will study the basic historical contours of the Arab-Israeli conflict starting in the nineteenth century, but with a particular focus on the period since the founding of the state of Israel in 1948 up to the present day. The student will examine the economic, political, military, and religious perspectives of Israeli Jews and Palestinian Arabs.
Attributes: Other World Civilization Gn Ed, *World Hist & Glb Awnss Gen Ed, Liberal

HIST 1055 East Asia (4 Credits)
This course is a survey of the political and social development of 'monsoon Asia' from the origins of its civilization to the present. Students will consider various philosophical and religious theories, as well as the wars, environmental phenomena, and class structures that have influenced the development of East Asia.
Attributes: Other World Civilization Gn Ed, Liberal

HIST 1060 Europe & Its Impact on the World (4 Credits)
This study will focus on the growth and impact of a market economy throughout the world and explore the ways European economic development helped to transform societies in Africa, the Americas, and Asia since (approx.) 1400. Through tracing the emergence of a market economy, students will assess social, political and cultural trends in Europe that were effected by economic change and consider how Europe was transformed by contact with the rest of the world. Similarly, they will examine how the traditional relationships in Africa and the Americas dissolved in the face of international economic expansion coordinated by European businessmen. Students will: analyze the growth of international trade; trace the interaction between rural and urban areas within Europe; explain how developments in one part of the world had consequences in other regions; and discuss how economic change influenced ideas and politics the world over.
Attributes: Other World Civilization Gn Ed, Western Civilization Gen Ed, Liberal

HIST 1070 Global History from the 1500 (4 Credits)
This study explores the rise of modern life as defined by major turning points in world events, e.g. industrialism, nationalism, and globalization. In addition, this study provides students with an introduction to the meaning of history and aspects of the historical process. This course was previously HIS-242114 .
Attributes: Other World Civilization Gn Ed, *World Hist & Glb Awnss Gen Ed, Liberal, Partial West Civ Gen Ed

HIST 1075 Global History to 1500 (4 Credits)
This course will introduce students to Global History to 1500, through texts, film, and interactivity. The course will explore the rise of the world's first major civilizations (including Mesopotamia, China, India and Egypt); specific cultural, political and social encounters; the classical foundations of both the Greek and Roman civilizations; and the impact of religion, memory schemes, and oral traditions in shaping world civilizations. Students will begin to learn the art and science of historical inquiry through the use of primary sources, maps and timelines, to bring into perspective our contemporary view of the origins of civilizations. This course was previously HIS-242104.
Attributes: Other World Civilization Gn Ed, *World Hist & Glb Awnss Gen Ed, Liberal

HIST 1080 History of World Religions (4 Credits)
This study will survey the history of the development of the major religious traditions of the world including Hinduism, Jainism, Buddhism, Confucianism, Taoism, Shintoism, Judaism, Christianity and Islam, as well as many of the indigenous religious traditions. In the process, students will have the opportunity to answer the question, 'What is religion?'
Attributes: Other World Civilization Gn Ed, *World Hist & Glb Awnss Gen Ed, Liberal

HIST 1095 Progressive Era in American History (4 Credits)
Who were the Progressives? And what was their legacy? Through this study, students will have the opportunity to analyze and assess the variety of historical theories proposed by historians to explain the origins, legacy, and demise of Progressivism. During this course the student will explore important events during the Progressive Era in American History. While every aspect of this period in American history will not be discussed in depth, students will examine various political, social and cultural themes in this course, including the Gilded Age and Progressive Era; the price of progress: capitalism; the wild west; the new South; the rise of industry; the Gilded Age; economic depression and political crisis; professionalism; the language of empire; race and power under Jim Crow; consumer culture and leisure; progressivism: the reform Vision; environmental issues; and the Great War.
Attributes: Liberal

HIST 1100 Revolutionary America (4 Credits)
Students will examine the origins, events and major personalities of the American Revolution, in the period from 1763-1789. Topics include the development of the American colonies, the reasons for the break with Great Britain, the course and character of the revolution, as well as the philosophical and political debate over the Constitution. The student will gain a better understanding of the major political, intellectual, social, economic, and cultural trends of the revolutionary period in American history, with a focus on the Revolution itself and the subsequent creation of a new constitutional system of government.
Attributes: Liberal

HIST 1105 Sex History & Art (4 Credits)
Sex, History and Art will introduce the student to the practices of sex and the role of art in the development of Western society. Although it is often a controversial topic, sex is a necessity for survival as are food, clothing, and shelter. Sex is a powerful force in the development of religion, politics, and art. Throughout the period of study, culture and the role of ideas will be emphasized as students examine the symbolism and narratives of sex across a range of topics.
Attributes: Arts Gen Ed, Western Civilization Gen Ed, *The Arts Gen Ed, Liberal

HIST 1115 Western Civilization I (4 Credits)
This study explores the ideas and institutions that arose from the ancient and medieval worlds, e.g. philosophy, law, and Christianity, that lay the foundations of western society. In addition, the study examines the development of the west in the context of world affairs. Finally, this study provides students with an introduction to the meaning of history and aspects of the historical process.
Attributes: Western Civilization Gen Ed, *World Hist & Glb Awnss Gen Ed, Liberal

HIST 1120 Western Civilization II (4 Credits)
This study of the rise of the modern age as defined by major turning points in western history, e.g. industrialism, revolution, and world war. In addition, the study examines the development of the West in the context of world affairs. Finally, this study provides students with an introduction to the meaning of history and aspects of the historical process.
Attributes: Western Civilization Gen Ed, *World Hist & Glb Awnss Gen Ed, Liberal

HIST 1122 Art Music & History I (4 Credits)
"Art, Music, and History I" is a survey of European culture from Ancient Greece through the Renaissance, which examines the many historical contexts that underlie art and music. Students do not need any background in the arts, as this is a course we will build from the ground up by first exploring the questions: What is art? Is it necessary? Where does it come from? Why is it important? And "What does it mean?" Our world is filled with art and music, and it did not get that way by accident. Broadly speaking, this is a course about cultural history, or how people live their lives in society--what they think, what they value, and what they do. If you can understand these basic ideas within your own life, then you will be able to understand them in history and vice versa. Although our focus here is on the arts, it is important to emphasize that we will study them within the political, social, economic and technological backgrounds from which they sprang and which they also influenced. Hopefully, you will see art, music, history and the world around you in ways you never thought possible.
Attributes: Western Civilization Gen Ed, *The Arts Gen Ed, Liberal

HIST 1127 Introduction to Guitar & Guitar Music in European History (4 Credits)
Introduction to Guitar and Guitar Music is designed to introduce students to the instrument of guitar and the music associated with it from a historical, as well as a practical, perspective. We will also explore the mechanical aspects of guitar construction as it evolved over the centuries by considering various materials such as wood, metal, bone, glue, synthetics, and strings, and we'll look at the building techniques/tools of luthiers (guitar-builders). This study will focus on American History, asking students to consider and write about the Baroque, Classical, or Romantic as styles of music/eras important within a broad outline of Western Civilization.
Attributes: *The Arts Gen Ed, Liberal

HIST 1128 Global Civilization (3 Credits)
This course is intended to provide students with an overview of the history, diversity and impact of human habitation across the entire globe. It shares with Karl Jaspers the sense that we live in a period that "requires the whole history of mankind to furnish us with the standards by which to measure the meaning of what is happening." Three questions are central to the courses: 1) why are some countries richer than others; 2) what difference do beliefs and ideas (as opposed to material circumstances) make to human history; and 3) what impact have these differences had on the lives of the world's peoples?
Attributes: Other World Civilization Gn Ed, Liberal

HIST 1130 Understanding the US Constitution: Introductory (4 Credits)
Focused on the U.S. Constitution, this course will help students understand and interpret the document that outlines America's fundamental rules and government structures and discover major constitutional issues. Students will examine a variety of topics related to the history and content of the Constitution and its role in American life.
Attributes: Liberal

HIST 1996 Special Topics in HIST (3-4 Credits)
The content of this course will vary by term and section. Students may repeat this course for credit as long as the topic differs. Please refer to the Term Guide for course topic offerings.
Attributes: Liberal

HIST 1998 Individualized Studies in Historical Studies (HIST) (1-8 Credits)
Students have the opportunity to develop individualized studies with their mentor in Historical Studies (HIST). Please contact your mentor/advisor for more details.

HIST 2005 American West (4 Credits)
The goal of this study is to introduce students to an understanding of the American West that transcends traditional perceptions of the American Frontier and its related mythology. Students in this study will examine various political, social and cultural themes in this course and explore the history of the American West from the pre-colonial era through the 21st Century. Topics will include definitions of 'the American West' from several perspectives, the historiography of the American West, and the social, political and cultural history of the American 'frontier.' Issues of race and gender are integrated throughout.
Attributes: Liberal

HIST 2010 Mexico: History & Culture (4 Credits)
This study provides an overview of Mexican history and material culture. Themes addressed in this study include the interaction of indigenous, European, and African peoples, the use and spread of material wealth, and the impacts of religion, education, and imperialism on expansion and development. The basic structure of this study is chronologically based but incorporates geography and cultural themes to addressed variations within the Mexican experience.
Attributes: Liberal

HIST 2013 Race in United States Politics (4 Credits)
The student will examine the issue of race in contemporary US politics. Students will examine issues relating to white supremacy/white nationalism, immigration and demographic/cultural change, and how racial resentments connect to economic issues, among others. Students will explore how these issues affect electoral politics, campaigns, and how office-holders govern. We will learn how politicians and partisan media use these issues to move public opinion, and how mainstream media cover these issues. This course is cross listed with POLI 2013. Cross-listed with POLI 2013.
Attributes: Liberal

HIST 2015 Native American Histories & Cultures: Introduction (4 Credits)
The purpose of this study is to understand and appreciate the variety of cultures developed by the Native American peoples of the Americas, and how they influenced Euro-American society. During the course of this study the student will examine the role of Native Americans in American history and the distinctive features of the history, institutions, economy, society, and culture of Native American Indian Nations. First Peoples may be included in Interdisciplinary & Multidisciplinary Studies This course was previously HIS-243134 First Peoples of North America.
Attributes: Other World Civilization Gn Ed, Liberal

HIST 2020 Novel America: The Story of the Story in American Literature to 1850 (4 Credits)
Why are we so fascinated with stories? Is it just because we like identifying with characters and circumstances; peering into lives outside our own; escaping to a world not possible for us? Or is there something more essential to who we are? In the New World, millions of people with their countless stories forged an identity that collectively became the American narrative. How did that develop? Is there such a thing as an American Identity? If so, how could we define it? From selections of literature in the period 1607-1850 students will discover how Americans thought of themselves, of others, of the world they inhabited, and of the supernatural. Students will dig deep into their meaning; examine the role of thinking in the creation of literature; analyze how writers write; and ask questions that they might not be able to answer. The readings are a diverse selection of literature by an even more diverse assortment of authors, including works by preachers and drunks, philosophers and fools, heroes and slaves, and radicals and Romantics.
Attributes: Humanities Gen Ed, Liberal

HIST 2025 US History to 1865: What Does it Mean to be a Free Nation? (3-4 Credits)
What was life like for the first European colonists? What were the ideas, events and actions that led to the American Revolution? What did the Declaration of Independence and the Constitution mean to the people who wrote it? How did the idea of liberty and the practice of slavery develop and co-exist? What was it like to be a woman, an immigrant, a slave, or a poor worker in America's formative years? This course will explore such questions. In doing so, we will meet and hear the voices of a diverse group of people ranging from well-known figures such as Thomas Jefferson and George Washington to others who by law and custom were excluded from the political process but still made a significant impact upon our nation's history and identity. This course was previously HIS-241214 U.S. History to 1865: What Does It Mean To Be A Free Nation?.
Attributes: American History Gen Ed, *US History & Civ Engmt Gen Ed, Liberal

HIST 2030 US History From 1865 to the Present (3,4 Credits)
In 1865, the United States was in tatters. Civil War had divided the nation into two, and even after the war ended, deep rifts remained between whites and blacks, immigrants and 'natives,' and the descendants of European settlers and indigenous Americans. The meaning of a simple word - freedom - lies at the core of these rifts and that word will guide our study. The course begins with a look at how the meaning of freedom changed in the Reconstruction era before moving into an exploration of America's westward and overseas expansion in the late 19th century, the economic booms and busts of the period between the two world wars, the social upheavals of the civil rights movements of the 1960s, and the conservative turn of the post-Reagan era. This course was previously HIS-241224 U.S. History From 1865 to the Present.
Attributes: American History Gen Ed, *US History & Civ Engmt Gen Ed, Liberal

HIST 2035 Women & Work in American History (4 Credits)
This study will examine the History of Women and Work from the colonial period to the late 20th century. Students will explore the ways historical events and circumstances have shaped women's wage work, as well as the diversity of women's work experiences arising from different cultural backgrounds and socioeconomic status. Students will also explore how social expectations and ideologies shaped women's work.
Attributes: American History Gen Ed, *US History & Civ Engmt Gen Ed, Liberal

HIST 2040 An Economic History of the West (4 Credits)
The scholarship of many historians suggests that trade and commerce are among the most important factors that have influenced the evolution and direction of human civilizations. Accordingly, this course examines how economic developments have served as a catalyst for change throughout the development and spread of Western Civilization. In order to understand the distinctive features of the history, institutions, society, culture, and politics of Western Civilization, students will be introduced to Western philosophies or theorizations of 'economy' in terms of history and civilization, and examine differricultural expansion. They will follow the evolution of such theories and consider how they have shaped historical developments from antiquity to the present. Students will illustrate connections between economic, social, cultural, and political developments within the context of the historical and contemporary West. In short, students will engage with 'the economic' as a particularly useful lens for understanding Western Civilization. This course was previously HIS-242504 An Economic History of the West.
Attributes: Western Civilization Gen Ed, Liberal

HIST 2045 American Environmental History: Introduction (4 Credits)
This study examines the changing environmental geography of North America from prehistoric times to the 21st century. Readings cover the history of the physical interactions between humans and the natural world as well as the intellectual transformations and the changing ways in which human societies inhabiting North America have conceptualized the environment. This study focuses on key turning points in U.S. environmental history and the historical forces behind those transformations in the modern era, emphasizing events in the 19th, 20th and 21st centuries.
Attributes: American History Gen Ed, *US History & Civ Engmt Gen Ed, Liberal

HIST 2050 History of American Medicine and Public Health: Introductory (4 Credits)
Students will study the evolution of medicine and public health in the US from colonial times to the present. This course will consider the relationship between American History and medicine and health. Each section of the course will focus on a different component of that history. Assignments will ask students to demonstrate their understanding of how individuals and communities respond to laws and regulations of health care systems. Students will apply historical and contemporary evidence to draw, support and verify conclusions in a se4ries of essay assignments.
Attributes: American History Gen Ed, *US History & Civ Engmt Gen Ed, Liberal

HIST 2055 History of American Families and Children: Introductory (4 Credits)
Students will explore important events in the history of American families and children from the pre-colonial era through the 21st Century. The diversity in family life that we see today is the result of changes in the way we make a living and the rise of the American value of self-actualization that has taken place over the past 300 years. We will explore the social developments and the 20th century challenges of economic collapse and world wars to understand the shifts in values and expectations that have accompanied the transition.
Attributes: American History Gen Ed, *US History & Civ Engmt Gen Ed, Liberal

HIST 2060 History of Social Welfare: Introductory (4 Credits)
This course examines the development of, and debates about, U.S. social welfare institutions and policies. In particular, this course examines how social welfare philosophy, mission, and practice evolved from its original altruistic and voluntary roots to become professionalized and identified with casework rather than social reform. Topics of this study include: the origins and inspirations of social welfare programs and philosophy in the United States; the impact of the Civil War; the "Scientific Charity" Movement; the history and evolution of Child Welfare policy; the Settlement House Movement; The Great Depression and the origins and evolution of Social Security Policy; the Johnson Administration's Great Society programs and War on Poverty; Welfare to Workfare in the 1970s; the state of social welfare in the USA today.
Attributes: American History Gen Ed, *US History & Civ Engmt Gen Ed, Liberal

HIST 2065 Long Island History: Introduction (4 Credits)
During this study students will examine the rich history and political, social, economic and cultural development of Long Island from the prehistoric period, through the colonial era and up to the present day.
Attributes: American History Gen Ed, *US History & Civ Engmt Gen Ed, Liberal

HIST 2070 Decisive Battles (4 Credits)
In this course, students will examine decisive battles that have shaped the character and course of Western Civilization and America from the origins of organized warfare in ancient Western Asia through the recent Gulf Wars. Students will also examine the nature and the evolution of military strategy throughout the history of the West.
Attributes: Liberal

HIST 2122 American Business History (4 Credits)
We will examine the people, events, and ideas in an economic context from the first settlements in 1607 through the 20th century in order to understand their many connections; to learn how to think about the discipline of History; and to understand why business and economics are essential to history. Leraning Objectives: 1. Demonstrate a working knowledge of historical events within the context of business and economics 2. Understand how to think about and analyze history 3. Use those skills in essays that demonstrate college-level writing ability 4. Understand the importance of history, business, and economics in their personal lives.
Attributes: American History Gen Ed, Liberal

HIST 2127 The Hudson River and its Valley (4 Credits)
In this course, we will examine American History from the discovery of the Hudson River by Europeans to the present day by studying the river, its valley, and the places directly connected to that large swathe of New York State. We will see how far and wide its impact stretched as we learn how to think about the disciplines of History and the Arts; understand their many connections; and to understand why history and art are so important to civilization. We will study the notion of local history and its connections to state, national, and international history, as well as how the Hudson River Valley influenced and was influenced by the arts of literature, painting, architecture, sculpture, and music. Materials assigned for the course will cover the diverse groups living in the region. The course culminates in a research project as an essay, photographic essay, or short documentary.
Attributes: American History Gen Ed, *The Arts Gen Ed, *US History & Civ Engmt Gen Ed, Liberal

HIST 2132 Genealogy (4 Credits)
Genealogy, Family, and History is a course in which we will explore fundamentals of genealogical and historical research for the purpose of connecting ancestry and history. To that end, a student will select a branch or branches of their family tree to make those connections.
Attributes: Liberal

HIST 2137 The Civil War: Introduction (4 Credits)
The purpose of this study is to give students the opportunity to survey the history of Antebellum slavery, the Civil War and the Reconstruction era, and introduce them to the major historical problems of the American Civil War and Reconstruction era. These include the causes of the war; the character of Antebellum American slavery; the causes behind the Confederacy's defeat; the Lincoln enigma; and the character and legacy of Reconstruction, within the context of the broad sweep of American history from the Colonial period through the Reconstruction era. The Civil War: Introduction is offered in conjunction with the Civil War History Residency.
Attributes: American History Gen Ed, *US History & Civ Engmt Gen Ed, Liberal

HIST 2142 History of Management (4 Credits)
Students will examine history and management practices in order to understand their many connections, and why they are so important in business.
Attributes: Liberal

HIST 2155 The Pursuit of Happiness in American History (4 Credits)
This study introduces students to the vast and diverse history of the United States using the theme, "the pursuit of happiness," as a lens through which to explore social, political, economic, and cultural changes over time. In addition, students will explore the theme through the lens of the diverse communities that make up the United States. The study also introduces students to the practice of "doing history," particularly of searching for and examining "primary" documents. This study can also be used for student seeking credit in educational planning.
Attributes: American History Gen Ed, *US History & Civ Engmt Gen Ed, Liberal

HIST 2162 1970s America: Introductory (4 Credits)
This course explores American history and culture during the critical decade of the 1970's. Students will read and view a variety of works (textual and cinematic) through which they will learn about important economic, political, social and cultural events, individuals, debates, and developments in the 1970's. Themes discussed throughout the course may include, but are not limited to: the fate of liberalism in post-1960's America, the rise of ethnic identity and its impact on the rights revolution, gender and the politics of sexuality, religion and the rise of the South, Nixon and Watergate, Carter and political malaise, urban decay, environmentalism, and encounters with terrorism.
Attributes: Liberal

HIST 2998 Individualized Studies in Historical Studies (HIST) (1-8 Credits)
Students have the opportunity to develop individualized studies with their mentor in Historical Studies (HIST). Please contact your mentor/advisor for more details.

HIST 3000 20th Century European History (4 Credits)
The study will focus on the social, political, economic, and cultural history of 20th century Europe. Students will begin by reading an overview of the period and will then do additional reading and writing in specific areas of interest.
Attributes: Western Civilization Gen Ed, Liberal

HIST 3002 American Art-The New World to the Modern World: Advanced (4 Credits)
From very humble beginnings in the 17th century, American art ultimately displaced Paris as the center of the art world in the post - WWII era. The course examines the relationship of artists to major historical themes and developments, which means at each juncture we look at the topic from historical and art-historical perspectives. Throughout those years, there were incredible successes, raging controversies, and numerous struggles for dominance, as artists, patrons, critics, and the public made and remade their place in American society. In the 17th century, we explore European influences on painting and architecture, which mostly derive from English and Dutch sources, but then consider the arts in connection to the Triangle Trade and Consumer Revolution. In the 18th century, the Colonies see more immigration from other parts of Europe (German, Scots-Irish, French) and slavery becomes more widespread, which we follow through the 19th century to distinguish between planter culture and what becomes the more industrialized North – all of that influences the artistic tastes and expenditures of peoples in the colonies and states, as do the great variety of political and religious views. From the 19th century through the 20th century, the public is exposed to art through media, public monuments, museums, and exhibitions, and paintings increasingly depicted immigrants, Indians, slaves, as well as people of all classes. Students will consider how artists gradually found a place in American culture, how art became a profession in an evolving nation, and how art influences and is influenced by diverse societies.
Attributes: American History Gen Ed, *The Arts Gen Ed, *US History & Civ Engmt Gen Ed, Liberal

HIST 3005 19th Century Eastern Europe (4 Credits)
Students will examine the history of Eastern Europe during the so-called 'long' nineteenth century including the impact of the French Revolution and the Napoleonic period, the post-Revolution restoration, the Polish uprisings in Russia in 1830 and 1863, the 1848 revolutions, the abolition of serfdom in mid-century, the Balkan states' gaining independence, and the First World War. Students will focus on the divisions of Eastern European territory among the great powers of the region: Prussia/Germany, Austria-Hungary, and Russia, as well as the rise of mass politics, nationalism, and socialism as forces that shaped the region. Prerequisites: An introductory level course in European history and/or Western Civilization is strongly recommended.
Attributes: Liberal

HIST 3007 History of Management (4 Credits)
Students will examine history and management practices in order to understand their many connections, and why they are so important in business.
Attributes: Liberal

HIST 3010 African History & Culture (4 Credits)
In this multidisciplinary approach to Africa's civilizations and cultures, students will gain knowledge of African history and its interactions with the Western world. Students will gain an understanding of structures, systems, and interrelationships between and across the nations of the continent through an exploration of the history of colonization and its impacts; different geographic regions of the continent; and a variety of literary and journalistic texts. Students also will explore such issues as sustainability and well-being by bringing in shared resources on such topical issues as disease prevention and spread, climate change, family and kinship networks, women and development, religion, and literature. Students engage in discussions, prepare case studies, and write short essays and a research paper, and prepare a visual presentation based on some aspect of their research. This course was previously HIS-243344 African History and Culture. Prerequisites: Introductory coursework in world history, advanced level research and writing skills.
Cross-listed with CUST 3167.
Attributes: Other World Civilization Gn Ed, *World Hist & Glb Awnss Gen Ed, Liberal

HIST 3012 Hillary vs. Trump: The 2016 Presidential Election (4 Credits)
The student will gain an understanding of the campaign for the 2016 presidential election, including the major policy issues relating to economics, race, gender, foreign policy, and other categories of issues. The student will gain an understanding of political and ideological divisions within each of the major parties, as well as between them.
Attributes: Liberal

HIST 3017 Sex History and Art: Advanced (4 Credits)
Sex, History, and Art is a course in which we will examine how sex has shaped history and appears in art. We will focus on making connections between those concepts as we learn how to think about the discipline of History, and to understand sex, history, and art are so important to civilization.
Attributes: Arts Gen Ed, Western Civilization Gen Ed, *The Arts Gen Ed, Liberal

HIST 3031 American Revolution: Military History (4 Credits)
The Revolutionary War Residency provides students the opportunity to survey the history of the American Revolution from the end of the Seven Years War until the end of the War of 1812 and to introduce them to the major historical issues of his era. Students, who take this particular study will examine in depth the military history of the period including the Seven Years, and the War of 1812, and especially the American Revolutionary War, all within the larger cultural, social, and political context of the times.
Attributes: American History Gen Ed, *US History & Civ Engmt Gen Ed, Liberal

HIST 3032 American Revolution: Constitution History (4 Credits)
The Revolutionary War Residency provides students the opportunity to survey the history of the American Revolution from the end of the Seven Years War until the end of the War of 1812 and to introduce them to the major historical issues of his era. Students who take this particular study will examine in depth the Constitutional history of the Revolutionary era, all within the larger military, cultural, social, and political context of the times.
Attributes: American History Gen Ed, *US History & Civ Engmt Gen Ed, Liberal

HIST 3033 American Revolution: Federalists and Jeffersonians (4 Credits)
The Revolutionary War Residency provides students the opportunity to survey the history of the American Revolution from the end of the Seven Years War until the end of the War of 1812 and to introduce them to the major historical issues of his era. Students who take this particular study will examine in depth the origins and character of the first political party system in American History, all within the larger military, cultural, social, and political context of the times.
Attributes: American History Gen Ed, *US History & Civ Engmt Gen Ed, Liberal

HIST 3034 American Revolution: Medical and Military History (4 Credits)
The Revolutionary War Residency provides students the opportunity to survey the history of the American Revolution from the end of the Seven Years War until the end of the War of 1812 and to introduce them to the major historical issues of this era, such as the causes of the war, the relationship between the First Great Awakening, the Enlightenment, the Renaissance and the Revolution; the factors behind America's triumph in the war; revolutionary ideology and the institution of slavery; the Critical Period in American history; the creation and ratification of the U.S. Constitution; the origins and character of the first national party system in America; and the causes and course of the War of 1812. This section on Medical and Military history explores the impact of disease on the military and civilian populations as well as society overall during the American Revolution.
Attributes: American History Gen Ed, *US History & Civ Engmt Gen Ed, Liberal

HIST 3035 American Revolution: Women's History (4 Credits)
The Revolutionary War Residency provides students the opportunity to survey the history of the American Revolution from the end of the Seven Years War until the end of the War of 1812 and to introduce them to the major historical issues of this era, such as the causes of the war, the relationship between the First Great Awakening, the Enlightenment, the Renaissance and the Revolution; the factors behind America's triumph in the war; revolutionary ideology and the institution of slavery; the Critical Period in American history; the creation and ratification of the U.S. Constitution; the origins and character of the first national party system in America; and the causes and course of the War of 1812. In this section we will focus on what the American Revolution meant to—and for—women, highlighting women's participation in and contributions to the revolutionary movement. We will focus on diverse experiences of individuals as women's participation was influenced by their race, socio-economic class, free or enslaved status, family circumstance, and whether they supported the patriot/colonial independence cause or remained loyal to the British crown.
Attributes: American History Gen Ed, *US History & Civ Engmt Gen Ed, Liberal

HIST 3036 American Revolution: Founding Fathers (4 Credits)
The Revolutionary War Residency provides students the opportunity to survey the history of the American Revolution from the end of the Seven Years War until the end of the War of 1812 and to introduce them to the major historical issues of this era, such as the causes of the war, the relationship between the First Great Awakening, the Enlightenment, the Renaissance and the Revolution; the factors behind America's triumph in the war; revolutionary ideology and the institution of slavery; the Critical Period in American history; the creation and ratification of the U.S. Constitution; the origins and character of the first national party system in America; and the causes and course of the War of 1812. This section uses biography to explore major questions of the Revolutionary and early national periods. Students will research and write about a member of the revolutionary generation (their choice) with input from the professor.
Attributes: American History Gen Ed, *US History & Civ Engmt Gen Ed, Liberal

HIST 3037 American Revolution: Religious History (4 Credits)
The Revolutionary War Residency provides students the opportunity to survey the history of the American Revolution from the end of the Seven Years War until the end of the War of 1812 and to introduce them to the major historical issues of this era, such as the causes of the war, the relationship between the First Great Awakening, the Enlightenment, the Renaissance and the Revolution; the factors behind America's triumph in the war; revolutionary ideology and the institution of slavery; the Critical Period in American history; the creation and ratification of the U.S. Constitution; the origins and character of the first national party system in America; and the causes and course of the War of 1812. This section on religious history explores the origins and meaning of the First and Second Great Awakening, the role of religion in the Revolutionary War, and the experience of Roman Catholics in the early national period.
Attributes: American History Gen Ed, *US History & Civ Engmt Gen Ed, Liberal

HIST 3038 American Revolution: Slavery and the Founding (4 Credits)
The Revolutionary War Residency provides students the opportunity to survey the history of the American Revolution from the end of the Seven Years War until the end of the War of 1812 and to introduce them to the major historical issues of his era. Students who take this particular study will examine in depth the relationship between the institution of slavery and the Founding Fathers of the United States.
Attributes: American History Gen Ed, *US History & Civ Engmt Gen Ed, Liberal

HIST 3040 American 20th Century History (4 Credits)
Sections under this title might include: The Age of Reagan; The Liberal Ascendancy; American Culture and The Cold War; History of America in the 1960s; American Modernism; No Ordinary Time: America in the Depression Years, 1929-1941; The Progressive Era in American history. This course will consider the history of the United States in the 20th century. Each section of the study will a different component of that history. After discussion with their advisors, students may complete more than one of the sections listed under this title.
Attributes: American History Gen Ed, Liberal

HIST 3045 American Business History: Advanced (4 Credits)
Students will examine the people, events, and ideas in an economic context from the first settlements in 1607 through the 20th century in order to understand their many connections; to learn how to think about the discipline of History; and to understand why business and economics are essential to history.
Attributes: American History Gen Ed, *US History & Civ Engmt Gen Ed, Liberal

HIST 3050 American Colonial History: Advanced (4 Credits)
During this course students will explore important events in Colonial American history from the pre-colonial era through the mid-eighteenth century. Students will examine various political, social and cultural themes in this course, including European conquest; the American Natives' response to the European presence; the beginnings of English America; the settlement of the Puritan Colonies; growth and conflict in New England; Spanish policy and Native Response in New Mexico; ethnic diversity of the Middle Colonies; the Caribbean connection; expansion in the south; slave life and culture; religious awakenings; America in the early eighteenth century; and colonial America at the mid-eighteenth century. Critical reading skills and the ability to analyze and evaluate primary and secondary historical sources and produce written interpretations will be emphasized. Students who enroll in this study at the advanced level also will complete a research paper of substantive length and scholarly value.
Attributes: Liberal

HIST 3060 American Environmental History (4 Credits)
This course examines the changing environmental geography of North America from prehistoric times to the 21st century. Readings cover the history of the physical interactions between humans and the natural world as well as the intellectual transformations and the changing ways in which human societies inhabiting North America have conceptualized the environment. This study focuses on key turning points in U.S. environmental history and the historical forces behind those transformations in the modern era, emphasizing events in the 19th, 20th and 21st centuries.
Attributes: American History Gen Ed, *US History & Civ Engmt Gen Ed, Liberal

HIST 3062 Global Art History (4 Credits)
This study is a global, thematic approach to visual and performing arts history that integrates both Western and Non-Western visual and performing arts in terms of style, aesthetic and meaning. In this context arts considered 'western' are examined in tandem with Indigenous 'Non-Western' expressions in which both similarities and differences will be explored. Building on a foundational discussion of the creative process, definitions of this process, design methods and iconography, the arts will be understood within cultural, political, social, economic and institutional influences on artists and human creativity. Within this thematic consideration of the role, function and meaning of the arts the course provides a broad overview throughout the known history of the human experience, particularly in Non-Western Cultures.
Attributes: Other World Civilization Gn Ed, Liberal

HIST 3065 American History & the Arts (4 Credits)
Sections under this title might include: American History, Cinema and Jazz; American History, Culture and the Arts; History of American Jazz Music. This course will consider the intersection of the arts and American history. Each section of the study will focus on a different facet of that history. After discussion with their advisors, students may complete more than one of the sections listed under this title.
Attributes: American History Gen Ed, Liberal

HIST 3070 American Immigration (4 Credits)
This course examines the history of immigration to cities and urban areas of the United States since the nineteenth century. It considers the causes of immigration, the social, cultural, and economic adaptation of various groups, return immigration, the significance of race, the varied experience of different immigrant groups, the development of ethnic group identities, changing American policy and attitudes towards immigrants and ethnic groups, and the impact of immigration on American society and culture.
Attributes: American History Gen Ed, *US History & Civ Engmt Gen Ed, Liberal

HIST 3085 American Labor History (4 Credits)
Sections under this title might include Blue Collar America; American Labor History; Labor Movements in the U.S. This course traces the experiences of working-class Americans from the beginnings of the Second Industrial Revolution at the end of the 19th century to the recent advent of a service-based economy. Regardless of the specific section, this course will consider work, family, community, and politics - these and other dimensions of working people's lives will be considered through reading and writing assignments. Each of the sections will also place the American labor movement(s) in the context of the larger, international labor movement. After consultation with their advisors, students may complete more than one of the sections listed under this title.
Attributes: American History Gen Ed, *US History & Civ Engmt Gen Ed, Liberal

HIST 3086 U.S. Unions since the 1960s (4 Credits)
In the 1960's labor unions were at the height of their economic and political powers. Collective bargaining provided union members with wages and benefits that kept pace with corporate profits, and even set standards for non-union workers. In politics, unions were an essential base of the Democratic coalition and crucial to passing social legislation like the Civil Rights Act and Medicare. Today, unions represent fewer than one in ten workers and struggle to produce political and economic wins for the working class. This course will examine this historic decline and its impact on society, as well as attempts by unions and workers to fight back and restore the power of unions. It is recommended that students who enroll in this course have experience in labor unions, or take a prior course on the labor movement or working class themes. (Recommended: HIST 3085 American Labor History and/or LABR 3020 Development of the Labor Movement)
Attributes: *US History & Civ Engmt Gen Ed, Liberal

HIST 3090 American Military History: Advanced (4 Credits)
This course is part of the Civil War Residency with a required field trip April 21 - April 23, 2023, in Sharpsburg, Maryland and Gettysburg Pennsylvania. This course will investigate in depth the military history of the United States from the colonial period through the 20th century. Prior advanced level coursework on the American Civil War, era of Reconstruction, and/or American military history is recommended for registration in this course.
Attributes: American History Gen Ed, *US History & Civ Engmt Gen Ed, Liberal

HIST 3095 American National Identity: Past Present & Future (4 Credits)
Students will examine the way Americans have defined and currently define our national identity as a people, as a community. That definition has changed over time as groups once excluded gradually found greater acceptance. Students will consider those changes and the struggles necessary to overcome resistance on the part of those who hope to define American national identity in more exclusionary terms. They will also study contemporary debates around the changing nature of American national identity, and exclusionary definitions of American national identity that some Americans continue to believe in. The course will explore how questions of immigration, ethnic/racial/religious identity, and demographic changes to our population affect the question of American national identity. Prerequisites: An introductory course in American history is strongly recommended.
Attributes: Liberal

HIST 3100 American Religious History I (4 Credits)
This course covers religion in American history from colonial times to the present. Sections might include: Jefferson's Bible: Reason and Religion in America. This course explores American Religious History from pre-colonial times to the present. Students will evaluate some facet of Native American, colonial, early republican, antebellum, regional and contemporary religion, alternative religions and other topics from a wide variety of perspectives. Students will also evaluate the impact of religious institutions upon Americans of various ethnic backgrounds, races and social classes. After consultation with their advisors, students may complete more than one of the sections listed under this title.
Attributes: American History Gen Ed, *US History & Civ Engmt Gen Ed, Liberal

HIST 3110 American Urban & Suburban History (4 Credits)
This course offers an examination of the nation's urban (and suburban) development and reflects the city's pivotal role in the unfolding of American history. Students will focus on various aspects of urban development, social class and class relations, the evolution of technology, race relations, redevelopment in the post-World War II nation, and significant changes in urbanization in a post-9/11 nation.
Attributes: American History Gen Ed, *US History & Civ Engmt Gen Ed, Liberal

HIST 3112 Novel America: Advanced (4 Credits)
We will read a variety of selections from American Literature and then discuss them as a group. In those discussions, each student will explain their insights into the material as a way to understand the creative process, historical context, and meaning of those works over time.
Attributes: Humanities Gen Ed, Liberal

HIST 3115 American Women's History (4 Credits)
Sections might include: America in the Age of Revolution; History of African-American Women; Women's Issues in American History; The Women's Suffrage Movement. This course examines the histories of women in the U.S., from the time of Europeans' first contact with the New World to the present. Students will explore how historical events and circumstances have shaped gender roles and the structure of family relationships, as well as the diversity of women's experiences as a result of differing cultural, racial, and ethnic backgrounds and socioeconomic status. Students might focus on women's daily lives, their interactions with their families and other social institutions (e.g. government, religion, etc...), women's activism, and women's impact on sociopolitical structures in the United States, and in the world today. After consultation with their advisors, students may complete more than one of the sections listed under this title. Some introductory level coursework in U.S History is recommended but not required for this course. Critical reading skills and the ability to analyze and evaluate primary and secondary historical sources and produce written interpretations will be emphasized. This course was previously HIS-243254 U.S. Women's History: Lives and Voices.
Attributes: American History Gen Ed, *US History & Civ Engmt Gen Ed, Liberal

HIST 3120 Ancient Greece: Advanced (4 Credits)
This study will investigate history of Ancient Greece from the Bronze Age through the Hellenistic period in Greece, Southern Italy, Sicily and Western Asia. This will include political, cultural, artistic, intellectual, and economic aspects of the Greek world. Students will explore the distinctive features of the history, institutions, economy, society, and culture of Western civilization and relates that development to the history of other world civilizations.
Attributes: Western Civilization Gen Ed, *World Hist & Glb Awnss Gen Ed, Liberal

HIST 3122 New York's Canals: A Social & Cultural History (2 Credits)
This course, which may be taken in conjunction with other sections of "New York's Canals," will focus on the social history of the canal system. Students will be expected to participate in on-site sessions to learn more about the canal systems, their role in New York's social and cultural history, and the changes they wrought in the society, culture, economics, and politics of New York State and the larger world.
Attributes: Liberal

HIST 3125 Ancient Rome: Republic & Empire: Advanced (4 Credits)
This study will chart the development of the Roman Republic and Empire. Students will investigate the history of the Italian peninsula from the development of settled villages through the end of Justinian I's reign in 565 CE. Through the use of primary and secondary sources students will explore the political, social, artistic, military, and religious contributions to both the ancient and modern worlds.
Attributes: Liberal

HIST 3127 Western Civilization II: Advanced (4 Credits)
Students will examine the events, ideas, and variety of peoples during the period 1500-1960 in order to understand their many connections; to learn how to think about the discipline of History; and to understand why history is so important to civilization.
Attributes: Liberal

HIST 3135 Art Music & History I: Advanced (4 Credits)
"Art, Music, and History I" is a survey of European culture from Ancient Greece through the Renaissance, which examines the many historical contexts that underlie art and music. Students do not need any background in the arts, as this is a course we will build from the ground up by first exploring the questions: What is art? Is it necessary? Where does it come from? Why is it important? And "What does it mean?" Our world is filled with art and music, and it did not get that way by accident. Broadly speaking, this is a course about cultural history, or how people live their lives in society--what they think, what they value, and what they do. If you can understand these basic ideas within your own life, then you will be able to understand them in history and vice versa. Although our focus here is on the arts, it is important to emphasize that we will study them within the political, social, economic and technological backgrounds from which they sprang and which they also influenced. Hopefully, you will see art, music, history and the world around you in ways you never thought possible.
Attributes: Western Civilization Gen Ed, *The Arts Gen Ed, Liberal

HIST 3140 Caribbean: Cruises Carnival & Colonization (4 Credits)
Students in this course will travel figuratively from the neo-colonial realities of the early 21st century Caribbean into the historic past. In doing so, they gain an opportunity to view and understand the situation in the Caribbean in a global context. Internationalization of the region, plantation societies, piracy, and cultural contacts between the native peoples of region and Europeans will be covered. Students will examine primary documents and work with a mapping tool to gain insights of the region's broader history in the Atlantic world as well as the similarities and differences of the British, French, and Spanish Caribbean. This course was previously HIS-244224 Caribbean: Cruises.
Attributes: Other World Civilization Gn Ed, Liberal

HIST 3142 1970s America (4 Credits)
This course explores American history and culture during the critical decade of the 1970s. The student will read and view a variety of works (textual and cinematic) through which they will learn about important economic, political, social, and cultural events, individuals, debates, and developments in the 1970s. Themes discussed throughout the course may include but are not limited to: the fate of liberalism in post-1960s America, the rise of ethnic identity and its impact on the rights revolution, gender and the politics of sexuality, religion and the rise of the South, Nixon and Watergate, Carter and political malaise, urban decay, environmentalism, and encounters with terrorism.
Attributes: American History Gen Ed, Liberal

HIST 3147 Tourism Cars & Geography-Marketing America (4 Credits)
The period between 1880 and 1940 is characterized by the escalation of national tourism. This occurrence was dependent upon the continual development of communication networks and transportation systems across the American landscape. It resulted in tourism emerging as a form of geographical consumption. Students will examine the growth of the tourist industry, which centered on the various sights and scenes of the American landscape, as well as the individuals, agencies, and corporations that advocated tourism as one's patriotic duty, or as an individual's right in relation to American citizenship. James Agee in Fortune noted that the automobile was "the opium of the American people," and went on to describe the American roadside by 1934 as "incomparably the most hugely extensive market the human race has ever set up to tease and tempt and take money from the human race."
Attributes: Liberal

HIST 3152 History of Social Welfare in the US: Advanced (4 Credits)
This course examines the development of, and debates about, U.S. social welfare institutions and policies. In particular, this course examines how social welfare philosophy, mission, and practice evolved from its original altruistic and voluntary roots to become professionalized and identified with casework rather than social reform. Topics of this study include: the origins and inspirations of social welfare programs and philosophy in the United States; the impact of the Civil War; the "Scientific Charity" Movement; the history and evolution of Child Welfare policy; the Settlement House Movement; the Great Depression and the origins and evolution of Social Security Policy; the Johnson Administration's Great Society programs and War on Poverty; Welfare to Workfare in the 1970s; the state of social welfare in the USA today. This course combines critical reading, writing, and discussion to illuminate the elements of evidence, values, and interpretation in the study of social welfare history and to fulfill guidelines for the Historical Studies Area of Study. This study can provide Historical Perspectives for Community and Human Services degrees and Historical and Comparative Perspectives for Public Affairs degrees. It also includes coverage of the basic narrative of American history from the 1800s to the present, knowledge of U.S. government and private philanthropies and how their policies and practices have impacted the quality of life for diverse population groups, and how the U.S. social welfare practices compared and contrasted to Western European welfare practices.
Attributes: American History Gen Ed, *US History & Civ Engmt Gen Ed, Liberal

HIST 3157 Women and Rural America (4 Credits)
The groundswell of support that President Trump gained in the 2016 presidential election from voters residing in rural areas caught the nation by surprise. Since then, scholars, popular commentators and others have been looking at issues of race, economics, religion and gender in efforts to understand better not only the history and current socio-economics of rural and deindustrialized parts of the United States but also the role of women. Women both contributed to Trump's popularity and formed significant coalitions in protest of the president's racial, anti-immigrant and anti-feminist politics. This study uses a set of contemporary texts as a basis for delving into historic moments of the mid-20th through early 21st century that have contributed to shaping a rural American identity. Through readings and discussions – online and face-to-face – we use a feminist lens to analyze and critique texts that offer multiple perspectives. In doing so, we examine our own assumptions of rural America and the role that gender plays in shaping rural identities, perceptions, and critiques.
Attributes: Liberal

HIST 3158 Globalization: Business and Society in the Information Age (4 Credits)
Examine international trends and the nature of socio-technological change over the past 25 years. Develop skills to forecast current and future trends in business, employment, trade, capital and labor flows, human rights issues and politics.
Attributes: Liberal

HIST 3162 Public History and Popular Culture (4 Credits)
Popular culture increasingly includes references to historical figures, events, and commemorations. Often, those references actually take the much more focused form of biopics, miniseries, or popular works of fiction or non-fiction. This study will examine that trend, asking how it started, who is consuming these historical forms, and how accurate the history portrayed is. Lerning Objectives: 1. define and explain public history as a discipline and popular culture as a method of framing history. 2. analyze the manner in which popular culture demonstrates and uses history. 3. demonstrate the ability to use primary and secondary sources when investigating and writing history.
Attributes: Liberal

HIST 3165 Disease in History (4 Credits)
Sections under this title might include: History/Politics of Infectious Disease; Disease in History. This study will focus on the ways in which human history has been and continues to be shaped by the phenomenon of disease. Students will consider the range of diseases that plague humans, where they come from, how they became significant elements in human life, and how inquiry has enlarged our understanding of their history. Each section of the course will take a different approach to the history of disease. After consultation with their advisor, students may complete more than one of the sections listed under this title.
Attributes: Western Civilization Gen Ed, *World Hist & Glb Awnss Gen Ed, Liberal

HIST 3167 New York's Canals: A Natural History (2 Credits)
This course, which may be taken in conjunction with other sections of "New York's Canals," will focus on the natural history of the canal system. Students will be expected to participate in on-site sessions to learn more about the canal systems, their role in New York's natural history, and the changes they wrought in the natural world.
Attributes: Liberal

HIST 3172 New York's Canals: Museums in Action (2 Credits)
his course, which may be taken in conjunction with other sections of "New York's Canals," will focus on the preservation and exhibition of the canal system. Students will be expected to participate in on-site sessions to learn more about the canal systems, their role in New York's heritage preservation movements, their role as exhibition objects, and their function as a centralizing force in exhibition and fundraising efforts.
Attributes: Liberal

HIST 3173 The Early American Republic: 1789-1815 (4 Credits)
The student will explore the history of the early American Republic from 1789-1815. The student will gain a better understanding of the major political, intellectual, social, economic, and cultural trends of the tumultuous early years of the American Republic after the Constitution through the end of the War of 1812. Issues of particular focus will include: slavery, the development of government institutions and political parties, and American foreign policy.
Attributes: Liberal

HIST 3175 Education & Interpretation in Museums (4 Credits)
This study presents an aspect within the growing field of Public History - the Museum Educator. Museum education has expanded from a limited focus on teaching school-aged children to a wide range of activities that fosters community, addresses social issues, and provides educational programming to a diverse audience within museums and galleries of all subjects - history, art, cultural history, science, etc. Museum educators direct education departments, create museum/web-based programs and learning resources, collaborate with exhibition development teams, and work with various community groups.
Attributes: Liberal

HIST 3177 New York's Canals: Geology in Action (2 Credits)
This course, which may be taken in conjunction with other sections of "New York's Canals," will focus on the geology of and surrounding the canal system. Students will be expected to participate in on-site sessions to learn more about the canal systems, their geology surrounding them, the changes to geology brought about by their creation, and their function as a major force in the geology of New York State.
Attributes: Liberal

HIST 3180 Enlightenment: Advanced Research (4 Credits)
Students will examine the intellectual and political movement known as the Enlightenment. They will gain a broad understanding of the period, with a particular focus on the ideas generated by Enlightenment thinkers like John Locke, Rousseau, Montesquieu, Voltaire, Hume, among many others. Students will also examine the social and political impact these ideas had on Europe and the West during that period. They will discuss such issues as human rights, civil liberties, religious toleration, social justice, the role of government and the relationship between the citizen and the state, among others. Prerequisites: An introductory course in European history is strongly recommended.
Attributes: Liberal

HIST 3182 New York's Canals: Economics in Action (2 Credits)
This course, which may be taken in conjunction with other sections of "New York's Canals," will focus on the economy of the canal systems. Students will be expected to participate in on-site sessions to learn more about the canal systems, the economic considerations that went into creating and developing them, and the long-term economic ramifications of the canals.
Attributes: Liberal

HIST 3185 Exploring Place History: Advanced (4 Credits)
This advanced level research course gives students an opportunity to propose and carry out a semester long, self-directed, in-depth research agenda. The focus of the research is on place as a community in a geographical location or physical environment. Students can explore the local history of the place where they live (or some other place of interest and research, among other things, a particular topic or period of local history by engaging with historical scholarship, consulting local archives and historical societies and/or interviewing community members who have witnessed local history. Students also will collaborate with others interested in history, the arts, and culture to learn concepts for thinking about place as process, a coming together of nature and culture, the local and global and of issues ranging from gender, class, ethnicity and the environment to modernization, conservation, and preservation. This course was previously HIS-244774 Exploring Place: History.
Attributes: Liberal

HIST 3187 New York's Canals: Creative Responses through Time (2 Credits)
This course, which may be taken in conjunction with other sections of "New York's Canals," will focus on the responses of artists, musicians, and writers to the canal system or life in and around it. Students will be expected to participate in on-site sessions to see the canal systems.
Attributes: Liberal

HIST 3190 Fashion in U.S. History (4 Credits)
This study will survey the ways in which fashion in the United States has been shaped by major developments in American history. Beginning with the development of the textile industry, this course will place fashion and the fashion industry within social, cultural and economic frameworks, and will cover a variety of topics including: industrialization, immigration, 'becoming American', labor movements, gender and the women's movement, class differentiations, haute couture, consumer culture, and the influence of the entertainment industry and globalization on the American fashion, textile and apparel industries. This course was previously HIS-243194 Fashion in U.S. History.
Attributes: American History Gen Ed, *US History & Civ Engmt Gen Ed, Liberal

HIST 3192 American Sport History (4 Credits)
This course reviews the development of sport in America from 19th century interest in physical culture to late 20th century spectator sports as a defining feature of American life.
Attributes: Liberal

HIST 3195 Film and/in American History (4 Credits)
Students will study the film industry, films and audiences from the advent of motion pictures during the early twentieth century to the present. This course will consider the relationship between American History and film. Each section of the study will focus on a different component of that history. After discussion with their advisors, students may complete more than one of the sections listed under this title.
Attributes: American History Gen Ed, *US History & Civ Engmt Gen Ed, Liberal

HIST 3197 History of Hiking (4 Credits)
In the United States, the pursuit of walking in wilderness areas and of outdoor recreation has roots in forestry and farming and was often a response to industrialization. However, the use of the wilderness for recreation and hiking has not included all Americans. In this course, we will consider both the leaders in guiding, trail blazing, developing equipment, and organizing groups to advocate for the pursuit of hiking, the interests of hikers, and wildness preservation AND the groups—especially BIPOC, differently abled, and those without the material wealth to pursue wilderness exploration—who have long been excluded from this history.
Attributes: American History Gen Ed, *US History & Civ Engmt Gen Ed, Liberal

HIST 3200 Food in American History (4 Credits)
This course explores the American diet from Native American cultures prior to European contact to the present. Students will consider topics like the ways that Americans gather food and cook, the impact of technology on diet and food preservation, environmental issues, gender, the ecology of commodity chains, reform movements, ethnic diets, food surpluses and famines, cooking traditions and innovations, and the emergence of restaurants, supermarkets, fast food.
Attributes: American History Gen Ed, *US History & Civ Engmt Gen Ed, Liberal

HIST 3202 Early Medieval Europe (4 Credits)
This study provides a broad historical inquiry into European history between 500-1000 CE. The course considers the successor states to the Roman Empire in Western Europe. It will also chart the growth and development of the Early Medieval Christian Church. The course will also investigate the roles and contributions of marginalized people such as women, Jews, and non-Europeans. This study satisfies the general education requirement for Western Civilization through its broad-based discussion of the distinctive features of the history, institutions, society, culture, and religion of Europe during the early medieval period. This study meets the Historical Studies Area of Study Guidelines that demonstrates an understanding of historical processes and events that have shaped social change and contemporary human problems. History of Early Medieval Europe also meets the guideline for developing research skills and knowledge of forms of citation shared by professional historians.

HIST 3205 Food & Drink in Medieval Europe (2 Credits)
What did people really eat in the Middle Ages? This study will explore the production, preparation, regulation and consumption of medieval food and drink. It will also explore the role of food in relation to social status and the role of food in medieval culture. This study addresses the Historical Studies Area of Study Guidelines relating to research skills, including a basic understanding of how to use libraries, archives, databases and other internet resources. It also addresses the guideline addressing an understanding of history as creative art, a subjective discipline and an imaginative interpretation of the past. Prerequisites: A previous course in Western Civilization or World History is strongly recommended but not required.

HIST 3210 Genealogy: Advanced (4 Credits)
This course provides students an opportunity to research their family's history and to place their family within the broader context of American History. Because no two students come from the same families, the assignments and topics covered will vary widely, depending upon the student's family background. Topics may include slavery, immigration, legal policy and laws concerning immigration, miscegenation laws and many other things. Most importantly, students will consider historical events surrounding their family's history.

HIST 3212 Age of Reagan (4 Credits)
The purpose of this study is to give the student the opportunity to examine in depth U.S. Twentieth Century History from the beginning of the Conservative Ascendancy in 1964 until the end of the Century. As historians of the Early National Period have dubbed the era from 1824-1848 the Age of Jackson after the most significant President of the era, Andrew Jackson, so Historians Sean Willentz and Steven Hayward have described this era as the Age of Reagan after the President who symbolized the Conservative Ascendancy and its values.

HIST 3215 Generals of the American Civil War (4 Credits)
This study will investigate in depth the generalship of some of the more important Generals during the American Civil War, and the impact of Northern and Southern generalship on the Confederacy's defeat. As a highly advanced independent reading and research study, it can serve as a capstone study for students who are interested in designing a concentration in Military History or American History. Generals of the Civil War is offered in conjunction with the Civil War History Residency. Prerequisites: Prior advanced level coursework on the American Civil War, era of Reconstruction, and/or American military history. This study is part the American Civil War History Residency, which includes a three-day bus chartered field trip to Antietam National Battlefield Park (Sharpsburg, MD) and Gettysburg National Battlefield Park (Gettysburg, PA). During this trip, students will tour the 2 battlefields while listening to classmates give their presentations at each of the assigned spots on the tour and participate with other students in evening discussions. Attendance at the residency is required. Course Objectives: Upon successful completion of this course, students will be able to: · Identify and explain the historical significance of important events, actions, individuals, and concepts related to the History Generalship during the Civil War such as Concentration in time vs. space, Interior Lines, Total War, Conciliatory War, etc. · Demonstrate an understanding of some of the various theories of Civil War Generalship, such as those proposed by T. Harry Williams, J.F.C. Fuller, Sir Basil Liddell-Hart, by identifying the various principles and elements of those theories. · Demonstrate the ability to critically read historical literature, by identifying the main thesis of an article, or book, the major evidence and arguments used by an author in support of his/her thesis, and finally to use rules of logic and evidence to critically analyze the author's arguments and evaluate his/her evidence. · Demonstrate a mastery of the methods that historians use to construct historical theories about the past; knowledge of the skills and methods used by historians to research and investigate the past.
